Subject: Password Management Tools

Date: March 9, 2023

We are aware that certain governments use password management tools to assist in the conduct of their daily functions. Recently we have become aware of a security incident involving one of those password management tools, LastPass (see link below). We are bringing this matter to your attention so auditors can consider whether there are any such "IT risks" that have impacted your audits and assess whether any risk mitigation steps have been taken if such security incidents have been encountered.
