State of Ohio *Comprehensive Annual Financial Report*

NOTE:

The State of Ohio *Comprehensive Annual Financial Report* for fiscal year ended June 30, 2015, including the Independent Auditor's Report, has been issued under separate cover by the Ohio Office of Budget and Management. This report is included as an attachment herein and can also be viewed at the following website: <http://obm.ohio.gov/>

EXECUTIVE SUMMARY 2015 STATE OF OHIO SINGLE AUDIT

AUDIT OF BASIC FINANCIAL STATEMENTS

There are 10 separate opinion units included in the basic financial statements of the State of Ohio for the state fiscal year (FY) ended June 30, 2015. For five of the 10 opinion units, our opinion was based, in whole or in part, on audits performed by independent accounting firms under contract with the Auditor of State. The remaining five opinion unit audits were performed by audit staff of the Auditor of State. This information is described on page 1 in our Independent Auditor's Report included in the CAFR.

We audited the basic financial statements of the State of Ohio as of and for the period ended June 30, 2015, following auditing standards generally accepted in the United States of America and the financial audit standards in the Comptroller General of the United States' *Government Auditing Standards*, and the provisions of the U.S. Office of Management and Budget (OMB) Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. The objective of our audit was to express our opinion concerning whether the financial statements present fairly, in all material respects, the respective financial position of the State of Ohio, and cash flows thereof and the respective budgetary comparisons, in accordance with accounting principles generally accepted in the United States of America. We issued unqualified opinions on the 10 opinion units. Our opinion letter, dated December 22, 2015, was provided to the Office of Budget and Management who released it, along with the CAFR, under separate cover. The State of Ohio CAFR is included as an attachment to this report.

In addition to our opinions on the basic financial statements, we issued an Independent Auditor's Report on Internal Control over Financial Reporting and on Compliance and Other Matters Required by *Government Auditing Standards*. There were two material weaknesses, but no noncompliance or significant deficiencies, required to be reported in this letter for the fiscal year ended June 30, 2015.

We also identified one finding for recovery that will be included in this document, but which did not have an impact on our Independent Auditor's Report on Internal Control over Financial Reporting and on Compliance and Other Matters Required by *Government Auditing Standards* or on the *Independent Auditor's Report on Compliance with Requirements Applicable to Each Major Federal Program and on Internal Control Over Compliance Required by OMB Circular A-133*, discussed below.

AUDIT RESPONSIBILITIES AND REPORTING UNDER OMB CIRCULAR A-133

The Single Audit Act requires an annual audit of the State's federal financial assistance programs. The specific audit and reporting requirements utilized for the June 30, 2015 audit are set forth in U.S. Office of Management and Budget Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. The federal government has also issued the new federal SuperCircular, also known as Uniform Guidance. The purpose of the new requirements is to help reduce the administrative burden and strengthen oversight of federal funds to reduce the risk of fraud, waste, and abuse. This guidance makes grant requirements similar across all types of grant recipients and all federal agencies and aims to eliminate duplicative language, and to clarify where grant policies are different across entity types. The *Administrative Requirements and Cost Principles* portion of the changes apply to new awards and to additional funding to existing awards (funding increments) made after December 26, 2014. Existing federal awards continued to be governed by the terms and conditions of the federal award. Therefore, these changes did not have a significant impact on our FY 2015 testing, but are expected to be applicable for the June 30, 2016 audit, along with changes related to *Audit Requirements*.

The Schedule of Expenditures of Federal Awards (the Schedule) reports federal expenditures for each federal financial assistance program by federal agency, as identified by the Catalog of Federal Domestic Assistance (CFDA) number. As detailed on pages 9 through 20, the State administered 339 federal programs from 23 Federal agencies with total federal expenditures of \$26.6 billion in fiscal year 2015.

State of Ohio
Fiscal Year 2015 State Single Audit
Executive Summary

Of the \$26.6 billion, the State disbursed \$71.4 million in funding related to the American Recovery and Reinvestment Act (ARRA) of 2009. This compares to \$519 million of ARRA funds disbursed in FY 2014, \$1 billion disbursed in FY 2013, and \$1.6 billion disbursed in FY 2012.

The Schedule is used for identifying Type A and Type B programs. For fiscal year 2015, Type A federal programs for the State of Ohio were those programs with annual federal expenditures exceeding \$39.9 million. There were 30 programs at or above this amount. Type B programs were those programs with annual federal expenditures exceeding \$8.0 million, but less than \$39.9 million. There were 30 programs meeting the criteria for Type B programs. The identification of Type A and B programs is utilized for determining which federal programs will be tested in detail for compliance with federal laws and regulations. Under OMB Circular A-133, the auditor uses a risk-based approach to testing. Once programs are classified as Type A or B, they are then assessed as either high or low risk programs. All high-risk Type A programs are considered major programs and are tested in detail for compliance with federal regulations. Low-risk Type A programs must be tested at least once every three years. One high-risk Type B program is then selected for testing to replace each low-risk Type A program not required to be tested. The State of Ohio Single Audit included the testing of 25 Type A programs and five high-risk Type B programs as major programs in fiscal year 2015.

Included in the Schedule are monies paid by the Ohio Department of Job & Family Services and the Ohio Department of Medicaid to their subrecipient county agencies to administer applicable portions of the Medicaid Cluster, Children's Health Insurance Program (CHIP), Temporary Assistance for Needy Families (TANF), Foster Care, Adoption Assistance, Social Services Block Grant, Child Care Cluster, Child Support Enforcement, and Supplemental Nutrition Assistance Program (SNAP) federal programs. The related county federal schedules will report expenditures for all disbursements made at the county level. However, for the Medicaid, CHIP, TANF (Ohio Works First portion), Adoption Assistance, CCDF Cluster, and SNAP federal programs, the counties performed limited functions and maintained case records to support benefits paid by the Ohio Department of Job & Family Services and the Ohio Department of Medicaid related to these programs. We selected five of 88 counties and performed testing related to the specific county level activities for these six major programs. The results of our county level audit procedures are included in the Schedule of Findings and Questioned Costs.

The State's colleges and universities' federal financial assistance, which was approximately \$3.4 billion in fiscal year 2015, is excluded from the State's Schedule although their financial activities are included in the State's financial statements (Discretely Presented Component Units). The State's colleges and universities included in the State's reporting entity are subject to separate audits under OMB Circular A-133.

In accordance with A-133, we issued an *Independent Auditor's Report on Compliance with Requirements Applicable to Each Major Federal Program and on Internal Control Over Compliance Required by OMB Circular A-133*. Our report on compliance includes our opinion on compliance with the 30 major federal financial assistance programs and describes instances of noncompliance with Federal requirements we detected that require reporting per Circular A-133. This report also describes any material weaknesses or significant deficiencies we identified related to controls used to administer Federal financial assistance programs. Due to the significance of eight of our audit findings, we qualified our opinion on compliance related to Cash Management applicable to the Low-Income Home Energy Assistance, Medicaid Cluster, and Children's Health Insurance Program major federal programs; Eligibility applicable to the Special Education Cluster, Improving Teacher Quality State Grants, and CCDF Cluster major federal programs; Reporting applicable to the Child Support Enforcement and Foster Care major federal program; and Special Tests and Provisions applicable to the Special Education Cluster and CCDF Cluster major federal programs.

SUMMARY OF FINDINGS AND QUESTIONED COSTS

The fiscal year 2015 Schedule of Findings and Questioned Costs contains 34 findings; two related to the Independent Auditor's Report on Internal Control over Financial Reporting and on Compliance and Other Matters Required by *Government Auditing Standards*, 31 related to the *Independent Auditor's Report on Compliance with Requirements Applicable to Each Major Federal Program and on Internal Control Over Compliance Required by OMB Circular A-133*, of which 16 were repeated from the fiscal year 2014 State of Ohio Single Audit, and one other item related to a finding for recovery.

The 31 A-133 findings, beginning on page 41, relate to the federal programs at 10 state agencies. Of these federal findings, many of which were rated as more than one type, six resulted in questioned costs (some also included control deficiencies), 14 were noncompliance (some also included control deficiencies), 24 were identified as material weaknesses, and seven were significant deficiencies. Of the six findings with questioned costs, five questioned amounts totaling approximately \$8,024,200. Amounts could not be determined for one questioned cost finding.

The schedule below identifies the number of reportable items included in the State of Ohio Single Audit, by state agency, for fiscal year 2010 through 2015.

State Agency	2015	2014	2013	2012	2011	2010
Ohio Department. of Job & Family Services <small>Note 1</small>	12	9	16	20	28	27
Ohio Department of Medicaid <small>Note 1</small>	3	8	<small>Note 1</small>	<small>Note 1</small>	<small>Note 1</small>	<small>Note 1</small>
Ohio Department of Education	10	5	1	4	7	2
Ohio Department of Health	0	0	0	1	4	7
Ohio Development Services Agency <small>Note 2</small>	1	2	4	1	4	1
Ohio Department of Developmental Disabilities	1	2	1	0	2	1
Ohio Department of Mental Health & Addiction Services <small>Note 3</small>	1	3	3	3	5	4
Opportunities for Ohioans with Disabilities <small>Note 4</small>	0	0	1	2	2	0
Ohio Department of Public Safety	0	2	2	3	1	0
Ohio Office of Budget and Management	2	1	1	0	1	0
Ohio Administrative Knowledge System	0	0	0	0	1	1
Ohio Department of Transportation	1	1	1	1	1	0
Ohio Environmental Protection Agency	1	2	2	2	1	0
Other State Agencies	2	0	1	0	2	1
Total	34	35	33	37	59	44

Note 1 – the Ohio Department of Medicaid was newly created in 2014. In prior years, this activity was included as part of the Ohio Department of Job & Family Services.

Note 2 – name changed in 2013; formerly Ohio Department of Development.

Note 3 – in 2014, the Ohio Department of Mental Health and the Ohio Department of Alcohol & Addiction Services merged into one agency. The prior years' comments represent the count for both agencies.

Note 4 – name changed in 2014; formerly Ohio Rehabilitation Services Commission.

In addition to the comments included in this report, the State of Ohio and each state agency may receive a management letter which would include internal control and compliance deficiencies that do not rise to the level required for inclusion in this report. Those management letters are not part of this report.

**INDEPENDENT AUDITOR'S
REPORTS ON COMPLIANCE
AND INTERNAL CONTROLS**

Dave Yost • Auditor of State

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS REQUIRED BY GOVERNMENT AUDITING STANDARDS

The Honorable John Kasich, Governor
State of Ohio
Columbus, Ohio

We have audited, in accordance with auditing standards generally accepted in the United States and the Comptroller General of the United States' *Government Auditing Standards*, the financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Ohio (the State) as of and for the year ended June 30, 2015, and the related notes to the financial statements, which collectively comprise the State's basic financial statements and have issued our report thereon dated December 22, 2015. Our report refers to other auditors who audited the financial statements of the following organizations, as described in our report on the State's financial statements:

Opinion Unit	Organization	Percent of Opinion Unit's Total	
		Assets	Expenditures /Expenses /Deductions
Governmental Activities	Treasurer of State Lease Rental Special Obligations	0%	1%
Business-Type Activities (BTA)	Ohio Bureau of Workers' Compensation; and Tuition Trust Authority	94%	40%
BTA / Workers' Compensation	Ohio Bureau of Workers' Compensation	100%	100%
Aggregate Discretely Presented Component Units	Bowling Green State University; Central State University; Cleveland State University; Columbus State Community College; JobsOhio; Kent State University; Miami University; Ohio State University; Ohio University; Shawnee State University; University of Akron; University of Cincinnati; University of Toledo; Wright State University; and Youngstown State University.	88%	91%
Aggregate Remaining Fund Information	Police and Fire Pension Fund, Public Employees Retirement System, School Employees Retirement, State Highway Patrol Retirement System, State Teachers Retirement System, State Treasury Asset Reserve of Ohio, Treasurer of State Lease Rental Special Obligations, Tuition Trust Authority, and Variable College Savings Plan.	97%	83%

This report does not include the results of the other auditors' testing of internal control over financial reporting or compliance and other matters that those auditors separately reported. In addition, the financial statements of JobsOhio, which represents six percent of the total assets and seven percent of the total expenses of the aggregate discretely presented component units, were not audited in accordance with *Government Auditing Standards*.

Internal Control Over Financial Reporting

As part of our financial statement audit, we considered the State's internal control over financial reporting (internal control) to determine the audit procedures appropriate in the circumstances to the extent necessary to support our opinions on the financial statements, but not to the extent necessary to opine on the effectiveness of the State's internal control. Accordingly, we have not opined on it.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, when performing their assigned functions, to prevent, or detect and timely correct misstatements. A *material weakness* is a deficiency, or combination of internal control deficiencies resulting in a reasonable possibility that internal control will not prevent or detect and timely correct a material misstatement of the State's financial statements. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all internal control deficiencies that might be material weaknesses or significant deficiencies. Therefore, unidentified material weaknesses or significant deficiencies may exist. We did identify certain deficiencies in internal control, described in the accompanying schedule of findings and questioned costs, that we consider material weaknesses. We consider findings 2015-001 and 2015-002 to be material weaknesses.

Compliance and Other Matters

As part of reasonably assuring whether the State's financial statements are free of material misstatement, we tested its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could directly and materially affect the determination of financial statement amounts. However, opining on compliance with those provisions was not an objective of our audit and accordingly, we do not express an opinion. The results of our tests disclosed no instances of noncompliance or other matters we must report under *Government Auditing Standards*.

Entity's Response to Findings

The State's responses to the findings identified in our audit are described in the accompanying schedule of findings and questioned costs. We did not audit the State's responses and, accordingly, we express no opinion on them.

Purpose of this Report

This report only describes the scope of our internal control and compliance testing and our testing results, and does not opine on the effectiveness of the State's internal control or on compliance. This report is an integral part of an audit performed under *Government Auditing Standards* in considering the State's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

Dave Yost
Auditor of State
Columbus, Ohio

December 22, 2015

Dave Yost • Auditor of State

INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE WITH REQUIREMENTS APPLICABLE TO EACH MAJOR FEDERAL PROGRAM AND ON INTERNAL CONTROL OVER COMPLIANCE REQUIRED BY OMB CIRCULAR A-133

The Honorable John Kasich, Governor
State of Ohio
Columbus, Ohio

Report on Compliance for Each Major Federal Program

We have audited the State of Ohio's (the State) compliance with the applicable requirements described in the U.S. Office of Management and Budget (OMB) *Circular A-133, Compliance Supplement* that could directly and materially affect each of the State's major federal programs for the year ended June 30, 2015. The *Summary of Auditors' Results* in the accompanying schedule of findings and questioned costs identifies the State's major federal programs.

Management's Responsibility

The State's Management is responsible for complying with the requirements of laws, regulations, contracts, and grants applicable to its federal programs.

Auditor's Responsibility

Our responsibility is to opine on the State's compliance for each of the State's major federal programs based on our audit of the applicable compliance requirements referred to above. Our compliance audit followed auditing standards generally accepted in the United States of America; the standards for financial audits included in the Comptroller General of the United States' *Government Auditing Standards*; and OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. These standards and OMB Circular A-133 require us to plan and perform the audit to reasonably assure whether noncompliance with the applicable compliance requirements referred to above that could directly and materially affect a major federal program occurred. An audit includes examining, on a test basis, evidence about the State's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances.

We believe our audit provides a reasonable basis for our compliance opinion on the State's major programs. However, our audit does not provide a legal determination of the State's compliance.

The State of Ohio's basic financial statements include the operations of State Colleges and Universities, which received approximately \$3.4 billion in federal awards which is not included in the State of Ohio's Schedule of Expenditures of Federal Awards by Federal Agency for the year ended June 30, 2015. Our audit of Federal awards, described below, did not include the operations of State Colleges and Universities because the component units engaged other auditors to audit their Federal award programs in accordance with OMB Circular A-133.

Basis for Qualified Opinion on the Major Federal Programs Listed in the Table

As identified in the findings listed in the table below, identified in the summary of findings and questioned costs on pages 36 and 37, and described in the accompanying schedule of findings and questioned costs, the State of Ohio did not comply with requirements regarding the following:

CFDA #	Program (or Cluster) Name	Finding #	State Agency	Compliance Requirement
84.027/84.173	Special Education Cluster	2015-008	Ohio Department of Education	Eligibility
84.027/84.173	Special Education Cluster	2015-008	Ohio Department of Education	Special Tests & Provisions – Access to Federal Funds for New or Significantly Expanded Charter Schools
84.367	Improving Teacher Quality State Grants	2015-007	Ohio Department of Education	Eligibility
93.568	Low-Income Home Energy Assistance	2015-005	Ohio Development Services Agency	Cash Management
93.575/93.596	CCDF Cluster	2015-020	Ohio Department of Job & Family Services	Eligibility
93.575/93.596	CCDF Cluster	2015-023 through 2015-025	Ohio Department of Job & Family Services	Special Tests & Provisions - Health & Safety Requirements
93.563	Child Support Enforcement	2015-026	Ohio Department of Job & Family Services	Reporting
93.658	Foster Care	2015-026	Ohio Department of Job & Family Services	Reporting
93.775/93.777/93.778	Medicaid Cluster	2015-030	Ohio Department of Medicaid	Cash Management
93.767	Children's Health Insurance Program	2015-030	Ohio Department of Medicaid	Cash Management

Compliance with these requirements is necessary, in our opinion, for the State to comply with the requirements applicable to each of these programs.

Qualified Opinion on Major Federal Programs

In our opinion, except for the noncompliance described for the major federal programs and compliance requirements identified in the *Basis for Qualified Opinion on the Major Federal Programs Listed in the Table* paragraph, the State of Ohio complied, in all material respects, with the requirements referred to above that could directly and materially affect the Special Education Cluster, Improving Teacher Quality State Grants, Low-Income Home Energy Assistance, CCDF Cluster, Child Support Enforcement, Foster Care, Medicaid Cluster, and Children's Health Insurance Program major federal programs for the year ended June 30, 2015.

Unmodified Opinion on Each of the Other Major Federal Programs

In our opinion, the State of Ohio complied in all material respects with the requirements referred to above that could directly and materially affect each of its other major federal programs identified in the *Summary of Auditor's Results* section of the accompanying schedule of findings and questioned costs for the year ended June 30, 2015.

Other Matters

The results of our auditing procedures also disclosed other instances of noncompliance which OMB Circular A-133 requires us to report. These instances of noncompliance are listed in the table below, identified in the summary of findings and questioned costs on pages 36 and 37, and described in the accompanying schedule of findings and questioned costs. These findings did not require us to modify our compliance opinion on each major federal program.

State Agency	Noncompliance Finding Numbers
Ohio Department of Education	2015-009 through 2015-011
Ohio Department of Job & Family Services	2015-018, 2015-019, 2015-021, 2015-022, 2015-026, and 2015-027
Ohio Department of Medicaid	2015-029 and 2015-030
Ohio Department of Mental Health & Addiction Services	2015-032

The State's responses to our noncompliance findings are described in the accompanying Corrective Action Plan. We did not audit the State's responses and, accordingly, we express no opinion on them.

Report on Internal Control over Compliance

The State's management is responsible for establishing and maintaining effective internal control over compliance with the applicable compliance requirements referred to above. In planning and performing our compliance audit, we considered the State's internal control over compliance with the applicable requirements that could directly and materially affect a major federal program, to determine our auditing procedures appropriate for opining on each major federal program's compliance and to test and report on internal control over compliance in accordance with OMB Circular A-133, but not to the extent needed to opine on the effectiveness of internal control over compliance. Accordingly, we have not opined on the effectiveness of the State's internal control over compliance.

Our consideration of internal control over compliance was for the limited purpose described in the preceding paragraph and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies. Therefore, we cannot assure we have identified all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies. However, as discussed below, we identified certain deficiencies in internal control over compliance that we consider to be material weaknesses and other deficiencies we consider to be significant deficiencies.

A deficiency in internal control over compliance exists when the design or operation of a control over compliance does not allow management or employees, when performing their assigned functions, to prevent, or to timely detect and correct, noncompliance with a federal program's applicable compliance requirement. *A material weakness in internal control over compliance* is a deficiency, or combination of deficiencies in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a federal program's compliance requirement will not be prevented, or timely detected and corrected.

We consider the deficiencies in internal control over compliance listed in the table below, identified in the summary of findings and questioned costs on pages 36 and 37, and described in the accompanying schedule of findings and questioned costs to be material weaknesses.

State Agency	Material Weakness Finding Numbers
Ohio Office of Budget & Management	2015-004
Ohio Development Services Agency	2015-005
Ohio Department of Developmental Disabilities	2016-006
Ohio Department of Education	2015-007 through 2015-010, and 2015-012 through 2015-015
Ohio Environmental Protection Agency	2015-017
Ohio Department of Job & Family Services	2015-020 through 2015-026
Ohio Department of Medicaid	2015-030 and 2015-031
Ohio Department of Mental Health & Addiction Services	2015-032
Ohio Department of Transportation	2015-033
Ohio Department of Veteran Services	2015-034

A *significant deficiency in internal control over compliance* is a deficiency or a combination of deficiencies in internal control over compliance with a federal program's applicable compliance requirement that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance. We consider the deficiencies in internal control over compliance listed in the table below, identified in the summary of findings and questioned costs on pages 36 and 37, and described in the accompanying schedule of findings and questioned costs to be significant deficiencies.

State Agency	Significant Deficiency Finding Numbers
Ohio Development Education	2015-011 and 2015-016
Ohio Department of Job & Family Services	2015-022, 2015-027, and 2015-028
Ohio Department of Medicaid	2015-029 and 2015-030

The State's responses to our findings on internal control over compliance are described in the accompanying Corrective Action Plan. We did not audit the State's responses and, accordingly, we express no opinion on them.

In addition, the State of Ohio's Schedule of Prior Audit Findings and Questioned Costs includes information about the status of comments subsequent to June 30, 2015, which we did not audit and, accordingly, express no opinion on.

This report only describes the scope of our tests of internal control over compliance and the results of this testing based on OMB Circular A-133 requirements. Accordingly, this report is not suitable for any other purpose.

Report on Federal Awards Expenditures Schedules Required by OMB Circular A-133

We have also audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Ohio, as of and for the year ended June 30, 2015, and the related notes to the financial statements, which collectively comprise the State's basic financial statements. We issued our unmodified report thereon dated December 22, 2015. Our opinion also explained that the State of Ohio adopted the provisions of Governmental Accounting Standards No. 67, *Financial Reporting for Pension Plans*, Statement No. 68, *Accounting and Financial Reporting for Pensions – an amendment of GASB Statement No. 27* and Statement No. 71, *Pension Transition for Contributions Made Subsequent to the Measurement Date* during the year. We conducted our audit to opine on the State's basic financial statements. We have not performed any procedures with respect to the audited financial statements subsequent to December 22, 2015. The accompanying Supplementary Schedule of Expenditures of Federal Awards by Federal Agency and Supplementary Schedule of Expenditures of Federal Awards by Federal Agency and Federal Program (schedules) present additional analysis required by the U.S. Office of Management and Budget Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations* and are not a required part of the basic financial statements. The schedules are management's responsibility, and were derived from and relate directly to the underlying accounting and other records management used to prepare the basic financial statements. We subjected these schedules to the auditing procedures we applied to the basic financial statements. We also applied certain additional procedures, including comparing and reconciling these schedules directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, in accordance with auditing standards generally accepted in the United States of America. In our opinion, these schedules are fairly stated, in all material respects, in relation to the basic financial statements taken as a whole.

- (a) These programs are a part of the Research and Development Cluster, as defined by OMB Circular A-133. See Note 4 to the Supplementary Schedule of Expenditures of Federal Awards.
- (b) This cluster encompasses the U.S. Department of Transportation's federal programs CFDA# 20.205 and CFDA# 20.219 and the U.S. Appalachian Regional Commission's federal program CFDA# 23.003. In accordance with OMB Circular A-133, CFDA# 23.003 has been included as part of the U.S. Department of Transportation's programs and excluded from the U.S. Appalachian Regional Commission's programs.
- (c) These programs receive non-cash assistance, as defined by OMB Circular A-133. See Note 2 to the Supplementary Schedule Awards of Expenditures of Federal Awards.

**STATE OF OHIO
NOTES TO THE SUPPLEMENTARY SCHEDULE
OF EXPENDITURES OF FEDERAL AWARDS
FOR THE YEAR ENDED JUNE 30, 2015**

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

A. Basis of Presentation

The Office of Management and Budget (OMB) Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*, revised June 27, 2003, requires a Supplementary Schedule of Expenditures of Federal Awards (Supplementary Schedule). The State of Ohio reports this information using the following presentations:

- Supplementary Schedule of Expenditures of Federal Awards Summarized by Federal Agency
- Supplementary Schedule of Expenditures of Federal Awards by Federal Agency and Federal Program

1. Federal Financial Assistance

The Supplementary Schedules report the federal financial assistance for the State of Ohio. Federal financial assistance is defined by Circular A-133 as assistance that non-Federal entities receive or administer in the form of grants, loans, loan guarantees, property (including donated surplus property), cooperative agreements, interest subsidies, insurance, food commodities, direct appropriations, and other assistance, but does not include amounts received as reimbursement for services rendered to individuals for Medicare and Medicaid.

2. Catalog of Federal Domestic Assistance

The *Catalog of Federal Domestic Assistance* (CFDA) is a government-wide compendium of individual federal financial assistance programs. Programs are assigned a five-digit program identification number (CFDA Number) and program name. The schedules report total disbursements for each federal financial assistance program, as listed in the CFDA. The State of Ohio reports each federal financial assistance program not officially assigned a CFDA number with a two-digit number that identifies the federal grantor agency number followed by a federal contract number, grant number, or 'UNKNOWN', when applicable.

3. Cluster of Programs

Closely related programs that share a common compliance requirement are considered a cluster of programs. OMB identifies those programs that comprise a program cluster. The Supplementary Schedules present federal financial assistance by cluster preceding individual programs. The Research and Development (R&D) Cluster is presented by Federal Agency and Federal Program within the Supplementary Schedule. Refer to NOTE 4 to see a consolidated view of the Federal Programs comprising the R&D Cluster.

B. Reporting Entity

The Supplementary Schedules include all federal programs the State of Ohio has administered for the fiscal year ended June 30, 2015. The State's financial reporting entity includes the primary government and its component units.

The State of Ohio's primary government includes all funds, account groups, elected officials, departments and agencies, bureaus, boards, commissions, and authorities that make up the State's legal entity. Component units, legally separate organizations for which the State's elected officials are financially accountable, also comprise, in part, the State's reporting entity. Additionally, other organizations for which the nature and significance of their relationship with the primary government are such that exclusion would cause the reporting entity's financial statements to be misleading or incomplete should be included in a government's financial reporting entity.

**STATE OF OHIO
 NOTES TO THE SUPPLEMENTARY SCHEDULE
 OF EXPENDITURES OF FEDERAL AWARDS
 FOR THE YEAR ENDED JUNE 30, 2015**

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Financial accountability is defined by GASB Statement No. 14, *The Financial Reporting Entity*, and amended by GASB Statement No. 61 *The Financial Reporting Entity: Omnibus*. The financial accountability of a primary government for a legally separate organization is set forth in two ways as follows:

- the primary government appoints the voting majority of the organization’s governing body, and the primary government is able to impose its will upon the component unit or there is a possibility that the component unit may provide specific financial benefits to, or impose specific financial burdens on, the primary government, or
- the component unit is fiscally dependent on the primary government and there is a potential for the organization to provide specific financial benefits to, or impose specific financial burdens on, the primary government.

The State has excluded federal financial assistance reported in the Discretely Presented Component Units from the Supplementary Schedules. The respective schedules of expenditures of federal awards for the following organizations, which constitute component units of the State since they impose or potentially impose financial burdens on the primary government, are subject to separate audits under OMB Circular A-133.

Discretely Presented Component Units:

State Universities:

- Bowling Green State University
- Central State University
- Cleveland State University
- Kent State University
- Miami University
- Northeast Ohio Medical University
- Ohio State University
- Ohio University
- Shawnee State University
- University of Akron
- University of Cincinnati
- University of Toledo
- Wright State University
- Youngstown State University

State Community Colleges:

- Cincinnati State Community College
- Clark State Community College
- Columbus State Community College
- Edison State Community College
- Northwest State Community College
- Owens State Community College
- Southern State Community College
- Terra State Community College
- Washington State Community College

Other Discretely Presented Component Units:

- Ohio Air Quality Development Authority
- Jobs Ohio
- Ohio Turnpike and Infrastructure Commission

C. Basis of Accounting

The State prepares the Supplementary Schedules on the cash basis of accounting; therefore, the State recognizes expenditures when paid rather than when it incurs obligations.

1. Direct Costs

Direct costs are those made for the benefit of one federal program and are allocable to that program. The State recognizes direct costs as disbursements in the Supplementary Schedules.

2. Indirect Costs

Indirect costs benefit more than one federal program and are not directly allocable to the programs receiving the benefits. The State recovers these costs from the federal government by applying federally approved indirect cost rates or by allocating the indirect costs among benefiting programs in accordance with federally approved plans. The State recognizes indirect costs as disbursements in the Supplementary Schedules.

**STATE OF OHIO
NOTES TO THE SUPPLEMENTARY SCHEDULE
OF EXPENDITURES OF FEDERAL AWARDS
FOR THE YEAR ENDED JUNE 30, 2015**

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

3. Intrastate Activity Elimination

The State excludes intrastate disbursements of federal moneys among State agencies to avoid the overstatement of federal financial assistance reported on the Supplementary Schedules.

NOTE 2 NON-CASH FEDERAL ASSISTANCE PROGRAMS

The State participated in several federal programs in which non-cash benefits are provided through the state to eligible program participants. These include:

- *National School Lunch Program (CFDA# 10.555)*

A portion of the federal assistance for this program represents the value of food the State distributes to subrecipients during the fiscal year. The U.S. Department of Agriculture assigns the prices at which the State values donated food commodities. The Supplementary Schedules include food commodity distributions of \$48,068,055. The outstanding inventory balance for food commodities as of June 30, 2015, is \$1,899,096.

- *Donation of Federal Surplus Personal Property (CFDA# 12.UNKNOWN)*

Federal assistance for this program represents the fair market value of donated federal surplus personal property the State distributes to subrecipients during the fiscal year. The State calculates fair value at 23.68 percent of the property's original costs, in conformity with guidelines the U.S. General Services Administration establishes in conjunction with the U.S. Department of Defense. The Supplementary Schedules include surplus property distributions of \$5,222,942.

- *Equitable Sharing Program (CFDA# 16.922)*

A portion of the federal assistance for this program represents the fair market value of the State's portion of seized and forfeited assets. The Supplementary Schedules include non-cash assistance in the form of seized and forfeited assets of \$16,175.

- *Donation of Federal Surplus Personal Property (CFDA# 39.003)*

Federal assistance for this program represents the fair market value of federal surplus personal property the State distributes to subrecipients during the fiscal year. The State calculates fair value at 23.68 percent of the property's original acquisition costs, in conformity with guidelines the U.S. General Services Administration establishes. The Supplementary Schedules include surplus property distributions of \$68,883.

- *Surveys, Studies, Research, Investigations, Demonstrations, and Special Purpose Activities Relating to the Clean Air Act (CFDA# 66.034)*

A portion of the federal assistance for this program represents the value of in-kind assistance the State used during the fiscal year. The U.S. Environmental Protection Agency determines the cost of the in-kind services and supplies provided to the State. The in-kind services and supplies are for speciation lab analysis of particulate matter in air sampling filters, the auditing of the air sampling monitors, and the supplying of filters for air monitors. The Supplementary Schedules include in-kind assistance, as of June 30, 2015, in the amount of \$610,930.

**STATE OF OHIO
 NOTES TO THE SUPPLEMENTARY SCHEDULE
 OF EXPENDITURES OF FEDERAL AWARDS
 FOR THE YEAR ENDED JUNE 30, 2015**

NOTE 2 NON-CASH FEDERAL ASSISTANCE PROGRAMS (Continued)

- *Water Pollution Control State, Interstate, and Tribal Program Support (CFDA# 66.419)*
 A portion of the federal assistance for this program represents the value of in-kind assistance the State used during the fiscal year. The U.S. Environmental Protection Agency determines the cost of the in-kind services and supplies provided to the State. The in-kind services are for sample collection and analysis to monitor Ohio sites as part of the National River and Stream Assessment. The Supplementary Schedules include in-kind assistance, as of June 30, 2015, in the amount of \$20,148.
- *Immunization Cooperative Agreements (CFDA# 93.268)*
 A portion of the federal assistance for this program represents the value of immunizations distributed, in lieu of cash, directly to the State and/or on behalf of the State to vaccinating providers. The U.S. Department of Health and Human Services determined the value of vaccines received during fiscal year 2015 to be \$106,699,239 which is included in the Supplementary Schedules. The outstanding inventory balance for immunizations as of June 30, 2015, is \$27,739,157.

NOTE 3 CAPITALIZATION GRANTS FOR REVOLVING LOAN FUNDS

In fiscal year 2015, the capitalization grants for revolving loan funds comprised the Capitalization Grants for Clean Water State Revolving Funds (CFDA# 66.458) and the Capitalization Grants for Drinking Water State Revolving Funds (CFDA# 66.468) programs. As of June 30, 2015, outstanding loans for the Capitalization Grants for Revolving Loan Funds programs totaled approximately \$1.337 billion.

The calculation of federal assistance for the loan programs includes the following elements.

Capitalization Grant Loan Balance, as of 6/30/14 (as restated).....	\$ 1,253,010,053
Loans without Compliance Requirements.....	(700,730,160)
Loans transferred without Compliance Requirements.....	(195,655,153)
Net Loan Balance (Loans with Compliance Requirements).....	<u>356,624,740</u>
New Loans Disbursed.....	97,656,260
Net Principal Repayments Received.....	(17,536,411)
Capitalized Interest Earned.....	<u>3,565,372</u>
Current Loan Activity.....	<u>83,685,221</u>
Ending Loan Balance (Loans with Compliance Requirements).....	<u>440,309,961</u>
Administrative Costs.....	2,305,357
Small System Technical Assistant Costs.....	408,471
Public Water Systems Supervision.....	1,966,522
Administrative Interest Earned.....	(23)
Loan Account Interest Earned.....	<u>(33)</u>
Total Federal Assistance for FY 2015.....	<u>\$ 444,990,255</u>

The total federal assistance for fiscal year 2015, as reported by the Ohio Environmental Protection Agency, for the Capitalization Grants for Clean Water State Revolving Funds and the Capitalization Grants for Drinking Water State Revolving Funds were \$357,964,844 and \$87,025,409 respectively.

**STATE OF OHIO
 NOTES TO THE SUPPLEMENTARY SCHEDULE
 OF EXPENDITURES OF FEDERAL AWARDS
 FOR THE YEAR ENDED JUNE 30, 2015**

NOTE 4 RESEARCH AND DEVELOPMENT CLUSTER

The State has reported the following federal programs under the Research and Development Cluster on the Supplementary Schedule of Expenditures of Federal Awards by Federal Agency and Federal Program.

CFDA #	Federal Program Title	Amount
15.250	Regulation of Surface Coal Mining and Surface Effects of Underground Coal Mining	\$ 18,816
15.252	Abandoned Mine Land Reclamation (AMLR) Program	52,976
15.605	Sport Fish Restoration Program	622,172
15.808	U.S. Geological Survey_ Research and Data Collection	93,418

15.819	Energy Cooperatives to Support the National Coal Resources Data System (NCRDS)	11,987
16.550	State Justice Statistics Program for Statistical Analysis Centers	40,862
16.593	Residential Substance Abuse Treatment for State Prisoners	346
16.609	Project Safe Neighborhoods	42,944
16.738	Edward Byrne Memorial Justice Assistance Grant Program	122,421
16.751	Edward Byrne Memorial Competitive Grant Program.....	8,262
20.205	Highway Planning and Construction	6,063,674
84.002	Adult Education - Basic Grants to States.....	1,680,319
Total Research and Development Cluster.....		<u>\$8,790,767</u>

NOTE 5 TRANSFERS BETWEEN FEDERAL PROGRAMS

During fiscal year 2015, the State made allowable transfers of approximately \$57.3 million from the Temporary Assistance for Needy Families (93.558) program to the Social Services Block Grant (93.667) program. The Supplementary Schedule shows the State spent approximately \$570 million on the Temporary Assistance for Needy Families program. The amount reported for the Temporary Assistance for Needy Families program on the Supplementary Schedule excludes the amount transferred to the Social Services Block Grant program. The amount transferred to the Social Services Block Grant program is included in the federal program expenditures for this program. The following table shows the gross amount drawn for the Temporary Assistance for Needy Families program during fiscal year 2015 and the amount transferred to the Social Services Block Grant program.

Temporary Assistance for Needy Families.....	\$ 627,304,381
Social Services Block Grant.....	<u>(57,282,432)</u>
Total Temporary Assistance for Needy Families.....	<u>\$ 570,021,949</u>

84.395	ARRA -- State Fiscal Stabilization Fund (SFSF) - Race-to-the-Top Incentive Grants, Recovery Act.....	59,735,920
84.412	ARRA -- Race to the Top – Early Learning Challenge	7,679,449
	Total ARRA Grants.....	<u>\$71,425,858</u>

Supplemental Nutrition Assistance Program (CFDA# 10.551) – The reported expenditures for benefits under the Supplemental Nutrition Assistance Program (SNAP) are supported by both regularly appropriated funds and incremental funding made available under section 101 of the American Recovery Reinvestment Act of 2009. The portion of total expenditures for SNAP benefits that is supported by Recovery Act funds varies according to fluctuations in the cost of the Thrifty Food Plan, and to changes in participating households’ income, deductions and assets. This condition prevents the U.S. Department of Agriculture (USDA) from obtaining the regular and Recovery Act components of SNAP benefits expenditures through normal program reporting processes. As an alternative, USDA has computed a weighted average percentage to be applied to the national aggregate SNAP benefits provided to households in order to allocate an appropriate portion thereof to Recovery Act funds. This methodology generates valid results at the national aggregate level but not at the individual State level. Therefore, the State of Ohio cannot validly disaggregate the regular and Recovery Act components of its reported expenditures for SNAP benefits. At the national aggregate level, however, Recovery Act funds account for approximately 0.64 percent of USDA’s total expenditures for SNAP benefits in the Federal fiscal year ended September 30, 2015.

2. FINDINGS RELATED TO THE FINANCIAL STATEMENTS REQUIRED TO BE REPORTED IN ACCORDANCE WITH GAGAS

1. FINANCIAL REPORTING – INTERGOVERNMENTAL PAYABLES MISCLASSIFICATION

<i>Finding Number</i>	2015-001
<i>State Agency</i>	Ohio Office of Budget & Management
<i>State Agency Number</i>	OBM-01

MATERIAL WEAKNESS

Governmental Accounting Standards Board's (GASB) *Codification of Governmental Accounting and Financial Reporting Standards* Section 2200.180 states, in part:

The term *current liabilities* is used principally to designate obligations whose liquidation is reasonably expected to require the use of existing resources properly classifiable as current assets, or the creation of other current liabilities. As a category in the statement of net position, the classification is intended to include obligations for items that have entered into the operating cycle..... Other liabilities whose regular and ordinary liquidation is expected to occur within one year also are intended for inclusion...”

It is management's responsibility to interpret accounting guidance and devise and implement financial reporting policies or approaches that adhere to it. It is also management's responsibility to ensure the financial statements are accurate, complete, and properly presented in accordance with governmental accounting standards.

STATE OF OHIO
JULY 1, 2014 THROUGH JUNE 30, 2015
SCHEDULE OF FINDINGS AND QUESTIONED COSTS

1. FINANCIAL REPORTING – INTERGOVERNMENTAL PAYABLES MISCLASSIFICATION
(Continued)

Beginning in fiscal year 2009 the State of Ohio periodically drew repayable advances from the Federal government to cover insufficient State funds for unemployment benefit claims. As of June 30, 2015, the State of Ohio recognized an intergovernmental payable liability of \$978.5 million for the outstanding portion of these advances in the Unemployment Compensation Fund. The Ohio Office of Budget and Management (OBM) properly classified portions of the liability on the government-wide *Statement of Net Position* as “Due in One Year” and “Due in More than One Year”. However, contrary to the GASB guidance, the entire amount of \$978.5 million was classified as a noncurrent liability on the *Statement of Net Position, Proprietary Funds - Enterprise* when the amount estimated to be paid within one year (\$601.2 million) should have been classified as a current liability. Once the error was brought to management’s attention, the *Statement of Net Position, Proprietary Funds - Enterprise* was adjusted to reflect the correct amounts.

Without the proper application of available guidance the State cannot reasonably ensure the information reported in its financial statements is accurate and complete. If amounts are not accurately reported, the risk is increased that the financial statement may be materially misstated and those using the statements could be relying on inaccurate information. Based on our discussions with OBM management, it appears they made a determination on how to accrue and classify the Unemployment Compensation liability based on a misunderstanding of the repayment process.

We recommend management strengthen existing controls to ensure all information reported in the financial statements is accurate and presented in accordance with accounting and financial reporting guidance. We further recommend management review and update the financial reporting policies/approaches periodically (i.e., annually) to ensure they are based on an accurate understanding of the related processes, and are consistent with current accounting and financial reporting guidance. Any changes to the policies should be reviewed and approved by management and documented in some manner.

Official’s Response

The accounting treatment for the intergovernmental payable liability has been in place for the past three years and the entire remaining liability is expected to be a current liability at the close of fiscal year 2016. This is the last year for the separation of current and noncurrent components. There are a number of recommendations for management to consider for the financial reporting process. OBM management is always open to ideas to improve our process and will review the recommendations for our next financial reporting cycle.

**STATE OF OHIO
JULY 1, 2014 THROUGH JUNE 30, 2015
SCHEDULE OF FINDINGS AND QUESTIONED COSTS**

2. UNEMPLOYMENT COMPENSATION FUND – GAAP REPORTING PACKAGE MISSTATEMENT

<i>Finding Number</i>	2015-002
<i>State Agency</i>	Ohio Department of Job & Family Services
<i>State Agency/Number</i>	JFS-01

MATERIAL WEAKNESS

It is management's responsibility to devise and implement internal control procedures which provide reasonable assurance the Department's GAAP (Generally Accepted Accounting Principles) Reporting Package (GRP) submitted to the Office of Budget and Management (OBM) used in preparation of the State of Ohio's financial statements is complete and accurate. Sound internal controls require a thorough review of the GRP, schedules, and supporting documentation be performed and documented in some manner prior to submission to ensure completeness and accuracy of the information being submitted to OBM.

OBM provides state agencies with a GRP containing various schedules related to each agency's financial activity which are used to gather information necessary to compile the State of Ohio's financial statements. OBM also provides detailed instructions for the agencies on how to complete each schedule since it is the agency's responsibility to complete and submit the schedules back to OBM. Various staff within the Department completes the GRP schedules and forwards them to their manager for review. Once all schedules have been reviewed, the Section Chief reviews each schedule for accuracy and then forwards them to the Assistant Deputy Director for final review and approval. However, the controls were not operating as intended and the Department incorrectly reported the estimated current portion of the outstanding loan balance due to the federal government for the Unemployment Compensation Fund as \$377,257,172 when it should have been \$601,202,206. This would have resulted in a \$223,945,034 (6.7%) understatement of the Other Noncurrent Liabilities, Due In One Year line item as well as a corresponding overstatement of the same amount for the Other Noncurrent Liabilities, Due in More than One Year line item for Business Type Activities on the financial statements. In addition, this would have resulted in a material understatement of the current portion of the Intergovernmental Payable line item as well as a corresponding overstatement of the noncurrent portion of the Intergovernmental Payable line item for the Unemployment Compensation proprietary fund. Once the error was brought to management's attention, the schedule was adjusted and re-submitted to OBM so the State of Ohio's financial statements reflect the correct amount.

Without adequate management reviews over the GRP, the Department cannot reasonably ensure the information reported to OBM is accurate and complete. If amounts are not accurately reported, the risk is increased that the State of Ohio's financial statements may be materially misstated and those using the statements could be relying on inaccurate information. Based our discussions with management and review of supporting documentation, it appears the amount was incorrectly reported to OBM because of ineffective reviews of the information reported in and certified as accurate in the GRP.

We recommend management strengthen existing controls to ensure all information reported in the GRP agrees to supporting documentation and that all required elements have been accurately reported prior to submitting the information to OBM. This could include performing a comparison of the schedules to the previous year's audited schedules to identify and investigate any significant, unusual, or unexpected variances/fluctuations. This review should be documented in some manner and the documentation should be maintained.

**STATE OF OHIO
JULY 1, 2014 THROUGH JUNE 30, 2015
SCHEDULE OF FINDINGS AND QUESTIONED COSTS**

**2. UNEMPLOYMENT COMPENSATION FUND – GAAP REPORTING PACKAGE MISSTATEMENT
(Continued)**

Official's Response

The Agency disagrees with the severity of this finding and the characterization of the same as a Material Weakness in the internal control procedures. The identified error was the result of a misunderstanding of a new question added to Schedule N-1 of the GRP Schedule. The question: "Please report the current portion of the outstanding federal repayable advances balance as of June 30, 2015 (portion expected to be paid within 12 months). The estimate should include state dollars as well as FUTA credit offsets." JFS staff maintains that the GRP question was not clear and was understood to mean a request for the estimated outstanding federal loan balance at the end of SFY 16 which was estimated to be \$377,257,172. This conclusion was reached after a minimum of three exempt staff reviewed the completed schedule prior to submission. It was later discovered that the purpose of the new question was to obtain the amount of expected payments (as opposed to the balance) which was estimated to be \$601,202,206 at the time of submission. After AOS had questioned the figure, JFS contacted OBM for a better understanding of the number requested on the schedule. With OBM's guidance, the schedule was immediately revised to report the amount of the estimated loan payments, prior to the number being shared or relied upon in any capacity. Internal controls are in place and require completed schedules to be reviewed by two members of management prior to submission. JFS contends these controls were followed and should be sufficient to detect errors. However, in this case, additional JFS reviews were unlikely to change the outcome as the question was answered and reviewed as being correct. In addition, AOS' recommendation that management compare the schedules to previous year's audit schedule would not have been fruitful since the question did not appear on the GRP schedule in any previous years.

While JFS is cognizant of the need to be complete and accurate and certainly strives for the same in providing the requested information, it is noteworthy that the requested figures are estimates and thus, by their nature can vary significantly throughout the course of a year and do not present a liability risk. In fact, if trust fund receipts warrant it, JFS can make voluntary payments towards the federal advance at any given time in the year without a revision to the GRP Estimate. Case in point, two voluntary payments of \$100,000,000 each were made this fiscal year with one of the payments being unanticipated and made subsequent to submitting the GRP schedule. Therefore, any reliance upon the projected data as actual, and any corresponding adjustments made using that data, would have been inaccurate. Further, while JFS can project Federal Unemployment Taxes (FUTA) collected and used to pay down the advance, the agency does not know the actual payments until well after the information is provided. JFS maintains that projected data of this nature does not and should not trigger significant hardline adjustments to the extent of actual data thereby significantly limiting, if not eliminating, any actual risk of liability to the state.

Given the foregoing, JFS maintains a finding of this magnitude is severe based on the information in question. Regardless, JFS maintains that sufficient internal controls are in place to prevent errors which may lead to actual state liability but when any uncertainty exists regarding the information being requested, JFS will not hesitate to seek guidance immediately.

Auditor of State's Conclusion

The finding was characterized as a material weakness based on guidelines set forth in generally accepted auditing standards which require auditors to evaluate the severity of each deficiency in internal control based on the magnitude of the potential misstatement and does not depend on whether a misstatement actually occurred in an entity's financial statements.

We identified the error during the review of JFS' GRP which was signed and certified to OBM as complete and accurate after all levels of review were completed. Based on this, JFS' controls were not operating effectively since they did not properly identify what information was being requested for the new GRP line item in order to detect the error prior to submitting the GRP to OBM. Furthermore, this amount was calculated and provided to OBM in past years, just not through the GRP process.

**STATE OF OHIO
JULY 1, 2014 THROUGH JUNE 30, 2015
SCHEDULE OF FINDINGS AND QUESTIONED COSTS**

3. FINDINGS AND QUESTIONED COSTS FOR FEDERAL AWARDS

The findings and questioned costs are summarized by state agency and type on pages 36 and 37.

The questioned costs are summarized by federal agency, program, and amount on page 39.

The findings and questioned costs are detailed by state agency on pages 41 through 91.

The State's responses to our noncompliance findings and findings on internal control over compliance are described in the accompanying Corrective Action Plan on pages 93 through 116. One response required an Auditor of State's Conclusion which is included on page 74.

4. OTHER – FINDING FOR RECOVERY

In addition, we identified the following other issue related to a Finding for Recovery. This issue did not impact our GAGAS or Federal Compliance and Controls reports.

1. FINDING FOR RECOVERY REPAID UNDER AUDIT – PAYROLL OVERPAYMENT

<i>Finding Number</i>	2015-003
<i>State Agency</i>	Ohio Retirement Study Council
<i>State Agency Number</i>	RET-01

Ohio Rev. Code §171.03 (C) lists one of the powers of the Ohio Retirement Study Council (the Council) is to "Fix the compensation of the director and all other employees of the council." Employee compensation is based on hours worked, services performed, or the use of earned benefits (vacation, sick, personal, or overtime / compensatory time). Generally, entities pay employee compensation after the actual work is performed (delayed), but some entities pay employees as the pay is earned or in advance (current).

During the audit period, the Council changed its practice from paying employees on a two-week current basis to a two-week delayed basis, similar to the majority of state entities. Paula H. Levitt was an employee who was paid on a current basis and retired approximately the same time as the Council transitioned to a delayed basis payroll process for employees. The Council issued two different checks to compensate Paula H. Levitt for 80 hours of work/leave used for the pay period ending January 27, 2013. As such, the Council paid Ms. Levitt twice for the same pay period – once on a biweekly current pay status and again as a biweekly delayed pay status. The gross amount overpaid, either directly to Ms. Levitt or on her behalf for benefits (taxes and pension), was \$1,539.

In accordance with the foregoing facts, and pursuant to Ohio Rev. Code § 117.28, a finding for recovery for public money illegally expended was issued against Paula H. Levitt in the amount of \$1,539 and in favor of the Ohio Retirement Study Council. On August 13, 2015, Bethany Rhodes, Director/General Counsel of the Ohio Retirement Study Council repaid \$1,539 which was posted to the Council's operating account.

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO OFFICE OF BUDGET AND MANAGEMENT

1. FEDERAL SCHEDULE – VARIOUS PROGRAMS

<i>Finding Number</i>	2015-004
<i>State Agency/Number</i>	OBM-02
<i>CFDA Number and Title</i>	10.553/10.555/10.556/10.559 – Child Nutrition Cluster 10.558 – Child and Adult Care Food Program 64.015 – Veterans State Nursing Home Care 93.791 – Money Follows the Person Rebalancing Demonstration
<i>Federal Agency</i>	Department of Agriculture Department of Veteran Affairs Department of Health and Human Services
<i>Compliance Requirement</i>	Schedule of Expenditures of Federal Awards

MATERIAL WEAKNESS

It is management's responsibility to implement control policies and procedures to reasonably ensure the State of Ohio's Schedule of Expenditures of Federal Awards (Schedule) is complete and accurate. Sound internal controls require a review and analysis of the Schedule and agency Attachments be performed prior to submission to the federal government to verify the information reported is accurate and complete. This review and analysis must be documented in some manner.

During state fiscal year 2015, the Office of Budget and Management (OBM) provided each state agency that received federal funds a reporting package containing a template of the Schedule to be used and instructions for completing the reporting package. OBM also offered training about the Schedule and reporting package to all agencies that received federal funds during state fiscal year 2015. OBM used the information returned by the agencies to prepare the overall Schedule and related footnotes for the State of Ohio. The various agencies used the reporting packages to provide the information necessary to determine the expenditure amounts reported on the Schedule for each of their federal programs and the related footnotes based on data from OAKS or other sources. Additionally, each state agency signed a certification form validating the accuracy and completeness of the information submitted, as well as a form attesting they considered any errors or adjustments noted during the previous audit when completing the current year's reporting package.

Once the Schedules and reporting packages were submitted by the agencies, OBM management reviewed the reporting packages for clerical and mathematical accuracy (i.e., proper CFDA's, footing, cross-footing, and the supporting amounts agree to the totals) in order to identify any discrepancies prior to preparation of the State of Ohio's Schedule. OBM management also calculated estimated/expected total federal expenditures based on OAKS data and or other outside sources used to compile the cash basis financial statements and compared these amounts to total federal expenditures reported on the draft Schedule to verify the amounts reported were within a reasonable percentage of the estimated amounts. In addition, OBM completed a comparison of federal expenditures for the current year to the prior year Schedule for large programs, to identify any significant or unusual changes which required research with the related agency. However, OBM's review of the data submitted by the agencies and investigation of certain significant or unusual variances did not identify and/or correct the following errors prior to completing the State of Ohio's Schedule:

- As reported in finding number 2015-015, there were variances identified on the Schedule and Attachment A submitted to OBM by the Ohio Department of Education (EDU) which resulted in an understatement of the Child and Adult Care Food Program (CACFP) of \$87,346,901 (2,372%) and an overstatement of the same amount for the Child Nutrition Cluster (CNC) (16.6%). This was due to EDU incorrectly coding expenditures to various Grant IDs related to CFDA#10.555 (CNC) instead of CFDA #10.558 (CACFP).

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO OFFICE OF BUDGET AND MANAGEMENT

1. FEDERAL SCHEDULE – VARIOUS PROGRAMS (Continued)

- As reported in finding number 2015-031, there were variances identified on the Schedule and Attachment A submitted to OBM by the Ohio Department of Medicaid (MCD) which resulted in an overstatement of \$3,276,801 (8.7%) for the Money Follows the Person Rebalancing Demonstration program (CFDA # 93.791). This was due to MCD improperly reporting a federal draw twice on its Schedule and Attachment A.
- As reported in finding number 2015-034, there were variances identified on the Schedule and Attachment A submitted to OBM by the Ohio Department of Veteran Services (DVS) which resulted in an understatement of \$1,447,454 (7.2%) for the Veterans State Nursing Home Care program (CFDA #64.015) and an overstatement of the Veterans State Domiciliary Care program (CFDA #64.014) for the same amount (38%). This was due to DVS improperly coding deposits for these programs in OAKS. The Veterans State Domiciliary Care program was a non-major program that was impacted by the error noted for the Veterans State Nursing Home Care program which was identified and tested as a major program.

These errors were brought to OBM's attention by the auditor and the State's Schedule was adjusted prior to submission to the federal government.

Without adequate monitoring and completeness controls over the State of Ohio's Schedule, management cannot reasonably ensure the information reported on the Schedule and footnotes is complete and accurate. If all expenditures are not accurately reported on the Schedule, the risk is increased that the State of Ohio's Schedule of Expenditures of Federal Awards may be materially misstated and those using it could be relying on inaccurate information.

Based on discussions with OBM management, the errors in the Schedule were not identified in their review because the agencies' Schedules were found to be mathematically accurate and reasonable explanations were obtained for significant variances they identified. OBM relies on the state agencies to ensure the completeness and accuracy of the information reported because they do not have an active role in the grant process. Management also indicated these errors can be attributed to the lack of a centralized process or system, such as a grants management system or similar module within OAKS, which would allow OBM the ability to identify and monitor the activity of federal programs by CFDA number rather than fund to help ensure the Schedule is complete and accurate.

We recommend OBM management strengthen and improve its existing monitoring and oversight controls to help ensure all required expenditures and revenue are accurately reported by the state agencies prior to completing the State of Ohio's Schedule of Expenditures of Federal Awards. These procedures could include, but are not limited to, the following:

- Ensuring agency explanations for significant or unusual variances seem reasonable and appropriate and, if not, investigate the variances further to determine if adjustments to the Schedule are necessary. Evidence of the follow up and any subsequent investigation should be documented and maintained.
- Requiring the agencies to provide information on significant financial changes to their programs, changes to their procedures for preparing the Schedule, and explanations for significant variances identified with their completed Schedule.
- Implementing a more centralized process and/or system to provide a more focused and accurate monitoring tool for the compilation and preparation of the State of Ohio's Schedule of Expenditures of Federal Awards.

We also recommend OBM continue to provide training to agencies that receive federal funding to help ensure they are completed properly and accurately and to address any new federal regulations or other relevant changes. We further recommend OBM formally document its policies and procedures for the compilation and preparation of the State of Ohio's Schedule of Expenditures of Federal Awards.

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEVELOPMENT SERVICES AGENCY

1. HEAP – CASH MANAGEMENT

<i>Finding Number</i>	2015-005
<i>State Agency/Number</i>	DEV-01
<i>CFDA Number and Title</i>	93.568 – Low-Income Home Energy Assistance
<i>Federal Agency</i>	Department of Health and Human Services
<i>Compliance Requirement</i>	Cash Management

NONCOMPLIANCE AND MATERIAL WEAKNESS

31 CFR 205.11 states, in part:

(a) A State and a Federal Program Agency must minimize the time elapsing between the transfer of funds from the United States Treasury and the State's payout of funds for Federal assistance program purposes, whether the transfer occurs before or after the payout of funds.

(b) A State and a Federal Program Agency must limit the amount of funds transferred to the minimum required to meet a State's actual and immediate cash needs.

...

To define these allowable timeframes, the State of Ohio and the U.S. Department of the Treasury entered into a Cash Management Improvement Act (CMIA) Agreement which requires the Ohio Development Services Agency (the Agency) to utilize the Modified Pre-Issuance Methodology when requesting federal funds for the Low-Income Home Energy Assistance Program (HEAP). Section 6.2.4 of the agreement regarding the Modified Pre-Issuance Methodology states, in part:

... The State shall request funds such that they are deposited in a State account not more than five business days prior to the day the State makes a disbursement. . . The amount of the request shall be the amount the State expects to disburse. . .

During state fiscal year 2015, the Agency drew down approximately \$218 million in federal funding for the HEAP program. Monthly, the Agency received payment requests from the utility companies for HEAP assistance and compiled a worksheet of all the amounts requested in order to determine the amount of federal funds to draw. This evaluation included year-to-date expenditures, year-to-date revenues, and any refunds received and/or pending. However, the Agency's internal controls did not ensure compliance with the time limits established in the CMIA Agreement for all transactions. Of 52 disbursements tested from 13 draws/receipts, six (11.54%) were not disbursed within five business days as required by the CMIA Agreement. The number of days late ranged from four to seven.

Without timely disbursement of funds, interest penalties may be incurred by the State of Ohio for funds drawn and not disbursed in accordance with federal requirements and the CMIA Agreement. This could also subject the Agency to sanctions or other penalties by the federal grantor agency. Based on our discussions with management, these errors likely occurred due to delays in processing and approving disbursements because of the high volume of the single payments for the HEAP program.

We recommend the Agency reinforce and strengthen its existing controls to reasonably ensure all requests for HEAP federal funds are drawn down consistently based on the Agency's immediate cash needs and disbursed timely in accordance with the guidelines set forth in the CMIA Agreement.

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEVELOPMENT SERVICES AGENCY

1. HEAP – CASH MANAGEMENT (Continued)

This should include evaluating and analyzing the current process to identify any possible efficiencies, as well as to ensure that resources are sufficient and job duties are properly aligned to handle the volume of transactions processed. We also recommend the Agency establish procedures to periodically monitor its compliance with the cash management requirements.

SCHEDULE OF FINDINGS AND QUESTIONED COSTS
OHIO DEPARTMENT OF DEVELOPMENTAL DISABILITIES

1. IT – INAPPROPRIATE ACCESS TO ADMINISTRATOR ROLES

<i>Finding Number</i>	2015-006
<i>State Agency/Number</i>	DMR-01
<i>CFDA Number and Title</i>	93.778 - Medical Assistance Program 93.791 – Money Follows the Person Rebalancing Demonstration
<i>Federal Agency</i>	Department of Health and Human Services
<i>Compliance Requirement</i>	Activities Allowed or Unallowed, Allowable Costs/Cost Principles, Special Tests and Provisions – Provider Eligibility

MATERIAL WEAKNESS

Access to systems and data must be appropriately restricted and monitored by authorized agency management. To help maintain a secure computer environment, user accounts and access privileges should be confirmed on a periodic basis to help ensure the accounts and privileges are appropriate for user job responsibilities and to maintain a proper segregation of duties. A positive confirmation process on all user accounts should be used.

The Medicaid Billing System (MBS) is designed to process claims for waiver and Targeted Case Management services. The MBS system is supported by several ancillary automated systems that enroll clients onto the various waivers, record individual service plans, which ultimately authorize waiver claims, and certify providers of Medicaid services. The Medicaid Services System (MSS) performs a series of electronic edits on waiver billings sent to the Department by service providers requesting reimbursement. The Provider Certification Wizard (PCW) system is used to receive and process applications from providers wishing to become certified for the Medicaid program. The PCW system performs edit checks to ensure all necessary documentation is received prior to the application being processed and approved.

There were 97 active administrator accounts for MBS, MSS, and PCW applications, including 17 MBS accounts, 26 MSS accounts, and 54 PCW accounts. According to the Department's IT Policy IS-001, *Completion of Information Systems Security Affidavit*, access roles have an effective period of one year from the date access is granted. Though the policy was in place during the audit period, the following exceptions were noted when testing the appropriateness of access for the 97 accounts with administrator access:

- 13 of 17 (76%) MBS account users had administrative access that allowed them to review claim files and run weekly provider reports was not appropriate for their job duties.
- 12 of 26 (46%) MSS account users had administrative access allowing them to submit a Payment Application Waiver Plan and enroll a provider; functions not appropriate for their job duties.
- 19 of 54 (35%) PCW account users had administrative access allowing them to update or change provider application data; functions not appropriate for their job duties.

Without positive periodic and accurate confirmation of all users' access roles, users could still have access to systems and functionality that once were part of their job functions, but are no longer needed after retirement, termination, or transfer. This could lead to improper changes to provider data. Based on discussions with management, the periodic reviews of user access accounts were not performed if there was no longer a need to simulate administrator roles during testing or training of end users.

We recommend the Department immediately evaluate the access roles for these administrative accounts and remove all unnecessary access that is not relevant to the job functions of those accounts. We also recommend management follow the formal policy in place that guides the process for performing periodic reviews of all user accounts, especially administrator accounts. Any changes for how IT security reviews are administered should be evaluated, approved, and updated in the Department's IT Policy.

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEPARTMENT OF EDUCATION

1. IMPROVING TEACHER QUALITY – MISALLOCATIONS TO LOCAL EDUCATIONAL AGENCIES

<i>Finding Number</i>	2015-007
<i>State Agency/Number</i>	EDU-01
<i>CFDA Number and Title</i>	84.367 – Improving Teacher Quality State Grants
<i>Federal Agency</i>	Department of Education
<i>Compliance Requirement</i>	Eligibility

QUESTIONED COSTS, NONCOMPLIANCE, AND MATERIAL WEAKNESS \$7,933,274

20 USC 6621(a) relates to allocations of Improving Teacher Quality State Grants federal funds passed through from states to local educational agencies and states, in part:

- (2) Hold harmless
 - (A) In general
 - From the funds reserved by a State under section 6613(a)(1) of this title, the State educational agency shall allocate to each local educational agency in the State an amount equal to the total amount that such agency received for fiscal year 2001 under—
 - (i) section 2203(1)(B) of this Act (as in effect on the day before January 8, 2002); and
 - (ii) section 306 of the Department of Education Appropriations Act, 2001 (as enacted into law by section 1(a)(1) of Public Law 106–554).
 - (B) Nonparticipating agencies
 - In the case of a local educational agency that did not receive any funds for fiscal year 2001 under one or both of the provisions referred to in clauses (i) and (ii) of subparagraph (A), the amount allocated to the agency under such subparagraph shall be the total amount that the agency would have received for fiscal year 2001 if the agency had elected to participate in all of the programs for which the agency was eligible under each of the provisions referred to in those clauses.

In addition, Section 9501(a)(1) of the Elementary and Secondary Education Act of 1965, as amended, relates to participation in educational programs by private school children and teachers and states:

IN GENERAL - Except as otherwise provided in this Act, to the extent consistent with the number of eligible children in areas served by a State educational agency, local educational agency, educational service agency, consortium of those agencies, or another entity receiving financial assistance under a program specified in subsection (b), who are enrolled in private elementary schools and secondary schools in areas served by such agency, consortium, or entity, the agency, consortium, or entity shall, after timely and meaningful consultation with appropriate private school officials provide to those children and their teachers or other educational personnel, on an equitable basis, special educational services or other benefits that address their needs under the program.

During state fiscal year (SFY) 2015, the Department expended approximately \$80.4 million in Improving Teacher Quality State Grants (ITQ) funds as subsidy payments to Local Educational Agencies (LEAs). The Department performed a calculation of the "hold-harmless" formula amounts allocated to LEAs based on those LEAs (including community schools) in existence as of SFY 2002. However, in completing this calculation the Department excluded community schools opening after SFY 2002. As a result, in SFY 2015 the Department disbursed \$7,933,274 more ITQ funds to traditional LEAs than they were entitled and \$7,933,274 less ITQ funds to community schools (opened after SFY 2002) than they were entitled. Given these circumstances, we will question the \$7,933,274 improperly allocated and disbursed to traditional LEAs.

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEPARTMENT OF EDUCATION

**1. IMPROVING TEACHER QUALITY – MISALLOCATIONS TO LOCAL EDUCATIONAL AGENCIES
(Continued)**

Misallocation of funds could subject the Department to sanctions or other penalties and a repayment of part of the ITQ grant award amount. Based on discussions with management and review of supporting documents, they interpreted the "hold-harmless" provision in 20 USC 6621 differently than the U.S. Department of Education (ED). Thus, the Department did not properly allocate the ITQ "hold-harmless" formula amount to traditional and community schools for SFY 2011 through 2015. The amount of questioned costs herein relates only to SFY 2015. On June 22, 2015, the Department entered into an agreement with ED that requires the Department include community schools that existed after SFY 2002 in the "hold-harmless" formula amounts for ITQ subgrants beginning in SFY 2016. It also requires the Department make adjustments to the SFY 2016 through 2020 allocations to LEAs to reverse misallocations of ITQ subgrant amounts that occurred in SFY 2011 through 2015. Both requirements will result in a reduction in funding to traditional LEAs and an increase in funding to community schools that opened after SFY 2002.

We recommend the Department evaluate its current control procedures over the calculation for the "hold-harmless" formula amounts for ITQ subgrants and update them as necessary to reasonably ensure compliance with the requirements. These procedures should include consideration of community schools opening after state fiscal year 2002 in the calculation. The Department should continue to work with the federal grantor agency, as needed, to determine an appropriate plan for correction of the misallocations of ITQ funds for all affected funding years. We also recommend the Department monitor future subgrant allocations to ensure the amounts are calculated in accordance with federal regulations/guidelines. If there is any uncertainty in the interpretation of a regulation, we recommend the Department contact ED for direction.

2. SPECIAL EDUCATION CLUSTER – MISALLOCATIONS TO LOCAL EDUCATIONAL AGENCIES

<i>Finding Number</i>	2015-008
<i>State Agency/Number</i>	EDU-02
<i>CFDA Number and Title</i>	84.027/84.173 – Special Education Cluster (IDEA)
<i>Federal Agency</i>	Department of Education
<i>Compliance Requirement</i>	Eligibility, Special Tests and Provisions – Access to Federal Funds for New or Significantly Expanded Charter Schools

QUESTIONED COSTS, NONCOMPLIANCE, AND MATERIAL WEAKNESS Undetermined Amount

34 CFR 76, Subpart H requires that SEAs (state educational agencies) take measures to ensure each charter school in the state receives the funds for which it is eligible under a covered program during its first year of operation and during subsequent years in which the charter school expands its enrollment. Specifically, 34 CFR 76.787 defines significant expansion of enrollment as:

. . . a substantial increase in the number of students attending a charter school due to a significant event that is unlikely to occur on a regular basis, such as the addition of one or more grades or educational programs in major curriculum areas. The term also includes any other expansion of enrollment that the SEA determines to be significant.

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEPARTMENT OF EDUCATION

2. SPECIAL EDUCATION CLUSTER – MISALLOCATIONS TO LOCAL EDUCATIONAL AGENCIES (Continued)

Additionally, 34 CFR 76.789 requires an SEA perform the following responsibilities: (a) provide the charter school LEA (local educational agency) with timely and meaningful information about each covered program in which the charter school LEA may be eligible to participate, and (b) allocate program funds to any charter school LEA that opens for the first time or significantly expands its enrollment during an academic year for which the state awards funds.

Furthermore, 34 CFR 300.705 relates to required subgrants to LEAs and states, in part:

- (a) *Subgrants required.* Each State that receives a grant under section 611 of the Act for any fiscal year must distribute any funds the State does not reserve under § 300.704 to LEAs (including public charter schools that operate as LEAs) in the State that have established their eligibility under section 613 of the Act for use in accordance with Part B of the Act. Effective with funds that become available on the July 1, 2009, each State must distribute funds to eligible LEAs, including public charter schools that operate as LEAs, even if the LEA is not serving any children with disabilities. . .

The remainder of 34 CFR 300.705 describes the allocations to be made to the LEAs. These payments include a base amount and a supplemental allocation of remaining funds for (a) the relative numbers of children enrolled in public and private elementary schools and secondary schools within the LEA's jurisdiction; and (b) an LEA's relative numbers of children living in poverty, as determined by the SEA. It is management's responsibility to implement control policies and procedures to reasonably ensure compliance with these requirements,

During state fiscal year (SFY) 2015, the Department expended approximately \$422.1 million in Special Education Grants to States funds (IDEA, Part B), including approximately \$403 million in subsidy payments to LEAs. Also during SFY2015, 11 new charter schools (called community schools in Ohio) opened and 70 community schools significantly expanded enrollment by adding one or more new grade levels. The Department had a policy in place during SFY 2015 for allocating additional funding to new or expanded community schools for various federal programs, including IDEA, Part B. However, the section within the Department that made the allocations to charter schools did not have a method in place to determine whether there were new or expanded charter schools.

In addition, the Department did not fulfill its responsibility and provide to the new charter schools timely and meaningful information about the IDEA, Part B program for which they may be eligible. This may have contributed to the condition that 10 of 11 (91%) new community schools did not receive any IDEA, Part B allocation during the year. One new community school was provided its appropriate share of IDEA, Part B funds during the year, but the Department did not allocate this amount in a timely manner. The Department was required to provide funding to the community school within five months of opening, or December 2014; however, the Department did not provide this funding until April 2015, five months late.

Department management also indicated they did not allocate additional IDEA, Part B funds to any of the 70 significantly expanded community schools during the year. Of eight significantly expanded community schools selected for testing, two (25%) did not receive any IDEA, Part B funding during the year and six (75%) received IDEA, Part B funding based on their enrollment data from the previous fiscal year. Because the data used in determining IDEA, Part B allocations included a base payment and enrollment data from the previous fiscal year, the community schools were not provided an accurate allocation of the amount of IDEA, Part B funds for which they were eligible.

Furthermore, although the Department had controls in place over the allocation process, they did not detect or prevent the lack of required funding to the community schools.

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEPARTMENT OF EDUCATION

2. SPECIAL EDUCATION CLUSTER – MISALLOCATIONS TO LOCAL EDUCATIONAL AGENCIES (Continued)

Funding that should have been provided to the community schools, either because a community school was created or expanded its enrollment, would have come from funding that was allocated to traditional schools. As a result, the Department disbursed more IDEA, Part B funds to traditional schools in SFY 2015 than they were entitled and less IDEA, Part B funds to community schools than they were entitled. However, the disbursement or allocation amount to each type of school could not be readily determined. Given these circumstances, we will question an undetermined amount improperly allocated and disbursed to traditional schools instead of to the 70 expanded community schools for the Special Education Grants to States. It is likely the amount of funds is greater than \$10,000. We will not question the costs related to the 10 new charter schools since their eligibility for program funds was not documented by the required plan/application.

If controls are not working consistently and as intended by management, the risk exists that transactions may not be recorded accurately, calculated appropriately, or approved properly. By not making appropriate allocation of funds to all LEAs, including the community schools, the Department may not have allocated the required amount of IDEA, Part B funds to community schools during SFY 2015. This could subject the Department to sanctions or other penalties and a repayment of the IDEA, Part B grant award amount. If community schools don't receive all funding they are eligible for, they may not be able to provide services at the level they could have to the detriment of the students impacted for the Special Education Grants to States program. Based on discussions with management and review of support documents, there was a lack of communication among Department divisions involved in the allocation process.

We recommend the Department evaluate its current control procedures over the allocation of IDEA, Part B funds to new and significantly expanded community schools and update them as necessary to reasonably ensure compliance with the requirements. The Department should ensure there is adequate communication among divisions within the Department to ensure staff responsible for allocating IDEA, Part B funds to LEAs has proper and current data on new and significantly expanded community schools. We also recommend the Department monitor future subgrant allocations to ensure the amounts are calculated in accordance with federal regulations/guidelines. If there is any uncertainty in the interpretation of a regulation, we recommend the Department contact the federal funding agency for direction.

NONCOMPLIANCE AND MATERIAL WEAKNESS (TITLE I GRANTS TO LOCAL EDUCATIONAL AGENCIES & IMPROVING TEACHER QUALITY STATE GRANTS)

MATERIAL WEAKNESS (ALL OTHER PROGRAMS LISTED ABOVE)

2 CFR part 25 established the Dun and Bradstreet Data Universal Numbering System (DUNS) number as a universal identifier for federal financial assistance applicants, as well as recipients and their direct subrecipients. 2 CFR 25.110 states that Part 25 applies to all entities, other than those listed exempted entities, which apply for/receive federal awards or receive subawards directly from recipients of those agency awards.

Additionally, 2 CFR part 25, Appendix A, Section B states: If you are authorized to make subawards under this award, you:

1. Must notify potential subrecipients that no entity (see definition in paragraph C of this award term) may receive a subaward from you unless the entity has provided its DUNS number to you.
2. May not make a subaward to an entity unless the entity has provided its DUNS number to you.

It is management's responsibility to implement control policies and procedures to reasonably ensure compliance with the DUNS number requirements. Effective controls require award recipients to notify potential subrecipients about providing a DUNS number or obtain it via review of subaward application documents prior to approval of such subawards.

During state fiscal year 2015, the Department did not have a consistent method for obtaining a DUNS number from subrecipients before entering into subawards using federal funds from U.S. Department of Education (ED) grants. As part of the application process for the subawards, subrecipients entered various information in the Ohio Educational Directory System (OEDS) and the Comprehensive Continuous Improvement Plan (CCIP) systems. Applicants had the option of entering their DUNS number in OEDS; however, it was not a required field, was not entered or uploaded into CCIP, and was not readily visible to users. Moreover, Department employees within the program offices did not obtain or review an entity's DUNS number during the application process or while approving the subaward. Although the Department did obtain DUNS numbers before awarding American Recovery and Reinvestment Act (ARRA) funds to subrecipients several years ago, not all subrecipients received ARRA awards and the entities that are subrecipients can change from year to year. For example, there were 11 new community school subrecipients in fiscal year 2015. Beginning in February 2015, the Department indicated it made entering the DUNS number a required field in OEDS and required local education

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEPARTMENT OF EDUCATION

3. DUNS NUMBERS FOR SUBAWARDS (Continued)

agencies certify they provided an accurate DUNS number to the Department prior to the subaward. We reviewed supporting documentation to verify these procedures were implemented; however, these controls occurred after subawards were issued during fiscal year 2015 and we did not test them to ensure they were operating effectively.

In addition, for one of 25 (4%) Title I, Part A and one of 25 (4%) Improving Teacher Quality State Grants, subawards tested, the Department could not provide evidence it had obtained, or the subrecipient had, a DUNS number before issuing the subaward. Subsequently, the Department obtained a DUNS number from the subrecipient.

Without proper internal controls to ensure applicants provide a valid DUNS number prior to approval of the subaward, the Department is not complying with 2 CFR part 25. Noncompliance could result in federal funds being reduced, taken away, or other sanctions imposed by the federal grantor agency. Based on discussions with management and review of supporting documentation, the corrective action plan for the fiscal year 2014 audit finding was not implemented until February 2015 after the fiscal year 2015 subawards were issued in July 2014.

We recommend the Department continue to evaluate its current control procedures over the subaward process for ED grants and update them as necessary to reasonably ensure it obtains DUNS numbers from all subrecipients before approving subawards. This evaluation and revision process should occur on a periodic basis and timely enough for the Department to be compliant with the DUNS number requirement. We also recommend the Department establish procedures to periodically monitor its compliance with the related requirements and initiate necessary actions to resolve any noncompliance that results.

4. SUBRECIPIENT CASH MANAGEMENT – VARIOUS PROGRAMS

<i>Finding Number</i>	2015-010
<i>State Agency/Number</i>	EDU-04
<i>CFDA Number and Title</i>	84.010 – Title I Grants to Local Educational Agencies 84.027/84.173 – Special Education Cluster (IDEA) 84.048 – Career and Technical Education – Basic Grants to States 84.287 – Twenty-First Century Community Learning Centers 84.367 – Improving Teacher Quality State Grants 84.377/84.388 – School Improvement Grants Cluster
<i>Federal Agency</i>	Department of Education
<i>Compliance Requirement</i>	Cash Management, Subrecipient Monitoring

NONCOMPLIANCE AND MATERIAL WEAKNESS

34 CFR part 80.20(b)(7) contains the U.S. Department of Education’s (ED) requirements on cash management for ED federal programs and states, in part:

. . . Grantees must monitor cash drawdowns by their subgrantees to assure that they conform substantially to the same standards of timing and amount as apply to advances to the grantees.

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEPARTMENT OF EDUCATION

4. SUBRECIPIENT CASH MANAGEMENT – VARIOUS PROGRAMS (Continued)

The Title I, Special Education Cluster, and Improving Teacher Quality State Grants programs, are subject to the Cash Management Improvement Act (CMIA) Agreement which requires the Department utilize the Modified Pre-Issuance technique when requesting funds for these federal programs. This funding technique requires the Department to disburse funds not more than five business days after they are deposited into a State account. The Career and Technical Education, Twenty-First Century, and School Improvement Grants programs are not included within the CMIA agreement and must adhere to 31 CFR 205.33 which requires the time between the drawdown of Federal funds and their disbursement must be minimized and the timing and amount of funds transfers must be as close as is administratively feasible.

During fiscal year 2015, the Department drew down and disbursed approximately \$1.1 billion to subrecipients for the six ED major federal programs listed above. The Department posted a Grants Management Online Forms and Guidance link on its website as a way to provide technical assistance and monitor the subrecipients' compliance with cash management requirements. The link included instructions for requesting funds via the Project Cash Request (PCR) form. Item # 4 of this form, dated April 4, 2013, stated "Cash may be requested for a maximum of one (1) month plus, if applicable, any negative balance. . . . All funds must be expended in the month in which you request them." However, these instructions and use of a "30-day advance funding rule" do not adhere to the above mentioned cash management requirements.

The Department also included on its website a Cash Management Guidance document, with the purpose ". . . to update cash management guidelines to comply with Federal regulations." The document required the subrecipients use the same cash management requirements used by the Department, as stated in the CMIA agreement and 31 CFR 205.33. However, this document was not effective until July 1, 2015, or after the audit period.

Not providing accurate information about, and appropriately monitoring subrecipients' compliance with, cash management requirements could result in the Department not complying with 34 CFR part 80.20(b)(7). This could also result in subrecipients not complying with the CMIA agreement and 31 CFR 205.33 cash management requirements. These conditions could subject the Department to sanctions or other penalties and a repayment of part of the grant award amount. In addition, noncompliance could subject the Department to paying interest charges on these draws. Based on discussions with management and review of supporting documentation, there was a misunderstanding of the regulations governing cash management related to subrecipients requesting and disbursing federal ED funds.

We recommend the Department continue to evaluate its existing cash management procedures and update them as necessary to reasonably ensure it provides accurate information to subrecipients and it monitors their cash management activities. This will help ensure subrecipients comply with cash management activities in accordance with the guidelines set forth in the CMIA agreement and 31 CFR 205.33. One immediate way to address this would be to revise the instructions to the PCR form to accurately identify the cash management requirements. We also recommend the Department establish procedures to periodically monitor its compliance with the cash management requirements and initiate necessary actions to resolve any noncompliance that results.

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEPARTMENT OF EDUCATION

5. CACFP – SPONSOR REVIEWS

<i>Finding Number</i>	2015-011
<i>State Agency/Number</i>	EDU-05
<i>CFDA Number and Title</i>	10.558 – Child and Adult Care Food Program
<i>Federal Agency</i>	Department of Agriculture
<i>Compliance Requirement</i>	Subrecipient Monitoring

NONCOMPLIANCE AND SIGNIFICANT DEFICIENCY

As part of administering the Child and Adult Care Food Program (CACFP), 7 CFR 226.6 requires the Department provide technical and supervisory assistance to institutions and facilities to facilitate effective program operations; monitor progress toward achieving program goals; ensure compliance with all requirements of the program; and maintain documentation of supervisory assistance activities, including reviews conducted, corrective actions prescribed, and follow-up efforts.

Specifically, 7 CFR 226.6 (m)(6) states, in part:

The State agency must annually review at least 33.3 percent of all institutions. At least 15 percent of the total number of facility reviews required must be unannounced. The State agency must review institutions according to the following schedule:

- (i) Independent centers and sponsoring organizations of 1 to 100 facilities must be reviewed at least once every three years. A review of such a sponsoring organization must include reviews of 10 percent of the sponsoring organization's facilities;

...

It is management's responsibility to implement control policies and procedures to reasonably ensure compliance with program requirements. Effective controls require the Department perform the reviews as frequently as needed and maintain documentation of the review and results.

During state fiscal year 2015, the Department completed reviews of 315 sponsors that participated in the CACFP program. Program Consultants were responsible for visiting these institutions and performing the required reviews. The Consultant completed various documents as part of the review process to evidence what they reviewed and the results. The Assistant Director or Management Analyst then reviewed these documents and denoted acceptance of the reviews in the Claims Reimbursement Reporting System (CRRS). In addition, the Department maintained a CRRS tracking module that listed all the participants of the program and when they were reviewed or were scheduled for review. However, the Department's controls did not prevent noncompliance with the review requirements. For one of 25 (4%) reviews selected for testing, the Department did not perform a review of the sponsor within the required three-year period. The sponsor started receiving funding in August 2011 but the sponsor review was not completed until March 2015.

Not properly monitoring CACFP sponsor reviews could result in proper documentation not being reviewed and/or maintained. Not being able to prove compliance with the review requirements could subject the Department to sanctions or other penalties and a repayment of part of the grant award amount. Based on discussions with management and review of support documents, the Department scheduled the review to occur earlier but was unable to perform it when scheduled. The sponsor started as a site under another sponsor. In 2011 it started its own non-profit with a new tax ID and became a new sponsor. It didn't have

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEPARTMENT OF EDUCATION

5. CACFP – SPONSOR REVIEWS (Continued)

a one-year review as is normally done with new sponsors because the Department had already done a review of the site before it became a sponsor. Then, the sponsor was not reviewed until 2015 as if the one year review had been done.

We recommend the Department evaluate its existing CACFP review control procedures and update them as necessary to reasonably ensure all reviews are performed when due. We also recommend the Department establish procedures to periodically monitor its compliance with the review requirements and initiate necessary actions to resolve any noncompliance that results.

6. MOE DETERMINATION CONTROLS – VARIOUS PROGRAMS

<i>Finding Number</i>	2015-012
<i>State Agency/Number</i>	EDU-06
<i>CFDA Number and Title</i>	84.010 – Title I Grants to Local Educational Agencies 84.027/84.173 – Special Education Cluster (IDEA) 84.287 – Twenty-First Century Community Learning Centers 84.367 – Improving Teacher Quality State Grants
<i>Federal Agency</i>	Department of Education
<i>Compliance Requirement</i>	Maintenance of Effort, Subrecipient Monitoring

MATERIAL WEAKNESS

34 CFR part 299 established uniform administrative rules for programs in titles I through XIII of the Elementary and Secondary Education Act (ESEA) of 1965, as amended. 34 CFR 299.5 (a) states:

An LEA [local educational agency] receiving funds under an applicable program listed in paragraph (b) of this section may receive its full allocation of funds only if the SEA [state educational agency] finds that either the combined fiscal effort per student or the aggregate expenditures of State and local funds with respect to the provision of free public education in the LEA for the preceding fiscal year was not less than 90 percent of the combined fiscal effort per student or the aggregate expenditures for the second preceding fiscal year.

It is management’s responsibility to implement control policies and procedures to reasonably ensure a LEA has met the maintenance of effort (MOE) compliance requirements and is eligible to receive the full allocation of funds. Effective controls require the SEA document its determination of how the LEA complied with the MOE requirement based on the LEA’s expenditures, as allowed by 34 CFR 299.5 (d).

The Department has two divisions that performed MOE calculations and reported them to the federal government for their respective federal programs. The Office for Exceptional Children (OEC) performed this function for the Special Education Cluster, while the Office of Federal Programs (OFP) performed it for the Title I, Twenty-First Century Community Learning Centers, Improving Teacher Quality, and other federal programs. Each Office monitored LEA compliance with MOE requirements through data uploaded from EMIS (Education Management Information System) into the CCIP (Continuous Comprehensive Improvement Plan) system, MOE Application module. EMIS is the statewide data collection system by which LEAs are required to report data, including all LEA expenditures and Average Daily Membership, to the Department. The Department’s Information Technology Office (ITO) notified OEC and OFP when EMIS was closed and the data was available for entry into the MOE module.

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEPARTMENT OF EDUCATION

6 MOE DETERMINATION CONTROLS – VARIOUS PROGRAMS (Continued)

Using this data, OEC and OFP determined whether a particular LEA met the MOE requirement. Each Office contacted and investigated only those LEAs that did not meet the MOE for additional information and support to help in the MOE determination. Based on data supplied by the LEA during an investigation and tracked in the MOE module, employees in OEC and OFP might have changed an LEA's expenditure data in the MOE Application module. However, OEC and OFP did not communicate this data change to ITO for revision of the data in EMIS. In addition, over the past several years, the Department re-opened the data reporting process into EMIS more than once for various reasons, allowing all LEAs the opportunity to correct, update, or otherwise change data that ends up in EMIS. However, ITO did not communicate to OEC and OFP which LEAs changed their data although they had based the MOE determinations on the original data in EMIS. In addition, OFP did not have formal, written policies and procedures over the LEA MOE compliance determination process.

The lack of communication between the divisions and not using the final revised data in EMIS may result in the Department determining that LEAs met the MOE requirement when they did not. This could result in LEAs receiving the full allocation of federal funds instead of a reduced amount. Noncompliance on the part of the LEA or the Department could result in federal funds being reduced, taken away, or other sanctions imposed by the federal grantor agency. Based on discussions with management and review of supporting documentation, ITO used "e-mail blasts" to notify the LEAs and other divisions within the Department when EMIS was re-opened, but not of specific LEAs that submitted changed data. Also, the Department did not have the technological ability during fiscal year 2015 to open EMIS to one or selected LEAs; it was an "all-or-none" option. The Department indicated it is investigating whether opening EMIS to selective LEAs is possible.

We recommend the Department continue to evaluate its current control procedures and processes over determining whether LEAs met the MOE requirement for federal programs and update them as necessary to reasonably ensure MOE determinations are made based on the most accurate data. We recommend the Department require communications of specific information among the various divisions when data affecting the MOE determination changes. The Department should also formally document and approve OFP's procedures over the LEA MOE compliance determination process. We also recommend the Department establish procedures to periodically monitor its compliance with the related controls and initiate necessary actions to resolve any noncompliance that results.

7. CNC – REPORTING

<i>Finding Number</i>	2015-013
<i>State Agency/Number</i>	EDU-07
<i>CFDA Number and Title</i>	10.553/10.555/10.556/10.559 – Child Nutrition Cluster
<i>Federal Agency</i>	Department of Agriculture
<i>Compliance Requirement</i>	Reporting

MATERIAL WEAKNESS

As part of administering the Child Nutrition Cluster (CNC), 7 CFR 225.8 requires the Department submit reports summarizing the operations of the Summer Food Service Program for Children (CFDA #10.559).

Specifically, 7 CFR 225.8(b) states, in part:

Each State agency shall submit to FNS a final report on the Summer Food Service Program Operations (FNS-418) for each month no more than 90 days following the last day of the month covered by the report . . .

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEPARTMENT OF EDUCATION

7. CNC – REPORTING (Continued)

Instructions to the FNS-418 report require grant recipients submit both 30-Day and 90-Day reports. It is management’s responsibility to implement control policies and procedures to reasonably ensure compliance with program requirements. Effective controls require the Department review the FNS-418 reports to ensure they are submitted in compliance with regulations and maintain documentation of the review.

During state fiscal year 2015, the Department disbursed approximately \$11.2 million in subsidy expenditures for the Summer Food Service Program for Children. As part of receiving those funds the Department is required to submit to the federal government monthly meal counts for the program. The 30-Day FNS-418 reports are based on estimated amounts for the month. The reports are generated and printed by the Account Clerk II and then compared to the prior year report to ensure that it appears reasonable. The Account Clerk II initials the report to evidence the comparison. However, for one of three (33.3%) monthly reports tested, the Account Clerk II did not initial the report to evidence their review.

Without consistent performance and documentation of internal controls, management cannot be assured the control was performed or working as intended. In addition, without the effective and consistent application of internal controls and maintaining of support documentation, management cannot reasonably be assured that reports submitted to the federal government are accurate or complete.

Any noncompliance may cause federal funding to be reduced or taken away, sanctions to be imposed by the federal grantor agency, or repayment of the federal funds to the federal government. Based on discussions with management and review of support documents, the report was not signed due to oversight.

We recommend the Department evaluate and reinforce its procedures to provide reasonable assurance the FNS-418 Reports are accurate, complete, and in compliance with federal requirements before being submitted to the federal government. Evidence of these reviews should be maintained to provide management with assurance the procedures are being performed timely and accurately. We also recommend the Department establish procedures to periodically monitor its compliance with the reporting review controls and initiate necessary actions to resolve any noncompliance that results.

8. CAREER & TECHNICAL EDUCATION - PROCUREMENT CONTRACTS

<i>Finding Number</i>	2015-014
<i>State Agency/Number</i>	EDU-08
<i>CFDA Number and Title</i>	84.048 – Career and Technical Education – Basic Grants to States
<i>Federal Agency</i>	Department of Education
<i>Compliance Requirement</i>	Activities Allowed or Unallowed, Procurement

MATERIAL WEAKNESS

OMB Circular A-133, § 300(b) requires recipients of federal awards “[m]aintain internal control over Federal programs that provides reasonable assurance that the auditee is managing Federal awards in compliance with laws, regulations, and the provisions of contracts or grant agreements that could have a material effect on each of its Federal programs.” It is management’s responsibility to design, implement, and monitor these controls to reasonably ensure compliance with the applicable requirements. These

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEPARTMENT OF EDUCATION

8. CAREER & TECHNICAL EDUCATION - PROCUREMENT CONTRACTS (Continued)

controls must include maintaining appropriate supporting documentation for all transactions and performing timely monitoring procedures to help ensure the transactions processed are accurate and complete.

During fiscal year 2015, the Department disbursed approximately \$2.2 million to vendors for 11 purchased personal services contracts related to the Career and Technical Education (CTE) program. These contracts were to go through a series of reviews at the Department, including review and approval by the Fiscal Specialist, Procurement Officer, legal staff, and the Superintendent of Public Instruction. However, for one of three contracts tested (33.3%), the Department could not provide documentation of review and approval signatures by the Fiscal Officer, Procurement Officer, and legal staff. These approvals were to be documented within the electronic Sharepoint program. Thus, we were not able to determine if the control was performed and working effectively.

Without proper documentation of a supervisory review and approval of contracts, a risk exists that procedures are not working as intended, are not consistently applied, or that management's objectives are not achieved. In addition, if control procedures are not performed and documented thoroughly and consistently, and the documentation maintained, management cannot be reasonably assured that contracts were reviewed, approved, and processed accurately. Based on discussion with management and review of supporting documentation, the 2015 contracts were archived in Sharepoint; thus, the page to view the approvals was unavailable and the data was not retrievable.

We recommend the Department evaluate and reinforce its existing policies and procedures related to contract approvals for the Career and Technical Education program and update them as necessary to reasonably ensure all contracts are properly reviewed, approved, and processed. The policies and procedures should also require the documentation of such approval be maintained and not archived until after the respective year has been audited and/or according to the Department's approved records retention schedule. The Department should formally document and communicate these policies and procedures to all employees involved in the process and update the procedures on a regular basis to address any necessary changes. In addition, management should periodically monitor these activities to help ensure the policies and procedures are functioning as intended.

9. FEDERAL SCHEDULE – CNC & CACFP

<i>Finding Number</i>	2015-015
<i>State Agency/Number</i>	EDU-09
<i>CFDA Number and Title</i>	10.553/10.555/10.556/10.559 – Child Nutrition Cluster 10.558 – Child and Adult Care Food Program
<i>Federal Agency</i>	Department of Agriculture
<i>Compliance Requirement</i>	Schedule of Expenditures of Federal Awards

MATERIAL WEAKNESS

OMB Circular A-133 §___.310 (b)(3) requires that auditees prepare a Schedule of Expenditures of Federal Awards (Schedule) that provides total federal awards expended for each federal program, along with the corresponding CFDA number or other identifying information. It is management's responsibility to implement control policies and procedures to reasonably ensure the Department's portion of the Schedule submitted to the Office of Budget and Management (OBM) is in compliance with OMB Circular A-133. Sound internal controls require a review of the Schedule and Attachments be performed and

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEPARTMENT OF EDUCATION

9. FEDERAL SCHEDULE – CNC & CACFP (Continued)

documented in some manner, prior to submission, to verify the information the Department reported is accurate and complete, and that all transactions and adjustments are appropriately reflected in the State's accounting system, the Ohio Administrative Knowledge System (OAKS).

During state fiscal year 2015, OBM provided state agencies that received federal funds a reporting package containing a template of the Schedule and detailed instructions for completing the reporting package. The Department prepared the Schedule and Attachments based on OAKS data and information provided by the program areas.

Management reviewed the draft documents to reasonably ensure completeness and accuracy prior to submission to OBM in August 2015. Based on communications with OBM, the Department also submitted two revised Schedules and Attachments. However, management's review did not detect the following material misstatements for the Child Nutrition Cluster (CNC) and the Child and Adult Care Food Program (CACFP):

- The CACFP (CFDA #10.558) was understated by \$87,346,901 (96%).
- The CNC (CFDA #10.553/555/556/559) was overstated by \$87,346,901 (16.6%), which was incorrectly coded to CFDA #10.555 instead of CACFP (CFDA #10.558), as shown by the following grants:
 - \$31,475,160 of Grant ID EDUFCC14.
 - \$52,501,560 of Grant ID EDUFCC15.
 - \$2,839,339 of Grant ID EDUFLU15.
 - \$530,842 of Grant ID EDUFSA14.

These errors were brought to OBM's attention by the auditor and the State's Schedule was adjusted prior to submission to the federal government.

By not accurately identifying and reporting federal expenditures, there is an increased risk that not only program activity but also the State of Ohio's Schedule of Expenditures of Federal Awards may be materially misstated. This, in turn, may result in a reduction in program funds and/or fines and penalties from the federal grantor agency.

Based on discussion with management and review of supporting documentation, it appears the variances were caused by ineffective reviews of the information reported and certified as accurate. In addition, the award letters from the U.S. Department of Agriculture for these programs listed only two CFDA numbers (10.555 and 10.558), which could have contributed to the Schedule being completed incorrectly.

We recommend the Department review and evaluate its current process for compiling, reviewing, and approving the Schedule and Attachments to help ensure the information and amounts reported to OBM are complete and accurate. In addition, management should strengthen their reviews and monitor the compilation of the Schedule and Attachments to help ensure the amounts being reported are accurate, properly reported for each federal program, include all federal programs, and reconcile to OAKS.

These reviews should include, but not be limited to, a comparison of the previous Schedule and Attachment to identify any significant or unusual variances in program or total federal expenditures. Any significant variances should be investigated to determine if amounts are accurate or require revision prior to submitting the Schedule and Attachment to OBM. If uncertainty exists in how to report something, the Department should seek technical advice from external sources such as OBM or the federal awarding agencies.

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEPARTMENT OF EDUCATION

10. CAREER AND TECHNICAL EDUCATION – ADMINISTRATIVE LEVEL OF EFFORT

<i>Finding Number</i>	2015-016
<i>State Agency/Number</i>	EDU-10
<i>CFDA Number and Title</i>	84.048 – Career and Technical Education – Basic Grants to States
<i>Federal Agency</i>	Department of Education
<i>Compliance Requirement</i>	Matching, Level of Effort, Earmarking

SIGNIFICANT DEFICIENCY

20 USC 2413 states:

(a) GENERAL RULE

Except as provided in subsection (b), for each fiscal year for which an eligible agency receives assistance under this chapter, the eligible agency shall provide, from non-Federal sources for the costs the eligible agency incurs for the administration of programs under this chapter, an amount that is not less than the amount provided by the eligible agency from non-Federal sources for such costs for the preceding fiscal year.

(b) EXCEPTION

If the amount made available from Federal sources for the administration of programs under this chapter for a fiscal year (referred to in this section as the 'determination year') is less than the amount made available from Federal sources for the administration of programs under this chapter for the preceding fiscal year, then the amount the eligible agency is required to provide from non-Federal sources for costs the eligible agency incurs for the administration of programs under this chapter for the determination year under subsection (a) shall bear the same ratio to the amount the eligible agency provided from non-Federal sources for such costs for the preceding fiscal year, as the amount made available from Federal sources for the administration of programs under this chapter for the determination year bears to the amount made available from Federal sources for the administration of programs under this chapter for the preceding fiscal year.

During state fiscal year 2015, the Department disbursed approximately \$41.8 million for the Career and Technical Education - Basic Grants to States program. Although the Department had controls in place over the level of effort allocation process, the Department had misinterpreted how the requirement was to be applied when there is a reduction in federal funding from the previous year. As a result, the controls in place did not detect or prevent the following noncompliance. The grant award for program year (PY) 2012 expired during the audit period. For PY 2012, the Department spent \$2,982,543 in total administrative costs, with \$1,460,748 from federal funds. For PY 2011, the Department spent \$4,325,500 in total administrative costs, with \$2,092,765 from federal funds.

Since the administrative funds from federal sources decreased by 30.2% from PY 2011 to PY 2012, the Department was required to provide 69.8% of the PY 2011 federal funds for administration costs from non-federal funds in PY 2012, or \$1,558,447. However, the Department provided only \$1,521,795 from non-federal funds, which was \$36,651 (2.4%) less than required

By not complying with the administrative funding level of effort requirements, the Department risks federal funding being reduced, taken away, having to repay part of the federal funds, or other sanctions being imposed by the federal grantor agency. Based on discussions with management, the Department did not realize it had to meet the level of effort amount from non-federal sources when there is a decrease in funding and thus, did not reserve enough state funds for the administration of this grant.

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEPARTMENT OF EDUCATION

10. CAREER AND TECHNICAL EDUCATION – ADMINISTRATIVE LEVEL OF EFFORT (Continued)

We recommend the Department evaluate its current control procedures over the administrative level of effort required for this program and update them as necessary to reasonably ensure compliance. These procedures could include periodically monitoring the level of spending for administrative costs incurred from non-federal sources to determine if the Department is on track to meet the required level of effort, allowing them to take necessary action to ensure compliance if a shortfall in non-federal spending appears imminent. We also recommend the Department contact the federal agency if it is uncertain about how to calculate the required level of effort.

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO ENVIRONMENTAL PROTECTION AGENCY

1. CWSRF & DWSRF – INVOICE REVIEWS

<i>Finding Number</i>	2015-017
<i>State Agency/Number</i>	EPA-01
<i>CFDA Number and Title</i>	66.458 – Clean Water State Revolving Fund Cluster 66.468 – Drinking Water State Revolving Fund Cluster
<i>Federal Agency</i>	Environmental Protection Agency
<i>Compliance Requirement</i>	Activities Allowed or Unallowed, Allowable Costs and Cost Principles

MATERIAL WEAKNESS

It is management's responsibility to design and implement an internal control structure capable of providing reasonable assurance that objectives are being achieved. As the prime recipient of the Capitalization Grants for Clean Water State Revolving Funds (CWSRF) and Drinking Water State Revolving Funds (DWSRF) programs, the Ohio Environmental Protection Agency (EPA) must implement internal controls that reasonably ensure amounts paid to borrowers (usually local government agencies), through the Ohio Water Development Authority (OWDA), are processed accurately, completely, and in compliance with the applicable federal laws and regulations.

During state fiscal year 2015, EPA expended approximately \$75.8 million from the CWSRF program and \$21.9 million from the DWSRF program for local government water construction projects. Ohio Rev. Code §6111.036 requires EPA and OWDA share responsibility for the management of these programs. An interagency agreement between EPA and OWDA establishes the responsibilities to be performed by each agency.

Prior to providing funding for a project, EPA enters into a loan agreement with the borrower and prepares a disbursement protocol agreement, including the borrower, project name and identification number, eligible costs, source of funds, and the project contingency cost which is an amount that can only be disbursed after written authorization from EPA. After receiving invoices for construction projects, the borrower completes the electronic Fund Payment Request form (FPR) via OWDA's website. OWDA then reviews the FPR for reasonableness and compliance with the loan agreement; approves the FPR; disburses the funding to the borrower; and, forwards the documentation to EPA. EPA coordinators then review the documentation to ensure the disbursement was allowable and electronically save a copy of the FPR to the Financial Aid Management System (AIMS). The coordinators check the verification box in AIMS to evidence their review of the disbursement. However, EPA does not have a policy that outlines the timeframe in which disbursement information should be reviewed once received from OWDA. Furthermore, nine of 120 (7.5%) disbursements (five DWSRF and four CWSRF) selected for testing were not approved timely within AIMS. The disbursements were approved from 36 to 391 days after the payment date, with an average of 155 days.

Without performing timely reviews of invoices and FPRs submitted for reimbursement by the borrower or performing other monitoring activities prior to the disbursement taking place, EPA cannot be reasonably assured OWDA's review process ensured payments made to borrowers were for allowable activities. In addition, if EPA does not perform timely reviews, there is an increased risk that noncompliance will not be identified in a timely manner. As a result, there is a risk federal funding will be reduced, taken away, or other sanctions will be imposed by the federal grantor agency. Based on discussions with management, EPA was not notified of some of the disbursements completed by OWDA due to oversight. In addition, several staff reassignments occurred at EPA which may have led to oversight.

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO ENVIRONMENTAL PROTECTION AGENCY

1. CWSRF & DWSRF – INVOICE REVIEWS (Continued)

We recommend EPA reinforce and strengthen existing controls to ensure disbursements and related documentation are reviewed timely. This should include, but not be limited to, implementing a policy that outlines the timeframe in which disbursement information is to be reviewed once it is received from OWDA. This policy should be formally documented and communicated to all employees. We also recommend management implement a periodic monitoring procedure which would allow them to ensure documentation for all disbursements completed by OWDA has been received. Finally, management should perform periodic monitoring over the disbursement process to ensure the control procedures performed by EPA staff are operating effectively and performed timely and consistently.

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEPARTMENT OF JOB AND FAMILY SERVICES

1. SNAP CLUSTER – INELIGIBLE RECIPIENTS

<i>Finding Number</i>	2015-018
<i>State Agency/Number</i>	JFS-02
<i>CFDA Number and Title</i>	10.551/10.561 – SNAP Cluster
<i>Federal Agency</i>	Department of Agriculture
<i>Compliance Requirement</i>	Activities Allowed or Unallowed, Allowable Costs/Cost Principles, Eligibility

QUESTIONED COSTS

\$31,476

7 CFR 272.10(b)(1)(i) states, in part, that a State's Food Stamps (now SNAP) system should:

Determine eligibility and calculate benefits or validate the eligibility worker's calculations by processing and storing all casefile information necessary for the eligibility determination and benefit computation (including but not limited to all household members' names, addresses, dates of birth, social security numbers, individual household members' earned and unearned income by source, deductions, resources and household size)...

7 CFR 272.14(c)(1) requires that States shall provide a system for:

Comparing identifiable information about each household member against information from databases on deceased individuals. States shall make the comparison of matched data at the time of application and no less frequently than once a year.

Department management is responsible for implementing a system to ensure duplicate benefit payments are not made to recipients and that information on deceased individuals is updated to CRIS-E in a timely manner.

During state fiscal year 2015, the Department had expenditures of approximately \$2.5 billion in SNAP Cluster benefits to recipients. Benefits issued are loaded onto an Electronic Benefits Transfer (EBT) card and can then be claimed/used at approved retailers to purchase food items. The Department uses the CRIS-E system to determine eligibility for SNAP recipients and their benefit amount. CRIS-E has edit checks in place to ensure one individual is not assigned multiple recipient numbers and receiving duplicate benefit payments.

Utilizing a listing of all recipients, all individuals on the recipient listing who had the same name and date of birth but different social security numbers and recipient numbers were identified; there were 49 instances related to 98 recipient numbers identified (and one of the social security numbers could not be validated in the Social Security Administration's subsystem). The Department issued an estimated \$99,028 in benefits to the 98 recipients; however, evidence was provided to show that a majority of these recipients were not issued benefits for any of the same months and no duplicate benefits were issued. The Department indicated that in a majority of these cases, the social security number was inaccurately entered initially and after the mistake was identified, the County Department of Job and Family Services (CDJFS) case worker entered the correct social security number and a new recipient number was generated. However, there were 12 instances related to 24 recipient numbers in which benefits, totaling \$17,878, were issued for the same months and the recipient could have received duplicate benefits. Since it cannot be determined which recipient case associated with the individuals includes accurate demographic information and therefore, a correct benefit amount, the total claimed by the 24 recipients will be questioned.

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEPARTMENT OF JOB AND FAMILY SERVICES

1. SNAP CLUSTER – INELIGIBLE RECIPIENTS (Continued)

In addition, under the current process, the Department receives files weekly from the United States Department of Commerce - National Technical Information Services' (NTIS) database listing all deceased individuals. The listing is stored within CRIS-E and when CRIS-E matches a new deceased record with existing recipients, an error alert is generated for the recipient's case file record and the CDJFS case worker is to review and verify the alert and take appropriate action. We obtained a listing of all deceased individuals from 2010 through 2014 from the Ohio Department of Health and then identified all deceased individuals on the recipient listing. There were 1,862 instances identified in which the deceased individual was issued benefits during the audit period. It is expected that some of these instances would occur since the Department is only required to perform the deceased match at least annually per 7 CFR 272.14(c)(1), thus resulting in a possibility of a 12 month lapse between date of death and the update of CRIS-E records. However, there were 36 instances in which the individual's date of death was prior to 2014 and, thus, the CRIS-E file should have been updated prior to January 1, 2015. The Department issued an estimated \$24,406 in benefits to these recipients; \$13,598 of which was claimed for nine of these recipients, resulting in questioned costs for the claimed amount.

If the Department does not consistently and timely work the CRIS-E alerts and ensure eligibility redeterminations and CRIS-E edit checks are working properly, the Department may not be able to fully support or ensure benefits were issued/claimed only by eligible recipients in compliance with federal rules and regulations. Additionally, if one individual is assigned multiple recipient numbers, there is a higher risk the individual will receive duplicate benefit payments. This could result in a reduction of federal funding or sanctions imposed by the federal grantor agency. Based on discussions with Department management, the errors were due to staff keying entries during initial application and untimely resolution of CRIS-e alerts at the CDJFS due to lack of staffing.

We recommend the Department evaluate its current policies and procedures to reasonably ensure the recipient information in CRIS-E is accurate, that all CRIS-E alerts are worked properly and timely, and benefits issued are based on current information. The Department should investigate the recipients specifically identified in this comment to ensure any necessary repayments or additional actions are taken. In addition, Department management should perform periodic reviews of CRIS-E to ensure edit checks are working as intended and possible duplicate payments are identified.

2. UNEMPLOYMENT INSURANCE – PERIOD OF AVAILABILITY

<i>Finding Number</i>	2015-019
<i>State Agency/Number</i>	JFS-03
<i>CFDA Number and Title</i>	17.225 – Unemployment Insurance
<i>Federal Agency</i>	Department of Labor
<i>Compliance Requirement</i>	Period of Availability

QUESTIONED COSTS

\$23,246

The uniform administrative requirements for grants to state and local governments are contained in 29 CFR 97 for Department of Labor (DOL) programs. 29 CFR 97.3 defines an obligation as:

. . . the amounts of orders placed, contracts and subgrants awarded, goods and services received, and similar transactions during a given period that will require payment by the grantee during the same or a future period.

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEPARTMENT OF JOB AND FAMILY SERVICES

2. UNEMPLOYMENT INSURANCE – PERIOD OF AVAILABILITY (Continued)

29 CFR 97.23 relates to period of availability (POA) for federal funds provided by DOL, and states:

- (a) *General.* Where a funding period is specified, a grantee may charge to the award only costs resulting from obligations of the funding period unless carryover of unobligated balances is permitted, in which case the carryover balances may be charged for costs resulting from obligations of the subsequent funding period.

In addition, the Unemployment Insurance (UI) Program Annual Funding Agreement for Fiscal Year 2015 funds, part 5, provides additional guidance related to POA. Regarding administrative costs, the agreement states, in part:

UI Administration – These funds are available for obligation by the Grantee (State) beginning October 1, 2014 through December 31, 2015, unless an extension is otherwise approved.

The Department receives federal funds from the DOL to administer the UI federal program. Typically, this federal program awards funds on a federal fiscal year (FFY), which begins October 1 and ends on the following September 30. The POA requirement comprises three components: the timeframe to obligate, the timeframe to liquidate (make payment on) the funds, and the timeframe to claim the funds.

Using the requirements above, we analyzed all of the UI expenditure transactions listed in OAKS (Ohio Administrative Knowledge System) made by the Department in state fiscal year 2015. This analysis identified several disbursements, totaling \$23,246 in federal funds, which were obligated outside of the POA, resulting in questioned costs. The related costs were obligated prior to the start of the 2015 UI grant award (JFSFUI15) on October 1, 2014; however, the expenditures were charged to the 2015 grant. These transactions related primarily to administrative costs (e.g. purchased personal services).

If the Department does not obligate and liquidate its federal funds within the time limits established by federal regulations, the Department could be required to repay those funds to the federal government. Noncompliance of federal requirements could also subject the Department to fines, sanctions, and/or a reduction in future federal funding. Based on our discussions with management, various processing issues occurred with the vouchers causing payment delays and the incorrect grant being charged.

We recommend the Department evaluate its current policies and procedures relating to processing of program expenditure transactions and update them, as necessary, to reasonably ensure compliance with the POA requirements. These policies and procedures should be communicated to all personnel involved and responsible for processing and reviewing program expenditure transactions. The Department should also more closely monitor cash requests and subsequent expenditures to help ensure that funds are spent within the grant's period of availability. In the event the POA requirements cannot be met for a particular transaction or set of transactions, the Department should seek to obtain a waiver from complying with the stated requirements from the federal government.

<i>Federal Agency</i>	Department of Health and Human Services
<i>Compliance Requirement</i>	Eligibility

QUESTIONED COSTS

\$5,860

NONCOMPLIANCE AND MATERIAL WEAKNESS

45 CFR 98.20(b) states:

Pursuant to §98.16(g)(5), a grantee or other administering agency may establish eligibility conditions or priority rules in addition to those specified in this section and §98.44 so long as they do not:

- (1) Discriminate against children on the basis of race, national origin, ethnic background, sex, religious affiliation, or disability;
- (2) Limit parental rights provided under Subpart D; or
- (3) Violate the provisions of this section, §98.44, or the Plan. In particular, such conditions or priority rules may not be based on a parent's preference for a category of care or type of provider. In addition, such additional conditions or rules may not be based on a parent's choice of a child care certificate.

In addition, 45 CFR 98.42(a) states “Lead Agencies shall establish, and periodically revise, by rule, a sliding fee scale(s) that provides for cost sharing by families that receive CCDF child care services.” Furthermore, 45 CFR 98.67(a) states “Lead Agencies shall expend and account for CCDF funds in accordance with their own laws and procedures for expending and accounting for their own funds.” The Department has incorporated its laws and procedures for administering the Child Care Development Fund (CCDF) Cluster, including caretaker application and copayment calculation provisions, within Ohio Administrative Code (OAC) 5101:2-16. It is management's responsibility to design and implement internal controls to reasonably ensure compliance with federal and state laws and regulations.

During state fiscal year 2015, the Department disbursed approximately \$239.3 million in federal assistance from the CCDF Cluster program based on information provided by the 88 CDJFS. The CDJFS case workers were to obtain and maintain a completed and signed application, determine the income and other key information from each applicant, and enter this information into the State's Child Care Information Data System (CCIDS) for eligibility and copay/benefit amount determinations. However, the controls did not prevent or detect the following errors noted during testing of 60 CCDF Cluster case files for eligibility and compliance with federal and state rules and regulations at five selected CDJFS:

- Eight (13.3%) did not support the application and/or income information in CCIDS, as follows:
 - For two cases (one at Cuyahoga and one at Franklin), the CDJFS could not provide support for all of the income reported in CCIDS; therefore, the copayment amount appears to be incorrectly calculated and the parent's/guardian's share of child care costs was more than it should have been. This resulted in the recipients receiving \$335 less in federal assistance for the state fiscal year than what they were eligible for.

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEPARTMENT OF JOB AND FAMILY SERVICES

3. CCDF CLUSTER – COPAYMENT/BENEFIT AMOUNTS (Continued)

- For one case (Franklin), the CDJFS incorrectly entered the recipient's income; therefore, the copayment amount appears to be incorrectly calculated and the parent's/guardian's share of child care costs was more than it should have been. This resulted in the recipient receiving \$51 less in federal assistance for the state fiscal year than what they were eligible for.
- For five cases (three at Montgomery, one at Cuyahoga, and one at Franklin), the CDJFS did not provide the complete application; therefore, the family size and/or child's age entered into CCIDS and used in the eligibility determination and/or copayment calculation could not be verified. The CDJFS provided documentation to support the accuracy of the income amounts entered into CCIDS in all five of these cases.
- One (1.7%) (Franklin) did not support the eligibility determination made in CCIDS. The recipient was receiving child care benefits as the CDJFS had indicated in CCIDS the child was eligible for protective child care. However, the county had no protective child care case plan on file, as required by OAC 5101:2-16-30 for a protected child to be considered eligible. As a result, we will question all benefits paid to the child care provider on the recipient's behalf, totaling \$5,860 (projected to an amount greater than \$10,000).

Under these conditions, the Department risks overpaying/underpaying federal monies to child care providers. This condition may also indicate that preventative controls of the subrecipients and/or monitoring controls of the Department require updating to assure compliance with federal regulations and benefit payments are made for the proper amounts to or on behalf of eligible recipients. This increases the risk the Department, which is responsible for the actions of its subrecipients, may be subject to sanctions or other penalties and a repayment of part of the grant award amount or reductions in future awards. Based on discussions with CDJFS management, the errors were due to staff oversight.

We recommend Department management evaluate the circumstances that allowed the incorrect payments to occur and the existing controls at both the State and CDJFS levels to identify where improvements should be made to minimize the risks of inaccurate copayment determinations, resulting in incorrect payments of federal funds. These controls may include:

- Enhancements or additional edit checks in the automated systems used to determine eligibility, benefits, and copayments.
- Additional training and technical assistance to subrecipients to help facilitate compliance with laws and regulations of the federal programs and to help ensure they are maintaining the complete application.
- Requiring the CDJFS randomly select cases throughout the year to help ensure the assessed copayments are accurate, especially those that are handled by inexperienced or new employees.

We also recommend the Department periodically monitor the established controls to determine if they are working as intended by management. We further recommend the Department investigate the cases listed above and take whatever actions are necessary to recover inappropriately spent federal and state funds and ensure any underpayments have been properly rectified.

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEPARTMENT OF JOB AND FAMILY SERVICES

4. IT – IEVS DUE DATES AND RESULT CODE ERRORS

<i>Finding Number</i>	2015-021
<i>State Agency/Number</i>	JFS-05
<i>CFDA Number and Title</i>	10.551/10.561 – SNAP Cluster 93.767 – Children’s Health Insurance Program 93.775/93.777/93.778 – Medicaid Cluster
<i>Federal Agency</i>	Department of Agriculture Department of Health and Human Services
<i>Compliance Requirement</i>	Activities Allowed or Unallowed, Allowable Costs, Eligibility, Special Tests and Provisions

NONCOMPLIANCE AND MATERIAL WEAKNESS

7 CFR 272.8(c)(2), regarding SNAP (formerly Food Stamps) IEVS alerts, requires that state agencies initiate and pursue the actions on recipient households specified in paragraph (c)(1) of this section so that the actions are completed within 45 days of receipt of the information items.

However, several years ago, the Department was granted a waiver by the federal grantor agency allowing the state of Ohio to extend the federal 45-day requirement to 90 days. The 90-day requirement was codified into OAC 5101:4-7-09 (F)(4)and states:

County agencies shall initiate, pursue and complete the actions specified in this paragraph within ninety days from receipt of the information.

42 CFR 435.952 states the following regarding Medicaid IEVS alerts (CHIP follows these regulations as well):

- (c) Except as specified in §435.953 of this subpart and paragraph (d) of this section, for beneficiaries, the agency must, within 45 days of receipt of an item of information, request verification (if appropriate), determine whether the information affects eligibility or the amount of medical assistance payment, and either initiate a notice of case action to advise the recipient of any adverse action the agency intends to take or make an entry in the case file that no further action is necessary.
- (d) Subject to paragraph (e) of this section, if the agency does not receive requested third party verification with-in the 45-day period after receipt of information, the agency may determine whether the information affects eligibility or correct amount of medical assistance payment after the 45-day period. . . .
- (e) The number of determinations delayed beyond 45 days from receipt of an item of information (as permitted by paragraph (d) of this section) must not exceed twenty percent of the number of items of information for which verification was requested.

The Department has implemented the Income and Eligibility Verification System (IEVS) which compares income, as reported by the recipients, to information maintained by outside (i.e. collateral) sources for the SNAP, CHIP, and Medicaid programs with total expenditures of approximately \$2.7 billion, \$336.1 million, and \$19.6 billion, respectively, in state fiscal year 2015. Information that does not appear to agree is communicated in the form of a CRIS-E alert, which is forwarded to the appropriate county for investigation.

During the state fiscal year 2015 audit, five counties were selected for testing for the timely completion of IEVS alerts in accordance with the federal regulations and ODJFS standards set forth in the IEVS CRIS-E Alert Processing Instruction Guide. These five counties (Cuyahoga, Franklin, Hamilton, Lucas, and Montgomery) represented approximately 45.7% of the nearly 1.5 million IEVS high priority alerts issued in state fiscal year 2015.

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEPARTMENT OF JOB AND FAMILY SERVICES

4. IT – IEVS DUE DATES AND RESULT CODE ERRORS (Continued)

However, nine of 60 (15%) IEVS high priority alerts tested at these five counties were not resolved by the mandated timeframe and there was no documentation for all nine alerts to indicate third-party verification was pending

These unresolved alerts related to SNAP, CHIP, and Medicaid benefits. Of the nine delinquent high priority alerts (two from Cuyahoga and seven from Franklin):

- Four were resolved one to 50 days beyond the due date; no additional recipient benefits appeared to be issued as a result of these errors.
- Three were resolved 51 to 500 days beyond the due date; no additional recipient benefits appeared to be issued as a result of these errors.
- Two were not resolved. Additional investigation by the ODJFS Bureau of Program Integrity showed that neither of these alerts related to Medicaid benefits would likely cause potential over payments for past or current eligibility.

In addition, five of 60 matches (8%) that were resolved after the due date did not have proper result codes and eight of 60 matches (13%) that were resolved timely did not have proper result codes. Result codes are entered by case workers to indicate the action taken to resolve the alert. No additional recipient benefits appeared to be issued as a result of these errors. Based on discussions with management, the alert resolution delinquencies and result code assignments were caused by:

- A lack of staff to complete the alerts timely.
- A lack of time for existing staff to complete the alerts in conjunction with their other assigned duties.
- Human error and possible lack of training when assigning proper result codes to resolved alerts.

Not completing the IEVS alerts within the established timelines increases the risk that benefits given to ineligible recipients or for inappropriate amounts will not be identified timely. This condition could adversely affect the Department's ability to comply with requirements of these Federal programs. Failure to comply with the requirements related to IEVS could also result in federal sanctions or penalties. Without adequate documentation and application of result codes, a reviewer cannot determine if an IEVS alert has been resolved in accordance with standards, which may lead to benefits being issued to ineligible recipients or benefits being paid in inappropriate amounts.

We recommend the Department work with the counties to implement control policies and procedures to reasonably ensure matches are completed by the due dates specified in the Federal regulations and IEVS CRIS-E Alert Processing Instruction Guide. These procedures must include reviews by the County IEVS Coordinator or other supervisory personnel (through CRIS-E) to monitor the status of IEVS alerts. Such requirements should be explicitly identified in the sub-grant agreements with the counties and include appropriate ramifications for noncompliance with the stated requirements. We also recommend the Department, as the pass-through entity, continue to monitor the activities of their county subrecipients during the award period to determine if they are following the established controls and are complying with the due date requirements. Finally, we recommend the Department take steps to ensure proper training be provided to case workers so that accurate result codes can be assigned as alerts are resolved.

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEPARTMENT OF JOB AND FAMILY SERVICES

5. SNAP CLUSTER AND TANF CLUSTER – ELIGIBILITY DOCUMENTATION

<i>Finding Number</i>	2015-022
<i>State Agency/Number</i>	JFS-06
<i>CFDA Number and Title</i>	10.551/10.561 – SNAP Cluster 93.558 – TANF Cluster
<i>Federal Agency</i>	Department of Agriculture Department of Health and Human Services
<i>Compliance Requirement</i>	Eligibility

NONCOMPLIANCE AND MATERIAL WEAKNESS (SNAP CLUSTER)

NONCOMPLIANCE AND SIGNIFICANT DEFICIENCY (TANF CLUSTER)

7 CFR 272.10(b)(1)(i), pertaining to the SNAP Cluster, states in part, that a State’s system should:

Determine eligibility and calculate benefits or validate the eligibility worker’s calculations by processing and storing all casefile information necessary for the eligibility determination and benefit computation (including but not limited to all household members’ names, addresses, dates of birth, social security numbers, individual household members’ earned and unearned income by source, deductions, resources and household size)...

45 CFR 206.10(a)(8), pertaining to public assistance programs, including TANF, states in part:

Each decision regarding eligibility or ineligibility will be supported by facts in the applicant’s or recipient’s case record...

...

When administering federal grant awards for the Department, management of each subrecipient County Department of Job and Family Services (CDJFS) is responsible for providing reasonable assurance only eligible individuals receive assistance and information reported to the Department is accurate, complete, and properly recorded in the Client Registry Information System – Enhanced (CRIS-E) to ensure appropriate eligibility determinations. Department management is responsible for monitoring CDJFS activities to help ensure they are in compliance with federal requirements.

During state fiscal year 2015, the Department had expenditures of approximately \$2.5 billion in SNAP Cluster benefits and \$273.7 million in TANF Ohio Works First (OWF) benefits to recipients based on information provided by the 88 CDJFS. Under the current process, the CDJFS are responsible for processing the application and related information for eligibility determinations and entering the information into CRIS-E. However, the CDJFS did not consistently enter or maintain documentation of eligibility information in CRIS-E, as indicated below.

- For three of 40 (7.5%) SNAP Cluster case files tested at the five CDJFS, the application and information did not support information entered into CRIS-E, as follows:
 - In two instances (one at Hamilton and one at Lucas), the unearned income amount for Child Support was not entered correctly into CRIS-E; however, the benefit issuance amount was not affected.
 - In one instance (Cuyahoga), the application could not be located; therefore, we could not verify that the application was accurately entered into CRIS-E. However, we were able to verify the income information was properly reflected in CRIS-E and therefore, the benefit amount was correctly calculated.

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEPARTMENT OF JOB AND FAMILY SERVICES

5. SNAP CLUSTER AND TANF CLUSTER – ELIGIBILITY DOCUMENTATION (Continued)

- For one of 40 (2.5%) TANF OWF case files tested at the five CDJFS, the application could not be located (Cuyahoga); therefore, we could not verify the application was accurately entered into CRIS-E. However, we were able to verify the income information was properly reflected in CRIS-E and therefore, the benefit amount was correctly calculated.

By not properly entering correct recipient income information into CRIS-E, inaccurate eligibility determinations could be made or recipient benefit payment amounts may be miscalculated. In addition, if complete applications are not maintained, the Department cannot reasonably ensure information in CRIS-E is accurate and eligibility determinations made are proper. This could result in questioned costs, reduction in federal funding, or sanctions imposed by the federal grantor agency.

If the Department does not consistently review the required documentation on file and in CRIS-E, the Department may not be able to fully support or ensure payments were made only to or on behalf of eligible recipients and that the Department complied with all federal rules and regulations. Based on discussions with CDJFS management, the errors were due to staff oversight.

We recommend the Department work with CDJFS management to ensure they have current policies and procedures to reasonably ensure the required documentation is on file and recipient income information entered into CRIS-E is accurate and complete. The Department should communicate to CDJFS management and their staff the importance of these policies and procedures and ensure the procedures are carried out as intended. In addition, Department management should perform periodic reviews of the case files to reasonably ensure case file information is properly maintained and accurately entered into the system.

6. CCDF CLUSTER – TYPE B HOME INSPECTIONS

<i>Finding Number</i>	2015-023
<i>State Agency/Number</i>	JFS-07
<i>CFDA Number and Title</i>	93.575/93.596 – CCDF Cluster
<i>Federal Agency</i>	Department of Health and Human Services
<i>Compliance Requirement</i>	Special Tests and Provisions – Health & Safety Requirements

NONCOMPLIANCE AND MATERIAL WEAKNESS

45 CFR 98.67 (a) states “Lead Agencies [primary grantee] shall expend and account for CCDF funds in accordance with their own laws and procedures for expending and accounting for their own funds.” The Department has incorporated its laws and procedures for administering the certification of Type B Homes within Ohio Administrative Code (OAC) 5101:2-14 which contains numerous requirements a provider must meet to be licensed as a Type B Home. The OAC defines Type B Homes as the permanent residence of the provider in which child care is provided for one to six children at one time and in which no more than three children are under two years of age.

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEPARTMENT OF JOB AND FAMILY SERVICES

6. CCDF CLUSTER – TYPE B HOME INSPECTIONS (Continued)

OAC 5101:2-14-03 (A) states, in part:

Each licensed type B home provider shall comply with the following inspections:

- (1) At least one inspection prior to the initial issuance of a provisional license.
- (2) At least three inspections during the provisional period, including at least two unannounced.
- (3) At least two inspections each state fiscal year after the issuance of the continuous license, including at least one unannounced.

When administering federal grant awards for the Department, management of each CDJFS is responsible for providing reasonable assurance only eligible entities are licensed as a child care provider and information reported to the Department is accurate and complete. Department management is responsible for monitoring CDJFS activities to help ensure they are in compliance with federal and state requirements.

During state fiscal year 2015, the Department provided approximately \$239.3 million in CCDF Cluster benefits to recipients based on information provided by the 88 CDJFS. However, the selected Type B Home files at the five tested CDJFS did not contain sufficient documentation to support Type B home eligibility determinations. Therefore, we could not determine if the CDJFS complied with these requirements, as detailed below.

- For 26 of 60 (43.3%) continuous license Type B Homes tested, the CDJFS did not document it performed the required two inspections, or the type performed, in accordance with OAC 5101:2-14-03(A)(3), as follows:
 - 20 had two or more inspections, but did not identify the type (three at Cuyahoga, three at Franklin, two at Hamilton, nine at Lucas, and three at Montgomery).
 - Six had only one inspection and did not identify the type (two at Cuyahoga, two at Franklin, and two at Lucas).
- For three of 60 (5%) initial license Type B Homes tested (all at Hamilton), the CDJFS did not document it performed the required three inspections, or the type performed, in accordance with OAC 5101:2-14-03(A)(2), as follows:
 - One had only two inspections; one was unannounced and the other did not identify the type.
 - Two had only one inspection and did identify the type.

Insufficient case file documentation increases the risk that amounts and other information reported to the federal grantor agencies may not reflect actual program activities. Without consistently performing the required inspections and obtaining, maintaining or reviewing the required documentation on file, the Department may not be able to fully support or ensure payments were made only to eligible providers and the Department complied with all federal rules and regulations, which could result in questioned payments. Based on discussions with CDJFS management, the errors were due to staff oversight. In addition, the standard home inspection form does not include an area to designate whether the inspection was unannounced.

We recommend the Department update the standard home inspection form to include a section for designating the type of inspection. We also recommend the Department work with CDJFS management to ensure they have current policies and procedures and/or implement new control procedures to reasonably ensure the required number and type of inspections of Type B homes are performed. The Department should communicate to CDJFS management and their staff the importance of these policies and procedures and ensure the procedures are carried out as intended. In addition, Department management should perform periodic reviews of the case files to reasonably ensure the required reviews are being performed and established controls and procedures are being followed by CDJFS personnel.

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEPARTMENT OF JOB AND FAMILY SERVICES

7. CCDF CLUSTER – TYPE B HOME LICENSES

<i>Finding Number</i>	2015-024
<i>State Agency/Number</i>	JFS-08
<i>CFDA Number and Title</i>	93.575/93.596 – CCDF Cluster
<i>Federal Agency</i>	Department of Health and Human Services
<i>Compliance Requirement</i>	Special Tests and Provisions – Health and Safety Requirements

NONCOMPLIANCE AND MATERIAL WEAKNESS

45 CFR 98.67 (a) states “Lead Agencies [primary grantee] shall expend and account for CCDF funds in accordance with their own laws and procedures for expending and accounting for their own funds.” The Department has incorporated its laws and procedures for administering the certification of Type B Homes within Ohio Administrative Code (OAC) 5101:2-14 which contains numerous requirements a provider must meet to be initially licensed as a Type B Home. The OAC defines Type B Homes as the permanent residence of the provider in which child care is provided for one to six children at one time and in which no more than three children are under two years of age.

OAC 5101:2-14-02(K) states, in part:

CDJFS requirements for application and issuance of licensure:

The CDJFS:

- (1) Shall recommend applications for approval or denial, to the Ohio department of job and family services (ODJFS) within one hundred days of receiving a completed application.

....

When administering federal grant awards for the Department, management of each CDJFS is responsible for ensuring Type B Home providers have submitted complete applications and the approval or denial recommendations of those applications are made timely to comply with OAC 5101:2-14-02(K). Department management is responsible for monitoring CDJFS activities to help ensure they are in compliance with federal and state requirements.

During state fiscal year 2015, the Department provided approximately \$239.3 million in CCDF Cluster benefits to recipients based on information provided by the 88 CDJFS. Upon receipt of the application, CDJFS personnel are to ensure it is complete and that all necessary documentation is included. Then the CDJFS personnel are to recommend the application for approval or denial to the Department. However, the CDJFS’ do not have consistent methods in place for tracking the date all application materials are received in order to ensure compliance with the OAC 5101:2-14-02(K). As a result, 25 of 60 (41.7%) Type B Home applications selected for testing at the five tested CDJFS were not recommended for approval/denial within the required 100 days of receipt (15 Cuyahoga, three Franklin, four Hamilton, and three Lucas). The number of days in excess of the requirement ranged from nine to 253 days, with an average of 57 days.

By not complying with OAC 5101:2-14, the Department increases the risk that Type B Home eligibility determinations will be delayed. In addition, if the Department is not complying with rules it implemented to meet federal requirements, the Department risks federal funding being reduced, taken away, or other sanctions imposed by the federal grantor agency. Based on discussions with CDJFS management, the errors were due to staff oversight.

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEPARTMENT OF JOB AND FAMILY SERVICES

7. CCDF CLUSTER – TYPE B HOME LICENSES (Continued)

In addition, in January 2014, the OAC requirement changed from 120 days to 100 days making a quicker turnaround necessary and making it more difficult for the CDJFS to meet the requirement.

We recommend the Department work with CDJFS management to ensure they have current policies and procedures and/or implement new control procedures to reasonably ensure the recommendations for approval or denial of Type B Home applicants is made timely and in compliance with requirements. The procedures implemented could include a mechanism for tracking application receipt and approval/denial dates. The Department management should perform periodic reviews of the case files to reasonably ensure the applications are being recommended for approval or denial timely and procedures are being followed by CDJFS personnel.

Auditor of State’s Conclusion

The Department’s response to this finding included within the State of Ohio Corrective Action Plan, which is located on pages 108 and 109, required an Auditor of State’s Conclusion.

Pertaining to the Hamilton County portion of the corrective action plan, only four errors were noted, not seven. Preliminary results were submitted to Hamilton County in January 2016 and additional documentation they were able to provide to support when a “completed” application was received was considered; however, it did not support the County’s assertion that only one application was not recommended timely. Therefore, the finding remains as stated above.

8. CCDF CLUSTER – TYPE A HOMES/CENTERS

<i>Finding Number</i>	2015-025
<i>State Agency/Number</i>	JFS-09
<i>CFDA Number and Title</i>	93.575/93.596 – CCDF Cluster
<i>Federal Agency</i>	Department of Health and Human Services
<i>Compliance Requirement</i>	Special Tests and Provisions

NONCOMPLIANCE AND MATERIAL WEAKNESS

5 CFR 98.67 (a) states “Lead Agencies [primary grantee] shall expend and account for CCDF funds in accordance with their own laws and procedures for expending and accounting for their own funds.” The Department has incorporated its laws and procedures for administering the licensure of child care centers and type A homes within Ohio Administrative Code (OAC) 5101:2-12 and 5101:2-13 which contains numerous requirements an applicant must meet to be licensed as a child care center or type A home. The OAC defines child care centers as the permanent residence of the licensee or administrator in which child care is provided, with or without compensation, for seven to twelve children at one time, or any place in which child care is provided for thirteen or more children at one time. The OAC also defines Type A homes as the permanent residence of the administrator in which child care is provided for seven to twelve children at one time or for four to twelve children at one time if four or more children at one time are under two years of age.

OAC 5101:2-12-04 initial application and issuance of a provisional license for child care centers, states:

- (A) The person desiring to establish or operate a child care center shall do all of the following for a provisional license:

...

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEPARTMENT OF JOB AND FAMILY SERVICES

8. CCDF CLUSTER – TYPE A HOMES/CENTERS (Continued)

(4) Complete and submit the JFS 01210 “Application for Child Care License”...

...

...

(E) The center shall comply with an inspection by ODJFS to determine that the requirements of Chapter 5104 of the Revised Code and Chapter 5101:2-12 of the Administrative Code are met.

(F) The center shall correct any noncompliances listed in the written inspection report conducted pursuant to paragraph (E) of this rule by the date noted on the report.

OAC 5101:2-12-11(B)(2) and OAC 5101:2-13-11(B)(2), states that fire department approval for licensed child care centers and licensed type A homes shall be obtained at least once annually within twelve months from the date of the last inspection report. In addition, OAC 5101:2-13-26, statement of nonconviction and criminal records check for licensed type A homes, states in part, “The JFS 01328 “Statement of Nonconviction for Child Care Centers and type A Homes” (rev. 7/2010) shall be completed and kept on file at the type A home...”. It is management’s responsibility to provide reasonable assurance only eligible entities are licensed and all inspections are completed in accordance with laws and regulations.

During state fiscal year 2015, the Department provided approximately \$239.3 million in CCDF Cluster benefits to recipients. As part of the licensure process, potential child care centers and type A homes (providers) are to complete and sign an application and other required forms and comply with an initial inspection to be conducted by the Department.

Department personnel are to review the application documentation and required forms to ensure they are complete and signed. In addition, inspections are to be conducted by the Department over all providers as specified in the OAC to reasonably ensure the provider is in compliance with all code sections. After the inspection is completed, the Department personnel are to prepare and sign a compliance report, transmittal letter, and recommendation form. However, the procedures were not consistently performed and documented to support the licensure of the providers; therefore, we could not determine if the Department complied with these requirements, as detailed below.

- For 16 of 60 (26.7%) continuous license providers tested (two type A homes and 14 centers), although a current inspection was on file, the inspection was not completed within 12 months of the previous fire inspection. The days late ranged from 12 to 456 days and averaged 142 days.
- For three of 25 (12%) initial license providers tested (one type A homes and two centers), the inspection transmittal letter was not signed by the Department personnel to indicate the inspection was completed and reviewed.
- For one of 25 (4%) initial license providers tested (a Center), the file did not contain the required response to noncompliance findings identified on the initial inspection.
- For one of 25 (4%) initial license providers tested (a Center), the file did not contain an application signed by the owner or authorized representative.
- For one of 25 (4%) initial license providers tested (a Type A Home), the file did not contain a Statement of Nonconviction form.

If sufficient controls are not performed and adequate support documentation is not maintained, there is an increased risk that providers will not comply with requirements and the Department will not identify provider noncompliance within its established procedures. In addition, if fire inspections are not completed within twelve months as required, there is a risk the provider will not be in compliance with fire codes and the violations will not be identified and corrected timely. Without complying with all requirements outlined in the OAC, the Department may not be able to fully support or reasonably ensure payments were made only to eligible providers. Upon discussion with management, the Department only ensures that a current fire inspection report is on file as it would be more difficult for small businesses to comply with the requirements. The other errors noted were due to staff oversight.

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEPARTMENT OF JOB AND FAMILY SERVICES

8. CCDF CLUSTER – TYPE A HOMES/CENTERS (Continued)

We recommend the Department periodically review its current processes and procedures related to provider licensing, update them as necessary, and ensure they are consistently followed and documented. Specifically, we recommend the Department implement procedures to reasonably ensure:

- Fire inspections are conducted within 12 months of the previous inspection. These procedures could include verifying that the current fire inspection date is within 12 months of the previous fire inspection report during the Department’s inspection of the provider.

- Follow up with Type A Homes and/or child care centers that do not respond to noncompliance findings identified on an inspection is performed timely. The Department should maintain documentation to support follow up with the unresponsive providers and resolution of the findings.
 - Signed application documentation is maintained.
 - Compliance inspections are properly completed and reviewed and all documentation to evidence the procedures performed is maintained.

9. REPORTING – VARIOUS PROGRAMS

<i>Finding Number</i>	2015-026

<i>CFDA Number and Title</i>	10.551/10.561 SNAP Cluster 17.225 Unemployment Insurance 17.207/17.801 Employment Services 17.258/17.259/17.278 WIA Cluster 93.558 TANF Cluster 93.563 Child Support Enforcement 93.658 Foster Care – Title IV-E
<i>Federal Agency</i>	Department of Agriculture Department of Labor Department of Health and Human Services
<i>Compliance Requirement</i>	Reporting

MATERIAL WEAKNESS (UNEMPLOYMENT INSURANCE)

NONCOMPLIANCE AND MATERIAL WEAKNESS (ALL OTHER PROGRAMS LISTED ABOVE)

45 CFR 92.20 contains the Department of Health and Human Services uniform administrative requirements for grants to state and local governments relating to financial administration and standards for financial management systems. The Department of Agriculture and the Department of Labor implemented similar uniform administrative requirements in 7 CFR 3016.20 and 29 CFR 97.20, respectively. Specifically, 45 CFR 92.20 states, in part:

- (a) A State must expand and account for grant funds in accordance with State laws and procedures for expending and accounting for its own funds. Fiscal control and accounting procedures of the State, as well as its subgrantees and cost-type contractors, must be sufficient to—
 - (1) Permit preparation of reports required by this part and the statutes authorizing the grant, and
 - (2) Permit the tracing of funds to a level of expenditures adequate to establish that such funds have not been used in violation of the restrictions and prohibitions of applicable statutes.

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEPARTMENT OF JOB AND FAMILY SERVICES

9. REPORTING – VARIOUS PROGRAMS (Continued)

(b) The financial management systems of other grantees and subgrantees must meet the following standards:

- (1) Financial reporting. Accurate, current, and complete disclosure of the financial results of financially assisted activities must be made in accordance with the financial reporting requirements of the grant or subgrant.
- (2) Accounting records. Grantees and subgrantees must maintain records which adequately identify the source and application of funds provided for financially- assisted activities. These records must contain information pertaining to grant or subgrant awards and authorizations, obligations, unobligated balances, assets, liabilities, outlays or expenditures, and income.

It is management's responsibility to design and implement internal controls to reasonably ensure compliance with laws and regulations and to ensure management's objectives are achieved.

The Department's Bureau of Grants Management and Federal Reporting Services is responsible for the preparation of various federal financial expenditure reports, including the quarterly Foster Care Assistance CB-496, Employment Services ETA-9130, TANF-196/196R, WIA ETA-9130, Child Support Enforcement OCSE-396A, and SNAP SF-425 reports. Department policy calls for all reports to go through a two-level review process prior to submission to the Federal Government.

These reviews are documented in the Sharepoint system. However, four of 60 (6.7%) reports selected for testing did not show proper evidence of the two-level approvals. Specifically:

- In two instances involving both the Unemployment Insurance and WIA programs, the history section of SharePoint did not show both levels of review, though there was evidence of the second level review on the final report.
- In one instance involving the Employment Services program, there was no first level review.
- In one instance involving the WIA program, there was evidence of both levels of review; however, the report was not included in SharePoint at the time of our review so we could not verify this report was actually reviewed as part of this two level review.

In addition, the following errors were noted for the reports listed above:

- For one of two (50%) Foster Care Assistance – Title IV-E CB-496 quarterly reports selected for testing (December 2014), there were errors with five of the line items on the report, resulting in \$6,903,928 in excluded costs broken down into the following five line items of the report:
 - Net Maintenance Payments - \$30,722
 - Total Case Planning & Management - \$4,872,516
 - Total Eligibility Determinations - \$201,119
 - Total Pre-Placement Activities - \$1,797,531
 - Training (Transitional FFP - 75%) - \$2,040
- For one of three (33%) Employment Services ETA-9130 quarterly reports selected for testing (March 2015), the Department did not properly correct two errors it had identified as noted below:
 - The amount reported under the 10% column for accruals and the 90% for Foreign Labor Overage were both improperly reported. After the submission of the report, the Department had identified these errors; however, it only corrected the incorrect amount reported for Foreign Labor Overage. As a result, the amount reported as accruals under the 10 percent column remained incorrect.
 - The amount reported as "Adjustments from December 2014" on the Wagner Peyser Summary included only one of the two adjustments that were to be made. As a result, this adjustment line item amount was understated by \$174,596.

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEPARTMENT OF JOB AND FAMILY SERVICES

9. REPORTING – VARIOUS PROGRAMS (Continued)

As a result of these two errors, the amounts reported on the Employment Services ETA-9130 March 2015 quarterly report as the federal share of expenditures for this period was overstated by \$176,461.

- For one of two (50%) TANF ACF-196 quarterly reports selected for testing (September 2014), the amount reported as Non-Recurrent Short Term Benefits this Period was understated by \$6,000.
- For one of 12 (8.3%) WIA ETA-9130 quarterly reports selected for testing (June 2015), the amount reported on the ETA-9130 for Statewide Dislocated Workers as Total Administrative Expenditures was understated by \$4,018.
- For the two (100%) Child Support Enforcement OCSE-396A reports selected for testing:
 - In the September 2014 quarterly report, the amount reported as Interest, Other Income for Current Quarter Claims was understated by \$534 because the amount for Star Ohio Investment Income was not included in the total.
 - In the December 2014 quarterly report, the amount reported as Program Income for fees from the Prior Quarter was overstated by \$105. The amount should have been reported as (\$52); however, it was reported as \$53.
- For one of two (50%) SNAP SF-425 quarterly reports selected for testing (June 2015), the amount reported as Total Outlays this Period for Fraud Control was overstated by \$107. In addition, the amount reported as Total Outlays this Period for Outreach was overstated by \$58. As a result of these two errors, the amount reported as Total Outlays for this Period was overstated by \$165.

A lack of adequate internal controls over federal reporting increases the risk that reports submitted to the federal grantor agency are inaccurate. These inaccuracies could affect current and future funding received by the Department since the information contained within the reports is used by the federal grantor agency in determining the types and amounts of funding for each state. Based on discussions with management, these errors were due to technical issues with SharePoint, a missing page of support documentation, and oversight. Management stated they planned to correct these errors in the next report submission.

We recommend the Department evaluate current procedures and implement additional policies and procedures as necessary to provide reasonable assurance the data being reported for all federal programs is reasonable and accurate and agrees to supporting documentation. Specifically, the Department should implement procedures to ensure the amounts included in the report are properly reported as either positive or negative numbers and that all identified corrections are included in the next submitted report. Finally, the Department should implement a procedure to ensure there are two levels of review for these reports prior to submission to the federal grantor agency, and that these reviews are evidenced in some manner.

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEPARTMENT OF JOB AND FAMILY SERVICES

10. CASH MANAGEMENT – ADOPTION ASSISTANCE AND SOCIAL SERVICES BLOCK GRANT

<i>Finding Number</i>	2015-027
<i>State Agency/Number</i>	JFS-11
<i>CFDA Number and Title</i>	93.659 – Adoption Assistance 93.667 – Social Services Block Grant
<i>Federal Agency</i>	Department of Health and Human Services
<i>Compliance Requirement</i>	Cash Management

NONCOMPLIANCE AND SIGNIFICANT DEFICIENCY

U.S. Treasury regulations, 31 CFR part 205, which implemented the Cash Management Improvement Act of 1990 (CMIA), require state recipients to enter into agreements which prescribe specific methods of drawing down federal funds (funding techniques) for selected large programs. The Department's Adoption Assistance and Social Services Block Grant (SSBG) programs are covered by such an agreement. The fiscal year 2015 CMIA Agreement between the State of Ohio and the United States Department of the Treasury specifically requires the State use the Modified Pre-Issuance technique of drawing federal funds for certain types of draws related to these programs. Paragraph 6.2.4 of the CMIA agreement requires the following for the Modified Pre-Issuance funding technique:

The State shall request funds such that they are deposited in a State account not more than five business days prior to the day the State makes a disbursement. The request shall be made in accordance with the appropriate Federal agency cut-off time specified in Exhibit I. The amount of the request shall be the amount the State expects to disburse. This funding technique is not interest neutral.

During the fiscal year, the Department drew down approximately \$185 million for the Adoption Assistance and SSBG programs and applied the same drawdown process to each of them. Generally, a Fiscal Specialist in the Federal Cash Draw Unit of the Bureau of Cash and Cost Reporting Services calculated the amount of funds to be drawn based on the Department's cash needs (payroll, administrative costs, county advances, etc.) and the current cash on hand. In addition, the Cash Management Section Supervisor reviewed and investigated any discrepancies on the monthly Summary Tracking Report, which listed the grant activities (award amounts, revenue draws, expenditures, and remaining balances) for the federal programs. This document provided a mechanism for the Department to monitor its draws with expenditures on a cumulative basis although it did not match up specific draws and expenditures. However, the Department's controls did not prevent noncompliance with the cash management requirements, as noted below. Similar immaterial errors were also noted and are included in the Department's management letter.

- Of 24 disbursements tested from ten draws, the Department did not disburse one (4.2%) SSBG payment within five business days of the receipt of the federal funds. The Department disbursed the funds eight days after the required disbursement date.
- Of 25 disbursements tested from 19 draws, the Department did not disburse one (4%) Adoption Assistance payment within five business days of the receipt of the federal funds. The Department disbursed the funds seven days after the required disbursement date.

Not having effective controls over the timely disbursement of federal funds could lead to the Department not limiting draws to immediate cash needs and the not expending funds timely. This could result in noncompliance with the CMIA compliance requirements which could subject the Department to sanctions or other penalties and a repayment of part of the grant award amount. In addition, noncompliance could subject the Department to paying interest charges on these draws.

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEPARTMENT OF JOB AND FAMILY SERVICES

10. CASH MANAGEMENT – ADOPTION ASSISTANCE AND SOCIAL SERVICES BLOCK GRANT (Continued)

Based on discussions with management and a review of supporting documentation, the errors were due to vouchers not being approved timely within the Bureau of Accounting because of inadequate staffing levels. Management indicated that a system has since been implemented to avoid untimely approvals of vouchers.

We recommend the Department evaluate its existing cash management control procedures and update them as necessary to reasonably ensure all federal draw requests are disbursed timely and are drawn only for immediate cash needs, based on the funding technique established for each program in the CMA agreement. We also recommend the Department establish procedures to periodically monitor its compliance with the cash management requirements and initiate necessary actions to resolve any noncompliance that results.

11. CHILD SUPPORT ENFORCEMENT – CODING ERRORS

<i>Finding Number</i>	2015-028
<i>State Agency/Number</i>	JFS-12
<i>CFDA Number and Title</i>	93.563 Child Support Enforcement
<i>Federal Agency</i>	Department of Health & Human Services
<i>Compliance Requirement</i>	Period of Availability

SIGNIFICANT DEFICIENCY

It is management's responsibility to consistently and efficiently track and compile financial data related to federal program activities. This is typically accomplished through the use of a chart of accounts with enough detail to reasonably ensure financial information can be gathered and organized to allow management to effectively analyze and/or report on program operations. In a sound internal control environment, procedures would be periodically performed which compare the chart of accounts in place to management's objectives to reasonably ensure sufficient and reliable data is being maintained from an overall Departmental perspective, and for each program as a whole.

When an obligation for the Child Support Enforcement (CSE) program is incurred, Department staff will review the associated documentation and assign appropriate coding for input into OAKS (Ohio Administrative Knowledge System) to ensure the correct federal grant is charged for the expenditure. The Department uses a detailed coding structure within OAKS to identify and account for the activities associated with its various programs and activities. However, the following errors/inconsistencies in CSE program expenditure coding existed for state fiscal year 2015:

- \$402,103 of expenditures obligated during the FFY13 CSE grant (CS13) period of availability were incorrectly coded to the FFY12 grant (CS12).
- \$8,843 of expenditures obligated during the FFY14 CSE grant (CS14) period of availability were incorrectly coded to the FFY13 grant (CS13).
- \$4,657,862 of expenditures obligated during the FFY14 CSE grant (CS14) period of availability were incorrectly coded to the FFY15 grant (CS15).
- \$9,163 of expenditures obligated during the FFY15 CSE grant (CS15) period of availability were incorrectly coded to the FFY14 grant (CS14).

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEPARTMENT OF JOB AND FAMILY SERVICES

11. CHILD SUPPORT ENFORCEMENT – CODING ERRORS (Continued)

These items did not result in questioned costs because, even though the vouchers were coded to an incorrect grant, the corresponding federal reimbursements claimed were drawn from the correct federal award.

Inaccurate coding of program expenditures increases the risk of misstatements in amounts included on internal or external reports, which could subject the Department to fines and/or sanctions or a reduction in future federal funding. Based on discussions with management, training issues with purchase order set-up within OAKS caused the incorrect coding issues.

We recommend management develop and implement policies and procedures requiring a periodic comparison of financial activity recorded in the State's accounting system to the Department's chart of accounts and internal accounting records. Information maintained in the State's accounting system could be exported and organized to identify all coding variables which are not included in or consistent with the Department's chart of accounts. Any discrepancies or unusual activity should be documented, investigated, and any necessary corrective actions implemented. The Department should also ensure personnel responsible for entering, reviewing, and approving the transactions are informed of the proper coding required.

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEPARTMENT OF MEDICAID

1. MEDICAID / CHIP – INELIGIBLE RECIPIENTS

<i>Finding Number</i>	2014-029
<i>State Agency/Number</i>	MCD-01
<i>CFDA Number and Title</i>	93.767 – Children’s Health Insurance Program 93.775/93.777/93.778 – Medicaid Cluster
<i>Federal Agency</i>	Department of Health and Human Services
<i>Compliance Requirement</i>	Activities Allowed or Unallowed, Eligibility

QUESTIONED COSTS AND SIGNIFICANT DEFICIENCY

\$30,344

42 CFR 435.10 Subpart A, State Plan requirements, states:

A State plan must---

- (a) Provide that the requirements of this part are met; and
- (b) Specify the groups to whom Medicaid is provided, as specified in subparts B, C, and D of this part, and the conditions of eligibility for individuals in those groups.

42 USC 1397bb(b), states, in part:

(1) Eligibility Standards

- (A) In general the plan shall include a description of the standards used to determine the eligibility of targeted low-income children for child health assistance under the plan.

The Medicaid State Plan outlines the specific eligibility conditions and standards within Sections 2.2 – Coverage and Conditions of Eligibility and 2.6 A – Financial Eligibility, Eligibility Conditions and Requirements. Furthermore, it is management’s responsibility to implement policies and procedures to provide reasonable assurance only individuals who meet all of the eligibility criteria are able to receive benefits.

During state fiscal year (SFY) 2015, the Department of Medicaid disbursed approximately \$20.8 billion in Medicaid funds and \$339.3 million in Children’s Health Insurance Program (CHIP) funds on behalf of recipients who were determined eligible. Currently, the County Departments of Job & Family Services (CDJFS) are responsible for processing the applications for individuals applying to receive Medicaid and CHIP benefits. The CDJFS enter the individual’s information into the Ohio Integrated Eligibility (IE) System or the Client Registry Information System Enhanced (CRIS-E) to determine initial eligibility and/or perform eligibility redeterminations. The Department is in the process of converting all Medicaid and CHIP case files to IE from the legacy system, CRIS-E. The IE and CRIS-E systems are programmed with the State Plan recipient eligibility requirements to determine whether the recipient is eligible to receive Medicaid or CHIP. Once the determination is made, the IE or CRIS-E system uploads the eligibility information to the Medicaid Information Technology System (MITS) to determine allowability of the payment.

At the request of the auditors, the Department’s Bureau of Audit Performance completed manual eligibility redeterminations for 75 Medicaid and 75 CHIP recipients and identified several instances in which the original determinations by IE or CRIS-E were not accurate. For two of 75 (2.7%) Medicaid recipients tested and five of 75 (6.7%) CHIP recipients tested, the recipient was not eligible to receive benefits on the date services were performed.

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEPARTMENT OF MEDICAID

1. MEDICAID / CHIP – INELIGIBLE RECIPIENTS (Continued)

Since IE and CRIS-E are the State's official eligibility determination systems, we will question costs for all claims paid for services provided to these individuals during the time they were ineligible, totaling \$9,223 for Medicaid (projected to be more than \$10,000) and \$21,121 for CHIP).

Without proper controls for processing and entering recipient information into CRIS-E and IE, there is an increased risk that medical claims paid on behalf of the Medicaid and CHIP recipients will be inaccurate or unallowable. Payments on behalf of ineligible recipients may subject the Department to penalties or sanctions which may jeopardize future funding and limit its ability to fulfill program requirements to provide benefits to those in need. Based on our discussions with management, assistance group income and resources for Medicaid were entered incorrectly into the systems. In addition, assistance group income for CHIP was incomplete and/or third party health insurance policies were not recorded in the systems.

We recommend the Department evaluate and seek reimbursement for all claims that were incorrectly paid. We also recommend the Department implement procedures to regularly evaluate selected Medicaid and CHIP payments to verify the recipient's eligibility, ensure reimbursements are properly computed within MITS based on the IE and CRIS-E eligibility determinations, and verify the recipient information entered into IE and CRIS-E by the CDJFS. Any problems noted should be promptly corrected to reduce the risk of benefit payments being made on behalf of ineligible individuals. We further recommend the Department provide periodic training to the CDJFS employees who are entering the assistance group information into CRIS-E and/or IE to help ensure proper and complete information is being collected, entered, and verified prior to an individual's eligibility determination being made.

2. CASH MANAGEMENT – VARIOUS PROGRAMS

<i>Finding Number</i>	2015-030
<i>State Agency/Number</i>	MCD-02
<i>CFDA Number and Title</i>	93.767 – Children's Health Insurance Program 93.775/93.777/93.778 – Medicaid Cluster 93.791 – Money Follows the Person Rebalancing Demonstration
<i>Federal Agency</i>	Department of Health and Human Services
<i>Compliance Requirement</i>	Cash Management

NONCOMPLIANCE AND MATERIAL WEAKNESS (CHIP AND MEDICAID CLUSTER)

NONCOMPLIANCE AND SIGNIFICANT DEFICIENCY (MFP)

31 CFR 205.11 states, in part:

(a) A State and a Federal Program Agency must minimize the time elapsing between the transfer of funds from the United States Treasury and the State's payout of funds for Federal assistance program purposes, whether the transfer occurs before or after the payout of funds.

(b) A State and a Federal Program Agency must limit the amount of funds transferred to the minimum required to meet a State's actual and immediate cash needs.

...

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEPARTMENT OF MEDICAID

2. CASH MANAGEMENT – VARIOUS PROGRAMS (Continued)

To define these allowable timeframes, the State of Ohio and the U.S. Department of the Treasury entered into a Cash Management Improvement Act (CMIA) Agreement which requires the Ohio Department of Medicaid (the Department) to utilize the Modified Pre-Issuance Methodology when requesting federal funds for the Children's Health Insurance Program (CHIP) and the Medicaid Cluster. Section 6.2.4 of the agreement regarding the Modified Pre-Issuance Methodology states, in part:

. . . The State shall request funds such that they are deposited in a State account not more than five business days prior to the day the State makes a disbursement. . . The amount of the request shall be the amount the State expects to disburse. . .

Programs not listed in the CMIA Agreement, such as the Money Follows the Person Rebalancing Demonstration (MFP), are required to comply with 31 CFR 205.33(a), which states:

(a) State must minimize the time between the drawdown of Federal funds from the Federal government and their disbursement for Federal program purposes. A Federal Program Agency must limit funds transfer to a State to the minimum amounts needed by the State and must time the disbursements to be in accord with the actual, immediate cash requirements of the State in carrying out a Federal assistance program or project. The timing and amount of funds transfers must be as close as is administratively feasible to a State's actual cash outlay for direct program costs and the proportionate share of any allowable indirect costs.

During state fiscal year 2015, the Department drew down approximately \$14.6 billion in federal funding for the CHIP, Medicaid Cluster, and MFP programs. Daily, the Department calculated the amount of funds to be drawn based on the Department's cash needs (payroll, administrative costs, county advances, etc.) and the current cash on hand by utilizing an Ohio Administrative Knowledge System (OAKS) Revenue Document.

In addition, the Department monitored its federal grant activities by maintaining a Summary Grant Tracking Spreadsheet which lists the grant award amount, the total cumulative revenue draws, and the remaining grant award balance. However, the Department's internal controls did not ensure compliance with the time limits established in the CMIA Agreement or 31 CFR 205.33(a), as noted below:

- Of 64 disbursements tested from 25 CHIP draws/receipts, eight (12.5%) were not disbursed within five business days as required by the CMIA Agreement. The number of days late ranged from five to 24.
- Of 71 disbursements tested from 25 Medicaid Cluster draws/receipts, six (8.5%) were not disbursed within five business days as required by the CMIA Agreement. The number of days late ranged from four to eight.
- Of 35 disbursements tested from 25 MFP draws/receipts, one (2.9%) was not disbursed within five business days as required by 31 CFR 205.33(a). The number of days late was four.

Without timely disbursement of funds, interest penalties may be incurred by the State of Ohio for funds drawn and not disbursed in accordance with federal requirements and the CMIA Agreement or 31 CFR 205.33(a). This could also subject the Department to sanctions or other penalties by the federal grantor agency. Based on our discussions with management, these delays were a result of obtaining multiple signatures to approve the invoices for payment, followed by another state agency that was responsible for processing these disbursements in OAKS.

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEPARTMENT OF MEDICAID

2. CASH MANAGEMENT – VARIOUS PROGRAMS (Continued)

We recommend the Department reinforce and strengthen its existing controls to reasonably ensure all requests for the CHIP, Medicaid, and MFP federal funds are drawn down consistently based on the Department's immediate cash needs and disbursed timely in accordance with the guidelines set forth in the CMIA Agreement and 31 CFR 205.33(a). This should include evaluating and analyzing the current process to identify any possible efficiencies. We also recommend the Department establish procedures to periodically monitor its compliance with the cash management requirements.

3. FEDERAL SCHEDULE – MONEY FOLLOWS THE PERSON

<i>Finding Number</i>	2015-031
<i>State Agency/Number</i>	MCD-03
<i>CFDA Number and Title</i>	93.791 – Money Follows the Person Rebalancing Demonstration
<i>Federal Agency</i>	Department of Health and Human Services
<i>Compliance Requirement</i>	Schedule of Expenditures of Federal Awards

MATERIAL WEAKNESS

OMB Circular A-133 §__.310 (b)(3) requires that auditees prepare a Schedule of Expenditures of Federal Awards (Schedule) that provides total federal awards expended for each federal program, along with the corresponding CFDA number or other identifying information. It is management's responsibility to implement control policies and procedures to reasonably ensure the Department's portion of the Schedule submitted to the Office of Budget and Management (OBM) is in compliance with OMB Circular A-133. Sound internal controls require a review of the Schedule and Attachments be performed and documented in some manner, prior to submission, to verify the information the Department reported is accurate and complete, and that all transactions and adjustments are appropriately reflected in the State's accounting system, the Ohio Administrative Knowledge System (OAKS).

During state fiscal year 2015, OBM provided state agencies that received federal funds a reporting package containing a template of the Schedule and detailed instructions for completing the reporting package. The Money Follows the Person Rebalancing Demonstration's reimbursed federal expenditures are calculated and reported on the Schedule on a revenue basis since this is a reimbursement program. The Fiscal Program area prepares the Schedule and Attachments based on OAKS revenue data and then they are reviewed by management, as evidenced by the signed transmittal letter, to reasonably ensure completeness and accuracy prior to submission to OBM. However, management's review did not prevent or detect the following error on the Schedule and Attachment A, which resulted in the Money Follows the Person Rebalancing Demonstration being overstated by \$3,276,801 (11.5%). This error was a result of the Department not accounting for a pass-through of \$3,276,801 of federal funding to another state agency. A second federal draw, totaling \$3,276,801, was later completed in order to repay the other state agency for overdrawing on the program's Federal Letter of Credit. Therefore the Department reported \$3,276,801 twice on its Federal Schedule for Fund 3G50.

This error was brought to OBM's attention by the auditor and the State's schedule was adjusted prior to submission to the federal government.

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEPARTMENT OF MEDICAID

3. FEDERAL SCHEDULE – MONEY FOLLOWS THE PERSON (Continued)

Without proper reviews of the Schedule and Attachments prior to submission to OBM, there is an increased risk that errors would not be detected, resulting in inaccurate reporting of federal expenditures for the individual programs and the State of Ohio's Schedule of Expenditures of Federal Awards as a whole. This could lead to a reduction in program funds and/or fines and penalties from the federal grantor agency. Based on our discussions with management, the error occurred because the Department did not take the federal draw made for pass-through to another state agency into consideration when preparing the Schedule and Attachments.

We recommend the Department strengthen its existing reviews and monitor the compilation of the Schedule and Attachments to verify the program revenues and/or expenditures are accurate, properly classified and recorded, and reconcile to OAKS. The Department should consider adding a procedure to inquire about the amount of federal funds being reported by the pass-through entity to ensure the amount being reported by both agencies is accurate and consistent.

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEPARTMENT OF MENTAL HEALTH AND ADDICTION SERVICES

1. DUNS NUMBERS FOR SUBAWARDS

<i>Finding Number</i>	2015-032
<i>State Agency/Number</i>	MHA-01
<i>CFDA Number and Title</i>	93.667 – Social Services Block Grant 93.959 – Block Grants for Prevention and Treatment of Substance Abuse
<i>Federal Agency</i>	Department of Health and Human Services
<i>Compliance Requirement</i>	Subrecipient Monitoring

NONCOMPLIANCE AND MATERIAL WEAKNESS

2 CFR part 25 established the Dun and Bradstreet Data Universal Numbering System (DUNS) number as a universal identifier for federal financial assistance applicants, as well as recipients and their direct subrecipients. 2 CFR 25.110 states that part 25 applies to all entities, other than those listed exempted entities, which apply for/receive federal awards or receive subawards directly from recipients of those agency awards. In addition, 2 CFR part 25, Appendix A, Section B states:

If you are authorized to make subawards under this award, you:

1. Must notify potential subrecipients that no entity (see definition in paragraph C of this award term) may receive a subaward from you unless the entity has provided its DUNS number to you.
2. May not make a subaward to an entity unless the entity has provided its DUNS number to you.

It is management's responsibility to implement control policies and procedures to reasonably ensure compliance with the DUNS number requirements. Effective controls require that award recipients notify potential subrecipients about providing a DUNS number or obtain it via review of subaward application documents prior to approval of such subawards.

During state fiscal year 2015, the Department disbursed approximately \$7.2 million in federal funds from the Social Services Block Grant (SSBG) program and \$42 million in federal funds from the Block Grants for Prevention and Treatment of Substance Abuse (SAPT) program as subawards. At the beginning of the year, the Department contracted with 53 Alcohol, Drug Addiction and Mental Health/Community Mental Health Services Boards via subaward agreements, with quarterly allocations. However, the Department did not obtain or ensure the subrecipients had a valid and current DUNS number for any of the 53 subrecipients before entering into subaward agreements for the SSBG or SAPT federal programs. Moreover, the Department did not have any controls in place to comply with this requirement. The Department indicated the former Ohio Department of Alcohol and Drug Addiction Services (ADA) had obtained DUNS numbers from these same subrecipients during its fiscal year 2011 audit prior to its merger with the Ohio Department of Mental Health to create the Ohio Department of Mental Health and Addiction Services in fiscal year 2014. However, the Department was not able to provide documentation that it had received information from ADA about obtaining the DUNS numbers.

Without ensuring applicants provide a valid DUNS number prior to approval of the subaward, the Department is not complying with 2 CFR part 25. Noncompliance could result in federal funds being reduced, taken away, or other sanctions imposed by the federal grantor agency. Based on discussions with management, they thought DUNS numbers previously obtained by ADA were sufficient since they are permanently assigned to entities and the subrecipients had not changed since fiscal year 2011. The Department was not aware of the need for obtaining and verifying DUNS numbers before issuing the 2015 awards until it was noted in the prior audit, which was after the 2015 subawards had been issued. The Department indicated it would alter its application process to obtain DUNS numbers before issuing the 2016 awards.

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEPARTMENT OF MENTAL HEALTH AND ADDICTION SERVICES

1. DUNS NUMBERS FOR SUBAWARDS (Continued)

We recommend the Department continue to evaluate its current control procedures over the subaward process for all grants and update them as necessary to reasonably ensure it obtains and/or verifies DUNS numbers from all subrecipients before approving subawards. This evaluation and revision process should occur on a periodic basis and timely enough for the Department to be compliant with the DUNS number requirement. We also recommend the Department establish procedures to periodically monitor its compliance with the related requirements and initiate necessary actions to resolve any noncompliance that results.

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEPARTMENT OF TRANSPORTATION

1. HIGHWAY PLANNING & CONSTRUCTION CLUSTER – WAGE RATE REQUIREMENTS

<i>Finding Number</i>	2015-033
<i>State Agency/Number</i>	DOT-01
<i>CFDA Number and Title</i>	20.205/20.219/23.003 – Highway Planning & Construction Cluster
<i>Federal Agency</i>	Department of Transportation
<i>Compliance Requirement</i>	Special Tests and Provisions – Wage Rate Requirements

MATERIAL WEAKNESS

As required by 40 USC 3141-3144, 3146, and 3147, Wage Rate Requirements, formerly known as the Davis-Bacon Act, requires laborers or mechanics employed by contractors or subcontractors that work on construction contracts in excess of \$2,000 and are financed by federal assistance funds to be paid wages not less than those established by the U.S. Department of Labor for the locality of the project. It is management's responsibility to implement policies and procedures to ensure compliance with the rules and regulations related to the Wage Rate Requirements.

During state fiscal year 2015, there were 1,092 active construction projects subject to the Wage Rate Requirements. During the life cycle of the projects, the Department's district representatives are to visit the project site and conduct interviews with the contractor to ensure compliance with the Wage Rate Requirements, as well as respond to any complaints or problems found on submitted payroll information. All interviews are conducted using an internal Standard Interview Form and included within the project file after completion. However, during the audit period, the Department did not maintain evidence of a site visit for 24 of 55 (43.6%) projects selected for testing. Additionally, the Central Office Prevailing Wage Manager performs a Technical Process Review (TPR) for each district to ensure compliance with Wage Rate Requirements and internal policies, evidenced by a TPR checklist. Per Department policy, these reviews should be completed for each district once every two annual construction cycles. However, a TPR had not been completed for Districts five, 10, and 11 during the last two annual construction cycles.

Without controls in place and operating effectively over Wage Rate Requirements, Department contractors may not be in compliance with applicable federal regulations which could result in federal funding being reduced or taken away, or other sanctions imposed by the federal grantor agency. Additionally, without periodically conducting reviews over each district, the Department cannot reasonably ensure each district is aware of and performing the necessary procedures to maintain compliance with the Wage Rate Requirements.

Based on our discussions with management, the EEOCC (Equal Employment Opportunity Contract Coordinator) position in Districts five & 11 have been vacant the past few construction cycles, and the District 10 EEOCC was unexpectedly out on medical leave during the 2014 construction season when a review was scheduled to be completed. Due to these vacancies, there was no coordinator to work with on the TPRs and site visits were either were not completed or the checklists could not be located by the interim personnel.

We recommend the Department strengthen and reinforce its policies and procedures regarding Wage Rate Requirement site visits and TPRs. The Department should ensure districts maintain site visit documentation in a readily accessible and organized fashion so others can obtain it when necessary, especially when employees leave the Department or are out on extended leave. Additionally, in the case of position vacancies, the Department should cross-train its employees to ensure another employee can assume the necessary duties so TPR's and site visit procedures can continue without interruption. Management should periodically monitor these procedures to ensure they are operating effectively and as intended.

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEPARTMENT OF VETERANS SERVICES

1. FEDERAL SCHEDULE – VETERANS STATE NURSING HOME CARE

<i>Finding Number</i>	2015-034
<i>State Agency/Number</i>	DVS-01
<i>CFDA Number and Title</i>	64.015 – Veterans State Nursing Home Care
<i>Federal Agency</i>	Department of Veterans Affairs
<i>Compliance Requirement</i>	Schedule of Expenditures of Federal Awards

MATERIAL WEAKNESS

OMB Circular A-133 §___.310 (b)(3) requires that auditees prepare a Schedule of Expenditures of Federal Awards (Schedule) that provides total federal awards received for each federal program, along with the corresponding CFDA number or other identifying information. It is management's responsibility to implement control policies and procedures to reasonably ensure the Department's portion of the Schedule submitted to the Office of Budget and Management (OBM) is in compliance with OMB Circular A-133. Sound internal controls require an adequate segregation of duties and must ensure revenues are appropriately collected, deposited timely, and accurately recorded in the State's accounting system, the Ohio Administrative Knowledge System (OAKS).

During state fiscal year 2015, State agencies that received federal funds were provided by OBM a reporting package containing a template of the Schedule and detailed instructions for completing the reporting package. During state fiscal year 2015, the Department received approximately \$28 million in Federal awards. The Department has traditionally had the Fiscal Officer prepare the Schedule reporting package, running applicable queries to identify the awards for each program. The Chief Fiscal Officer (CFO) would then review and submit the Schedule reporting package to OBM. However, for state fiscal year 2015, the CFO compiled, reviewed, and submitted the Schedule reporting package to OBM. As such, the Department did not have adequate segregation of duties over the preparation and submission of the Schedule.

Also during state fiscal year 2015, the Department received approximately \$23.8 million in federal reimbursement for the Veterans State Domiciliary Care and Veterans State Nursing Home Care programs. Upon receipt of a reimbursement, a Financial Manager compares the Veteran Affairs (VA) Vendor Inquiry System amount and internal documentation to the VA electronic transfer ensuring the proper amount and coding of the deposit into OAKS. However, the Financial Manager's review did not prevent or detect the following:

- One revenue deposit totaling \$1,448,190 was incorrectly coded to the Veterans State Domiciliary Care program in OAKS instead of the Veterans State Nursing Home Care program.
- One deposit of \$736 was incorrectly coded to the Veterans State Nursing Home Care program in OAKS instead of the Veterans State Domiciliary Care program.

Since the CFO prepares the Schedule based on OAKS data, the net effect of these errors caused the Veterans State Nursing Home Care program to be understated by \$1,447,454 (7.2%) and the Veterans State Domiciliary Care program to be overstated by the same amount (38%) on the Schedule. The Veterans State Domiciliary Care program was a non-major program that was impacted by the error noted for the Veterans State Nursing Home Care program which was identified and tested as a major program.

This error was brought to OBM's attention by the auditor and the State's schedule was adjusted prior to submission to the federal government.

SCHEDULE OF FINDINGS AND QUESTIONED COSTS

OHIO DEPARTMENT OF VETERANS SERVICES

1. FEDERAL SCHEDULE – VETERANS STATE NURSING HOME CARE (Continued)

Without a proper segregation of duties, the Department increases the risk that the Schedule will be prepared and submitted inaccurately. Likewise, without proper reviews of OAKS deposits prior to approval, there is an increased risk that errors would not be detected, resulting in inaccurate data for the individual federal programs and the State of Ohio's Schedule of Expenditures of Federal Awards as a whole. This could lead to a reduction in program funds and/or fines and penalties from the federal grantor agency. Based on our discussions with management, the Schedule errors occurred because the Department did not properly review the OAKS deposits prior to approval. The lack of a segregation of duties resulted from a vacancy in the fiscal officer position.

We recommend the Department evaluate the existing internal control structure encompassing the revenue transaction cycle and implement additional procedures to reasonably ensure all receipts are properly coded. The Department should periodically monitor revenue activities to help ensure all deposits are coded correctly and controls are in place and operating as intended. We further recommend the Department develop policies which provide for an adequate segregation of duties for the Schedule preparation in the event of vacant positions.

[THIS PAGE LEFT BLANK INTENTIONALLY]

**SUPPLEMENTAL
INFORMATION**

**STATE OF OHIO
CORRECTIVE ACTION PLAN
JULY 1, 2014 THROUGH JUNE 30, 2015**

FINDING/AGENCY/CORRECTIVE ACTION

Finding Number: 2015-004
State Agency: Ohio Office of Budget and Management
Finding Description: Federal Schedule – Various Programs

Official's Response and Corrective Action Plan:

The Office of Budget and Management (OBM) acknowledges our responsibility to reasonably ensure the State of Ohio Schedule of Expenditures of Federal Awards (Schedule) provided to the Auditor of State as part of the State of Ohio Single Audit is complete and accurate. This role includes providing adequate monitoring and completeness controls relative to the Schedule.

OBM improved its monitoring controls in fiscal year 2015 and identified agency reporting errors which were corrected prior to the final Schedule being submitted to the Auditor of State. Despite these efforts, three errors went undetected during this process. Two of these errors resulted from grant coding mistakes made during the agency data entry process into the state accounting system. These errors are significantly difficult to identify by OBM during a post-monitoring review since agency management is unaware of them and can reasonably explain program differences with prior years by annual funding variations.

OBM will continue to strengthen its monitoring and analytical procedures. We will evaluate possible methods to detect agency coding errors for agencies to analyze. Agency education will be enhanced by our establishment of an Ohio Grants Management Working Group. This working group will commence in the spring of 2016 and will address the federal schedule preparation process as well as future changes in federal requirements.

JULY 1, 2014 THROUGH JUNE 30, 2015**

FINDING/AGENCY/CORRECTIVE ACTION

Finding Number: 2015-005
State Agency: Ohio Development Services Agency
Finding Description: HEAP – Cash Management

Official's Response and Corrective Action Plan:

Due to the volume of Home Energy Assistance Program transactions, the Accounting Manager in the Agency Fiscal Office downloads these on a daily basis. She then requests the corresponding dollars from the federal government based on the total provided from the Program office. Subsequently and periodically, the Program office has to recall vouchers due to the inclusion of incorrect information. Additionally, outside entities such as Ohio Shared Services cause similar delays. This results in a delay in the release of those dollars, causing the Ohio Development Services Agency (ODSA) to be out of compliance with the Cash Management Improvement Act agreement. Additionally, there seems to be frequent discrepancies in the dates used to track this five-day requirement.

ODSA will monitor transactions periodically to ensure the input of entry dates from uploads into OAKS aligns with the Accounting Dates for output reports in Business Intelligence (A reporting tool). These errors lengthen the schedule payment date which cause the transactions to expend funds late. We will review our process and make changes to the areas that we control.

Finding Number: 2015-006
State Agency: Ohio Department of Developmental Disabilities
Finding Description: IT – Inappropriate Access to Administrator Roles

Official's Response and Corrective Action Plan:

Ohio Department of Developmental Disabilities (DODD) IT Section acknowledges the observation identified by the AOS audit. The observation has helped us to continue to refine processes and procedures related to the newly implemented Secured Entitlement Management System (SEMS) which has been reviewed by the OBM Internal Auditors. Specifically in regard to the observation of administrative accounts, initial reports provided to the audit team were not accurate and not clearly communicated as the reports delivered contained additional accounts that were previously disabled. Upon further review DODD refined the list and validated the audit concerns identified below. DODD IT Section is working on building comprehensive reporting from the Data Warehouse to provide accurate data of user access to all applications. DODD IT Section will use this data to implement a 90 day

**STATE OF OHIO
CORRECTIVE ACTION PLAN (Continued)
JULY 1, 2014 THROUGH JUNE 30, 2015**

FINDING/AGENCY/CORRECTIVE ACTION

disablement process for those accounts not accessed during this timeframe and to enhance additional security controls.

DODD IT Section began an annual review process in March of 2015 to review DODD internal Active Directory to disable accounts no longer in use. With the Secure Entitlement Management System (SEMS), DODD IT Section implemented this new system to manage application access of all accounts and will begin a comprehensive review of all internal and external administrative accounts across all DODD systems in May of 2016 to ensure accounts that are no longer in use be disabled immediately and only appropriate level access is provided to end users. DODD IT Section will amend the current IT policy (IS-001) to properly reflect the new SEMS process.

Finding Number: 2015-007
State Agency: Ohio Department of Education
Finding Description: Improving Teacher Quality – Misallocations to Local Education Agencies (questioned costs \$7,933,274)

Official's Response and Corrective Action Plan:

Beginning in state fiscal year (SFY) 2016, the Department modified the allocation methodology to local education agencies (LEA) for Improving Teacher Quality subgrants and included community schools that opened after SFY 2002 in the "hold-harmless" calculation of the funding formula. Additional adjustments were made to LEAs to provide the amount of funding LEAs should have received in SFY 2011 in the "hold-harmless" portion of the calculation. This process will continue through SFY 2020, to cover the period of adjustments for SFY 2012-SFY 2015. The Department has and will continue to work with U.S. Department of Education on implementation of the agreed upon process.

Anticipated Completion Date for Corrective Action:

**STATE OF OHIO
CORRECTIVE ACTION PLAN (Continued)
JULY 1, 2014 THROUGH JUNE 30, 2015**

FINDING/AGENCY/CORRECTIVE ACTION

Finding Number: 2015-008
State Agency: Ohio Department of Education
Finding Description: Special Education Cluster – Misallocations to Local Education Agencies (questioned costs undetermined)

Official's Response and Corrective Action Plan:

The Department's Office for Exceptional Children (OEC) has a procedure in place to manage the process for allocating IDEA, Part B funds to new community schools and community schools that notify us of significant expansion. During the FY15 school year, OEC instituted a new electronic process for generating the allocation amount per district which ensures that new community schools are included in the original allocation for July 1. The process requires a control measure to ensure OEC has included all new community schools for the year. This new control measure includes the following:

- The OEC Resource Management office will request the list of new community schools from the community school office.
- The OEC Resource Management office will check the allocation list to ensure all schools are accounted for in the Comprehensive Continuous Improvement Plan (CCIP) allocation (the federal funding software application).
- The grants manager will also check to ensure OEC has all new community schools accounted for in the original load process for the allocation.

The OEC defines "significant expansion" as having formerly added grade levels and having a minimum number of students with disabilities reported in the data used for the Federal Child Count as being enrolled in those grade levels. This definition may differ from definitions of significant expansion used by other offices, including the community school office.

OEC will request the community school office list of expanded community schools each December. OEC staff will review the list with the data manager assigned to special education to determine if any of the schools listed meet the definition of significant expansion used by OEC.

A policy decision is yet to be made to determine at what point changes in population will trigger re-allocation. Consideration will be given to factors that include the percent of increase of total students, and the number of students with disabilities within that increase. This policy decision will be finalized by June 2016, which is when the FY16 allocation process begins.

The community schools that were missed in the FY15 allocation process have been restored to the proper allocation amount. The new measures built into the process will help ensure this error does not occur in the future.

FINDING/AGENCY/CORRECTIVE ACTION

Finding Number: 2015-009
State Agency: Ohio Department of Education
Finding Description: DUNS Numbers for Subawards

Official's Response and Corrective Action Plan:

Corrective action was implemented. Subrecipients enter their Data Universal Numbering System (DUNS) number into the Ohio Educational Directory System (OEDS). The nightly Comprehensive Continuous Improvement Plan (CCIP) systems and OEDS interface was updated to include obtaining the DUNS number, along with other established data sets (i.e., Superintendent name, Treasurer name, contact information, address, etc.). A DUNS validation was then developed and implemented, in which the CCIP verifies that the DUNS number was brought in and the field is completed before the district obtains access to the federal award. A warning and error messages will be reported if the information is missing. The program offices were informed of this requirement during discussions at the Quarterly Grants Managers meetings held during fiscal year 2015.

In June 2015, the Department notified district Superintendents, Treasurers, Title I Directors/Coordinators and Consolidated Application Contacts of the requirement to apply for a DUNS number, register in SAM.gov, and enter the assigned DUNS number in the Ohio Educational Directory System (OEDS-R) in order to receive federal funds. This affected all federal awards to be issued beginning in fiscal year 2016.

FINDING/AGENCY/CORRECTIVE ACTION

Finding Number: 2015-012
State Agency: Ohio Department of Education
Finding Description: Maintenance of Effort – Determination Control Deficiencies

Official's Response and Corrective Action Plan:

Office for Exceptional Children (OEC), OFP, and the Education Management Information System (EMIS) office will identify specific procedures for exchanging information when a district needs to update or correct its data. Areas of discussion to develop the procedures include:

- Identification of the EMIS closing date to enable the offices to run the test based on the final EMIS data. OEC and OFP will not open the new year MOE cycle until the offices receive notification from EMIS that the financial data and ADM data are finalized.
- Communications from the EMIS office to OEC and OFP if the Office of Data Quality and EMIS determine that the system will open for any inquiring district to make adjustments. OEC and OFP will be notified when the LEAS update their data so the MOE application can be run again for the identified LEA changes.
- OEC and OFP notification to the Office of Data Quality of instances when districts verify the financial data in EMIS is not reported or coded correctly.
- Steps the Office of Data Quality will take to work with districts to determine if the data issue has a substantive impact beyond MOE, which would require the districts to make adjustments in the EMIS system.

Other affected offices will be involved in process development, as necessary. Once the procedures are finalized, agreed upon procedures will be developed between OEC, OFP and the EMIS office.

OFP has "Agreed Upon Procedures" that were formally developed and approved in 2009. These procedures are utilized when an LEA does not report financial data into EMIS. OFP will combine all relevant pieces (including "Agreed Upon Procedures") into one procedural document. The document will be provided to leadership for review and formal approval within 30 days of this notice.

**STATE OF OHIO
CORRECTIVE ACTION PLAN (Continued)
JULY 1, 2014 THROUGH JUNE 30, 2015**

FINDING/AGENCY/CORRECTIVE ACTION

Finding Number: 2015-015
State Agency: Ohio Department of Education
Finding Description: Federal Schedule – Child Nutrition Cluster & Child and Adult Care Food Program

Official's Response and Corrective Action Plan:

OBM is responsible for compiling the Schedule. The Department initially reported amounts based on the catalog of federal domestic assistance (CFDA) numbers listed on the award notice received. OBM requested several programs be segmented for more detailed reporting. In the process of making revisions, the amounts were not accurately split among the CFDA numbers. The Department did not misreport aggregate dollars.

There were numerous communications between staff and OBM for the FY 2015 Schedule. For the FY 2016 Schedule, the Chief Financial Officer will work with OBM to confirm report requirements. Also, the Department will confirm with the U.S. Department of Agriculture the expectations for reporting.

Anticipated Completion Date for Corrective Action:

September 2016

Finding Number: 2015-016
State Agency: Ohio Department of Education
Finding Description: Career and Technical Education – Administrative Level of Effort

Official's Response and Corrective Action Plan:

The Department has historically overmatched dollar for dollar, but did not realize there was also a maintenance of effort requirement in addition to the dollar for dollar match. For fiscal year (FY) 2012, federal spending should have decreased by \$17,196.87 and state spending increased by \$17,196.87 to maintain the same ratio (MOE-state match to federal spending) as FY 2011.

The Department has separate coding with budget controls to ensure the appropriate amount of General Revenue Fund state match dollars are spent. The Department will consult with the U.S. Department of Education regarding the requirement, and will establish additional controls to monitor the ratios throughout the year. The new processes will be implemented for the federal year 2014 grant. FY 2013 spending will be reviewed to assess compliance.

Finding Number: 2015-017
State Agency: Ohio Environmental Protection Agency
Finding Description: Clean Water State Revolving Funds and Drinking Water State Revolving Funds – Invoice Reviews

Official's Response and Corrective Action Plan:

Ohio EPA's guidance on attaching payment requests in the Financial Aid Management System (AIMS) currently does not include a specific timeframe for completing the task. As a result, the Auditor applied a standard timeframe of 30 days to upload and approve Fund Payment Requests (FPRs) into our AIMS system. Also, completing this task within a 30-day window is not a program requirement nor is it a statutory or rule requirement; it's purely an internal administrative function. Our loan recipients received their payments in a timely manner; the information just wasn't uploaded to our document/information management system within the Auditor-imposed 30-day window.

Furthermore, based on the process that was initiated in January 2013, Ohio EPA has continued to improve its timeliness. In 2013, the Auditor noted that 78% of the sample population did not meet the 30-day standard. In 2014, 12% didn't meet; and in 2015, only 7.5% didn't meet. Ohio EPA will continue to follow our established FPR review process, while management will perform periodic monitoring checks to improve the timeliness of the FPR reviews.

Since Ohio EPA's guidance on attaching payment requests in AIMS currently does not include a specific timeframe, we will establish a 45-day standard to complete this administrative task.

**STATE OF OHIO
CORRECTIVE ACTION PLAN (Continued)
JULY 1, 2014 THROUGH JUNE 30, 2015**

FINDING/AGENCY/CORRECTIVE ACTION

Finding Number: 2015-020
State Agency: Ohio Department of Job & Family Services
Finding Description: Child Care Development Fund (CCDF) Cluster – Copayment Amounts (questioned costs \$5,860)

Official's Response and Corrective Action Plan:

Ohio Department of Job & Family Services

Currently, there are no plans for enhancements or additional edit checks in the automated systems used to determine eligibility, benefits, and copayments. ODJFS staff will address the necessity to ensure applications are complete at the county agency video conferences scheduled for 2016: February 24, April 27, July 20 and October 26.

At the March 23, 2016 statewide child care video conference, the ODJFS Technical Assistance Unit will suggest statewide video conference that counties consider implementing their own form of internal quality control by randomly selecting cases throughout the year to help ensure the assessed copayments are accurate, especially those that are handled by inexperienced or new employees.

Cuyahoga County

Cuyahoga Job and Family Services will remind all staff of the importance of proper scanning into the OnBase System and the corresponding procedures.

Franklin County

Franklin County DJFS has made several changes beginning in March 2015 with internal case reviews. These are completed by the agency's quality support services area in an effort to reduce agency error and incorrect eligibility determinations. Feedback is given to staff and they are responsible to make corrections on the case found in error. These cases are pulled randomly. Childcare supervisors have also implemented quick case reviews each month beginning January 2016. Three cases are pulled randomly for review every month for each worker. They are provided feedback and training to areas that are identified as error prone. Staff is encouraged to attend video conferences and webinars offered by ODJFS in an effort to maintain knowledge of eligibility and implement any changes in policy. Management will monitor staff performance and if necessary follow disciplinary process for those individuals that do not meet expectations. Franklin County DJFS will re-evaluate in three months and make any necessary changes as identified.

Montgomery County

Montgomery County Child Care Supervisor worked with our IT department to update the default scan setting for the On-Base scanning to duplex scan all items. The applications in Montgomery County were scanned on one side only and the even numbered pages were omitted. The setting is now forced to duplex scan – removing the possibility of worker error of not scanning two-sided documents.

**STATE OF OHIO
CORRECTIVE ACTION PLAN (Continued)
JULY 1, 2014 THROUGH JUNE 30, 2015**

FINDING/AGENCY/CORRECTIVE ACTION

Finding Number: 2015-021
State Agency: Ohio Department of Job & Family Services
Finding Description: IT – IEVS Due Dates and Result Code Errors

Official's Response and Corrective Action Plan:

- The Bureau of Program Integrity (BPI) continues to provide one-on-one and group training and technical assistance for counties to help ensure that Income and Eligibility Verification System (IEVS) matches are properly coded and processed in a timely manner. The training includes guidance for the County IEVS Coordinator and other supervisory personnel for how to manage the processing of IEVS matches.
- An intermediate IEVS training session will be presented by videoconference on March 1, 2016 to caseworkers statewide. The presentation will cover the basics of IEVS alert processing and address correct coding, timeliness and monitoring procedures for agency supervisors. Additionally, IEVS Coordinators will receive instruction on effectively managing IEVS matches in their counties.
- We do not agree with the recommendation to include IEVS requirements in the sub-grant agreement. The sub-grant agreement is intended to identify the basic expectations of ODJFS and the county government as a sub recipient of the department. The sub-grant agreement establishes overall terms, conditions and requirements governing the administration and use of the financial assistance received. It is not feasible to identify all of the program requirements given the number of programs administered by the county and all of the related requirements of each program.
- Processing timeliness statistics are monitored monthly. Counties that do not meet the 80 percent timeliness standard for four consecutive months are required to develop and implement a Continuous Improvement Plan (CIP). If the county does not show improvement after the CIP has been implemented, the Fraud Control Unit Manager and assigned Fraud Control Specialist will schedule a meeting with the Agency Director, or designee, to discuss what can be done to improve compliance.
- BPI continues to perform IEVS Reviews at each county agency no less than triennially. The detailed IEVS Reviews evaluate compliance with timing and coding requirements.

**STATE OF OHIO
CORRECTIVE ACTION PLAN (Continued)
JULY 1, 2014 THROUGH JUNE 30, 2015**

FINDING/AGENCY/CORRECTIVE ACTION

Finding Number: 2015-022
State Agency: Ohio Department of Job & Family Services
Finding Description: Supplemental Nutrition Assistance Program Cluster and Temporary Assistance for Needy Families Cluster – Eligibility Documentation

Official's Response and Corrective Action Plan:

Ohio Department of Job and Family Services

The Ohio Department of Job and Family Services agrees with the finding. Technical assistance will be provided to all county agencies regarding the importance of maintaining proper documentation in the eligibility system and case record (including electronic records management systems) of all information relied upon to make a determination of eligibility.

Cuyahoga County

Cuyahoga Job and Family Services will remind all staff of the importance of proper scanning into the OnBase System and the corresponding procedures.

Hamilton County

As a result of the one (1) Hamilton County unearned income calculation error, Hamilton County JFS management will insure the topic is addressed at upcoming Eligibility Technician trainings and Policy Meetings.

Lucas County

The Lucas County Job and Family Services caseworker did not use the correct conversion factor for the Child Support income. In February 2016, a desk aide will be provided to Eligibility workers regarding conversion factors. In addition, Lucas County Job and Family Services QA staff will conduct monthly reviews of unearned income cases to ensure cases are being completed according to policy. The QA Coordinator will notify the worker and unit coordinator of any errors immediately. Management will review findings with QA quarterly, commencing April 2016, to review trends and identify training opportunities.

**STATE OF OHIO
CORRECTIVE ACTION PLAN (Continued)
JULY 1, 2014 THROUGH JUNE 30, 2015**

FINDING/AGENCY/CORRECTIVE ACTION

Finding Number: 2015-023
State Agency: Ohio Department of Job & Family Services
Finding Description: Child Care and Development Fund Cluster – Type B Home Inspections

Official's Response and Corrective Action Plan:

Ohio Department of Job & Family Services

ODJFS will continue to provide technical assistance and training to County Department of Job & Family Services (CDJFS) management on the requirements of licensing policies and procedures to ensure that licensing inspection reports are completed accurately by documenting the type of inspection and that the required number of inspections are performed for the Type B Home. Additionally, ODJFS will continue to conduct annual on-site county monitoring and file audits to ensure requirements are being implemented.

Cuyahoga County

Cuyahoga County is currently utilizing the electronic version (Sanswrite) of the 1926. There is a designated area for type of inspection. All CDJFS Staff will document the type of inspection that was conducted in this area. CDJFS Supervisors will review the home visit tracking tool with staff to assure inspection visits that are planned and conducted are appropriate based on the provider's recent inspection visit history.

All providers will receive two inspections in the fiscal year. CDJFS Staff will project inspection visits for the fiscal year on their home visit tracking tool and document those inspection visits as they are completed. CDJFS Supervisors will review the visit tracking tool to assure that all providers have or will have two inspections by the end of the fiscal year.

Hamilton County

Regarding the two inspections of licensed providers where the inspection type was not documented in Hamilton County: HCJFS agrees that ODJFS should revise the home inspection form (JFS 01926) to include a section for designating the visit type. HCJFS staff typically notes this distinction on the JFS 01926, and also designates the type performed in a HCJFS database called (Child Care Provider Tracking). In both inspections cited, the inspection was noted as unannounced in the CCPT database.

Regarding the three of 60 (5%) initial license Type B Homes tested (all at Hamilton), we concur that the CDJFS did not document it performed the required three inspections. However, the type of inspection performed in each case noted was unannounced in the CCPT. For the two provisional (initial) licenses with only two of three inspections completed, both providers were referred to ODJFS for enforcement action after the CDJFS made multiple unsuccessful attempts to complete inspections. Both providers were ultimately revoked for non-compliance after a substantial delay in the revocation process (5 months and 9 months respectively).

CDJFS policy will be revised to remind staff to note the inspection type on the JFS 01926, in addition to the CCPT database. No additional corrective action is planned. The CDJFS can do nothing but document continued unsuccessful attempts at inspection during the enforcement process.

Lucas County

Lucas County Job and Family Services did not identify the type of inspection on nine inspection reports. The Child Care Coordinator met with staff on February 5, 2016, and reminded them that they needed to note the type of inspection on the top of the inspection form. The Coordinator will complete quarterly reviews of the inspection forms to ensure they are appropriately marked. In addition, a stamp will be

**STATE OF OHIO
CORRECTIVE ACTION PLAN (Continued)
JULY 1, 2014 THROUGH JUNE 30, 2015**

FINDING/AGENCY/CORRECTIVE ACTION

issued to the Child Care Specialists that will be used to indicate whether the inspection was “announced and unannounced”. The implemented corrective action will be reviewed by April 1, 2016.

Lucas County Job and Family Services had two cases in which only one inspection was completed in the fiscal year and the type of inspection was not properly noted. Staff has submitted an inspection schedule to the Coordinator to ensure that all inspections and the correct type of inspections are completed timely. The Coordinator will review the tentative schedule monthly with each staff member to ensure inspections were completed. Quarterly reviews will also be completed to ensure adherence to the schedule.

The Child Care Coordinator, Program Administrator, Deputy Director of Client Services, and Deputy Director of Program Integrity and Compliance will meet quarterly to evaluate program performance. The first quarterly meeting will be held in April 2016.

Montgomery County

Effective 2/11/2016 all Type B child care inspections completed by MCDJFS will include the type of inspection notated on the inspection form. All Type B licensing staff have reviewed the inspection report and been instructed where the type of inspection should be indicated. From this day forward all Type B inspection reports completed by MCDJFS will include designation of the type of inspection.

Anticipated Completion Date for Corrective Action:

June 2016

Contact Person Responsible for Corrective Action:

Jeffery Van Deusen, Bureau Chief, Child Care Licensing and Monitoring, Ohio Department of Job & Family Services

4200 East Fifth Avenue, Columbus, Ohio 43219

Phone: (614) 752-0581 E-Mail: Jeffery.vandeusen@jfs.ohio.gov

Finding Number: 2015-024
State Agency: Ohio Department of Job & Family Services
Finding Description: Child Care and Development Fund Cluster – Type B Home Licenses

Official’s Response and Corrective Action Plan:

Ohio Department of Job & Family Services

ODJFS will continue to provide technical assistance and training to CDJFS management on the requirements of licensing policies and procedures to ensure that recommendations for approval of Type B applications are made timely and in compliance with all requirements. Additionally, ODJFS will continue to conduct on-site county monitoring and file audits to ensure requirements are being implemented.

Cuyahoga County

CDJFS Staff will now date stamp all application documents as they are received to assure they are received within 90 days of the date of the application. These receive dates will also be documented on the CDJFS Monitoring Staff’s Child Care Licensing Form.

**STATE OF OHIO
CORRECTIVE ACTION PLAN (Continued)
JULY 1, 2014 THROUGH JUNE 30, 2015**

FINDING/AGENCY/CORRECTIVE ACTION

CDJFS Licensing Supervisors will track all application dates and make certain recommendations for approval or denial are made to ODJFS in a timely manner – not to exceed the required timelines unless otherwise determined by ODJFS.

Franklin County

In September 2015 Franklin County implemented a web application reporting and tracking system for Type B Home Inspections. This system has improved tracking and monitoring of all documents received for a completed application. The Licensing Specialist will receive updated training on how to better monitor dates utilizing the web application and the addition of a clerical support specialist will better assist with the appropriate tracking as well. The supervisor will be responsible to monitor and review paperwork dates.

Hamilton County

As noted in a 1/22/16 e-mail correspondence from Auditor of State staff, the testing for application timeliness should consider the number of days between the application approval/denial date and the date the application was deemed complete (with all required documentation submitted). It would appear that testing instead considered the number of days between the application date and the application approval/denial date. In re-reviewing the seven applications noted on 1/22/16 to be not approved or denied within 100 days of receiving the application, we found only one to be in excess of 100 days. The remaining applications were all processed within 100 days, in fact averaging 63.5 days to process.

HCJFS will continue to closely monitor application processing timeliness. A local HCJFS database (Child Care Provider Intake) will continue to capture the application date and each date the application is returned for corrections or additional documentation. This same database captures the date all information was received from the applicant and the date the application was deemed complete. The application and all associated documentation will continue to be stored electronically with an electronic date stamp (date received) in our local document imaging system (Onbase).

Lucas County

The CDJFS (1) shall recommend applications for approval or denial, to the Ohio Department of Job & Family Services (ODJFS) within one hundred days of receiving a completed application. On January 28, 2016, the Child Care Coordinator reminded staff to date stamp every incoming document. The Coordinator will review each completed package and ensure it is date stamped before the application is submitted to the State.

Montgomery County

Effective 2/11/2016 the corrective action plan for Montgomery County consists of two parts: Date stamping all Type B application documentation as it is received by the CDJFS and tracking each application item in a data base exclusively for Type B application timeliness. This database will include the start date of the 100 day count as well as the 100th day deadline for the CDJFS to make recommendation for approval/denial of a Type B license.

Anticipated Completion Date for Corrective Action:

May 2016

Contact Person Responsible for Corrective Action:

**STATE OF OHIO
CORRECTIVE ACTION PLAN (Continued)
JULY 1, 2014 THROUGH JUNE 30, 2015**

FINDING/AGENCY/CORRECTIVE ACTION

Finding Number: 2015-025
State Agency: Ohio Department of Job & Family Services
Finding Description: Child Care and Development Fund Cluster – Type A Homes/Centers

Official's Response and Corrective Action Plan:

(1) It is conventional procedure that during an inspection, the licensing specialist assesses that a program has completed a fire inspection. The licensing specialist assesses compliance at the point of inspection and therefore reviews that the program has a current fire inspection on the day of the inspection. If it is discovered that the program failed to complete the inspection within 12 months from the previous fire inspection but possessed a current inspection at the time of inspection, the licensing specialist documents the finding as "In-Compliance". The bureau procedure will be altered to include a documenting statement in the inspection when such an instance is assessed which will remind the program that Administrative Code requires the program to obtain a fire inspection every 12 months and that the program must comply with the requirement. Licensing specialists and supervisors will be trained on the new procedure.

(2) Bureau procedure is that licensing specialists should contact a program if compliance materials are not submitted and documentation of this contact should be uploading to FileNet. Training will be provided to licensing supervisors and specialists about the bureau procedure of ensuring proper documentation is uploaded to FileNet.

(3) In order for ODJFS to receive an initial application, the owner and/or administrator must electronically sign the application prior to COLTS-SOLAR allowing the provider to officially submit the application. The electronic system is designed in a manner that each time that a provider makes a change to their application (e.g.: update telephone number; mailing address), it saves over the previous application, therefore leaving no history of applications previously submitted. The system also allows a provider to log into their application and make changes without officially submitting to ODJFS. ODJFS is able to view the working copy of an application in which the provider is working, however, ODJFS does not receive the official copy until the owner and/or administrator signs the application and submits electronically. It is believed the licensing specialist did not print the initial application and upload to FileNet per bureau procedures, however, printed the unofficial copy of a version of the application in which the provider was making changes. ODJFS is in the process of designing a licensing database where all historical applications will be saved. Training will be provided to licensing specialists and supervisors on bureau procedures.

(4) Training will be provided to licensing specialists and supervisors on ensuring all appropriate documents are signed, such as: inspection reports, JFS 01214, and letters.

**STATE OF OHIO
CORRECTIVE ACTION PLAN (Continued)
JULY 1, 2014 THROUGH JUNE 30, 2015**

FINDING/AGENCY/CORRECTIVE ACTION

Finding Number: 2015-026
State Agency: Ohio Department of Job & Family Services
Finding Description: Reporting – Various Programs

Official’s Response and Corrective Action Plan:

The Department is in the process of implementing the use of the CAPIS – Federal Financial Reporting (FFR) system to collect financial information used to prepare the quarterly federal financial reports. CAPIS-FFR acts as repository for all OAKS information (payroll, personal services, supplies & maintenance, pass thru, revenue, program income, and subsidies), as well as CFIS expenditure data and ACR expenditure data. Pulling the financial data from a single system source, should increase the Department’s ability to accurately report financial information on the federal reports by reducing the transfer of information between and across spreadsheets.

The Department uses SharePoint to post the federal reports and backup documentation to ensure two levels of review for each federal report. When a new file for a federal report and backup documentation are posted in SharePoint (*each federal report requires a new file upload*), the system sends an email to indicate an “Approval” is required. There are 2 levels of supervisory verification required; the Unit Supervisor reviews the reports and documentation after receiving the email from SharePoint. If corrections are necessary, the report is rejected through SharePoint, which alerts the Analyst who posted the report to make corrections. If no corrections are necessary, the Unit Supervisor “Approves” the file and it is forwarded to the Section Chief who conducts further review and either “Approves” or “Rejects” the federal report. When “Approved” by the Section Chief, a Certified Federal Report is posted to the file in SharePoint.

Finding Description: Cash Management – Various Programs

Official's Response and Corrective Action Plan:

The Department of Medicaid is currently conducting a full review of the current draw procedures. As part of the review we are looking at the voucher approval process with a focus on eliminating the conditions that cause delays in payments. During this review procedures will be updated to mitigate the risk that delays in the approval, processing, and payment of vouchers will result in CMIA violations. Additionally, we are implementing methods to monitor payment delays that do occur to enable us to identify undisbursed funds for repayment to federal accounts.

Anticipated Completion Date for Corrective Action:

April 2016

Contact Person Responsible for Corrective Action:

Mark Wilson, Bureau Chief Cost Allocation and Reporting, Ohio Department of Medicaid
50 West Town Street, Columbus, Ohio 43215
Phone: (614) 752-2136 E-mail: Mark.Wilson@medicaid.ohio.gov

**STATE OF OHIO
CORRECTIVE ACTION PLAN (Continued)
JULY 1, 2014 THROUGH JUNE 30, 2015**

FINDING/AGENCY/CORRECTIVE ACTION

Finding Number: 2015-031
State Agency: Ohio Department of Medicaid
Finding Description: Federal Schedule – Money Follows the Person

Official's Response and Corrective Action Plan:

The Department of Medicaid will conduct a full review of the current procedures. During this review, the procedures will be updated to include a process for verifying pass-through monies with sister agencies and new written procedures for additional management review.

Anticipated Completion Date for Corrective Action:

June 2016

Contact Person Responsible for Corrective Action:

Kara Benson, Financial Manager, Ohio Department of Medicaid
50 West Town Street, Columbus, Ohio 43215
Phone: (614) 466-9446 E-mail: Kara.Benson@medicaid.ohio.gov

Finding Number: 2015-032
State Agency: Ohio Department of Mental Health and Addiction Services
Finding Description: DUNS Numbers for Subawards

Official's Response and Corrective Action Plan:

The Department is aware that without ensuring applicants provide a valid DUNS number prior to approval of the subaward, it is noncompliant with 2 CFR part 25. This noncompliance could result in Federal funds being reduced, taken away, or other sanctions imposed by the Federal grantor agency. Based on discussions with AOS, DUNS numbers previously obtained by the Department, although permanently assigned to entities and the subrecipients and not changed since Fiscal Year 2011, the annual function of obtaining and verifying DUNS numbers before issuing awards is required.

In order to meet compliance, the Department will take the following corrective action before providing Federal funds to ensure that no allocations or grants are made without receiving DUNS numbers:

Require potential subrecipients of the following:

- a. A subaward cannot be made to an entity unless the entity has provided its DUNS number and
- b. No entity may receive a subaward unless the entity has provided its DUNS number

As indicated previously, prior to consolidation of the two Departments, DUNS numbers were obtained from the Boards by the Ohio Department of Alcohol and Drug Addiction Services (ODADAS). Compliance was believed sufficient since DUNS numbers are permanently assigned to entities and the subrecipients had not changed since Fiscal Year 2011.

**STATE OF OHIO
CORRECTIVE ACTION PLAN (Continued)
JULY 1, 2014 THROUGH JUNE 30, 2015**

FINDING/AGENCY/CORRECTIVE ACTION

During consolidation of both Departments procedures to ensure efficiencies and compliance in this area resulted in the following additional two steps, in order to achieve adherence regarding 2 CFR part 25:

1. The Department has re-engineered the Subrecipient Monitoring program to include desktop reviews. These desktop reviews include an Annual Monitoring Questionnaire for each of the ADA/ADAMH/CMH/MHRS Boards. The questionnaire has been revised to include a request for the valid DUNS number for the entity. This has already been implemented and effective in SFY 2016.
2. The Department is implementing a new electronic grant application process for Subawards to be accomplished in SFY 2017. The request for DUNS information will be incorporated into the on-line application process that applicants use to apply for grants before awards are approved. As part of this system, the subrecipients will also be notified of the required language regarding 2 CFR part 25. During the interim period, while the system is in the final stages of development, the Community Funding staff will work on a case-by-case bases to obtain the DUNS number.

Anticipated Completion Date for Corrective Action:

Step One has been implemented. Each year the Department evaluates the Questionnaire and determines if revisions are necessary before sending. The questionnaire is sent to Boards on the first business day of each State Fiscal Year.

Step Two will be accomplished in the new electronic grants system, scheduled to be complete June 2017. This will be effective for continuation grant applications, as well as competitive bid grant applications.

Contact Person Responsible for Corrective Action:

Rosaland M. Gatewood-Tye, Assistant Chief Fiscal Officer, Ohio Department of Mental Health and Addiction Services

30 E. Broad Street, Columbus, Ohio 43215

Finding Number: 2015-033
State Agency: Ohio Department of Transportation
Finding Description: Highway Planning & Construction Cluster – Wage Rate Requirements

Official's Response and Corrective Action Plan:

All of the District Contractor Compliance Officers (CCOs) formerly referred to as EEOCC (Equal Employment Opportunity Contract Coordinator) now report to one manager who reports to Central Office, Office of Small & Disadvantaged Business Enterprise (OSDBE) in the Division of Opportunity, Diversity, and Inclusion. This will ensure consistent practices among all districts throughout the State.

We are currently training all of the District CCOs on Davis-Bacon and Related Acts and Investigations for Wage Violations. Additionally, by the end of March 2016, ODOT will have the mandatory implementation of the Civil Rights and Labor (CRL) System, which will allow the upload of bona fide Digital Signature Certified Payrolls. This implementation will allow the CCOs to spend more time out on ODOT's construction projects and performing more site interviews.

**STATE OF OHIO
CORRECTIVE ACTION PLAN (Continued)
JULY 1, 2014 THROUGH JUNE 30, 2015**

FINDING/AGENCY/CORRECTIVE ACTION

The District 5 CCO was hired on December 28, 2015. The District 11 CCO was hired on February 3, 2016. The hiring of these individuals will increase the number of site interviews being performed.

TPRs will resume after the Construction Manual of Procedures (MOP) is updated with the duties of the CCOs. The MOP will be updated by August 2016. After the MOP update, the TPR process will be modified to reflect the changes made to the MOP. TPRs will resume in June 2017.

Anticipated Completion Date for Corrective Action:

July 2017

Contact Person Responsible for Corrective Action:

Danette L. Shuler, Contractor Compliance Manager, Ohio Department of Transportation
1980 West Broad Street, Columbus, Ohio 43223
Phone: (513) 933-6530 E-mail: Danette.Shuler@dot.ohio.gov

Finding Number: 2015-034
State Agency: Ohio Department of Veteran Services
Finding Description: Federal Schedule – Veterans State Nursing Home Care

Official's Response and Corrective Action Plan:

The Department of Veterans Services (DVS) filled the vacant position. DVS will review revenue transactions to ensure receipts are coded properly. The Department will also develop a procedure to provide for adequate segregation of duties for the Schedule preparation in the event of vacant positions.

Anticipated Completion Date for Corrective Action:

March 2016

Contact Person Responsible for Corrective Action:

Michael Liptay, Chief Fiscal Officer, Ohio Department of Veteran Services
3416 Columbus Ave, Sandusky, Ohio 44870
Phone: (419) 625-2454 E-mail: Michael.Liptay@dvs.ohio.gov

**STATE OF OHIO
SCHEDULE OF PRIOR AUDIT FINDINGS AND QUESTIONED COSTS
JULY 1, 2014 THROUGH JUNE 30, 2015**

AGENCY/FINDING	CURRENT STATUS ¹
Ohio Department of Medicaid	
2014-001 / IT – Lack of Formal Program Change Policy and Procedures	Corrective action was taken and this finding is no longer reportable in the 2015 State of Ohio Single Audit Report.
Ohio Department of Education	
2014-002 / Finding for Recovery – Sunrise Academy	Corrective action was taken and this finding is no longer reportable in the 2015 State of Ohio Single Audit Report.
2014-003 / Finding for Recovery – Directional Academy	Corrective action was taken and this finding is no longer reportable in the 2015 State of Ohio Single Audit Report.
Ohio Office of Budget and Management	
2014-004 / Federal Schedule – Various Programs	The finding was repeated for fiscal year 2015. The Office of Budget and Management (OBM) enhanced its review procedures beyond analytical procedures during its compilation of the statewide fiscal year 2015 Schedule of Expenditures of Federal Awards (SEFA). Despite those additional procedures, three agency errors occurred in the 2015 SEFA provided to the Auditor of State. For fiscal year 2016, OBM will continue to seek additional methods to identify potential errors beyond its current procedures. Full remediation is expected by November 2016; finding first reported in fiscal year 2013.
Ohio Development Services Agency	
2014-005 / Home Energy Assistance Program (HEAP) – Period of Availability	Corrective action was taken and this finding is no longer reportable in the 2015 State of Ohio Single Audit Report.
2014-006 / HEAP – Cash Management	The finding was repeated for fiscal year 2015. The Agency will monitor transactions periodically to ensure the input of entry dates from uploads into OAKS aligns with the Accounting Dates for output reports in Business Intelligence (reporting tool). These errors lengthen the schedule payment date which cause the transactions to expend funds late. The Agency will review its process and make changes to the areas that it controls. Full remediation is expected by June 2016; finding first reported in fiscal year 2014.
Ohio Department of Developmental Disabilities	
2014-007 / Medicaid – Provider Certification and Reviews	Corrective action was taken and this finding is no longer reportable in the 2015 State of Ohio Single Audit Report.
2014-008 / Medicaid – Accreditation Reviews	Corrective action was taken and this finding is no longer reportable in the 2015 State of Ohio Single Audit Report.

STATE OF OHIO
SCHEDULE OF PRIOR AUDIT FINDINGS AND QUESTIONED COSTS (Continued)
JULY 1, 2014 THROUGH JUNE 30, 2015

AGENCY/FINDING	CURRENT STATUS ¹
Ohio Department of Education	
2014-009 / Various Programs – Transparency Act Reporting	The finding was not reportable in the 2015 State of Ohio Single Audit Report as Transparency Act reporting is no longer a significant compliance requirement of the federal government. The Ohio Department of Education (ODE) modified its processes to ensure completeness of reporting to the U.S. Department of Education although clarification delays from the U.S. Department of Agriculture slowed this process. Full remediation was completed in June 2015; finding first reported in fiscal year 2011.
2014-010 / DUNS Numbers for Subawards	The finding was repeated for fiscal year 2015. ODE implemented corrective action in February 2015 after the fiscal year 2015 subawards were issued. Full remediation is in place; finding first reported in fiscal year 2014.
2014-011 / Cash Management	Corrective action was taken and this finding is no longer reportable in the 2015 State of Ohio Single Audit Report.
2014-012 / Child and Adult Care Food Program – Sponsor Reviews	The finding was repeated for fiscal year 2015. ODE will ensure all new entities and all new sponsors are entered in the Claims Reimbursement and Reporting System. Additionally, training will be provided. Full remediation is expected in February 2016; finding first reported in fiscal year 2014.
2014-013 / Federal Schedule – Various Programs	The finding was repeated for fiscal year 2015. ODE will work with OBM staff and the U.S. Department of Agriculture to accurately split federal funds among the correct CFDA numbers. Full remediation is expected in September 2016; finding first reported in fiscal year 2014.

Ohio Environmental Protection Agency

2014-014 / Clean Water State Revolving Fund (CWSRF) and Drinking Water State Revolving Fund (DWSRF) – Invoice Reviews	The finding was repeated for fiscal year 2015. The Ohio Environmental Protection Agency indicates they will establish a 45 day standard for completing invoice reviews as no standard was previously in place. The agency feels they can meet a 45 day invoice review process in the future. Full remediation is expected in February 2016; finding first reported in fiscal year 2011.
2014-015 / CWSRF & DWSRF – Cash Management Internal Controls	Corrective action was taken and this finding is no longer reportable in the 2015 State of Ohio Single Audit Report.

STATE OF OHIO
SCHEDULE OF PRIOR AUDIT FINDINGS AND QUESTIONED COSTS (Continued)
JULY 1, 2014 THROUGH JUNE 30, 2015

AGENCY/FINDING	CURRENT STATUS ¹
Ohio Department of Job and Family Services	
2014-016 / IT – Income and Eligibility Verification System (IEVS) Due Dates and Result Code Errors	The finding was repeated for fiscal year 2015. The Ohio Department of Job and Family Services (ODJFS) continue to provide training and technical assistance to county staff to resolve this long reported issue. ODJFS will monitor counties for timeliness and will require continuous improvement plans for delinquent timeliness rates. Full remediation is expected by March 2016; finding first reported in fiscal year 1997.
2014-017 / Supplemental Nutrition Assistance Program (SNAP) Cluster – Incorrect Benefit Amount	The finding was repeated in fiscal year 2015. ODJFS will continue providing county employees with eligibility training and will conduct targeted reviews for payment accuracy. Full remediation is expected by April 2016; finding first reported in fiscal year 2006.
2014-018 / Child Care – Copayment Amounts	The finding was repeated for fiscal year 2015. ODJFS will continue providing county employees with training while county offices make necessary corrections to internal processes. ODJFS expects full remediation by March 2016; finding first reported in fiscal year 2012.
2014-019 / Child Care Type B Homes – Various Counties	The finding was repeated for fiscal year 2015. ODJFS will continue to monitor county operations and errors identified by the Auditor of State at individual counties will implement appropriate controls to prevent non-compliance in the future. Full remediation is expected by June 2016; finding first reported in fiscal year 2012.
2014-020 / Reporting – CB-496 and OCSE-396A	The finding was repeated for fiscal year 2015. ODJFS is implementing a single source federal reporting system and well as a layered supervisory review process. Full remediation is expected by July 2016; finding first reported in fiscal year 2013.
2014-021 / SF-425 Reporting – Various Programs	The finding was repeated for fiscal year 2015. ODJFS is implementing a single source federal reporting system and well as a layered supervisory review process. Full remediation is expected by July 2016; finding first reported in fiscal year 2014.
2014-022 / Various Programs – Transparency Act Reporting	Corrective action was taken and this finding is no longer reportable in the 2015 State of Ohio Single Audit Report.
2014-023 / Various Programs – Cash Management	The finding was repeated for fiscal year 2015. ODJFS is developing internal procedures to reduce the voucher processing delays within the five business day requirement. Full remediation is expected by March 2016; finding first reported in fiscal year 2013.
2014-024 / Child Care Development Fund (CCDF) Cluster – Fraud Detection and Repayment Monitoring	Corrective action was taken and this finding is no longer reportable in the 2015 State of Ohio Single Audit Report.

**STATE OF OHIO
SCHEDULE OF PRIOR AUDIT FINDINGS AND QUESTIONED COSTS (Continued)
JULY 1, 2014 THROUGH JUNE 30, 2015**

AGENCY/FINDING	CURRENT STATUS ¹
Ohio Department of Medicaid	
2014-025 / Medicaid/Children's Health Insurance Program (CHIP) – Ineligible Recipients	The finding was repeated in fiscal year 2015. Ohio Department of Medicaid (ODM.) indicates high staff turnover at the county caseworker level can lead to errors. ODM will increase county training, publish newsletters, and provide various desk aids to increase consistency and accuracy statewide. Full remediation is currently in place; finding first reported in fiscal year 2010.
2014-026 / Medicaid/CHIP – Incorrect Benefit Amount	Corrective action was taken and this finding is no longer reportable in the 2015 State of Ohio Single Audit Report.
2014-027 / IT – Medicaid Information Technology System (MITS) – Claims Reimbursement in Excess of Ohio Administrative Code Limits	Corrective action was taken and this finding is no longer reportable in the 2015 State of Ohio Single Audit Report.
2014-028 / Medicaid/CHIP – Incomplete Consumer Complaint Population	Corrective action was taken and this finding is no longer reportable in the 2015 State of Ohio Single Audit Report.
2014-029 / IT – Lack of Formal Program Change Policy and Procedures	Corrective action was taken and this finding is no longer reportable in the 2015 State of Ohio Single Audit Report.
2014-030 / Medicaid – Federal Schedule	A finding for a different federal program was repeated in fiscal year 2015. ODM will conduct a full review of the current procedures. During this review, the procedures will be updated to include a process for verifying pass-through monies with other state agencies and new written procedures for additional management review. Full remediation is expected by June 2016; finding first reported in fiscal year 2014.
2014-031 / Medicaid & CHIP – Surveillance and Utilization Review (SUR) Limited Scope Reviews	Corrective action was taken and this finding is no longer reportable in the 2015 State of Ohio Single Audit Report.

**STATE OF OHIO
SCHEDULE OF PRIOR AUDIT FINDINGS AND QUESTIONED COSTS
JULY 1, 2014 THROUGH JUNE 30, 2015**

AGENCY/FINDING	CURRENT STATUS ¹
Ohio Department of Mental Health and Addiction Services	
2014-032 / Social Service Block Grant (SSBG) – Transparency Act Reporting	The finding was not reportable in the 2015 State of Ohio Single Audit Report as Transparency Act reporting is no longer a significant compliance requirement of the federal government. The Ohio Department of Mental Health and Addition Services (MHA) created a modification to its federal reporting system to correctly capture this information. Full remediation is expected by March 2016; finding first reported in fiscal year 2014.
2014-033 / DUNS Numbers for Subawards	The finding was repeated for fiscal year 2015. MHA has a short-run solution to strengthen its monitoring program related to the DUNS number with a future solution to incorporate this information as part of an on-line application process. Full remediation is expected by February 2016; finding first reported in fiscal year 2014.
2014-034 / Block Grants for Prevention and Treatment of Substance Abuse – Late Report Submission	Corrective action was taken and this finding is no longer reportable in the 2015 State of Ohio Single Audit Report.
Ohio Department of Public Safety	
2014-035 / Subrecipient Monitoring	Corrective action was taken and this finding is no longer reportable in the 2015 State of Ohio Single Audit Report.
2014-036 / Federal Transparency Act – Subaward Reporting	Corrective action was taken and this finding is no longer reportable in the 2015 State of Ohio Single Audit Report.
Ohio Department of Transportation	
2014-037 / Highway Planning & Construction Cluster – Transparency Act Reporting	Corrective action was taken and this finding is no longer reportable in the 2015 State of Ohio Single Audit Report.

¹ The State of Ohio's Schedule of Prior Audit Findings and Questioned Costs includes information about the status of comments subsequent to June 30, 2015, which we did not audit and, accordingly, express no opinion on.

Office of Budget and Management

John R. Kasich
Governor

Timothy S. Keen
Director

December 22, 2015

To the Honorable John R. Kasich, Governor;
Members of the Ohio General Assembly; and
Citizens of Ohio:

It is my privilege to present the State of Ohio's Comprehensive Annual Financial Report (CAFR) for the year ended June 30, 2015, prepared in accordance with Generally Accepted Accounting Principles (GAAP) as prescribed by the Governmental Accounting Standards Board (GASB).

The Office of Budget and Management (OBM) prepared this report pursuant to Section 126.21, Ohio Revised Code. The report includes the basic financial statements, which provide an overview of the State's financial position and the results of financial operations. Responsibility for the accuracy of the data presented, as well as the completeness and fairness of the presentation, including all disclosures, rests with OBM.

To the best of our knowledge and belief, the information presented is accurate in all material respects and reported in a manner designed to present fairly the financial position and results of operations of the State of Ohio. All disclosures necessary for a reasonable understanding of the State's financial activities have been included.

This letter of transmittal is intended to complement management's discussion and analysis (MD&A) and should be read in conjunction with it. The MD&A provides an overview of the State's financial activities addressing both governmental and business-type activities reported in the government-wide financial statements.

The reporting format for our CAFR is significantly different from the way the State more typically presents its finances on a non-GAAP budgetary basis. The most obvious difference is that the "General Fund" in the CAFR includes more than just the State's General Revenue Fund (GRF). The General Fund also includes other funds such as the reimbursement-supported funds used for activities administered by state agencies and departments for which special revenue or proprietary fund classifications were considered to be inappropriate.

The State's management is responsible for establishing and maintaining internal control designed to ensure that the State's assets are protected from loss, theft, or misuse and to ensure that adequate accounting data are compiled to allow for the preparation of financial statements in conformity with GAAP. Internal control is designed to provide reasonable, but not absolute, assurance that these objectives are met. The concept of reasonable assurance recognizes that: 1) the cost of a control should not exceed the benefits likely to be derived, and 2) the valuation of costs and benefits requires estimates and judgments by management.

INDEPENDENT AUDIT RESULTS

In compliance with Ohio Revised Code, an annual financial audit has been performed by the Office of the Auditor of State. The audit was conducted in accordance with auditing standards generally accepted in the United States of America and Government Auditing Standards issued by the Comptroller General of the United States. The auditor's unmodified opinion is included in the Financial Section of this report. This opinion indicates there was no limitation on the scope of the auditors' examination and the financial statements were presented fairly, in all material respects, in accordance with GAAP.

Additionally, the State's Single Audit report is audited by the Office of the Auditor of State to meet the requirements of the federal Single Audit Act Amendments of 1996 and related Office of Management and Budget (OMB) Circular A-133. The Single Audit report will be issued separately from the State's CAFR.

PROFILE OF THE GOVERNMENT

History

Ohio's first constitution was adopted in 1802, and Ohio entered the union in 1803. Ohio's present constitution was modified by a state constitutional convention in 1851 and has since been amended on numerous occasions. The Constitution establishes a state governmental structure similar to the federal model, with three separate branches of government — executive, legislative, and judicial.

Governmental Structure

The executive branch consists of the Governor and Lieutenant Governor, who are jointly elected, and four additional statewide elected officials: the Attorney General, the Auditor of State, the Secretary of State, and the Treasurer of State. All of these officials are elected to four-year terms. The State Board of Education is also part of the executive branch.

Approximately 100 departments, agencies, boards, and commissions are part of the executive branch of government and receive appropriations from the legislature, along with several judicial and legislative agencies. An organizational chart of state government can be found on pages xiv and xv.

The state legislature in Ohio is referred to as the General Assembly and consists of two separate chambers, the Senate, a 33-member body, and the House of Representatives, a 99-member body. Each member of the General Assembly is elected to represent the residents of a geographical district for a specified term. Members of Ohio's General Assembly are subject to term-limits; senators are restricted to serving two four-year terms, and representatives are restricted to serving four two-year terms. Each chamber has a presiding officer to call the chamber to order and direct the calendar of events. The presiding officer in the Senate is the President of the Senate, and the presiding officer of the House of Representatives is the Speaker of the House. A new General Assembly is convened in January of each odd-numbered year.

Within the Judicial system, the Supreme Court is the court of last resort in Ohio. Most of its cases are appeals from the twelve district courts of appeal. The chief justice and six justices are elected to six-year terms on a nonpartisan ballot.

Reporting Entity and Its Services

For financial reporting purposes, the State's reporting entity consists of (1) the primary government, (2) component units for which the primary government is financially accountable, and (3) other component units for which the nature and significance of their relationship with the primary government is such that exclusion would cause the reporting entity's financial statements to be misleading or incomplete. The criteria set forth in Governmental Accounting Standards Board's (GASB) Statement 14, the Financial Reporting Entity, Statement 39, Determining Whether Certain Organizations are Component Units, an amendment to GASB 14 and Statement 61, the Financial Reporting Entity: Omnibus, an amendment to GASB 14, are used to determine the organizations for which the State is financially accountable. NOTE 1A to the financial statements explains more fully which financial activities are included in the State's reporting entity.

The State provides a wide range of services and support to its citizenry that are accounted for in the following functions or programs: primary, secondary and other education, higher education support, public assistance and Medicaid, health and human services, justice and public protection, environmental protection and natural resources, transportation, general government, community and economic development, workers'

compensation, lottery, unemployment compensation, tuition credits, and other business-type activities.

Retirement Systems

Employees of the primary government or its component units may be eligible to participate in the Ohio Public Employees Retirement System, the State Teachers Retirement System of Ohio, the State Highway Patrol Retirement System, or the Alternative Retirement Plan. Further information on the State's participation in the different retirement systems can be found in NOTE 9 to the financial statements.

Risk Management

As discussed in NOTE 1Q to the financial statements, the State's primary government is self-insured for claims under its traditional healthcare plan as well as its vehicle liability plan. Employee and public official fidelity bonding is placed with a private insurer. Tort liability is self-funded; however, several state agencies have also acquired private insurance. State owned buildings are covered under a catastrophic property policy for both real and personal property losses. All other liability risk to State property is self-funded on a pay-as-you-go basis. The State's primary government and its component units participate in a public entity risk pool, which is accounted for in the Workers' Compensation Enterprise Fund, for the financing of their workers' compensation liability.

Budgetary Control and Accounting System

Ohio's Constitution requires the State to have a balanced budget. The State's biennium budget begins on July 1 of odd-numbered years and ends 24 months later on June 30. The State maintains budgetary controls to ensure compliance with legal provisions embodied in the appropriated budget approved by the General Assembly. Budgets are entered on the statewide accounting system once the appropriations bill becomes law. Controls are maintained first at the agency level, with additional control at the fund and appropriation level to ensure that expenditures do not exceed authorized limits.

The State's non-GAAP budgetary financial statements are prepared on a modified cash basis of accounting. This means that revenues are recognized when cash is received and expenditures are recognized when cash is paid. Encumbrances, reservations of appropriation authority as of June 30, the end of the State fiscal year, are reflected as expenditures on the budgetary basis of accounting.

Budget-to-actual comparisons can be found in this report for each governmental fund for which an appropriated annual budget has been adopted. For the General Fund and the Job, Family and Other Human Services Special Revenue Fund, these comparisons are presented as part of the basic financial statements. For other budgeted non-major

governmental funds with appropriated annual budgets, budget-to-actual comparisons are in the non-major governmental funds section of the CAFR.

Additional discussion of the budgetary and GAAP bases of accounting is provided in NOTE 1 to the financial statements.

The accounting system maintains all non-GAAP budgetary basis transactions and most GAAP basis adjustments. In addition to the information obtained from the accounting system for financial reporting, selected financial information provided by the State's agencies and departments is compiled to complete the GAAP basis financial statements.

Differences between the two bases of accounting (GAAP vs. non-GAAP budgetary) include: 1) entity differences — the GAAP reporting entity may include organizations such as financing authorities and other component units that are not included in the State's budget; 2) basis differences — the GAAP basis results in the reporting of accruals while the non-GAAP budgetary basis results in the reporting of cash transactions; and 3) timing differences — for example, GAAP recognizes expenditures for payables for goods and services received, whereas the non-GAAP budgetary basis considers unliquidated encumbrances as expenditures. Reconciliation between the GAAP basis and non-GAAP budgetary basis fund balances is presented in NOTE 3 to the financial statements.

ECONOMIC OVERVIEW AND OUTLOOK

The Economy in 2015

The U.S. economy expanded for the sixth consecutive calendar year in 2015, extending to six and one half years the expansion that began in mid-2009. At 78 months in length as of December, the current expansion is the fourth longest of the eleven expansions since the end of World War II. By a number of important measures, however, this expansion is the weakest of the four expansions that have lasted at least as long.

Real GDP increased at an annual rate of 2.2% during the twenty-five quarters ending in the third quarter of 2015, compared with an average growth rate of 4.6% during the first twenty-five quarters of the three other expansions that lasted as long. GDP growth across the last four expansions lasting at least 25 quarters has steadily declined: average growth was 5.6% in the 1960s expansion, 4.8% in the 1980s expansion, 3.5% in the 1990s expansion, and now 2.2% in the current expansion. Similarly, real final sales increased at a 1.9% annual rate during the current period, compared with the average of 4.3% during the three previous expansions. Nonfarm payroll employment has increased at an annual rate of 1.3% in the current expansion, less than one half of

the average of 2.8% for the prior three long expansions. Real disposable personal income has increased at an annual rate of only 1.8% in the current expansion, compared with an average of 4.2% in the prior three long expansions.

During 2015, real GDP has remained volatile, rising at an annual rate of 0.6% in the first quarter and then increasing 3.9% in the second quarter but slowing to 2.1% growth in the third quarter. Major monthly indicators point to continued growth in the fourth quarter, although manufacturing activity is slowing. Personal consumption expenditures contributed 1.9 percentage points of the growth in real GDP from the fourth quarter of 2014 through the third quarter of 2015. Gross private domestic investment contributed 0.7 percentage points, and government spending contributed 0.25 percentage points. In an indication of the effect of the strengthening in the dollar on trade, exports made no contribution and imports, which are included among the other categories and subtracted separately, subtracted 0.64 percentage points.

Growth in personal consumption expenditures was concentrated in services, with the largest increase in health care, but spending on both durable and nondurable goods also increased. Spending on motor vehicles and parts added only marginally to overall growth despite the historically high pace of new auto sales because the increase in the level has been modest. Increases in spending on nondurable goods were spread widely across individual categories.

Investment in business equipment and intellectual property were the primary drivers of investment during the first three quarters of 2015, accounting for more than one half of the contribution of gross private domestic investment to real GDP. Investment in nonresidential structures subtracted slightly from real GDP growth. In the government sector, almost all of the contribution to growth was state and local gross investment. Federal government spending made almost no contribution to growth.

Real personal consumption expenditures, which increased at an annual rate of 1.9% during the first three quarters of 2015, were financed by a 3.5% rate of increase in real disposable personal income. Real wage and salary disbursements, which account for more than one half of disposable personal income, also increased at an annual rate of 4.1%. Approximately one-half of the increase in compensation reflected an increase in employment and hours worked. The saving rate increased from 4.7% of disposable personal income in the fourth quarter of 2014 to 5.2% in the third quarter of 2015 because spending increased by less than income.

Inflation remained tame in 2015. The Consumer price index increased at an annual rate of 0.5% from the fourth quarter of 2014 to the third quarter of 2015. As expected at the

beginning of 2015, the large decrease in the price of oil has temporarily but significantly suppressed broad measures of inflation. The underlying rate of inflation is higher, as indicated by the 2.0% annualized increase in the CPI excluding food and energy and the 2.4% annualized rate of increase in the Median CPI from the Federal Reserve Bank of Cleveland.

Monetary policy remained extraordinarily accommodative throughout 2015. The Federal Reserve continued to peg the federal funds rate near zero, but has set the stage for beginning to raise the rate at its December meeting. In light of recent improvements in labor markets, policy makers no longer view the extremely low rate target as necessary. Employment growth slowed somewhat but remained solid during the first ten months of 2015, and the unemployment rate fell from 5.6% at the end of 2014 to 5.1% in October 2015. Broader measures of labor market conditions indicate ongoing improvement but at a slower pace.

Fiscal policy continued to add directly to aggregate demand in Fiscal Year 2014, as federal outlays amounted to an estimated 20.6 percent of GDP, compared with receipts amounting to an estimated 18.2 percent of GDP. The budget deficit as a percent of GDP declined for the sixth straight year, reaching an estimated 2.5 percent of GDP, but remained large by historical standards during economic expansions.

In line with trends across the country, labor markets across Ohio strengthened further in 2015. Nonfarm payroll employment in Ohio increased by 58,400 jobs, or 1.3% annualized, from December 2014 to October 2015. In addition, the annual benchmark revisions to historical data released by the U.S. Bureau of Labor Statistics in early 2015 revealed stronger growth in employment during both 2013 and 2014 than had been previously reported. The December-to-December growth was revised up from 51,000 jobs to 76,700 jobs in 2013 and from 61,500 jobs to 72,000 jobs in 2014.

Most major sectors of the economy contributed to Ohio job growth year-to-date through October 2015. Growth was concentrated in educational and health services (+17,800), trade, transportations, and utilities (+17,500), manufacturing (+13,500), financial activities (+8,200), and leisure and hospitality (+5,400). Employment declined through October in construction (-2,400), professional and business services (-2,300), mining and natural resources (-1,600), and government (-1,400). Private sector Ohio employment increased by 59,800 jobs.

The Ohio unemployment rate decreased 0.7 percentage points from 5.1% in December 2014 to 4.4% in October 2015. The decrease during 2015 reflected an increase of 19,596, or 0.4%, in total employment, a decrease of 43,733, or 15.0%, in unemployed

people, and a decrease of 24,137, or 0.4%, in the labor force. As is the case across the country, at least a portion of the decrease in the labor force is attributable to demographic changes that affect decisions to retire or pursue higher education.

In response to the ongoing growth in labor markets, Ohio personal income increased at an annual rate of 2.6% in the first half of 2015. Personal income increased at an annual rate of 3.0% across the country. Wage and salary disbursements increased at an annual rate of 2.3%, compared with 5.0% across the country.

The six and a half year long economic expansion has produced rising state tax revenue in Ohio. General fund tax revenues exceeded the estimate for the fifth year in a row in FY 2015, coming in \$390 million over the estimate (1.9%). Sales tax revenue was over the estimate by \$51.2 million (0.5%), but the real strength was in the personal income tax, which exceeded the estimate by \$279 million (3.4%). Through the first five months of FY 2016, overall tax revenues are on target with the estimate, with an overage in the sales tax and a shortfall in the income tax approximately canceling each other out.

The Economic Outlook

The economy is likely to continue expanding in 2016, despite the recent weakening in the manufacturing and export sectors. Past expansions have been cut short by unexpected events that have often included some mix of rising inflation, tightening monetary policy, and an upward spike in energy costs – none of which has recently occurred or appears likely in the near-term. Leading economic indicators that in the past have provided some warning of oncoming recessions are instead almost uniformly signaling growth at least at a moderate pace.

The pace of overall economic growth is projected to remain about the same in 2016. Real GDP will expand by a projected 2.4% in 2015 and 2016, according to the November 2015 forecast by IHS Global Insight. The Ohio economy is also expected to grow in 2016, according to the November 2015 IHS Global Insight forecast. Employment is projected to grow 0.9% in 2016 after a projected 1.2% increase in 2015 on an average annual basis. Personal income growth is projected to accelerate from 2.9% in 2015 to 4.0% in 2016. Nominal Gross State Product is projected to stay steady at 3.9%.

As always, unexpected events will shape future economic performance. In the near-term, U.S. economic growth could be stronger than previously anticipated for a time before ultimately giving way to more moderate growth longer-term. The economy could benefit more than anticipated in the near-term from the following:

- Extraordinarily accommodative monetary policy, even though the Fed appears poised to soon begin slowly raising short-term interest rates;
- The high level of corporate profits and strong corporate balance sheets;
- Further improvements in consumer confidence and household balance sheets; and
- The substantial decrease in the price of oil, which on balance will enhance productivity and boost spending on non-energy goods and services.

However, risks to the economic outlook include:

- A more rapid than anticipated rise in interest rates by the Federal Reserve;
- Additional increases in the foreign exchange value of the dollar and an intensification of the economic slowdown overseas; and
- An inability of federal lawmakers to implement fiscal and regulatory policies that foster long-term economic growth, coupled with large direct and indirect costs and economic distortions related to recent and pending health care, environmental, and financial services regulations.

MAJOR INITIATIVES AND PROJECTS

Transforming Ohio For Growth: Stronger. Together.

Consistent with state law, the Governor's biennial Executive Budget for fiscal years 2016 and 2017 was released in February of 2015 and introduced in the General Assembly as H.B. 64. After extended hearings and review, the 2016-17 biennial appropriations budget was passed by the General Assembly and signed (with selective vetoes) by Governor John Kasich on June 30, 2015.

Among the major policy initiatives undertaken by the Kasich Administration in conjunction with the biennial operating budget for fiscal years 2016 and 2017:

A Balanced Budget: In 2015, Ohio passed a balanced budget that was built with continued focus on conservative economic forecasts, conservative revenue estimates and the full allocation of funds necessary to cover our expected program costs and obligations.

The Governor's guiding principle was the maintenance and protection of the strong financial position our state presently enjoys. Ohio's enacted budget is balanced, but also structurally balanced, ensuring that ongoing revenues are sufficient to cover ongoing expenses.

Our strong finances and fiscal discipline have allowed us to reform our tax system, reduce the personal income rates and small business taxes in order to improve Ohio's jobs climate and economic competitiveness.

Reducing Taxes on Small Businesses: The budget continues the exemption of 75% of the first \$250,000 in business income for "flow-through" businesses and then increases the exemption to 100% for tax year 2016 (FY 2017). For "flow-through" business income in excess of \$250,000, a flat tax of 3% now applies, rather than the higher marginal tax rates under prior law. These provisions are beneficial to many small businesses that receive flow through income that is taxed under personal income tax.

Lower Income Taxes, Again: Personal income tax rates will be cut for all Ohio taxpayers by 6.3 percent. This means Ohio's top marginal income tax rate will have been cut from 5.925 percent when Gov. Kasich came into office in 2011 to 4.997 percent in 2016. With the \$1.9 billion in net tax cuts in this budget, Ohio will have reduced taxes by approximately \$5 billion during the past five years. The personal income tax rates are at the lowest level since 1982.

Continued Strong Support for K-12 Education: For the second straight budget, Ohio will significantly increase funding to K-12 education — providing record funding for K-12 education. Additionally, by building on a practice Kasich first proposed two years ago and giving greater consideration to the income of local residents, Ohio will more effectively drive state support to school districts with a series of carefully targeted aid categories.

Making College More Affordable: The budget will freeze tuition at two- and four-year state-supported schools, assuring that Ohio remains a leader in holding down the growth of tuition and general fees. A new nine-member Task Force on Affordability and Efficiency is working to help public colleges and universities examine ways to reduce costs. Following the work of the Task Force, Ohio's public colleges and universities will conduct an efficiency review to improve efficiencies and reduce costs.

Better Support for Ohioans with Disabilities: The budget makes historic new investments to ensure that every Ohioan with a developmental disability who wants to live and work in the community can do so. This budget invests \$286 million over two years to increase home- and community-based services, support community work opportunities and create new options for individuals who want to leave institutions.

Combating Infant Mortality: It is not acceptable that each year more than 1,000 Ohio babies die before their first birthday. Ohio has one of the worst infant mortality rates in

the country. The budget provides enhanced maternal services through Medicaid health plans for every woman living in neighborhoods most at risk for poor infant health outcomes. Working to engage local community leaders, health plans will connect women in high-risk neighborhoods to health care services.

Transforming Welfare: The budget creates a person-centered case management system where services are wrapped around an individual's needs in order to better support them as they move toward self-sufficiency. New initiatives will initially focus on those ages 16-24 in order to have the greatest impact and prevent the poverty cycle at an early age. To help in the effort, the budget also works to soften the benefit "cliffs" by allowing families to keep subsidized child care on a gradually reducing scale up to 300 percent of the federal poverty level.

Reducing Recidivism and Treating Addiction in Ohio's Prisons: Approximately 80 percent of Ohio's prison inmates have past histories of drug and alcohol addiction and those who don't overcome their addiction have a higher likelihood of re-entering prison after their release. By leveraging the clinical expertise of the Department of Mental Health and Addiction Services, Ohio can get inmates the help they need to overcome their addiction while they are serving their sentences and provide a seamless transition of services and supports to ensure sustained recovery after their release. In addition, the state will begin transferring low-level, non-violent inmates with addictions to serve their short-term sentence in a community treatment facility

Raining Day Fund Grows: At the end of FY15, the Budget Stabilization Fund (BSF) balance was increased to just over \$2 billion or approximately 6.4% of FY15 GRF revenues. A provision in the operating budget bill raised the statutory BSF ceiling from 5% of the prior year's GRF revenues to 8.5% of revenues.

The BSF is Ohio's rainy day savings account, a reserve balance set aside in good economic times to protect the State's budget from cyclical changes in revenues and expenditures should the economy become weakened unexpectedly.

Mid-Biennium Review: During Fiscal Year 2016, the Office of Budget and Management is leading state agencies through a Mid-Biennium Review (MBR) process, a thorough analysis of state agency budgets, operations and programs. The Kasich Administration initiated the first MBR process in 2012, and the two previous MBRs produced hundreds of recommendations for efficiencies and reforms to reduce the cost of government and revitalize Ohio's ability to keep and attract jobs.

Capital Budget: Early in 2016, the Governor is expected to introduce his capital budget proposal for the 2017 and 2018 fiscal biennium, identifying spending priorities to maintain and improve the state's educational and public service infrastructure in ways that help keep Ohio a leader in the competitive world economy.

AWARDS AND ACKNOWLEDGEMENTS

Certificate of Achievement

The Government Finance Officers Association of the United States and Canada (GFOA) awarded a Certificate of Achievement for Excellence in Financial Reporting to the State of Ohio for its comprehensive annual financial report (CAFR) for the fiscal year ended June 30, 2014.

In order to be awarded a Certificate of Achievement, a government must publish an easily readable and efficiently organized CAFR. The report must satisfy both generally accepted accounting principles and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe that our current CAFR continues to meet the Certificate of Achievement Program's requirements and we are submitting it to the GFOA to determine its eligibility for another certificate.

Acknowledgments

In conclusion, I wish to express my appreciation to the Financial Reporting staff of OBM's State Accounting Section and staffs of the various state agencies whose time and dedicated efforts made this report possible. I encourage you to access Ohio's Comprehensive Annual Financial Report at <http://www.obm.ohio.gov>.

Respectfully submitted,

Dave Yost • Auditor of State

INDEPENDENT AUDITOR'S REPORT

The Honorable John Kasich, Governor
 State of Ohio
 Columbus, Ohio

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Ohio (the State), as of and for the year ended June 30, 2015, and the related notes to the financial statements, which collectively comprise the State's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for preparing and fairly presenting these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes designing, implementing, and maintaining internal control relevant to preparing and fairly presenting financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to opine on these financial statements based on our audit. We did not audit the financial statements of the following organizations which reflect the percentages of total assets and expenditures/expenses/deductions indicated for the related opinion units:

Opinion Unit	Organization	Percent of Opinion Unit's Total	
		Assets	Expenditures /Expenses /Deductions
Governmental Activities	Treasurer of State Lease Rental Special Obligations	0%	1%
Business-Type Activities (BTA)	Ohio Bureau of Workers' Compensation and Tuition Trust Authority	94%	40%
BTA / Workers' Compensation	Ohio Bureau of Workers' Compensation	100%	100%
Aggregate Discretely Presented Component Units	Bowling Green State University; Central State University; Cleveland State University; Columbus State Community College; JobsOhio; Kent State University; Miami University; Ohio State University; Ohio University; Shawnee State University; University of Akron; University of Cincinnati; University of Toledo; Wright State University; and Youngstown State University.	88%	91%
Aggregate Remaining Fund Information	Police and Fire Pension Fund, Public Employees Retirement System, School Employees Retirement, State Highway Patrol Retirement System, State Teachers Retirement System, State Treasury Asset Reserve of Ohio, Treasurer of State Lease Rental Special Obligations, Tuition Trust Authority, and Variable College Savings Plan.	97%	83%

Those statements were audited by other auditors whose report has been furnished to us, and our opinion, insofar as it relates to the amount included for these independently audited organizations, is based solely on the report of other auditors. We audited in accordance with auditing standards generally accepted in the United States of America and the financial audit standards in the Comptroller General of the United States' *Government Auditing Standards*. Those standards require us to plan and perform the audit to reasonably assure the financial statements are free from material misstatement. The other auditors audited the financial statements of JobsOhio, which represents six percent of the total assets and seven percent of the total expenses of the aggregate discretely presented component units, in accordance with auditing standards generally accepted in the United States of America and not in accordance with *Government Auditing Standards*.

An audit requires obtaining evidence about financial statement amounts and disclosures. The procedures selected depend on our judgment, including assessing the risks of material financial statement misstatement, whether due to fraud or error. In assessing those risks, we consider internal control relevant to the State's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not to the extent needed to opine on the effectiveness of the State's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of management's accounting policies and the reasonableness of their significant accounting estimates, as well as our evaluation of the overall financial statement presentation.

We believe the audit evidence we obtained is sufficient and appropriate to support our audit opinions.

Opinions

In our opinion, based on our audit and the report of other auditors, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, the aggregate discretely presented component units, each major fund, and the aggregate remaining fund information of the State of Ohio, as of June 30, 2015, and the respective changes in financial position and where applicable, cash flows thereof and the respective budgetary comparisons for the General and Job, Family and Other Human Services funds thereof for the year then ended in accordance with the accounting principles generally accepted in the United States of America.

Emphasis of Matter

As discussed in Note 2 to the financial statements, during the year ended June 30, 2015, the State adopted Governmental Accounting Standards No. 67, *Financial Reporting for Pension Plans*, Statement No. 68, *Accounting and Financial Reporting for Pensions – an amendment of GASB Statement No. 27* and Statement No. 71, *Pension Transition for Contributions Made Subsequent to the Measurement Date*. We did not modify our opinion regarding this matter.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require this presentation to include *Management's Discussion and Analysis*, *Schedules for Infrastructure Assets Accounted for using the Modified Approach*, and *Schedules of Net Pension Liability and Employer Contributions* listed in the table of contents, to supplement the basic financial statements. Although this information is not part of the basic financial statements, the Governmental Accounting Standards Board considers it essential for placing the basic financial statements in an appropriate operational, economic, or historical context. We applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, consisting of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, to the basic financial statements, and other knowledge we

obtained during our audit of the basic financial statements. We do not opine or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to opine or provide any other assurance.

Supplementary and Other Information

Our audit was conducted to opine on the State of Ohio's basic financial statements taken as a whole.

The introductory section, the financial section's combining statements, individual fund statements and schedules, and the statistical section information present additional analysis and are not a required part of the basic financial statements.

The statements and schedules are management's responsibility, and derive from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. We subjected this information to the auditing procedures applied to the basic financial statements. We also applied certain additional procedures, including comparing and reconciling this information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves in accordance with auditing standards generally accepted in the United States of America. In our opinion, this information is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

We did not subject the introductory section and statistical section information to the auditing procedures applied to the audit of the basic financial statements and, accordingly, we express no opinion or any other assurance on them.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated December 22, 2015, on our consideration of the State's internal control over financial reporting and our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements and other matters. That report describes the scope of our internal control testing over financial reporting and compliance, and the results of that testing, and does not opine on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the State's internal control over financial reporting and compliance.

State of Ohio

Management's Discussion and Analysis For the Fiscal Year Ended June 30, 2015

(Unaudited)

Introduction

This section of the State of Ohio's annual financial report presents management's discussion and analysis of the State's financial performance during the fiscal year ended June 30, 2015. The management's discussion and analysis section should be read in conjunction with the preceding transmittal letter and the State's financial statements, which follow.

Financial Highlights

Government-wide Financial Statements

During fiscal year 2015, net position of the State's primary government decreased by \$1.6 billion, and ended fiscal year 2015 with a balance of \$28.6 billion. Net position of the State's component units decreased by \$5.14 billion, and ended fiscal year 2015 with a balance of \$9.56 billion. See additional discussion beginning on page 8.

Fund Financial Statements

Governmental funds reported a combined ending fund balance of \$13.43 billion that was comprised of \$129.8 million in nonspendable, \$8.89 billion restricted for specific purposes, \$1.41 billion committed, \$2.57 billion in assigned, and \$410.9 million in unassigned. See additional discussion beginning on page 11.

As of June 30, 2015, the General Fund's fund balance was approximately \$5 billion, including \$49.7 million in nonspendable, \$1.15 billion in restricted, \$803.6 million in committed, \$2.59 billion in assigned, and \$411.2 million in unassigned. The General Fund's fund balance decreased by \$688.2 million (exclusive of a \$3.6 million decrease in inventories) or 12.1 percent during fiscal year 2015. See additional discussion beginning on page 12.

Proprietary funds reported net position of \$9.28 billion, as of June 30, 2015, an increase of \$337.6 million since June 30, 2014. This increase is largely due to the net increase of \$590.5 million in the Unemployment Compensation Fund. See additional discussion beginning on page 13.

Capital Assets

The carrying amount of capital assets for the State's primary government increased to \$26.73 billion at June 30, 2015. The majority of the \$754.4 million increase during fiscal year 2015 was from the acquisition of machinery and equipment and construction-in-progress projects. See additional discussion beginning on page 14.

Long-Term Debt — Bonds and Notes Payable and Certificates of Participation Obligations

Overall, the carrying amount of total long-term debt for the State's primary government decreased \$33.8 million or .2 percent during fiscal year 2015, for an ending balance of \$17.7 billion. During the year, the State issued, at par, \$1.37 billion of long-term debt of which \$316.9 million was refunding bonds. See additional discussion beginning on page 15.

Overview of the Financial Statements

This annual report consists of three required components: management's discussion and analysis, basic financial statements, including the accompanying notes to the financial statements, and required supplementary information. In addition, this report includes an optional section that contains combining statements and schedules for the nonmajor governmental funds, nonmajor proprietary funds, fiduciary funds, and nonmajor discretely presented component unit funds.

The basic financial statements are comprised of the government-wide financial statements and fund financial statements. The figure on the following page summarizes the major features of these statements.

Major Features of the State of Ohio's Government-wide and Fund Financial Statements				
	Government-wide Statements	Fund Statements		
		Governmental Funds	Proprietary Funds	Fiduciary Funds
Scope	Entire State government (except fiduciary funds) and the State's component units	The activities of the State that are not proprietary or fiduciary, such as general government, transportation, justice and public protection, etc.	Activities the State operates similar to private businesses, such as the workers' compensation insurance program, lottery, tuition credit program, etc.	Instances in which the State is the trustee or agent for someone else's resources
Required Financial Statements	<ul style="list-style-type: none"> • Statement of Net Position • Statement of Activities 	<ul style="list-style-type: none"> • Balance Sheet • Statement of Revenues, Expenditures and Changes in Fund Balances 	<ul style="list-style-type: none"> • Statement of Net Position • Statement of Revenues, Expenses and Changes in Fund Net Position • Statement of Cash Flows 	<ul style="list-style-type: none"> • Statement of Fiduciary Net Position • Statement of Changes in Fiduciary Net Position
Accounting Basis and Measurement Focus	Accrual accounting and economic resources focus	Modified accrual accounting and current financial resources focus	Accrual accounting and economic resources focus	Accrual accounting and economic resources focus
Type of asset/liability information	All assets and liabilities, both financial and capital, and short-term and long-term	Only assets expected to be used up and liabilities that come due during the year or soon thereafter; no capital assets included	All assets and liabilities, both financial and capital, and short-term and long-term	All assets and liabilities, both financial and capital, and short-term and long-term
Type of inflow/outflow information	All revenues and expenses during the year, regardless of when cash is received or paid	Revenues for which cash is received during or soon after the end of the year; expenditures when goods or services have been received and payment is due during the year or soon thereafter	All revenues and expenses during the year, regardless of when cash is received or paid	All revenues and expenses during the year, regardless of when cash is received or paid

Government-wide Financial Statements – Reporting the State as a Whole

The two government-wide financial statements, prepared on a basis and focus similar to those used by private-sector companies, report the State's net position and how it has changed. Net position — the difference between the State's assets/deferred outflows of resources and liabilities/deferred inflows of resources — is one way to measure the State's financial health, or position. Over time, increases or decreases in the State's net position indicate whether its financial health has improved or deteriorated, respectively. However, a reader should consider additional nonfinancial factors, such as changes in the State's economic indicators and the condition of the State's highway system, when assessing the State's overall financial status.

These statements, found on pages 20 through 23 of this report, are divided into three categories as follows.

Governmental Activities — Most of the State's basic services are reported under this category, such as primary, secondary and other education, higher education support, public assistance and Medicaid, and transportation. Taxes, federal grants, and charges for services, fees, fines and forfeitures finance most of these activities.

Business-type Activities — The State charges fees to customers to help cover the costs of certain services it provides. The State reports the following programs and activities as business-type: workers' compensation insurance program, lottery operations, unemployment compensation program, guaranteed college tuition credit program, and the Auditor of State's governmental auditing and accounting services.

Component Units — The State presents the financial activities of the Ohio Facilities Construction Commission, Ohio State University, and other entities as discretely presented component units under a separate column in the government-wide financial statements. The Buckeye Tobacco Settlement Financing Authority is presented as a blended component unit with its activities blended and included under governmental activities. Although legally separate, the State is financially accountable for its component units. For further explanation and a complete list of component units, see NOTE 1A. to the financial statements.

Fund Financial Statements – Reporting more detail about the State’s most significant funds

A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. State law and bond covenants mandate the use of some funds. The Ohio General Assembly establishes other funds to control and manage money for particular purposes or to show that the State is properly using certain taxes and grants. The State employs fund accounting to ensure and demonstrate compliance with finance-related legal requirements. The basic fund financial statements can be found on pages 24 through 45 of this report while the combining fund statements and schedules can be found on pages 157 through 233. The State has the following three kinds of funds:

Governmental Funds — Most of the State’s basic services are included in governmental funds, which focus on how cash and other financial assets that can readily be converted to cash flow in and out (i.e., near-term inflows and outflows of spendable resources) and the balances remaining at year-end that are available for spending (i.e., balances of spendable resources). Consequently, the governmental fund financial statements provide a detailed short-term view that helps the financial statement reader determine whether there are more or fewer financial resources that can be spent in the near future to finance the State’s programs. Because these statements do not encompass the long-term focus of the government-wide statements, a reconciliation schedule, which follows each of the governmental fund financial statements, explains the relationship (or differences) between them.

The State’s governmental funds include the General Fund, Job, Family and Other Human Services Special Revenue Fund, and the Buckeye Tobacco Settlement Financing Authority Revenue Bonds Debt Service Fund, all of which are considered major funds. Data from the other governmental funds, which are classified as nonmajor funds, are combined into an aggregated presentation under a single column on the basic governmental fund financial statements. Individual fund data for each of these nonmajor governmental funds is provided in the form of combining statements elsewhere in this report.

For budgeted governmental funds, the State also presents budgetary comparison statements and schedules in the basic financial statements and combining statements, respectively, to demonstrate compliance with the appropriated budget. The State’s budgetary process is explained further in NOTE 1D. to the financial statements.

Proprietary Funds — Services for which the State charges customers a fee are generally reported in proprietary funds. Financial statements for the proprietary funds, which are classified as enterprise funds, provide both long- and short-term financial information.

Presented under separate columns on the three statements is information for the Workers’ Compensation, Lottery Commission, and Unemployment Compensation enterprise funds, all of which are considered to be major funds. Data from the other enterprise funds, which are classified as nonmajor funds, are combined into an aggregated presentation under a single column on the statements. Individual fund data for each of these nonmajor proprietary funds is provided in the form of combining statements elsewhere in this report.

The enterprise funds are the same as the State’s business-type activities reported in the government-wide financial statements, but the proprietary fund financial statements provide more detail and additional information, such as information on cash flows.

Fiduciary Funds — The State is the trustee, or fiduciary, for assets that — because of a trust arrangement — can only be used for the trust beneficiaries. The State is responsible for ensuring the assets reported in these funds are used for their intended purposes. The State Highway Patrol Retirement System Pension Trust Fund, Variable College Savings Plan Private-Purpose Trust Fund, STAR Ohio Investment Trust Fund, and the agency funds are presented on two statements. Fiduciary information is excluded from the government-wide financial statements because the State cannot use these assets to finance its operations.

Discretely Presented Component Unit Statements (Component Unit)

Following the fund financial statements, the State includes statements for its major discretely presented component units within the basic financial statements section. Nonmajor discretely presented component units are also presented in aggregation under a single column in the component unit financial statements and in combining statements elsewhere in this report.

Notes to the Financial Statements

The basic financial statements section includes notes that more fully explain the information in the government-wide and fund financial statements; the notes provide more detailed data that are essential to a full understanding of the data presented in the financial statements. The notes can be found on pages 50 through 139 of this report.

Required Supplementary Information

Following the notes is a section of required supplementary information that discusses the assessed condition and estimated and actual maintenance and preservation costs of the state’s highway and bridge infrastructure assets

that are reported using the modified approach. Limited in application to a government's infrastructure assets, the modified approach provides an alternative to the traditional recognition of depreciation expense. Also displayed in the required supplementary information are various schedules disclosing the State's share of pension obligation, employer contributions required as compared to employer contributions actually paid, and covered payroll, for the various retirement systems in which the State participates. Required supplementary information can be found on pages 142 through 153 of this report.

FINANCIAL ANALYSIS OF THE STATE AS A WHOLE

Net Position. During fiscal year 2015, as shown in the table below, the combined net position of the State's primary government decreased by \$1.6 billion or 5.3 percent. Net position reported for governmental activities decreased approximately \$1.94 billion or 9.1 percent, compared to the net position on July 1, 2014, and business-type activities increased \$337.6 million, or 3.8 percent. Condensed financial information derived from the Statement of Net Position for the primary government is presented in the following table.

As of June 30, 2015, the primary government's net investment in capital assets (e.g., land, buildings, infrastructure, and construction-in-progress) was \$23.56 billion. Restricted net position was approximately \$14.38 billion, resulting in a \$9.34 billion deficit. Net position is restricted when constraints placed on their use are either 1) externally imposed by creditors, grantors, contributors, or laws or regulations of other governments or 2) legally imposed through constitutional or enabling legislation. Unrestricted net position consists of net position that does not meet the definition of "restricted" or "net investment in capital assets". The State's Budget Stabilization Fund balance of \$1.48 billion at June 30, 2015, is included within unrestricted net position.

The government-wide Statement of Net Position reflects a \$9.18 billion deficit for unrestricted governmental activities, which is primarily attributable to the following two reasons:

(1) The State of Ohio, like many other state governments, issues general and special obligation debt, the proceeds of which benefit local governments and component units. The proceeds are used to build facilities for public-assisted colleges and universities and local school districts and finance infrastructure improvements for local governments. The policy of selling general obligation and special obligation bonds for these purposes has been the practice for many years. Of the \$11.06 billion of outstanding general obligation and special obligation debt at June 30, 2015, \$8.1 billion is attributable to debt issued for state assistance to component units (Ohio Facilities Construction Commission and the colleges and universities) and local governments. The balance sheets of component unit and local government recipients reflect ownership of the related constructed capital assets without the burden of recording the debt. Unspent proceeds related to these bond issuances are included on the Statement of Net Position as restricted net position. By issuing such debt, the State is left to reflect significant liabilities without the benefit of recording the capital assets constructed with the proceeds from the debt issuances.

(2) During fiscal year 2015, the State implemented the provisions of GASB Statement No. 67, *Financial Reporting for Pension Plans*, GASB Statement No. 68, *Accounting and Financial Reporting for Pension*, and GASB Statement No. 71, *Pension Transition for Contributions Made Subsequent to the Measurement Date (an amendment of GASB Statement No. 68)*, related to the measurement and reporting of the annual costs and long-term obligations associated with the pension benefits provided to State employees. These new standards require the State to record a proportionate share of the net pension liability of the associated pension plans. As a result of implementing these standards, the State is reporting a net pension asset, net pension liability, deferred outflows of resources, and deferred inflows of resources related to pension on the accrual basis of accounting. This implemen-

tation also had the effect of restating net position at June 30, 2014 (See NOTES 2, 9, 14, 15, and 18 for more information).

Condensed financial information derived from the Statement of Activities, which reports how the net position of the State's primary government changed during fiscal years 2015 and 2014, follows.

Governmental Activities

Expenses exceeded revenues during fiscal year 2015 for governmental activities. Revenues of \$55.48 billion for fiscal year 2015 were \$3.81 billion higher than those reported for fiscal year 2014. General taxes (including taxes restricted for transportation purposes) comprised 45.7 percent of fiscal year 2015 total revenues and increased by 6 percent compared to fiscal year 2014. Operating grants, contributions and restricted investment income, making up 43.2 percent of total revenues, increased by 11.7 percent compared to fiscal year 2014. Expenses for fiscal year 2015 increased \$3.55 billion or 6.7 percent from fiscal year 2014, as a result of an overall increase in the Medicaid caseload and programmatic costs during fiscal year 2015. Fiscal year 2015 net transfers of \$1.08 billion reflect an increase of 13.2 percent over fiscal year 2014.

The following chart illustrates revenues by source of governmental activities as percentages of total reported for the fiscal year ended June 30, 2015.

**Governmental Activities — Sources of Revenue
Fiscal Year 2015**

Total FY 15 Revenue for Governmental Activities = \$55.48 Billion

The following table presents the total expenses and net cost of each of the State's governmental programs for the fiscal year ended June 30, 2015, with comparative numbers from June 30, 2014. The net cost (total program expenses less revenues generated by the program) represents the financial burden that was placed on the State's taxpayers by each of these programs. This cost is essentially funded with the State's general revenues from taxes, tobacco settlement, and escheat property.

**Program Expenses and Net Costs of Governmental Activities by Program
For the Fiscal Years Ended June 30, 2015 and 2014
(dollars in thousands)**

Business-Type Activities

The State’s enterprise funds reported net position of \$9.28 billion, as of June 30, 2015, as compared to \$8.94 billion in net position, as of June 30, 2014, an increase of \$337.6 million, or 3.8 percent. The Unemployment Compensation Fund reported a \$590.5 million increase in net position during fiscal year 2015 as a result of a decline in the unemployment rate in Ohio and consequently a decline in benefit expense.

The chart below compares program expenses and program revenues for business-type activities. Additional analysis of the Business-Type Activities’ revenues, expenses, and other changes in net position is included with the discussion of the Proprietary Funds beginning on page 13.

**Business-Type Activities — Expenses and Program Revenues
Fiscal Year 2015**

FINANCIAL ANALYSIS OF THE STATE’S FUNDS

The State uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

Governmental Funds

Governmental funds reported the following results, as of and for the fiscal years ended June 30, 2015 and June 30, 2014 (dollars in thousands).

	As of and for the Fiscal Year Ended June 30, 2015			
	General Fund	Other Major Funds	Nonmajor Governmental Funds	Total Governmental Funds
Unassigned Fund Balance (Deficit).....	\$ 411,190	\$ -	\$ (306)	\$ 410,884
Total Fund Balance.....	5,003,799	5,164,623	3,260,233	13,428,655
Total Revenues.....	34,496,350	11,171,778	9,211,914	54,880,042
Total Expenditures.....	33,941,965	11,258,380	12,864,647	58,064,992

	As of and for the Fiscal Year Ended June 30, 2014 (as restated)			
	General Fund	Other Major Funds	Nonmajor Governmental Funds	Total Governmental Funds

Total Revenues.....	32,617,219	9,998,925	9,106,010	51,722,154
Total Expenditures.....	30,971,219	10,273,103	12,445,942	53,690,264

General Fund

The main operating fund of the State is the General Fund. During fiscal year 2015, General Fund revenue increased by \$1.88 billion and expenditures increased by \$2.97 billion. Increases of \$785.6 million in sales tax revenue, primarily from a rate increase and strong growth in revenues from the tax on managed care premiums for Medicaid Health Insuring Corporations, \$629.3 million in federal government revenue, related to Medicaid spending, and \$496.4 million in personal income tax revenue all contributed to the rise in revenue. The increase in expenditures is primarily due to increases in program spending for Primary, Secondary and Other Education and Public Assistance and Medicaid of \$452 million and \$2.33 billion, respectively. Increase in Medicaid spending constituted the largest portion of the increase in the Public Assistance and Medicaid category. Other sources and uses showed a decrease of \$268 million primarily from a decrease in bond issuance proceeds. Total fund balance at June 30, 2015 decreased by \$688.2 million (exclusive of a \$3.6 million decrease in inventories) or 12.1 percent. The State's Budget Stabilization Fund balance of \$1.48 billion is included within unassigned fund balance.

General Fund Budgetary Highlights

The State ended the second year of its 2014-15 biennial budget on June 30, 2015, with a General Fund budgetary fund balance (i.e., cash less encumbrances) of \$4.99 billion. Total budgetary sources for the General Fund (including \$1.59 billion in transfers from other funds) in the amount of \$37.71 billion were above final estimates by \$488.1 million or 1.3 percent during fiscal year 2015. Total tax receipts were above final estimates by \$390.2 million or 1.6 percent primarily as a result of the positive performance of the personal income tax quarterly estimated payments.

Total budgetary uses for the General Fund (including \$2.05 billion in transfers to other funds) in the amount of \$38.48 billion were below final estimates by \$1.79 billion or 4.5 percent for fiscal year 2015. The majority of lower than appropriated spending came from Medicaid, economic development, revitalization, and public works programs. There was no budget stabilization designation at June 30, 2014, for use in balancing the final fiscal year 2015 budget.

The main appropriations act (Act) for the 2014-15 biennium for the General Revenue Fund (GRF), the largest, non-GAAP, budgetary-basis operating fund included in the State's General Fund, was passed by the General Assembly and signed (with selective vetoes) by the Governor on June 30, 2013. Reflecting a stated focus on job creation and continued spending restraint, and based on a conservative economic forecast, the Act provides for GRF appropriations of approximately \$31.7 billion in fiscal year 2015, a 4.7 percent increase from fiscal year 2014 appropriations.

GRF appropriations for major program categories in fiscal year 2015 reflect the following increases relative to 2014 appropriations:

- 6.2 percent for Medicaid;
- 5.8 percent for primary and secondary education;
- 2.1 percent for higher education;
- .3 percent for mental health and addiction services and developmental disabilities; and
- .2 percent for corrections and youth services.

The Act reflects tax reductions and related adjustments of major State taxes, primarily in personal income and sales and use taxes. These reductions and adjustments were projected to reduce GRF revenues by approximately \$771 million in fiscal year 2015. The Act also implements a new school funding formula and allocates a portion of State public higher education funding to institutions based on their graduation rates.

Subsequent to the passage of the Act, the State Controlling Board approved an increase to federal Medicaid appropriations by approximately \$2 billion during fiscal year 2015. These additional federal appropriations were authorized to support the federally-authorized expansion of the Medicaid program to cover those with incomes up to 138 percent of the federal poverty level using 100 percent federal funds in fiscal year 2015.

On March 12, 2014, the Governor announced a series of initiatives resulting from a "mid-biennium review" (MBR) of the 2014 and 2015 biennium with the stated purpose of keeping Ohio moving forward. The proposals were introduced in the General Assembly in March 2014 as fourteen separate pieces of legislation. Seven of the fourteen bills were enacted by the General Assembly in May and June 2014 and addressed subjects of elementary and secondary education, higher education, personal income tax reductions and adjustments, workforce, and human services. The MBR also authorized a transfer from the GRF to a Medicaid reserve fund. Please see the Letter of Transmittal within the Introductory Section for additional information regarding the MBR.

The Ohio Constitution prohibits the State from borrowing money to fund operating expenditures in the GRF. Therefore, by law, the GRF's budget must be balanced so that appropriations do not exceed available cash receipts and cash balances for the current fiscal year.

The State ended fiscal year 2015 with a GRF cash balance of \$1.71 billion and a GRF budgetary fund balance of \$1.29 billion. In addition to meeting the State's statutory target to maintain an ending fund balance reflecting one-half of one percent of fiscal year 2015 GRF revenues, the State transferred \$425.5 million into the Budget Stabilization Fund (BSF) in early fiscal year 2016. The Medicaid Reserve Fund also transferred \$101.1 million to the BSF, bringing the BSF's cash balance to \$2.01 billion by the end of July 2015.

Other Major Governmental Funds

The Job, Family and Other Human Services Fund had a fund balance of \$304.3 million at June 30, 2015, a decrease of \$36.1 million, or 10.6 percent, compared to fiscal year 2014. Federal Government revenue increased by \$1.26 billion, largely attributable to an overall increase in the Medicaid caseload and programmatic costs. Partially offsetting this increase is a decrease of \$87.7 million in revenue collected from license, permits and fees.

The increase in Public Assistance and Medicaid expenditures of \$980.4 million is primarily attributable to an overall increase in the Medicaid expansion population through the federal Affordable Care Act. A \$27.6 million decrease in net Other Financing Sources over the prior fiscal year is largely attributable to a reduction in bonds and notes issued in fiscal year 2015 over fiscal year 2014 also contributed to the decline in the fund balance.

The fund balance for the *Buckeye Tobacco Settlement Financing Authority Revenue Bonds Fund*, as of June 30, 2015, totaled approximately \$4.86 billion dollars, a decrease of \$107.7 million or 2.2 percent since June 30, 2014. Debt Service expenditures increased by \$1.4 million during fiscal year 2015 as a result of scheduled principal and interest payments on outstanding bonds. Additionally, Tobacco Settlement Receipts decreased by \$6.7 million from June 30, 2014, which resulted in the decreased fund balance at June 30, 2015.

Proprietary Funds

Major Proprietary Funds

The State's proprietary fund financial statements report the same type of information found in the business-type activities portion of the government-wide financial statements, but in a slightly different format.

The *Workers' Compensation Fund's* net position decreased \$191.9 million to \$9.27 billion at June 30, 2015. During the fiscal year, investment income decreased \$2.5 billion, largely due to an approximately 11.2 percent decrease in the net return on its investment portfolio. The healthy net position brought over from the prior year was enough to mostly offset the decreased income thus resulting in only a two percent decrease in net position.

For fiscal year 2015, the *Lottery Commission Fund* reported \$1.07 billion in net income before transfers of approximately \$1.09 billion. The \$40.6 million decrease in the fund's net position to approximately \$261.4 million, as of June 30, 2015, was largely attributable to a \$223 million increase in video lottery terminal commission expenses from the opening of two new racinos and a \$177.3 million increase in prizes expense connected with increased ticket sales. In addition, the Commission transferred a record high amount to the Lottery Profits Education Fund. Partly offsetting these expense and transfer increases was a \$489.3 million increase in charges for sales and services revenue that was primarily due to increased video lottery terminal revenue at of the two new racinos.

The \$590.5 million increase in net position in the *Unemployment Compensation Fund* is primarily due to a continued decline in the unemployment rate. The unemployment rate in Ohio dropped from an average of 6.6 percent in fiscal year 2014 to an average of 5.3 percent in fiscal year 2015. The decrease in the unemployment rate caused the State's benefits and claims expense to decrease by \$419.9 million or 29.1 percent from the previous fiscal year. While the benefits and claims expense decreased, the State also received less money from the federal government. During fiscal year 2015, the State received \$17.5 million of federal funding compared to \$293.9 million in fiscal year 2014 resulting in a 94 percent decrease. Contributing to the overall increase in net position is a \$402.6 million gain on extinguishment of debt (for the Federal Unemployment Tax Act credit, see NOTE 2).

Capital Asset and Debt Administration

Capital Assets

As of June 30, 2015, and June 30, 2014, the State had invested \$26.73 billion and \$25.98 billion, respectively, net of accumulated depreciation of \$3.83 billion and \$3.63 billion, respectively, in a broad range of capital assets, as detailed in the table on the following page.

The total increase in the State's capital assets, net of accumulated depreciation, for the current fiscal year was 2.9 percent (a 2.8 percent increase for governmental activities and an 18.9 percent increase for business-type activities). Depreciation expense increased 10.9 percent for governmental activities.

The State completed construction on a variety of projects at various state facilities during fiscal year 2015 totaling approximately \$216 million, as compared with \$481.9 million in the previous fiscal year. As is further detailed in NOTE 20D of the notes to the financial statements, the State had \$239.5 million in major construction commitments (unrelated to infrastructure), as of June 30, 2015, as compared with \$172.3 million for 2014.

Modified Approach

For reporting its highway and bridge infrastructure assets, the State has adopted the use of the modified approach. To use this approach, a government must maintain an asset management system and demonstrate that the infrastructure is being preserved approximately at or above an established condition level. Under this approach, infrastructure is not depreciated, and maintenance and preservation costs are expensed. Infrastructure assets accounted for using the modified approach include approximately 43,198 lane miles of highway and approximately 106.2 million square feet of deck area that comprises 14,229 bridges for which the State has the responsibility for ongoing maintenance.

Ohio accounts for its pavement network in two subsystems: Priority and General. It is the State's goal to allow no more than 25 percent of the total lane-miles reported for each of the priority and general subsystems to be classified with a "poor" condition rating. The most recent condition assessment, completed by the Ohio Department of Transportation (ODOT) for fiscal year 2015, indicates that only 1.2 percent and .6 percent of the priority and general subsystems, respectively, were assigned a "poor" condition rating. For fiscal year 2014, only 1.1 percent and .8 percent of the priority and general subsystems, respectively, were assigned a "poor" condition rating.

For the bridge network, it is the State's intention to allow no more than 15 percent of the total number of square feet of deck area to be in "fair" or "poor" condition. The most recent condition assessment, completed by ODOT for fiscal year 2015, indicates that only 2.4 percent of the number of square feet of bridge deck area was considered to be in "fair" and "poor" conditions. For fiscal year 2014, 3.4 percent of the number of square feet of bridge deck area was considered to be in "fair" and "poor" conditions.

For fiscal year 2015, total actual maintenance and preservation costs for the pavement network were \$887.8 million, compared to estimated costs of \$769.7 million, while total actual maintenance and preservation costs for the bridge network was \$571.7 million, \$37.1 million above estimate. For the previous fiscal year, total actual maintenance and preservation costs for the pavement network were \$826.9 million, compared to estimated costs of \$771.7 million, while total actual maintenance and preservation costs for the bridge network was \$528 million, \$22.6 million below estimate. Overall, the State's costs for actual maintenance and preservation for highway infrastructure assets have exceeded estimates over the past two years due to steadily increasing underlying costs for the materials and labor associated with infrastructure projects.

More detailed information on the State's capital assets can be found in NOTE 8 to the financial statements and in the Required Supplementary Information section of this report.

Debt — Bonds and Notes Payable and Certificates of Participation Obligations

The State's general obligation bonds are backed by its full faith and credit. Revenue bonds and notes are secured with revenues pledged for the retirement of debt principal and the payment of interest. Special obligation bonds are supported with lease payments from tenants of facilities constructed with the proceeds from the bonds. Under certificate of participation (COPs) financing arrangements, the State is required to make rental payments (subject to appropriations) that approximate interest and principal payments made by trustees to certificate holders.

During fiscal year 2015, the State issued, at par, \$754.3 million in general obligation bonds, \$218.1 million in revenue bonds, \$316.6 million in special obligation bonds, and \$76.2 million in certificates of participation. Of the general obligation bonds, revenue bonds, and special obligation bonds issued, at par, \$212.3 million, \$62.3 million, and \$42.3 million, respectively, were refunding bonds. The total decrease in the State's debt obligations for the current fiscal year, as based on carrying amount, was .2 percent, all in governmental activities.

As of June 30, 2015, and June 30, 2014, the State had total debt of approximately \$17.7 billion and \$17.73 billion, respectively, as shown in the table below.

Bonds and Notes Payable and Certificates of Participation		
As of June 30, 2015 and 2014		
<i>(dollars in thousands)</i>		
	Governmental Activities

Certificates of Participation.....	231,837	173,603
Total Debt.....	<u>\$ 17,697,511</u>	<u>\$ 17,731,309</u>

Credit Ratings

Both the State's general and special obligation bonds carry a "stable" credit outlook from all three crediting rating agencies. A credit outlook is an indication of the pressure on the rating over the near-to-intermediate term and should not be viewed as a precursor to a rating change.

The ratings and rating outlooks in effect from time to time reflect only the views of the particular rating organization. An explanation of its view of the meaning and significance of its rating or outlook may be obtained from the respective rating agency. Generally, the rating agencies base their rating on submitted information and on their own investigations, studies, and assumptions. There can be no assurance that the ratings or outlooks assigned will continue for any given time. Rating agencies may lower or withdraw a rating at any time, if in its judgment circumstances so warrant.

The State's bonds and notes are rated as follows:

Limitations on Debt

Section 17 of Article VIII of the Ohio Constitution, approved by Ohio voters in November 1999, establishes an annual debt service "cap" applicable to future issuances of direct obligations payable from the GRF or net state lottery proceeds. Generally, new obligations may not be issued if debt service for any future fiscal year on those new and the then outstanding bonds of those categories would exceed five percent of the total of estimated GRF revenues plus net state lottery proceeds for the fiscal year of issuance.

Those direct obligations of the State include general obligation and special obligation bonds that are paid from the State's GRF, but exclude general obligation debt for Third Frontier Research and Development, development of sites and facilities, and veterans compensation, and general obligation bonds payable from non-GRF funds (such as highway bonds that are paid from highway user receipts). Pursuant to the implementing legislation, the Governor has designated the Director of the Ohio Office of Budget and Management as the State official responsible for making the five percent determinations and certifications. Application of the five percent cap may be waived in a particular instance by a three-fifths vote of each house of the Ohio General Assembly and may be changed by future constitutional amendments.

The State met the requirements of Section 17 of Article VIII of the Ohio Constitution and more detailed information on the State's long-term debt, including changes during the year, can be found in NOTES 10 through 13 and NOTE 15 to the financial statements.

Conditions Expected to Affect Future Operations

Economic Factors

Through October 2015, leading economic indicators continue to point toward modest, uninterrupted economic expansion across the country and in Ohio. The Ohio unemployment rate in October 2015 was 4.4 percent, .6 percentage points below the national unemployment rate. From October 2014 to October 2015, Ohio's nonfarm payroll employment increased by 77 thousand jobs.

Nationally, real gross domestic product (GDP) slowed to 1.5 percent in the third quarter of calendar year 2015, down from 3.9 percent in the second quarter, but still up from .6 percent in the first quarter. Year-over-year growth was a subdued 2 percent.

The national labor market outlook strengthened further in October 2015, as the level of nonfarm payroll employment increased by 271 thousand jobs. The U.S. unemployment rate for October 2015 was five percent, down from 5.1 percent in September, and down from 5.7 percent in October 2014.

The 2016-17 Biennial Budget

The main appropriations act (Act) for the 2016-17 biennium for the General Revenue Fund (GRF), the largest, non-GAAP, budgetary-basis operating fund included in the State's General Fund, was passed by the General Assembly and signed (with selective vetoes) by the Governor on June 30, 2015. Reflecting a stated continuing focus on job creation, and based on a conservative economic forecast, that Act provides for GRF appropriations of approximately \$34.9 billion in fiscal year 2016, a 13.1 percent increase over fiscal year 2015 actual spending, and \$36.3 billion in fiscal year 2017, a 4.2 percent increase over fiscal year 2016 appropriations.

GRF appropriations for major program categories in fiscal years 2016 and 2017 reflect the following increases: for Medicaid, 21.8 percent in fiscal year 2016 (driven in large part by the shift in funding to the GRF from non-GRF sources beginning in fiscal year 2016 for the Medicaid expansion population), and 5.1 percent for fiscal year 2017; for elementary and secondary education, five percent for fiscal year 2016, and 4.2 percent for fiscal year 2017; for higher education, 4.5 percent for fiscal year 2016, and 3.3 percent for fiscal year 2017; for mental health and developmental disabilities, 9.1 percent for fiscal year 2016, and 7.3 percent for fiscal year 2017; for corrections and youth services, 4.8 percent for fiscal year 2016 appropriations, and 3.0 percent for fiscal year 2017. The Act also modifies the school funding formula to distribute new resources to districts with less capacity to raise revenues locally and freezes tuition and fees for two- and four year higher education institutions.

The Act reflects tax reductions and related adjustments of major State taxes, primarily in personal income taxes. These reductions and adjustments are projected to reduce GRF revenues by approximately \$869 million in fiscal year 2016 and by approximately \$952 million in fiscal year 2017.

General Revenue Fund

For fiscal year 2016, total fiscal year-to-date GRF receipts collected through October 2015 are \$35.7 million above estimates and \$1.38 billion higher than collections through October of the prior fiscal year. Total fiscal year-to-date GRF disbursements through October 2015 are \$390.3 million below estimates for the first four months of fiscal year 2016 and \$712.9 million above expenditures for the first four months of the prior fiscal year. As of October 2015, receipts were .3 percent above budget estimates and disbursements were three percent below budget estimates for fiscal year 2016. Fiscal year 2016 receipts are 13.5 percent ahead of receipts for the first four months of fiscal year 2015. Disbursements for fiscal year 2016 are six percent above disbursements for the same time period of fiscal year 2015.

Budget Stabilization Fund

The Budget Stabilization Fund (BSF) is Ohio's rainy day savings account, a reserve balance set aside in good economic times to protect the State's budget from cyclical changes in revenues and expenditures should the economy become weakened unexpectedly. By law, the maximum balance for the BSF had for many years been set at five percent of the prior fiscal year's GRF revenues. In June 2015, Governor Kasich signed a provision that increased the authorized maximum BSF balance to 8.5 percent of GRF revenues. After depositing \$526.6 million into the BSF in July 2015, the BSF has reached a record-high balance in excess of \$2 billion, the strongest reserves in State history.

Workers' Compensation Fund

The Bureau of Workers' Compensation (BWC) is in the process of transitioning its premium collection model to a prospective payment system that will provide more flexibility for employers while reducing overall systems costs. The change will align BWC with standard industry practice and will enable BWC to collect premiums before extending coverage. Private employers transitioned to prospective billing on July 1, 2015, while public employer taxing districts will transition on January 1, 2016. The prospective billing system resulted in an overall base rate reduction of two percent for private employers and four percent for public employers and provides for increased ability to detect employer non-compliance and fraud. Transitional one-time premium credits are planned to eliminate any double payment by employers.

House Bill 52, signed by the Governor in June 2015, allows BWC to transfer investment income from the State Insurance Fund (SIF) to cover the cost of the Disabled Workers' Relief Fund (One) benefits for private and public taxing district employers rather than levying assessments against these employers. BWC management will recommend that the Board of Directors approve the use of the SIF investment earnings and will then record a \$582 million liability in the SIF that will result in \$582 million decrease to the net position of BWC during fiscal year 2016.

Unemployment Compensation Fund

During fiscal years 2009 and 2010, the State sought federal assistance in meeting its unemployment benefit costs and received repayable advances in the Unemployment Trust Fund of \$2.31 billion from the Federal Unemployment Account to cover the insufficient State funds for benefit claims during those fiscal years. The State continues to make principal and interest payments on these advances. During fiscal year 2015, Federal Unemployment Tax Act (FUTA) credits of \$402.6 million also offset the outstanding repayable advances. As of June 30, 2015, the outstanding repayable advances balance is \$978.5 million. More information relating to the FUTA credits and remaining advances can be found in NOTE 2D and NOTE 14, respectively.

Contacting the Ohio Office of Budget and Management

This financial report is designed to provide the State's citizens, taxpayers, customers, investors and creditors with a general overview of the State's finances and to demonstrate the State's accountability for the money it receives. Questions regarding any of the information provided in this report or requests for additional financial information should be addressed to the Ohio Office of Budget and Management, Financial Reporting Section, 30 East Broad Street, 34th Floor, Columbus, Ohio 43215-3457 or by e-mail at obm@obm.state.oh.us.

Basic Financial Statements

The Spirit of '98

- West side of the Ohio Statehouse
- Erected in 1930

STATE OF OHIO

RECONCILIATION OF THE GOVERNMENTAL FUNDS
BALANCE SHEET TO THE STATEMENT OF NET POSITION
JUNE 30, 2015
(dollars in thousands)

Total Fund Balances for Governmental Funds..... **\$ 13,428,655**

Total net position reported for governmental activities in the Statement of Net Position is different because:

Net Pension Assets Reported for Governmental Activities are not Financing Resources and therefore are not Reported in the Funds 7,337

Capital assets used in governmental activities are not financial resources, and therefore, are not reported in the funds. Those assets consist of:

Land.....	2,323,700
Buildings and Improvements, net of \$2,172,453 accumulated depreciation.....	1,556,212
Land Improvements, net of \$310,085 accumulated depreciation.....	161,190
Machinery and Equipment, net of \$773,871 accumulated depreciation.....	649,737
Vehicles, net of \$228,112 accumulated depreciation.....	158,518
Infrastructure, net of \$31,622 accumulated depreciation.....	19,993,138
Construction-in-Progress.....	1,714,845
	<u>26,557,340</u>

The following Deferred Outflows of Resources are not related to the current period and therefore, are not reported in the funds.

Hedging Derivatives.....	34,675
Loss on Debt Refundings.....	163,743
Net Pension Asset/Liability.....	343,323
Total Deferred Outflows of Resources.....	<u>541,741</u>

The following liabilities are not due and payable in the current period, and therefore, are not reported in the funds.

Accrued Liabilities:	
Interest Payable.....	(166,452)
Bonds and Notes Payable:	
General Obligation Bonds.....	(9,149,056)
Revenue Bonds and Notes.....	(6,409,774)
Special Obligation Bonds.....	(1,906,844)
Certificates of Participation.....	(231,837)
Other Noncurrent Liabilities:	
Compensated Absences.....	(421,817)
Net Pension Liability.....	(2,703,806)
Net OPEB Obligation.....	(149,131)
Capital Leases Payable.....	(2,072)
Derivatives.....	(45,873)
Estimated Claims Payable.....	(2,186)
Pollution Remediation.....	(1,568)
	<u>(21,190,416)</u>

The following Deferred Inflows of Resources are not related to the current period and therefore, are not reported in the funds.

Resources from the Sale of Future Revenues.....	(1,287,933)
Net Pension Asset/Liability.....	(61,056)
Less Unavailable Resources Reported in the Funds:.....	
Taxes Receivable.....	82,616
Intergovernmental Receivable.....	789,059
Other Receivables.....	450,473
	<u>1,322,148</u>
Total Deferred Inflows of Resources.....	<u>(26,841)</u>

Total Net Position of Governmental Activities..... **\$ 19,317,816**

The notes to the financial statements are an integral part of this statement.

STATE OF OHIO

RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES
AND CHANGES IN FUND BALANCES OF GOVERNMENTAL FUNDS
TO THE STATEMENT OF ACTIVITIES
FOR THE FISCAL YEAR ENDED JUNE 30, 2015
(dollars in thousands)

Net Change in Fund Balances -- Total Governmental Funds	(900,642)
Change in Inventories.....	<u>924</u>
	(899,718)

The change in net position reported for governmental activities in the Statement of Activities is different because:

Governmental funds report capital outlays as expenditures. However, in the Statement of Activities, the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense. This is the amount by which capital outlays exceeded depreciation in the current period.

Capital Outlay Expenditures.....	1,026,371	
Depreciation Expense.....	<u>(299,323)</u>	
Excess of Capital Outlay Over Depreciation Expense.....		<u>727,048</u>

Debt proceeds provide current financial resources to governmental funds, but issuing debt increases long-term liabilities in the Statement of Net Position. In the current period, proceeds were received from:

General Obligation Bonds.....	(542,000)	
Revenue Bonds and Notes.....	(155,875)	
Special Obligation Bonds.....	(274,300)	
Refunding Bonds, including Bond Premium/Discount, Net.....	(384,955)	
Certificates of Participation.....	(76,150)	
Premiums and Discounts, Net:		
General Obligation Bonds.....	(74,697)	
Revenue Bonds and Notes.....	(23,397)	
Special Obligation Bonds.....	(41,877)	
Certificates of Participation.....	(11,926)	
Total Debt Proceeds.....		<u>(1,585,177)</u>

Repayment of long-term debt is reported as an expenditure in governmental funds, but the repayment reduces long-term liabilities in the Statement of Net Position. In the current year, these amounts consist of:

<i>Debt Principal Retirement and Defeasements:</i>		
General Obligation Bonds.....	997,569	
Revenue Bonds and Notes.....	227,441	
Special Obligation Bonds.....	270,448	
Certificates of Participation.....	26,330	
Capital Lease Payments.....	<u>983</u>	
Total Long-Term Debt Repayment.....		<u>1,522,771</u>

The notes to the financial statements are an integral part of this statement.

Some revenues and expenses reported in the Statement of Activities are not reported as revenue and expenditures in the governmental funds. Under the modified accrual basis of accounting used in the governmental funds, expenditures are not recognized for transactions that are not normally paid with expendable available financial resources. In the Statement of Activities, however, which is presented on the accrual basis, expenses, liabilities, and deferred resources are reported regardless of when financial resources are available. In addition, interest on long-term debt is not recognized under the modified accrual basis of accounting until due, rather than as it accrues. This adjustment combines the changes in the following balances:

<i>Increase in Other Assets</i>	5,336	
<i>Increase in Accrued Interest and Other Accrued Liabilities</i>	(3,508)	
<i>Amortization of Bond Premiums/Accretion of Bond Discount, Net</i>	97,187	
<i>Decrease in Refunding Loss Included in Deferred Outflows of Resources</i>	(9,101)	
<i>Increase in Pension Related Balances Included in Deferred Outflows of Resources</i>	124,580	
<i>Decrease in Compensated Absences</i>	4,878	
<i>Decrease in Derivative Liabilities (Excluding Hedging Derivatives)</i>	655	
<i>Decrease in Estimated Claims Payable</i>	9,545	
<i>Increase in Pollution Remediation</i>	(18)	
<i>Decrease in Net Pension Obligation</i>	28,183	
<i>Increase in Net Pension Liability</i>	(51,387)	
<i>Increase in Liability for OPEB Obligation</i>	(21,030)	
<i>Increase in Other Noncurrent Liabilities</i>	(193)	
<i>Decrease in Deferred Inflow of Resources</i>	544,292	
<i>Total additional revenues and expenditures</i>		<u>729,419</u>
 Change in Net Position of Governmental Activities		 <u>\$ 494,343</u>

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accompanying financial statements of the State of Ohio, as of June 30, 2015, and for the year then ended, conform with generally accepted accounting principles (GAAP) as applied to governments. The Governmental Accounting Standards Board (GASB) is the standard-setting body for establishing governmental accounting and financial reporting principles, which are included in the GASB's *Codification of Governmental Accounting and Financial Reporting Standards*. The State's significant accounting policies are as follows.

A. Financial Reporting Entity

The State of Ohio's primary government includes all funds, elected officials, departments and agencies, bureaus, boards, commissions, and authorities that make up the State's legal entity. Component units, legally separate organizations for which the State's elected officials are financially accountable, also comprise, in part, the State's reporting entity. Additionally, other organizations for which the nature and significance of their relationship with the primary government are such that exclusion would cause the reporting entity's financial statements to be misleading or incomplete should be included in a government's financial reporting entity.

GASB Statement No. 14 (GASB 14), *The Financial Reporting Entity*, as amended by GASB Statement No. 39 (GASB 39), *Determining Whether Certain Organizations are Component Units* and GASB Statement No. 61 (GASB 61), *The Financial Reporting Entity: Omnibus*, defines financial accountability. The criteria for determining financial accountability include the following circumstances:

- appointment of a voting majority of an organization's governing authority and the ability of the primary government to either impose its will on that organization or the potential for the organization to provide specific financial benefits to, or impose specific financial burdens on, the primary government, or
- an organization is fiscally dependent on the primary government and there is a potential for the organization to provide specific financial benefits to, or impose specific financial burdens on, the primary government.

1. Blended Component Units

The Buckeye Tobacco Settlement Financing Authority (BTSFA) is a legally separate organization for which the State has financial accountability through voting majority and the State has the potential to receive a financial benefit. The BTSFA provides services entirely, or almost entirely, to the State or otherwise exclusively, or almost exclusively, for the benefit of the State. Therefore, the State reports this organization's balances and transactions as though they were part of the primary government using the blending method.

2. Fiduciary Component Units

The State Highway Patrol Retirement System is a legally separate organization that provides services entirely, or almost entirely, to the State or otherwise exclusively, or almost exclusively, for the benefit of the State. Therefore, the State reports this organization's balances and transactions separately in the fiduciary fund financial statements.

3. Discretely Presented Component Units

The component units' columns in the basic financial statements include the financial data of another 28 organizations. The separate discrete column labeled, "Component Units," emphasizes these organizations' separateness from the State's primary government. Officials of the primary government appoint a voting majority of each organization's governing board.

The primary government has the ability to impose its will on the following organizations by modifying or approving their respective budgets, through policy modification authority, or by modifying or approving rate or fee changes.

Ohio Facilities Construction Commission
Ohio Air Quality Development Authority
Ohio Capital Fund
JobsOhio

The Ohio Turnpike and Infrastructure Commission has the potential to provide a financial benefit to the primary government.

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

The following organizations impose or potentially impose financial burdens on the primary government.

Ohio State University
University of Cincinnati
Ohio University
Miami University
University of Akron
Bowling Green State University
Kent State University
University of Toledo
Cleveland State University
Youngstown State University
Wright State University
Shawnee State University
Northeast Ohio Medical University
Central State University
Terra State Community College
Columbus State Community College
Clark State Community College
Edison State Community College
Southern State Community College
Washington State Community College
Cincinnati State Community College
Northwest State Community College
Owens State Community College

The Ohio Facilities Construction Commission, a governmental component unit, does not issue separately audited financial reports.

Information on how to obtain financial statements for the State's component units that do issue their own separately audited financial reports is available from the Ohio Office of Budget and Management.

4. Joint Ventures and Related Organizations

As discussed in more detail in NOTE 19, the State participates in several joint ventures and has related organizations. The State does not include the financial activities of these organizations in its financial statements, in conformity with GASB 14, as amended by GASB 39 and GASB 61.

B. Basis of Presentation

Government-wide Statements — The Statement of Net Position and the Statement of Activities display information about the primary government (the State) and its component units. These statements include the financial activities of the overall government, except for fiduciary activities.

Fiduciary funds of the primary government and component units that are fiduciary in nature are reported only in the statements of fiduciary net position and changes in fiduciary net position.

For the government-wide financial statements, eliminations have been made to minimize the double counting of internal activities. These statements distinguish between the *governmental* and *business-type activities* of the State. Governmental activities generally are financed through taxes, intergovernmental revenues, and other non-exchange transactions. Business-type activities are financed in whole, or in part, by fees charged to external parties for goods or services.

The Statement of Net Position reports all financial and capital resources using the economic resources measurement focus and the accrual basis of accounting. The State presents the statement in a format that displays *assets and deferred outflows of resources less liabilities and deferred inflows of resources equal net position*. The *net position* section is displayed in three components:

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

- The *Net Investment in Capital Assets* component consists of 1) capital assets, net of accumulated depreciation, and deferred outflows of resources that are attributable to the acquisition, construction, or improvements of those assets or related debt less 2) outstanding balances of any bonds or other borrowings and deferred inflows of resources that are attributable to the acquisition, construction, or improvement of those assets or related debt. The portion of debt and deferred inflows of resources attributable to significant unspent related debt proceeds at year-end is not included in the calculation of this net position component.
- The *Restricted Net Position* component represents the net position with constraints placed on its use that are either 1) externally imposed by creditors, grantors, contributors, or laws or regulations of other governments or 2) imposed by law through constitutional provisions or enabling legislation. For component units with permanent endowments, restricted net position is displayed in two additional components — nonexpendable and expendable. Nonexpendable net position is for those endowments that are required to be retained in perpetuity.
- The *Unrestricted Net Position* component consists of the net position that does not meet the definition of the preceding two components.

The Statement of Activities presents a comparison between direct expenses and program revenues for each function of the State's governmental activities and for the different business-type activities of the State. Direct expenses are those that are specifically associated with a program or function and, therefore, are clearly identifiable to a particular program or function. Centralized expenses have been included in direct expenses. Indirect expenses have not been allocated to the programs or functions reported in the Statement of Activities.

Program revenues include licenses, permits and other fees, fines, forfeitures, charges paid by the recipients of goods or services offered by the programs, and grants, contributions, and investment earnings that are restricted to meeting the operational or capital requirements of a particular program. Revenues that are not classified as program revenues, including all tax, tobacco settlement, escheat property revenues, unrestricted investment income, and state assistance, are presented as general revenues.

Fund Financial Statements — The fund financial statements provide information about the State's funds, including the fiduciary funds and blended component units. Separate statements for each fund category — governmental, proprietary, and fiduciary — are presented. The emphasis of fund financial statements is on major governmental and enterprise funds, each displayed in a separate column. All remaining governmental and proprietary funds are aggregated and reported as nonmajor funds.

Governmental fund types include the General, special revenue, debt service, and capital projects funds. The proprietary funds consist of enterprise funds. Fiduciary fund types include pension trust, private-purpose trust, investment trust, and agency funds.

Operating revenues for the State's proprietary funds mainly consist of charges for sales and services and premium and assessment income since these revenues result from exchange transactions associated with the principal activity of the respective enterprise fund. Exchange transactions are those in which each party receives and gives up essentially equal values. Revenue from the federal government for the underfunded regular and extended unemployment benefits is also reported as operating revenues for the Unemployment Compensation Fund, since this source provides significant funding for the payment of unemployment benefits — the fund's principal activity. Investment income for the Tuition Trust Authority Fund is also reported as operating revenue, since this source provides significant funding for the payment of tuition benefits. Nonoperating revenues for the proprietary funds result from nonexchange transactions or ancillary activities; nonoperating revenues are primarily comprised of investment income and federal operating grants.

Proprietary fund operating expenses principally consist of expenses for the cost of sales and services, administration, bonuses and commissions, prizes, benefits and claims, and depreciation. Nonoperating expenses principally consist of interest expense on debt and the amortization of discount on lottery prize liabilities, which is reported under "Other" nonoperating expenses.

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

The State reports the following major governmental funds:

General — The General Fund, the State's primary operating fund, accounts for resources of the general government, except those required to be accounted for in another fund.

Job, Family and Other Human Services Special Revenue Fund — This fund accounts for public assistance programs primarily administered by the Ohio Department of Job and Family Services, which provides financial assistance, services, and job training to those individuals and families who do not have sufficient resources to meet their basic needs. The primary sources of revenue for this fund are licenses, permits and fees and the federal government.

Buckeye Tobacco Settlement Financing Authority Revenue Bonds Debt Service Fund — This fund accounts for the payment of principal and interest on the revenue bonds issued to fund long-lived capital projects at State-supported institutions of higher education and to pay the State's share of the cost of rebuilding elementary and secondary school facilities across the State.

The State reports the following major proprietary funds:

Workers' Compensation Enterprise Fund — This fund accounts for the operations of the Ohio Bureau of Workers' Compensation and the Industrial Commission of Ohio, which provide workers' compensation insurance services.

Lottery Commission Enterprise Fund — This fund accounts for the State's lottery operations.

Unemployment Compensation Enterprise Fund — This fund, which is administered by the Ohio Department of Job and Family Services, accounts for unemployment compensation benefit claims.

The State reports the following fiduciary fund types:

Pension Trust Fund — The State Highway Patrol Retirement System Pension Trust Fund accounts for resources that are required to be held in trust for members and beneficiaries of the defined benefit plan. The financial statements for the State Highway Patrol Retirement System Pension Trust Fund are presented for the fiscal year ended December 31, 2014.

Private-Purpose Trust Fund — The Private-Purpose Trust Fund accounts for trust arrangements under which principal and income benefit participants in the Variable College Savings Plan, which is administered by the Tuition Trust Authority.

Investment Trust Fund — The STAR Ohio Investment Trust Fund accounts for the state-sponsored external investment pool, which the Treasurer of State administers for local government participants.

Agency Funds — These funds account for the receipt, temporary investment, and remittance of fiduciary resources held on behalf of individuals, private organizations, and other governments.

The State reports the following major discretely presented component unit funds:

The *Ohio Facilities Construction Commission Fund* primarily accounts for grants that provide assistance to local entities for the construction of school buildings. The fund also provides construction services for arts and sports facilities.

The *Ohio State University Fund* is a business-type activity that uses proprietary fund reporting. It reports the university's operations, including the University's health system, supercomputer center, agricultural research and development center, and other legally separate entities subject to the control of the university's board.

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

C. Measurement Focus and Basis of Accounting

Government-wide, Enterprise Fund, and Fiduciary Fund Financial Statements — The State reports the government-wide financial statements and the proprietary fund and fiduciary fund financial statements using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned, and expenses are recorded at the time liabilities are incurred, regardless of when the related cash flows take place.

The State recognizes revenues, expenses, gains, losses, assets, and liabilities resulting from exchange and exchange-like transactions when the exchange takes place. When resources are received in advance of the exchange, the State reports the unearned revenue as a liability.

Nonexchange transactions, in which the State gives (or receives) value without directly receiving (or giving) equal value in exchange, include derived taxes, grants, and entitlements. The revenues, expenses, gains, losses, assets, deferred outflows of resources, liabilities, and deferred inflows of resources resulting from nonexchange transactions are recognized in accordance with the requirements of GASB 33, *Accounting and Financial Reporting for Nonexchange Transactions* and GASB 65, *Items Previously Reported as Assets and Liabilities*.

Under the accrual basis, the State recognizes assets from derived tax revenues (e.g., personal income, sales, and motor vehicle fuel taxes) in the fiscal year when the exchange transaction on which the tax is imposed occurs or when the resources are received, whichever occurs first. The State recognizes derived tax revenues, net of estimated refunds and estimated uncollectible amounts, in the same period that the assets are recognized, provided that the underlying exchange transaction has occurred.

Revenue from grants and entitlements is recognized in the fiscal year in which all eligibility requirements have been satisfied. Resources transmitted in advance of the State meeting eligibility requirements are reported as unearned revenue.

Investment income includes the net increase (decrease) in the fair value of investments.

Governmental Fund Financial Statements — The State reports governmental funds using the current financial resources measurement focus and the modified accrual basis of accounting. Under this method, revenues are recognized when measurable and available. The State considers revenues reported in the governmental funds to be available when the revenues are collectible within 60 days after year-end or soon enough thereafter to be used to pay liabilities of the current period.

Significant revenue sources susceptible to accrual under the modified accrual basis of accounting include:

- Personal income taxes
- Sales and use taxes
- Motor vehicle fuel taxes
- Charges for goods and services
- Federal government grants
- Tobacco settlement
- Investment income

The State recognizes assets from derived tax revenues (e.g., personal income, sales, and motor vehicle fuel taxes) in the fiscal year when the exchange transaction on which the tax is imposed occurs or when the resources are received, whichever occurs first. The State recognizes derived tax revenues, net of estimated refunds and estimated uncollectible amounts, in the same period that the assets are recognized, provided that the underlying exchange transaction has occurred and the revenues are collected during the availability period.

For revenue arising from exchange transactions (e.g., charges for goods and services), the State recognizes deferred inflows of resources when resources earned from the exchange are not received during the availability period and reports unearned revenue when resources are received in advance of exchange.

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

The governmental funds recognize federal government revenue in the period when all applicable eligibility requirements have been met and resources are available. Resources transmitted in advance of the State meeting eligibility requirements are reported as unearned revenue. The State recognizes deferred inflows of resources for reimbursement-type grant programs if the reimbursement is not received during the availability period.

Licenses, permits, fees, and certain other miscellaneous revenues are not susceptible to accrual because generally they are not measurable until received in cash. The "Other" revenue account is comprised of refunds, reimbursements, recoveries, and other miscellaneous income.

Expenditures are recorded when the related fund liability is incurred, except for principal and interest on general long-term debt, capital lease obligations, compensated absences, and claims and judgments. The governmental funds recognize expenditures for these liabilities to the extent they have matured or will be liquidated with expendable, available financial resources.

Capital asset acquisitions are reported as expenditures in the governmental funds. Proceeds from long-term debt issuances, including refunding bond proceeds, premiums, and acquisitions under capital leases are reported as other financing sources while discounts and payments to refunded bond escrow agents are reported as other financing uses.

D. Budgetary Process

As the Ohio Revised Code requires, the Governor submits biennial operating and capital budgets to the General Assembly.

The General Assembly approves operating appropriations in annual amounts and capital appropriations in two-year amounts.

The General Assembly enacts the budget through passage of specific departmental line-item appropriations, the legal level of budgetary control. Line-item appropriations are established within funds by program or major object of expenditure. The Governor may veto any item in an appropriation bill. Such vetoes are subject to legislative override.

The State's Controlling Board can transfer or increase a line-item appropriation within the limitations set under Sections 127.14 and 131.35, Ohio Revised Code.

All governmental funds are budgeted except the following activities within the debt service and capital projects fund types:

- Improvements General Obligations
- Highway Improvements General Obligations
- Development General Obligations
- Highway General Obligations
- Public Improvements General Obligations
- Vietnam Conflict Compensation General Obligations
- Infrastructure Bank Revenue Bonds
- Buckeye Tobacco Settlement Financing Authority Revenue Bonds
- Lease Rental Special Obligations
- MARCS Certificates of Participation
- OAKS Certificates of Participation
- STARS Certificates of Participation
- TMS Certificates of Participation
- EDCS Certificates of Participation
- MARCS Project
- OAKS Project
- STARS Project
- TMS Project
- EDCS Project

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

For budgeted funds, the State's Ohio Administrative Knowledge System (OAKS) controls expenditures by appropriation line-item, so at no time can expenditures exceed appropriations and financial-related legal compliance is assured. The State uses the modified cash basis of accounting for budgetary purposes.

The *Detailed Appropriation Summary by Fund Report* is available for public inspection at the Ohio Office of Budget and Management and on its web site at www.obm.ohio.gov/StateAccounting/financialreporting. This Summary provides a more comprehensive accounting of activity on the budgetary basis at the legal level of budgetary control.

In the *Statement of Revenues, Expenditures and Changes in Fund Balances — Budget and Actual (Non-GAAP Budgetary Basis) — General Fund and Major Special Revenue Fund*, the State reports estimated revenues and other financing sources and uses for the General Fund only; the State does not estimate revenue and other financing sources and uses for the major special revenue fund or its budgeted nonmajor governmental funds.

Additionally, in the non-GAAP budgetary basis financial statement and schedules, "actual" budgetary expenditures include cash disbursements and outstanding encumbrances, as of June 30.

The State Highway Patrol Retirement System Pension Trust Fund, the Variable College Savings Plan Private-Purpose Trust Fund, and the STAR Ohio Investment Trust Fund are not legally required to adopt budgets. The State is not legally required to report budgetary data and comparisons for the budgeted proprietary funds. Also, the State does not present budgetary data for its discretely presented component units.

Because the State budgets on a modified cash basis of accounting, which differs from GAAP, NOTE 3 presents a reconciliation of the differences between the GAAP basis and non-GAAP budgetary basis of reporting.

E. Cash Equity with Treasurer and Cash and Cash Equivalents

Cash equity with Treasurer consists of pooled demand deposits and investments carried at fair value. The State's cash pool under the Treasurer of State's administration has the general characteristics of a demand deposit account whereby additional cash can be deposited at any time and can also be effectively withdrawn at any time, within certain budgetary limitations, without prior notice or penalty.

Cash and cash equivalents include amounts on deposit with financial institutions and cash on hand. The cash and cash equivalents account also includes investments with original maturities of three months or less from the date of acquisition for the Workers' Compensation Enterprise Fund.

Cash equity with Treasurer and cash and cash equivalents, including the portions reported under "Restricted Assets," are considered to be cash equivalents, as defined in GASB Statement No. 9, for purposes of the Statement of Cash Flows.

Additional disclosures on the State's deposits can be found in NOTE 4.

F. Investments

Investments include long-term investments that may be restricted by law or other legal instruments. With the exception of certain money market investments, which have remaining maturities at the time of purchase of one year or less and are carried at amortized cost, and holdings in the State Treasury Asset Reserve of Ohio (STAR Ohio) investment pool, the State reports investments at fair value based on quoted market prices. STAR Ohio operates in a manner consistent with Rule 2a7 of the Investment Company Act of 1940; investments in the 2a7-like pool are reported at amortized cost (which approximates fair value).

The colleges and universities report investments received as gifts at their fair value on the donation date.

The primary government does not manage or provide investment services for investments reported in the Agency Fund that are owned by other, legally separate entities that are not part of the State of Ohio's reporting entity.

Additional disclosures on the State's investments can be found in NOTE 4.

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

G. Taxes Receivable

Taxes receivable represent amounts due to the State at June 30, which will be collected sometime in the future. In the government-wide financial statements, revenue has been recognized for the receivable. In the fund financial statements only the portion of the receivable collected during the 60-day availability period has been recognized as revenue while the remainder is recorded as deferred inflows of resources. Additional disclosures on taxes receivable can be found in NOTE 5.

H. Intergovernmental Receivable

The intergovernmental receivable balance is primarily comprised of amounts due from the federal government for reimbursement-type grant programs. Advances of resources to recipient local governments before eligibility requirements have been met under government-mandated and voluntary nonexchange programs and amounts due for exchanges of State goods and services with other governments are also reported as intergovernmental receivables. Additional details on the intergovernmental receivable balance can be found in NOTE 5.

I. Inventories

Inventories are valued at cost. Principal inventory cost methods applied include first-in/first-out, average cost, moving-average, and retail.

In the governmental fund financial statements, the State recognizes the costs of material inventories as expenditures when purchased. Inventories do not reflect current appropriable resources in the governmental fund financial statements. Therefore, the State reports an equivalent portion of fund balance as nonspendable.

J. Restricted Assets

The primary government reports assets restricted for the payment of lottery prize awards payable, revenue bonds, and tuition benefits in the enterprise funds.

Generally, the component unit funds hold assets in trust under bond covenants or other financing arrangements that legally restrict the use of these assets.

K. Capital Assets

Primary Government

The State reports capital assets purchased with governmental fund resources in the government-wide financial statements at historical cost, or at estimated historical cost when no historical records exist. Donated capital assets are valued at their estimated fair value on the donation date. The State does not report capital assets purchased with governmental fund resources in the fund financial statements. Governmental capital assets are reported net of accumulated depreciation, except for land, construction-in-progress, transportation infrastructure assets, and individual works of art and historical treasures, including historical land improvements and buildings. Transportation infrastructure assets are reported using the "modified approach," as discussed below, and therefore are not depreciable. Individual works of art and historical treasures, including historical land improvements and buildings, are considered to be inexhaustible, and therefore, are not depreciable.

The State reports capital assets purchased with enterprise fund resources and fiduciary fund resources in the government-wide and the fund financial statements at historical cost, or at estimated historical cost when no historical records exist. Donated capital assets are valued at their estimated fair value on the donation date. Capital assets, except for land and construction-in-progress, are reported net of accumulated depreciation.

The State has elected to capitalize its transportation infrastructure assets, defined as bridges, general highways, and priority highways, using the modified approach. Under this approach, the infrastructure assets are not depreciated because the State has committed itself to maintaining the assets at a condition level that the Ohio Department of Transportation (ODOT) has determined to be adequate to meet the needs of the citizenry. Costs of maintaining the bridge and highway infrastructure are not capitalized. New construction that represents additional lane-miles of highway or additional square-footage of bridge deck area and improvements that add to the capacity or efficiency of an asset are capitalized.

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

ODOT maintains an inventory of its transportation infrastructure capital assets, and conducts annual condition assessments to establish that the condition level that the State has committed itself to maintaining is, in fact, being achieved. ODOT also estimates the amount that must be spent annually to maintain the assets at the desired condition level.

For its other types of capital assets, the State does not capitalize the costs of normal maintenance and repairs that do not add to an asset’s value or materially extend its useful life. Costs of major improvements are capitalized. Interest costs associated with the acquisition of capital assets purchased using governmental fund resources are not capitalized, while those associated with acquisitions purchased using enterprise and fiduciary fund resources are capitalized.

The State does not capitalize collections of works of art or historical treasures that can be found at the Governor’s residence, Malabar Farm (i.e., Louis Bromfield estate), which the Ohio Department of Natural Resources operates, the Ohio Arts Council, the State Library of Ohio, and the Capitol Square Review and Advisory Board for the following reasons:

- The collection is held for public exhibition, education, or research in furtherance of public service rather than for financial gain.
- The collection is protected, kept unencumbered, cared for, and preserved.
- The collection is subject to an organizational policy that requires the proceeds from sales of collection items to be used to acquire other items for collections.

The State has established the following capitalization thresholds:

Buildings	\$15,000
Building Improvements	100,000
Land, including easements	All, regardless of cost
Land Improvements	15,000
Machinery and Equipment	15,000
Vehicles.....	15,000
Infrastructure:	
Highway Network.....	500,000
Bridge Network.....	500,000
Park and Natural Resources Network	All, regardless of cost

For depreciable assets, the State applies the straight-line method over the following estimated useful lives:

Buildings	20-45 Years
Land Improvements	10-30 Years
Machinery and Equipment	3-15 Years
Vehicles.....	7-15 Years
Park and Natural Resources Infrastructure Network	10-50 Years

NOTE 8 contains additional disclosures about the primary government’s capital assets.

Discretely Presented Component Unit Funds

The discretely presented component unit funds value all capital assets at cost and donated capital assets at estimated fair value on the donation date. They apply the straight-line method to depreciable capital assets. Additional disclosures about the discretely presented component unit funds’ capital assets can be found in NOTE 8.

L. Medicaid Claims Payable

The Medicaid claims liability, which has an average maturity of one year or less, includes an estimate for incurred, but not reported claims.

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

M. Noncurrent Liabilities

Government-wide Financial Statements — Liabilities whose average maturities are greater than one year are reported in two components — the amount due in one year and the amount due in more than one year. Additional disclosures as to the specific liabilities included in noncurrent liabilities can be found in NOTES 10 through 15.

Fund Financial Statements — Governmental funds recognize noncurrent liabilities to the extent they have matured or will be liquidated with expendable, available financial resources.

The proprietary funds and discretely presented component unit funds report noncurrent liabilities expected to be financed from their operations.

N. Compensated Absences

Employees of the State's primary government earn vacation leave, sick leave, and personal leave at various rates within limits specified under collective bargaining agreements or under law. Generally, employees accrue vacation leave at a rate of 3.1 hours every two weeks for the first four years of employment, up to a maximum rate of 9.2 hours every two weeks after 24 years of employment. Employees may accrue a maximum of three years vacation leave credit. At termination or retirement, the State pays employees, at their full rate, 100 percent of unused vacation leave, personal leave, and, in certain cases, compensatory time and 50 to 55 percent of unused sick leave.

Such leave is liquidated in cash, under certain restrictions, either annually in December, or at the time of termination from employment.

For the governmental funds, the State reports the matured compensated absences liability as a fund liability (included in the "Accrued Liabilities" account as a component of wages payable) to the extent it will be liquidated with expendable, available financial resources. For the primary government's proprietary funds and its discretely presented component unit funds, the State reports the compensated absences liability as a fund liability included in the "Refund and Other Liabilities" account.

The State's primary government accrues vacation, compensatory time, and personal leaves as liabilities when an employee's right to receive compensation is attributable to services already rendered and it is probable that the employee will be compensated through paid time off or some other means, such as at termination or retirement.

Sick leave time that has been earned, but is unavailable for use as paid time off or as some other form of compensation because an employee has not met a minimum service time requirement, is accrued to the extent that it is considered to be probable that the conditions for compensation will be met in the future.

The State's primary government accrues sick leave using the vesting method. Under this method, the liability is recorded on the basis of leave accumulated by employees who are eligible to receive termination payments, as of the balance sheet date, and on leave balances accumulated by other employees who are expected to become eligible in the future to receive such payments.

Included in the compensated absences liability is an amount accrued for salary-related payments directly and incrementally associated with the payment of compensated absences upon termination. Such payments include the primary government's share of Medicare taxes.

For the colleges and universities, vacation and sick leave policies vary by institution.

O. Pensions

For purposes of measuring the net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions, and pension expense, information about the fiduciary net position of the pension plans and additions to/deductions from their fiduciary net position have been determined on the same basis as they are reported by the pension systems. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. The pension systems report investments at fair value.

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

P. Fund Balance Classification; Budget Stabilization Fund; Net Position/Fund Balance Spending Order

Fund balance reported in the governmental fund financial statements is classified as follows:

Nonspendable

The *nonspendable* fund balance classification includes amounts that cannot be spent because they are either 1) not in spendable form, such as prepaids and inventories or 2) legally or contractually required to be maintained intact, such as the corpus of a permanent fund.

Restricted

Fund balance amounts should be *restricted* when constraints placed on the use of resources are either 1) externally imposed by creditors, grantors, contributors, or laws or regulations of other governments; or 2) imposed by law through constitutional provisions or enabling legislation.

Unrestricted

Committed

Amounts constrained for specific purposes by formal action (i.e., legislation) of the government's highest level of decision-making authority (i.e., General Assembly) should be reported as *committed* fund balance. Committed amounts cannot be used for other purposes unless the General Assembly passes legislation to remove the constraints.

Assigned

Amounts that are constrained by the government's *intent* to be used for specific purposes, but are neither restricted nor committed, should be reported as *assigned* fund balance, except for stabilization arrangements. The intent should be conveyed by the governing body itself or through delegation to a body or official authorized on behalf of the government to assign amounts to be used for specific purposes. The Controlling Board, created under Chapter 127, Ohio Revised Code, is an example of a body delegated by the government to make assignments. The Director of the Office of Budget and Management is an example of an authorized official granted assignment authority through legislative language, including enacted budget bills. While both the committed and assigned fund balance classifications include amounts constrained for specific use by actions taken by the government itself, the authority for making an assignment is not required to be the government's highest level of decision-making authority. Amounts should not be reported as assigned if the assignment would result in a deficit in unassigned fund balance.

Unassigned

Unassigned fund balance is the residual classification for the General Fund. This classification represents spendable fund balance that has not been otherwise restricted, committed or assigned to specific purposes within the General Fund. In funds other than the General Fund, the unassigned classification should only be used to report a deficit balance due to overspending amounts that are restricted or committed.

Fund balance in the State's Budget Stabilization Fund, as discussed in Sections 131.43 and 131.44, Ohio Revised Code, does not meet the criteria to be classified as restricted or committed and is, therefore, reported as unassigned in the General Fund.

For reporting purposes, restricted amounts are generally considered to have been spent first, followed by unrestricted amounts. Within the unrestricted fund balance amounts, the spending order is generally committed, followed by assigned, and then unassigned when expenditures are incurred for purposes for which amounts in any unrestricted fund balance classification could be used.

Q. Risk Management

The State's primary government is self-insured for claims under its traditional healthcare plan and for vehicle liability while it has placed employee and public official fidelity bonding with a private insurer. The State self-funds tort liability although several agencies also choose to participate in private insurance programs. All State owned buildings are covered under a catastrophic property policy that covers both real and personal property losses. All other liability risk to State property is self-funded on a pay-as-you-go basis.

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

While not the predominant participants, the State's primary government and its discretely presented component units participate in a public entity risk pool, which is accounted for in the Workers' Compensation Enterprise Fund, for the financing of their respective workers' compensation liabilities. These liabilities are reported in the governmental and proprietary funds under the "Interfund Payable" account. (See NOTE 7).

R. Interfund Balances and Activities

Interfund transactions and balances have been eliminated from the government-wide financial statements to the extent that they occur within either the governmental or business-type activities. Balances between governmental and business-type activities are presented as internal balances and are eliminated in the total column. Revenues and expenses associated with reciprocal transactions within governmental or within business-type activities have not been eliminated.

In the fund financial statements, interfund activity within and among the three fund categories (governmental, proprietary, and fiduciary) is classified and reported as follows:

Reciprocal interfund activity is the internal counterpart to exchange and exchange-like transactions. This activity includes:

Interfund Loans — Amounts provided with a requirement for repayment, which are reported as interfund receivables in lender funds and interfund payables in borrower funds. When interfund loan repayments are not expected within a reasonable time, the interfund balances are reduced and the amount that is not expected to be repaid is reported as a transfer from the fund that made the loan to the fund that received the loan.

Interfund Services Provided and Used — Sales and purchases of goods and services between funds for a price approximating their external exchange value. Interfund services provided and used are reported as revenues in seller funds and as expenditures or expenses in purchaser funds. Unpaid amounts are reported as interfund receivables and payables in the fund balance sheets or fund statements of net position.

Nonreciprocal interfund activity is the internal counterpart to nonexchange transactions. This activity includes:

Interfund Transfers – Flows of assets without equivalent flows of assets in return and without a requirement for repayment. In governmental funds, transfers are reported as other financing uses in the funds making transfers and as other financing sources in the funds receiving transfers.

Interfund Reimbursements — Repayments from funds responsible for particular expenditures or expenses to the funds that initially paid for them. Reimbursements are not displayed in the financial statements.

Details on interfund balances and transfers are disclosed in NOTE 7.

S. Intra-Entity Balances and Activities

Balances due between the primary government and its discretely presented component units are reported as receivables from component units or primary government and payables to component units or primary government. For the discretely presented component units, the nature and amount of significant transactions with the primary government are disclosed in NOTE 7.

Resource flows between the primary government and its discretely presented component units are reported like external transactions (i.e., revenues and expenses).

T. Derivatives Instruments

The State's derivative instruments include investment derivatives and interest rate swaps. Interest rate swaps that are ineffective hedging derivatives are reported within the investment derivatives classification.

The State reports its derivative instruments at fair value in the Statement of Net Position. Changes in fair value for investment derivatives are recorded as investment income in the Statement of Activities. Changes in fair value for effective hedging derivatives are reported as deferred outflows/inflows of resources in the Statement of Net Position and disclosed in NOTE 18.

NOTE 1 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Additional disclosures on the State's investment derivatives and its hedging derivatives can be found in NOTE 4 and NOTE 10, respectively.

U. Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and reported amounts of revenues and expenses during the reported period. Actual results could differ from those estimates.

NOTE 2 RESTATEMENTS, CHANGES IN ACCOUNTING PRINCIPLES, EXTINGUISHMENTS OF DEBT AND SPECIAL ITEMS

A. Restatements

Restatements of net position, as of June 30, 2015, for the primary government and discretely presented component units are presented in the following table (dollars in thousands).

Government-Wide Financial Statements:

	Governmental Activities	Business-type Activities	Total Primary Government	Total Discretely Presented Component Units
Net Position, as of June 30, 2014, As Previously Reported	\$ 21,254,955	\$ 8,940,722	\$ 30,195,677	\$ 14,702,657
<i>Implementation of a New Accounting Standard:</i>				
GASB Statement No. 68 and 71.....	(2,431,482)	(178,301)	(2,609,783)	(5,912,889)
<i>Correction of an Error:</i>				
Youngstown State University Component Unit.....	-	-	-	(3,216)
Total Changes in Net Position.....	(2,431,482)	(178,301)	(2,609,783)	(5,916,105)
Net Position, July 1, 2014, As Restated	\$ 18,823,473	\$ 8,762,421	\$ 27,585,894	\$ 8,786,552

Governmental Fund and Fiduciary Fund Financial Statements:

	General Fund	Pension Trust Fund
Fund Balance/Net Position, as of June 30, 2014, As Previously Reported	\$ 5,928,956	\$ 813,952
<i>Implementation of a New Accounting Standard:</i>		
GASB Statement No. 67.....	-	22,771
<i>Correction of an Error:</i>		
Unclaimed Funds.....	(233,445)	-
Total Changes in Fund Balance/Net Position.....	(233,445)	22,771
Fund Balance/Net Position, July 1, 2014, As Restated	\$ 5,695,511	\$ 836,723

B. Implementation of Recently Issued Accounting Pronouncements

For the fiscal year ended June 30, 2015, the State implemented the provisions of

- Governmental Accounting Standards Board (GASB) Statement No. 67, *Financial Reporting for Pension Plans*.
- Governmental Accounting Standards Board (GASB) Statement No. 68, *Accounting and Financial Reporting for Pensions (an amendment of GASB Statement No. 27)*.
- Governmental Accounting Standards Board (GASB) Statement No. 69, *Government Combinations and Disposals of Government Operations*.
- Governmental Accounting Standards Board (GASB) Statement No. 71, *Pension Transition for Contributions Made Subsequent to the Measurement Date (an amendment of GASB Statement No. 68)*.

**NOTE 2 RESTATEMENTS, CHANGES IN ACCOUNTING PRINCIPLES,
EXTINGUISHMENTS OF DEBT AND SPECIAL ITEMS (Continued)**

GASB Statement No. 67 amends GASB Statement No. 25, *Financial Reporting for Defined Benefit Pension Plans and Note Disclosures for Defined Contribution Plans*, by establishing financial reporting standards for state and local government defined benefit pension plans and defined contribution pension plans that are administered through trusts or equivalent arrangements. Additionally, for defined benefit pension plans, this Statement establishes standards of financial reporting for separately issued financial reports and specifies the required approach to measuring the pension liability of employers and nonemployer contributing entities for benefits provided through the pension plan. The State's implementation of GASB 67 is based on the year-end of the State Highway Patrol Retirement System. Please see NOTE 2A. for restatements resulting from the implementation of this standard and NOTE 9 for more information.

GASB Statement No. 68 amends GASB Statement No. 27, *Accounting for Pensions by State and Local Governmental Employers*, and establishes standards for measuring and recognizing liabilities, deferred outflows of resources, deferred inflows of resources, and expense/expenditures. For defined benefit pensions, this Statement identifies the methods and assumptions that should be used to project and discount benefit payments. Please see NOTE 2A. for restatements resulting from the implementation of this standard and NOTE 9 for more information.

GASB Statement No. 69 establishes accounting and financial reporting standards related to government combinations and disposals of government operations. As used in this Statement, the term *government combinations* includes a variety of transactions referred to as mergers, acquisitions, and transfers of operations. The implementation of this standard did not result in any change to the State's financial statements or note disclosures.

GASB Statement No. 71 eliminates the source of a potential significant understatement of restated beginning net position and expense in the accrual-basis financial statements of employer and nonemployer contributing entities in the first year of implementation of GASB 68. Please see NOTE 2A. for restatements resulting from the implementation of this standard and NOTE 9 for more information.

C. Recently Issued GASB Pronouncements

In February 2015, the GASB issued Statement No. 72, *Fair Value Measurement and Application*. The provisions of GASB 72 are effective for financial statements for periods beginning after June 15, 2015. The requirements of this Statement enhance comparability by requiring measurement of certain assets and liabilities at fair value using a consistent and more detailed definition of fair value and accepted valuation techniques. This Statement also enhances fair value application guidance and related disclosures in order to provide information to financial statement users about the impact of fair value measurement on a government's financial position.

In June 2015, the GASB issued Statement No. 73, *Accounting and Financial Reporting for Pensions and Related Assets That Are Not within the Scope of GASB Statement 68, and Amendments to Certain Provisions of GASB Statements 67 and 68*. The provisions of GASB 73 are effective for fiscal years beginning after June 15, 2015. The requirements of this Statement will improve financial reporting by establishing a single framework for the presentation of information about pensions, which will enhance the comparability of pension-related information reported by employers and nonemployer contributing entities.

In June 2015, the GASB issued Statement No. 74, *Financial Reporting for Postemployment Benefit Plans Other Than Pension Plans*. The provisions of GASB 74 are effective for financial statements for fiscal years beginning after June 15, 2016. The requirements of this Statement improve financial reporting primarily through enhanced note disclosures and schedules of required supplementary information that will be presented by OPEB plans that are administered through trusts that meet the specified criteria. The new information will enhance the decision-usefulness of the financial reports of those OPEB plans, their value for assessing accountability, and their transparency by providing information about measures of net OPEB liabilities and explanations of how and why those liabilities changed from year to year.

**NOTE 2 RESTATEMENTS, CHANGES IN ACCOUNTING PRINCIPLES,
EXTINGUISHMENTS OF DEBT AND SPECIAL ITEMS (Continued)**

In June 2015, the GASB issued Statement No. 75, *Accounting and Financial Reporting for Postemployment Benefits Other Than Pensions*. The provisions of GASB 75 are effective for fiscal years beginning after June 15, 2017. The requirements of this Statement will improve the decision-usefulness of information in employer and governmental nonemployer contributing entity financial reports and will enhance its value for assessing accountability and interperiod equity by requiring recognition of the entire OPEB liability and a more comprehensive measure of OPEB expense. Decision-usefulness and accountability also will be enhanced through new note disclosures and required supplementary information. The consistency, comparability, and transparency of the information reported by employers and governmental nonemployer contributing entities about OPEB transactions will also be improved by the requirements of this Statement.

In June 2015, the GASB issued Statement No. 76, *The Hierarchy of Generally Accepted Accounting Principles for State and Local Governments*. The provisions of GASB 76 are effective for financial statements for periods beginning after June 15, 2015, and should be applied retroactively. This Statement supersedes GASB 55. The requirements in this Statement improve financial reporting by 1) raising the category of GASB Implementation Guides in the GAAP hierarchy; 2) emphasizing the importance of analogies to authoritative literature when the accounting treatment for an event is not specified in authoritative GAAP; and 3) requiring the consideration of consistency with the GASB Concepts Statements when evaluating accounting treatments specified in nonauthoritative literature.

In August 2015, the GASB issued Statement No. 77, *Tax Abatement Disclosures*. The provisions of GASB 77 are effective for financial statements for periods beginning after December 15, 2015. The requirements of this Statement improve financial reporting by giving users of financial statements essential information that is not consistently or comprehensively reported to the public at present. Disclosure of information about the nature and magnitude of tax abatements will make these transactions more transparent to financial statement users. As a result, users will be better equipped to understand 1) how tax abatements affect a government's future ability to raise resources and meet its financial obligations and 2) the impact those abatements have on a government's financial position and economic condition.

Management is assessing the impact that the new GASB pronouncements will have on the State's financial statements.

D. Extinguishments of Debt – Major Funds

Extinguishments of debt reflected in the State's basic financial statements, as of June 30, 2015 (dollars in thousands) are as follows:

Gain on Extinguishment of Debt

The \$402.6 million gain on extinguishment of debt reported in the business-type activities relates to Unemployment Compensation. To assist the State in the repayment of outstanding advances owed to the federal government, the federal government implemented a reduction to the Federal Unemployment Tax Act (FUTA) credit it gives to employers. The additional tax paid by the employers and collected directly by the federal government as a result of the FUTA credit reduction is offset against the State's outstanding advance balance.

NOTE 3 GAAP versus NON-GAAP BUDGETARY BASIS

In the accompanying *Statement of Revenues, Expenditures and Changes in Fund Balances — Budget and Actual (Non-GAAP Budgetary Basis) — General Fund and Major Special Revenue Funds*, actual revenues, transfers-in, expenditures, encumbrances, and transfers-out reported on the non-GAAP budgetary basis do not equal those reported on the GAAP basis in the *Statement of Revenues, Expenditures and Changes in Fund Balances — Major Governmental Funds*.

This inequality results primarily from basis differences in the recognition of accruals, deferred resources, interfund transactions, and loan transactions, and from timing differences in the budgetary basis of accounting for encumbrances. On the non-GAAP budgetary basis, the State recognizes encumbrances as expenditures in the year encumbered, while on the modified accrual basis, the State recognizes expenditures when goods or services are received regardless of the year encumbered.

Original budget amounts in the accompanying budgetary statements have been taken from the first complete appropriated budget for fiscal year 2015. An appropriated budget is the expenditure authority created by appropriation bills that are signed into law and related estimated revenues. The original budget also includes actual appropriation amounts automatically carried over from prior years by law, including the automatic rolling forward of appropriations to cover prior-year encumbrances.

Final Budget amounts represent original appropriations modified by authorized transfers, supplemental and amended appropriations, and other legally authorized legislative and executive changes applicable to fiscal year 2015, whenever signed into law or otherwise legally authorized.

For fiscal year 2015, no excess expenditures over appropriations were reported in individual funds.

A reconciliation of the fund balances reported under the GAAP basis and budgetary basis for the General Fund and the major special revenue fund is presented on the following page.

NOTE 4 DEPOSITS AND INVESTMENTS

A. Legal Requirements

The deposit and investment policies of the Treasurer of State and the State Board of Deposit are governed by the Uniform Depository Act, Chapter 135, Ohio Revised Code, which requires state moneys to be maintained in one of the following three classifications:

Active Deposits – Moneys required to be kept in cash or near cash status to meet current demands. Such moneys must be maintained either as cash in the State's treasury or in any of the following: a commercial account that is payable or about to be withdrawn, in whole or in part, on demand, a negotiable order of withdrawal account, a money market deposit account or a designated warrant clearance account.

Inactive Deposits – Those moneys not required for use within the current two year period of designation of depositories. Inactive moneys may be deposited or invested only in certificates of deposit maturing not later than the end of the current period of designation of depositories.

Interim Deposits – Those moneys not required for immediate use, but needed before the end of the current period of designation of depositories. Interim deposits may be deposited or invested in the following instruments:

- US Treasury bills, notes, bonds or other obligations or securities issued by or guaranteed as to principal and interest by the United States;
- Bonds, notes, debentures, or other obligations or securities issued by any federal government agency or instrumentality;
- Bonds and other direct obligations of the State of Ohio issued by the Treasurer of State and of the Ohio Public Facilities Commission, the Ohio Housing Finance Agency, the Ohio Water Development Authority, and the Ohio Turnpike Infrastructure Commission;
- Commercial paper issued by any corporation that is incorporated under the laws of the United States or a state;
- Written repurchase agreements with any eligible Ohio financial institution that is a member of the Federal Reserve System or Federal Home Loan Bank, or any recognized U.S. government securities dealer in the securities enumerated above;
- No-load money market mutual funds consisting exclusively of securities and repurchase agreements enumerated above;
- Securities lending agreements with any eligible financial institution that is a member of the Federal Reserve System or Federal Home Loan Bank, or any recognized U.S. government securities dealer;
- Bankers' acceptances maturing in 270 days or less;
- Certificates of deposit in the eligible institutions applying for interim moneys, including linked deposits, as authorized under Sections 135.61 to 135.67, Ohio Revised Code, agricultural linked deposits, as authorized under Sections 135.71 to 135.76, Ohio Revised Code, and housing linked deposits, as authorized under Sections 135.81 to 135.87, Ohio Revised Code;
- The Treasurer of State's investment pool, as authorized under section 135.45, Ohio Revised Code;
- The Treasurer of State's STAR Plus program;
- Debt interest, other than commercial paper as enumerated above, of corporations incorporated under the laws of the United States or a state, or foreign nations diplomatically recognized by the United States, or any instrument based on, derived from, or related to such interests that are denominated and payable in U.S. funds;

NOTE 4 DEPOSITS AND INVESTMENTS (Continued)

- Bonds, notes, and other obligations of any state or political subdivision thereof;
- Obligations of a board of education, as authorized under Section 133.10, Ohio Revised Code; and
- Obligations of a political subdivision issued under Chapter 133, Ohio Revised Code.

The reporting entity's deposits must be held in insured depositories approved by the State Board of Deposit and must be fully collateralized. However, in the case of foundations and other component units of the colleges and universities, deposits of these entities are not subject to the legal requirements for deposits of governmental entities.

Deposit and investment policies of certain individual funds and component units are established by Ohio Revised Code provisions other than the Uniform Depository Act and by bond trust agreements. In accordance with applicable statutory authority, the State Highway Patrol Retirement System Pension Trust Fund, the Tuition Trust Authority Enterprise Fund, the Workers' Compensation Enterprise Fund, the Retirement Systems Agency fund, and the higher education institutions may also invest in common and preferred stocks, domestic and foreign corporate and government bonds and notes, mortgage loans, limited partnerships, venture capital, real estate and other investments.

B. State-Sponsored Investment Pool

The Treasurer of State is the investment advisor and administrator of the State Treasury Asset Reserve of Ohio (STAR Ohio), a statewide external investment pool authorized under Section 135.45, Ohio Revised Code. STAR Ohio issues a stand-alone financial report, copies of which may be obtained by making a written request to: Director of Investments, Treasurer of State, 30 East Broad Street, 9th Floor, Columbus, Ohio 43215, by calling 1-800-648-7827, or by accessing the Treasurer of State's website at www.tos.ohio.gov.

C. Deposit and Investment Risks

Although exposure to risks is minimized by complying with the legal requirements explained above and internal policies adopted by the Treasurer of State and the investment departments at the various state agencies, the State's deposits and investments are exposed to risks that may lead to losses of value.

The following risk disclosures report investments by type. The "U.S. Agency Obligations" category includes securities issued by federal government agencies and instrumentalities, including government sponsored enterprises.

1. Custodial Credit Risk

Custodial credit risk for deposits exists when a government is unable to recover deposits or recover collateral securities that are in the possession of an outside party in the event of a failure of a depository financial institution.

Deposits of the primary government and its component units are exposed to custodial credit risk if they are not covered by depository insurance, and the deposits are uncollateralized, collateralized with securities held by the pledging financial institution, or collateralized with securities held by the pledging financial institution's trust department or agent but not in the depositor-government's name.

In Ohio, legal requirements for depositor-governments are met when deposits are collateralized with securities held by the pledging financial institution, or by the pledging institution's trust department or agent but not in the government's name. The State's reporting entity has not established specific policies for managing custodial credit risk exposure for deposits.

NOTE 4 DEPOSITS AND INVESTMENTS (Continued)

The table below reports the carrying amount of deposits, as of June 30, 2015, held by the primary government, including fiduciary activities, and its major discretely presented component units and the extent of exposure to custodial credit risk.

Primary Government (including Fiduciary Activities) and Major Discretely Presented Component Units					
Deposits—Custodial Credit Risk					
As of June 30, 2015					
<i>(dollars in thousands)</i>

<i>Primary Government</i>	\$ 1,286,302	\$ 1,107,365	\$ 22,923	\$ 69,199	\$ 21,242
<i>Major Discretely Presented Component Units:</i>					
Ohio State University.....	1,020,691	1,003,400	-	-	970,132

Custodial credit risk for investments exists when a government is unable to recover the value of investments or collateral securities that are in the possession of an outside party in the event of a failure of a counterparty to a transaction.

Investment securities are exposed to custodial credit risk if the securities are uninsured, are not registered in the name of the government, and are held by either the counterparty or the counterparty's trust department but not in the government's name.

The State's reporting entity has not established specific policies for managing custodial credit risk exposure for investments.

NOTE 4 DEPOSITS AND INVESTMENTS (Continued)

The following table reports the fair value, as of June 30, 2015, of investments by type for the primary government, including fiduciary activities, and the extent of exposure to custodial credit risk (dollars in thousands).

Variable Rate Notes	15,682	15,682
Total Ohio State University.....		<u>\$ 1,812,966</u>

2. Credit Risk

The risk that an investment’s issuer or counterparty will not satisfy its obligation is called credit risk. The exposure to this risk has been minimized through the laws and policies adopted by the State.

For investments that are included in the treasury’s cash and investment pool and reported as “Cash Equity with Treasurer” and other investment securities managed by the Treasurer of State’s Office, Chapter 135, Ohio Revised Code, requires such investments to carry certain credit ratings at the time of purchase as follows:

- Commercial paper must carry ratings in the two highest categories by two nationally recognized rating agencies;
- Debt interests (other than commercial paper) must carry ratings in the three highest categories by two nationally recognized rating agencies. This requirement is met when either the debt interest or the issuer of the debt interest carries this rating; and
- For Registered Investment Companies (Mutual Funds), no-load money market mutual funds must carry a rating of the highest category by one rating agency.

Investment policies of the Treasurer of State’s Office further define required credit ratings as follows:

- Commercial paper must have a short term debt rating of at least “A1” or equivalent by all agencies that rate the issuer, with at least two agencies rating the issuer;
- Bonds and notes of any State or political subdivision thereof must be rated in the three highest categories by Standard & Poor’s;
- Banker acceptances must carry a minimum of “A+” for long-term debt (“AAA” for foreign issuers) by a majority of the agencies rating the issuer. For short-term debt, the rating must be at least “A1” or equivalent by at least two agencies rating the issuer;

NOTE 4 DEPOSITS AND INVESTMENTS (Continued)

- Foreign debt must be guaranteed as to principal and interest by the foreign nation, and be rated in one of the three highest categories by at least two rating agencies; and
- Repurchase agreements must, in the case when issued by a counterparty that is not either: an Ohio financial institution that is a member of the Federal Reserve System, or a Federal Home Loan Bank, or a recognized government securities dealer, then such counterparty must have a short-term debt rating of at least A-1 by Standard & Poor's, or, if the counterparty is not explicitly rated A-1 by Standard & Poor's, then the counterparty must possess a guarantee from a Standard & Poor's-rated parent company.

Investment policies regarding credit risk that are in addition to Ohio Revised Code requirements and are specific to the following significant entities reported in the State's reporting entity are as follows:

Workers' Compensation Enterprise Fund

The Fund requires investment-grade ratings by at least two nationally-recognized bond rating services for fixed income securities.

Variable College Savings Plan Private-Purpose Trust Fund

The fixed income portfolio should consist primarily of domestic investment grade bonds and may be partially invested in below investment grade bonds. Any portion of the portfolio in below-investment grade securities should be invested in "BB" and "B" rated securities.

STAR Ohio Investment Trust Fund

Investment policies governing the STAR Ohio external investment pool require that all securities must be rated the equivalent of "A-1" or higher. Mutual funds must be rated AAA or AAAM by Standard and Poor's.

Retirement Systems Agency Fund

For the Ohio Public Employees Retirement System, non-investment grade securities are limited to 35 percent of the total Public Fixed Income portfolio assets. Limitations on the holdings of non-investment grade securities are included in the portfolio's guidelines.

For the Ohio Police and Fire Pension Fund,

- Securities in the core fixed income portfolio shall be rated "BBB-" or better by two standard rating agencies at the time of the purchase;
- Securities in the high yield fixed income portfolio are high yield bonds issued by U.S. corporations with a minimum rating of "CCC" or equivalent;
- Investment managers may purchase securities that are "Not Rated" as long as they deem these securities to be at least equivalent to the minimum ratings; and
- Short-term investments must be rated within the two highest classifications established by two standard rating agencies.

The Ohio Facilities Construction Commission Component Unit Fund also participates in the State Treasurer's Cash and Investment Pool. Risks associated with the Ohio Facilities Construction Commission's share of the pool are included in the disclosures for the Primary Government.

NOTE 4 DEPOSITS AND INVESTMENTS (Continued)

All investments, as categorized by credit ratings in the tables below and on the following page, meet the requirements of the State's laws and policies, when applicable.

NOTE 4 DEPOSITS AND INVESTMENTS (Continued)

Descriptions of the investment credit ratings shown in the tables are as follows:

Rating	General Description of Credit Rating
AAA/Aaa	Extremely strong
AA/Aa	Very strong
A/A-1	Strong
BBB/Baa	Adequate
BB/Ba	Less vulnerable
B	More vulnerable
CCC/Caa	Currently vulnerable to nonpayment
CC/Ca	Currently highly vulnerable to nonpayment
C	Currently highly vulnerable to nonpayment due to certain conditions (e.g., filing of bankruptcy petition or similar action by issuer)
D	Currently highly vulnerable to nonpayment for failure to pay by due date

3. Concentration of Credit Risk

The potential for loss of value increases when investments are not diversified. The State has imposed limits on the types of authorized investments to prevent this type of loss.

For investments that are included in the treasury’s cash and investment pool, and reported as “Cash Equity with Treasurer” and other investment securities managed by the Treasurer of State’s Office, Chapter 135, Ohio Revised Code, requires the following:

- Investments in commercial paper may not exceed 40 percent of the State’s total average portfolio;
- Bankers acceptances cannot exceed ten percent of the State’s total average portfolio;
- Corporate notes cannot exceed 25 percent of the State’s total average portfolio;
- Corporate notes of a single issuer, when combined with other investments of that issuer, may not exceed five percent of the State’s total average portfolio;
- Debt interest (other than commercial paper) shall not exceed 25 percent of the State’s total average portfolio, and when combined with commercial paper, the amount of a single issuer may not exceed five percent of the total average portfolio; and
- Debt interests in foreign nations may not exceed one percent of the State’s total average portfolio.

Investment policies of the Treasurer of State further restrict concentrations of investments. Maximum concentrations are as follows:

Investment Type	Maximum % of Total Average Portfolio
U.S. Treasury	100
Federal Agency (fixed rate)	100
Federal Agency (callable)	55
Federal Agency (variable rate)	10
Repurchase Agreements	50
Bankers’ Acceptances	10
Commercial Paper	40
Corporate Notes	25
Foreign Notes	1
Certificates of Deposit	20
Municipal Obligations	20
STAR Ohio	25
Mutual Funds	100

NOTE 4 DEPOSITS AND INVESTMENTS (Continued)

The investment policies of the Treasurer of State's Office also specify that commercial paper, when combined with investments in other corporate obligations, are further limited to no more than five percent of the total average portfolio. Bankers' Acceptances are limited to no more than five percent of the total average portfolio in any single issuer. Mutual funds are further limited in that the Treasurer's holdings in a single mutual fund cannot be more than ten percent of the total assets of that mutual fund, nor more than ten percent of the total average portfolio. Repurchase Agreements are further limited in that any one counterparty may not exceed ten percent of the total average portfolio. Municipal obligations are further limited to no more than 2.5 percent of the total average portfolio in any single issuer.

Investment policies regarding concentration of investments that are in addition to Ohio Revised Code requirements and are specific to the following significant entities reported in the State's reporting entity are as follows:

Lottery Commission Enterprise Fund

No more than two percent of the total average portfolio may be invested in the securities of any single issuer with the following exceptions: U.S. government obligations, 100 percent maximum; repurchase agreements, limited at the lesser of five percent or \$250 million; and mutual funds, ten percent maximum.

State Highway Patrol Retirement System Pension Trust Fund

Policy prohibits the investment of more than ten percent of its fixed income portfolio in securities of any one issuer with the exception of U.S. government securities, or the investment of more than five percent of the Fund's total investments in any one issuer with the exception of U.S. government securities.

STAR Ohio Investment Trust Fund

Investments in a single issuer are further limited to no more than five percent of the total average portfolio except as follows:

- U.S. Treasury obligations, limited at 100 percent;
- U.S. Agency obligations, limited to 100 percent with no single U.S. Agency exceeding 33 percent unless maturing in 30 days or less and rated AA- or higher;
- repurchase agreement counterparties, limited at a maximum of 25 percent for A-1 rated counterparties and at a maximum of 50 percent for A-1+ rated counterparties, with further limitations based on the maturity of the investment;
- mutual funds, limited at 100 percent; with no more than ten percent of the total average portfolio invested in any single mutual fund and limited to no more than ten percent of the total assets of any single mutual fund;
- corporate obligations, limited to 25 percent, with no more than five percent invested with any single issuer;
- municipal bonds, limited at ten percent and limited to no more than 2.5 percent with any single issuer;
- commercial paper, limited to 40 percent, with no more than five percent invested with any single issuer; and
- bankers' acceptances, limited at ten percent, with no more than five percent invested with any single issuer.

Retirement Systems Agency Fund

For the Ohio Police and Fire Pension Fund, no more than ten percent of the core Fixed Income Portfolio may be invested in the securities of any one issuer, and no more than five percent in any one issuer on a dollar duration basis, with the exception of U.S. government or agency securities. For its High Yield Portfolio, no more than ten percent of the portfolio may be invested in securities of a single issue or issuer, unless approved by the Board of Trustees.

NOTE 4 DEPOSITS AND INVESTMENTS (Continued)

As of June 30, 2015, all investments meet the requirements of the State’s law and policies, when applicable. However, investments in certain issuers are at least five percent of investment balances, as follows (dollars in thousands):

Issuer	Amount	Percentage of Investment Balance
<i>Governmental and Business-Type Activities:</i>		
Federal Home Loan Bank	2,398,823	6%
<i>STAR Ohio Investment Trust Fund:</i>		
Federal Home Loan Bank	651,398	20%
<i>Ohio Facilities Construction Commission Component Unit Fund:</i>		
Federal National Mortgage Association	27,942	5%
Federal Home Loan Bank	102,351	19%
Federal Home Loan Mortgage Corporation	34,358	6%
Federal Farm Credit Bank.....	41,404	8%

4. Interest Rate Risk

Certain of the State’s investments are exposed to interest rate risk. This risk exists when changes to interest rates will negatively impact the fair value of an investment. The State has adopted policies to mitigate this risk.

Investment policies governing the treasury’s cash and investment pool, which is reported as “Cash Equity with Treasurer” and is managed by the Treasurer of State’s Office, limit maturities of short term investments to no more than 18 months with a weighted average maturity not to exceed 90 days. For long-term investments, maturities are limited to five years or less, except for those that are matched to a specific obligation or debt of the State. A duration target of three years or less has been established for long-term investments. Policy also limits maturities for specific investment types as follows: five years for corporate notes, 270 days for commercial paper, 90 days for repurchase agreements, 270 days for bankers’ acceptances, and five years for foreign debt.

Investment policies regarding investment maturities that are in addition to Ohio Revised Code requirements and are specific to the following significant entities reported in the State’s reporting entity are as follows:

Workers’ Compensation Enterprise Fund

Policy requires each fixed-income portfolio to be invested with duration characteristics that are within a range consistent with Barclay’s Capital Fixed Income Index ranges.

Lottery Commission Enterprise Fund

Investments are required to have maturities of 30 years or less. In no case may the maturity of an investment exceed the expected date of disbursement of those funds.

Variable College Savings Plan Private-Purpose Trust Fund

Policy requires each fixed-income portfolio to be invested with duration characteristics that are within a range consistent with Barclay’s Aggregate Index ranges.

STAR Ohio Investment Trust Fund

Investment policies limit maturities of investments to a final stated maturity of 397 days or less, with a 762 day limit for floating rate U.S. Treasury and U.S. Agency obligations. Repurchase agreements are limited to maturities of 30 days and both commercial paper and bankers’ acceptances are limited to maturities of 270 days.

NOTE 4 DEPOSITS AND INVESTMENTS (Continued)

Retirement Systems Agency Fund

The Public Fixed Income Policy of the Ohio Public Employees Retirement System requires an average effective duration of all defined benefit and health care assets to be within 20 percent of the option-adjusted duration of the Public Fixed Income asset class, excluding Liquidity Funds. Liquidity Funds duration must be within a range of zero to 120 percent of the average option-adjusted duration.

As of June 30, 2015, investments reported as "Cash Equity with Treasurer" have terms that make their fair values highly sensitive to the interest rate changes. The U.S. agency obligations investment type includes \$2.26 billion of investments with call dates during fiscal years 2016 through 2020. All of these investments have maturities between fiscal years 2016 through 2021 and are reported in the table on the following page as maturing in one to six years.

In addition, several investments reported as "Investments" have terms that make their fair values highly sensitive to interest rate changes. U.S. agency obligations of \$187.9 million and corporate bonds of \$25.5 million have daily, monthly, and quarterly reset dates. Commercial paper of \$92.6 million has a 31-day put notice. U.S. Treasury Floating Rate Notes of \$15 million have quarterly reset dates. Certificates of deposit of \$10 million have daily reset rates. For "Collateral on Lent Securities," variable rate notes of \$1.11 billion and \$110 million have quarterly and daily reset rates, respectively. Commercial paper of \$110 million has monthly reset dates. Repurchase agreements of \$329 million have daily reset rates.

The Lottery Commission Enterprise Fund has "Collateral on Lent Securities" with reset dates. Variable rate notes of \$42.5 million and \$3 million have quarterly and daily reset dates, respectively. Commercial paper of \$8 million has monthly reset dates. Repurchase agreements of \$16 million have daily reset dates.

Also during fiscal year 2015, the Treasurer of State acted as the custodian of the Retirement Systems Agency Fund's investments. These investments contain terms that make their fair values highly sensitive to interest rate changes. Specific information on the nature of the investments and their terms can be found in each respective retirement system's Comprehensive Annual Financial Report.

The tables on the following page list the investment maturities of the investments for the primary government, including fiduciary activities, and its major discretely presented component units. All investments at June 30, 2015, meet the requirements of the State's laws and policies, when applicable. The Ohio Facilities Construction Commission Component Unit Fund also participates in the State Treasurer's Cash and Investment Pool. Risks associated with the Ohio Facilities Construction Commission's share of the pool are included in the disclosures for the Primary Government.

5. Foreign Currency Risk

Investments in stocks and bonds denominated in foreign currencies are affected by foreign currency risk which arises from changes in currency exchange rates.

As of June, 30, 2015, investments denominated in the currency of foreign nations, as detailed in the following tables for the primary government, including fiduciary activities, and the Ohio State University major discretely presented component unit, meet the requirements of the State's laws and policies, when applicable.

The State's laws and investment policies include provisions to limit the exposure to this type of risk. According to Chapter 135, Ohio Revised Code, investments managed by the Treasurer of State's Office, and reported as "Cash Equity with Treasurer", are limited to the debt of nations diplomatically recognized by the United States and that are backed by the full faith and credit of that foreign nation.

Investment policies of the Treasurer of State's Office further limit the types of authorized investments. These requirements include maturity limitations of five years at the date of purchase and denomination of principal and interest in U.S. dollars. Other limitations are noted in the previous sections of this note that discuss credit risk and concentration of credit risk.

Investment policies regarding foreign currency risk have also been adopted for the following significant entities reported in the primary government and are specific to those entities:

Retirement Systems Agency Fund

For the Ohio Public Employees Retirement System, non-U.S. dollar-based securities are limited to 25 percent of the total Fixed Income assets. Additionally, no more than 40 percent of the Fixed Income assets may be from non-U.S. issuers.

D. Securities Lending Transactions

The Treasurer of State participates in the securities lending programs for securities included in the "Cash Equity with Treasurer" and "Investments" accounts. Each lending program is administered by a custodial agent bank, whereby certain securities are transferred to an independent broker-dealer (borrower) in exchange for collateral.

NOTE 4 DEPOSITS AND INVESTMENTS (Continued)

At the time of the loan, the Treasurer of State requires its custodial agents to ensure that the State's lent securities are collateralized at no less than 102 percent of fair value. At no point in time can the value of the collateral be less than 100 percent of the underlying securities.

Consequently, as of June 30, 2015, the State had no credit exposure since the amount the State owed to the borrowers at least equaled or exceeded the amount borrowers owed to the State.

The State invests cash collateral in short-term obligations, which have a weighted average maturity of 36 days or less while the weighted average maturity of securities loans is 12 days or less.

The State cannot sell securities received as collateral unless the borrower defaults. Consequently, these amounts are not reflected in the financial statements.

According to the lending contracts the Treasurer of State executes for the State's cash and investment pool and for the Ohio Lottery Commission Enterprise Fund, the securities lending agent is to indemnify the Treasurer of State for any losses resulting from either the default of a borrower or any violations of the security lending policy.

During fiscal year 2015, the State had not experienced any losses due to credit or market risk on securities lending activities.

In fiscal year 2015, the Treasurer of State lent U.S. government and agency obligations and corporate notes in exchange for cash collateral.

E. Investment Derivatives

As of June 30, 2015, the State reports the following investment derivatives in its financial statements (dollars in thousands):

Investment Derivatives					
As of June 30, 2015					
<i>(dollars in thousands)</i>					
	Notional	Fair Value at 6/30/2015		Increase (Decrease) in Fair Value	
		Amount	Reported as	Amount	Reported as
Governmental Activities:					
Investment Derivatives:					
Pay-fixed interest rate swaps	\$ 112,370	\$ (11,197)	Other Noncurrent Liability	\$ 655	Operating Restricted Investment Loss - Primary, Secondary and Other Education Function
Fiduciary Funds—Agency:					
Investment Derivatives:					
Credit default swaps	58,117	1,212	Investments	1,160	Investment Income
Credit linked notes	-	-	Investments	(2,899)	Investment Income
Equity swaps	1,206,948	(18,576)	Investments	(30,857)	Investment Income
Foreign exchange forward currency contracts	11,288,539	(23,838)	Investments	18,613	Investment Income
Futures contracts	(153,027)	(3,959)	Investments	(4,293)	Investment Income
Interest rate swap	7,047,139	(42)	Investments	1,372	Investment Income
Options	1,761,403	4,530	Investments	7,176	Investment Income
Total return swaps	1,361,893	9,625	Investments	(2,093)	Investment Income
Warrants	1,821	3,209	Investments	(5,770)	Investment Income

For governmental activities, the pay-fixed swaps included in the table above do not meet the criteria for hedging derivatives as of June 30, 2015, and are reported as investment derivatives. The increases in the fair values for fiscal year 2015 of \$655 thousand are reported as operating restricted investment gains for the primary, secondary and other education function in the Statement of Activities.

NOTE 4 DEPOSITS AND INVESTMENTS (Continued)

The credit quality ratings of JPMorgan Chase, the counterparty, are Aa3/A+/AA- as of June 30, 2015. The State was not exposed to credit risk because these swaps had negative fair values at June 30, 2015. However, should interest rates change and the fair values of the swaps become positive, the State would be exposed to credit risk in the amount of the derivative's positive fair value.

Each swap counterparty is required to post collateral to a third party when their respective credit rating, as determined by specified nationally recognized credit rating agencies, falls below the trigger level defined in the swap agreement and based on the fair value of the swap. This arrangement protects the State by mitigating the credit risk, and therefore termination risk, inherent in the swap. Collateral on all swaps must be in the form of cash or U.S. government securities held by a third-party custodian. Net payments are made on the same date, as specified in the agreements.

These swaps, maturing March 15, 2025, are associated with Common Schools Bonds, Series 2005A and Series 2005B. The underlying index is a variable rate based on 62 percent of the ten year LIBOR. The combination of the variable-rate bonds and a floating-to-fixed swap creates a low-cost, long-term synthetic fixed-rate debt that protects the State from rising interest rates.

The Ohio Public Employees Retirement System, Ohio Police and Fire Pension Fund, School Employees Retirement System of Ohio, and State Teachers Retirement System of Ohio have entered into the derivatives reported in the Agency Fund. All derivatives of these retirement systems are categorized as investment derivatives. The fair values and associated risks of the investment derivatives for the Agency Fund are included in the balances and risks disclosed in the previous sections of this note disclosure.

NOTE 5 RECEIVABLES

A. Taxes Receivable – Primary Government

Current taxes receivable are expected to be collected in the next fiscal year while noncurrent taxes receivable are not expected to be collected until more than one year from the balance sheet date. As of June 30, 2015, approximately \$82.6 million of the net taxes receivable balance is also reported as deferred inflows of resources on the governmental funds' balance sheet, all of which is reported in the General Fund.

Refund liabilities for income taxes, totaling approximately \$763.4 million are reported as "Refund and Other Liabilities" for governmental activities on the Statement of Net Position and in the General Fund on the governmental funds' Balance Sheet.

The following table summarizes taxes receivable for the primary government (dollars in thousands):

	Governmental Activities		
	General	Nonmajor Governmental Funds	Total Primary Government
Current-Due Within One Year:			
Income Taxes	\$ 394,727	\$ -	\$ 394,727
Sales Taxes	519,964	-	519,964
Motor Vehicle Fuel Taxes	93,509	72,946	166,455

Business-Type Activities:							
Major Proprietary Funds:							
Lottery Commission	1,485	-	-	-	1,485	1,485	
Nonmajor Proprietary Funds	7,616	-	-	-	7,616	7,616	
Total Business-Type Activities	9,101	-	-	-	9,101	9,101	
Total Primary Government	\$ 651,644	\$ 1,518	\$ 1,643	\$ 8,715	\$ 663,520	\$ 664,817	

Interfund balances result from the time lag between dates that 1) interfund goods and services are provided or reimbursable expenditures/expenses occur, 2) transactions are recorded in the accounting system, and 3) payments between funds are made.

The State's primary government is permitted to pay its workers' compensation liability on a terminal-funding (pay-as-you-go) basis. As a result, the Workers' Compensation Enterprise Fund recognized \$651.6 million as an interfund receivable for the unbilled premium due for the primary government's share of the Bureau's actuarially determined liability for compensation. In the Statement of Net Position, the State includes the liability in the internal balance reported for governmental activities.

NOTE 7 INTERFUND BALANCES AND TRANSFERS AND SIGNIFICANT TRANSACTIONS WITH COMPONENT UNITS (Continued)

B. Interfund Transfers

Interfund transfers, for the fiscal year ended of June 30, 2015, consist of the following (dollars in thousands):

Transferred from	Transferred to			
	Governmental Activities			
	Major Governmental Funds			Total
General	Job, Family & Other Human Services	Nonmajor Governmental Funds		
Major Governmental Funds:				
General	\$ -	\$ 2,226	\$ 2,041,746	\$ 2,043,972
Job, Family and Other Human Services	-	-	45,673	45,673
Buckeye Tobacco Settlement Financing Authority Revenue Bonds	-	-	13,771	13,771
Nonmajor Governmental Funds	321,156	-	138,321	459,477
Total Governmental Activities	321,156	2,226	2,239,511	2,562,893
Major Proprietary Funds:

Total Business-Type Activities	-	1,110,323
Total Primary Government	\$ 28,262	\$ 3,701,478

Transfers are used to 1) move revenues from the fund that statute or budget requires to collect them, to the fund that statute or budget requires to expend them, 2) move receipts restricted to debt service from the funds collecting the receipts, to the debt service fund as the debt service payments become due, and 3) utilize unrestricted revenues collected in one fund to finance various programs accounted for in other funds in accordance with budget authorizations.

NOTE 7 INTERFUND BALANCES AND TRANSFERS AND SIGNIFICANT TRANSACTIONS WITH COMPONENT UNITS (Continued)

C. Discretely Presented Component Units

For fiscal year 2015, the discretely presented component units reported \$2.43 billion in state assistance revenue from the primary government in the Statement of Activities.

Included in "Primary, Secondary, and Other Education" expenses reported for the governmental activities, is the funding that the primary government provided to the Ohio Facilities Construction Commission for capital construction at local school districts. The primary government also transferred bond proceeds to the Ohio Facilities Construction Commission to pay the State's share of the cost of rebuilding elementary and secondary school facilities across the State.

Additionally, the primary government provided financial support to the colleges and universities in the form of state appropriations for instructional and non-instructional purposes and capital appropriations for construction. This assistance is included in "Higher Education Support" expenses reported for governmental activities.

Details of balances and activity reported in the government-wide financial statements between the primary government and its discretely presented component units are summarized below.

Primary Government <i>(dollars in thousands)</i>						
Program Expenses for State Assistance to Component Units

For fiscal year 2015, Ohio State University reported approximately \$342.2 million in depreciation expense.

NOTE 9 PENSION AND OTHER POSTEMPLOYMENT BENEFITS (OPEB) PLANS

All part-time and full-time employees and elected officials of the State, including its component units (unless otherwise excluded in Ohio Revised Code), are eligible to be covered by one of the following retirement plans:

- Ohio Public Employees Retirement System
- State Teachers Retirement System of Ohio
- State Highway Patrol Retirement System
- Alternative Retirement Plan

A. Ohio Public Employees Retirement System (OPERS)

Pension Benefits

OPERS is a cost-sharing, multiple-employer public employee retirement system that administers three separate pension plans – a defined benefit plan, a defined contribution plan, and a combined plan with features of both the defined benefit plan and the defined contribution plan.

OPERS issues a stand-alone financial report, copies of which may be obtained by visiting <https://www.opers.org/investments/cafr.shtml>, making a written request to Ohio Public Employees Retirement System, 277 East Town Street, Columbus, Ohio 43215-4642, or calling (800) 222-7377 or (614) 222-5601.

As established under Chapter 145, Ohio Revised Code, OPERS provides retirement and disability benefits, annual cost-of-living adjustments, and survivor and death benefits to plan members and beneficiaries enrolled in the defined benefit and combined plans.

**NOTE 9 PENSION AND OTHER POSTEMPLOYMENT BENEFITS (OPEB) PLANS
(Continued)**

Most employees who are members of OPERS and who have fewer than five total years of service credit as of December 31, 2002, and new employees hired on or after January 1, 2003, are eligible to select one of the OPERS retirement plans, as listed above, in which they wish to participate. Members not eligible to select a plan include law enforcement officers, (who must participate in the defined benefit plan), college and university employees who choose to participate in one of the university's alternative retirement plans (see NOTE 9D), and re-employed OPERS retirees. Participants may change their selection once prior to attaining five years of service credit, once after attaining five years of service credit but prior to attaining ten years of service credit, and once after attaining ten years of service credit.

Senate Bill 343 was enacted into law with an effective date of January 7, 2013. The pension changes included in the bill modify the retirement eligibility criteria and benefits to provide for longer life expectancies of members. The pension plan design changes also include updated benefits to the disability program, which addresses eligibility for members to return to work. Other changes include updated provisions such as the cost of purchasing service credit and the impact of retiring early with a reduced retirement benefit.

In the legislation, members were categorized into three groups with varying provisions of the law applicable to each group. Members eligible to retire under the law in effect prior to Senate Bill 343 or who will be eligible to retire no later than five years after January 7, 2013, comprise Transition Group A. Members with 20 years of service credit prior to January 7, 2013, or who will be eligible to retire no later than 10 years after January 7, 2013, are included in Transition Group B. Those members who are not in either Group A or B or were hired after January 7, 2013, are in Transition Group C.

Members in Transition Groups A and B are eligible to retire at age 55 with 25 years of credited service, or at or after age 60 with 60 contributing months of credited service. Members in Transition Group C are eligible to retire at age 57 with 25 years of service credit or at age 62 with 5 years of service credit. Regular employees retiring before meeting age and service credit eligibility requirements receive a percentage reduction in benefit amounts. Law enforcement employees may retire at age 52 with 15 or more years of credited service.

The retirement allowance for the defined benefit plan is calculated on the basis of age, years of credited service, and the final average salary. The annual allowance for regular employees is determined by multiplying the final average salary by 2.2 percent for each year of Ohio contributing service up to 30 years and by 2.5 percent for all other years in excess of 30 years of credited service. The annual allowance for law enforcement employees is determined by multiplying the final average salary by 2.5 percent for the first 25 years of Ohio contributing service, and by 2.1 percent for each year of service over 25 years. Retirement benefits increase three percent annually of the original base amount regardless of changes in the Consumer Price Index.

The retirement allowance for the defined benefit portion of the combined plan is calculated on the basis of age, years of credited service, and the final average salary. The annual allowance for regular employees is determined by multiplying the final average salary by one percent for each year of Ohio contributing service up to 30 years and by 1.25 percent for all other years in excess of 30 years of credited service. Retirement benefits for the defined benefit portion of the plan increase three percent annually of the original base amount regardless of changes in the Consumer Price Index. Additionally, retirees receive the proceeds of their individual retirement plans in a manner similar to retirees in the defined contribution plan, as discussed below.

Regular employees who participate in the defined contribution plan may retire after they reach the age of 55. The retirement allowance for the defined contribution plan is based entirely on the total member and vested employer contributions to the plan, plus or minus any investment gains or losses. Employer contributions vest at a rate of 20 percent per year over a five-year vesting period. Retirees may choose from various payment options including monthly annuities, partial lump-sum payments, payments for a guaranteed period, payments for a specific monthly amount, or various combinations of these options. Participants direct the investment of their accounts by selecting from professionally managed OPERS investment options.

**NOTE 9 PENSION AND OTHER POSTEMPLOYMENT BENEFITS (OPEB) PLANS
(Continued)**

Retirees covered under any one of the three OPERS plan options may also choose to take part of their retirement benefit in a Partial Lump-Sum Option Plan (PLOP). Under this option, the amount of the monthly pension benefit paid to the retiree is actuarially reduced to offset the amount received initially under the PLOP. The amount payable under the PLOP cannot be less than six times or more than 36 times the monthly amount that would be payable to the member under the plan of payment selected, and cannot result in a monthly allowance that is less than 50 percent of that monthly amount.

Employer and employee required contributions to OPERS are established by the Retirement Board and are within the limits authorized by the Ohio Revised Code. The contribution rates are based on percentages of covered employees' gross salaries, which are calculated annually by the retirement system's actuaries. The Ohio Revised Code currently limits the employer contribution to a rate not to exceed 14 percent of covered payroll for regular employees and 18.1 percent of covered payroll for law enforcement employees.

Contribution rates for fiscal year 2015, which are the same for the defined benefit, defined contribution, and combined plans, were as follows:

	Contribution Rates	
	Employee Share	Employer Share
<u>Regular Employees:</u>		
July 1, 2014 through June 30, 2015.....	10.00%	14.00%
<u>Law Enforcement Employees:</u>		
July 1, 2014 through June 30, 2015.....	13.00%	18.10%

In the combined plan, the employer's share finances the defined benefit portion of the plan, while the employee's share finances the defined contribution portion of the plan. In the defined contribution plan, both the employee and employer share of the costs are used to finance the plan.

At June 30, 2015, the State reports a liability of \$2.5 billion for its proportionate share of the net pension liability for the Traditional Plan and an asset for its proportionate share of the net pension asset of \$7.6 million for the Combined Plan. Ohio Facilities Construction Commission and Ohio State University Discretely Presented Component Units reports liabilities of \$5.1 million and \$1.05 billion, for their proportionate shares of the net pension liability for the Traditional Plan. Ohio Facilities Construction Commission Discretely Presented Component Unit also reports an asset of \$25 thousand for its proportionate share of the net pension asset for the Combined Plan. The net pension asset/liability was measured as of December 31, 2014. The total pension asset/liability used to calculate the net pension asset/liability was determined by an actuarial valuation as of December 31, 2014. The State's proportion of the net pension asset/liability is determined by a measure of the State's proportionate relationship of employer contributions made to OPERS to the total contributions made to OPERS by all employers and non-employer contributing entities to the plan. The State's proportion of the net asset/liability is based on the State's long-term share of contributions to the plan as compared to the total projected long-term contributions of employers and all non-employer contributing entities. At December 31, 2014, the State's proportion was 20.73 percent for the Traditional Plan and 20.23 percent for the Combined Plan. The proportions for the Traditional Plan and Combined Plan for Ohio Facilities Construction Commission Discretely Presented Component Unit were .04 percent and .06 percent, respectively. The proportion for the Traditional Plan for Ohio State University Discretely Presented Component Unit was 8.8 percent.

**NOTE 9 PENSION AND OTHER POSTEMPLOYMENT BENEFITS (OPEB) PLANS
(Continued)**

For the year ended June 30, 2015, the State recognized pension expense of \$279.6 million, Ohio Facilities Construction Commission recognized \$569 thousand, and Ohio State University Discretely Presented Component Unit recognized \$151.8 million. At June 30, 2015, the State reports deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	Primary Government	Ohio Facilities Construction Commission	Ohio State University
Deferred Outflow of Resources:			
Net Difference between Projected and Actual Earnings on Pension Plan investments.....	\$ 133,001	\$ 271	\$ 57,206
Contributions subsequent to the measurement date.....	203,601	415	84,922
Total.....	<u>\$ 336,602</u>	<u>\$ 686</u>	<u>\$ 142,128</u>
Deferred Inflow of Resources:			
Changes in Proportion and Differences Between State Contributions and Proportionate Share of Contributions.....	\$ (97)	\$ -	\$ -
Differences between expected and actual experience.....	(46,843)	(96)	(20,512)
Total.....	<u>\$ (46,940)</u>	<u>\$ (96)</u>	<u>\$ (20,512)</u>

Deferred Outflows of Resources of \$203.6 million related to pensions resulting from State contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in the year ended June 30, 2016. Ohio Facilities Construction Commission and Ohio State University Discretely Presented Component Units will recognize \$415 thousand and \$84.9 million, respectively, as reduction of their net pension liabilities. Other amounts reported as Deferred Outflows of Resources and Deferred Inflows of Resources related to pensions will be recognized in pension expense as follows:

	Primary Government	Ohio Facilities Construction Commission	Ohio State University
YEAR ENDED JUNE 30:			
2016.....	\$ 12,710	\$ 26	\$ 5,453
2017.....	12,583	26	5,452
2018.....	29,281	60	12,643
2019.....	32,699	67	14,088
2020.....	(275)	(1)	(214)
Thereafter.....	(937)	(3)	(728)

Actuarial Assumptions:

The Total Pension Liability in the December 31, 2014 actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement:

	Traditional Plan	Combined Plan
Inflation.....	3.75	3.75 Percent
Salary Increases.....	4.25-10.05	4.25-8.05 Percent
Investment Rate of Return.....	8.00	8.00 Percent
COLA.....	3.00	3.00 Percent
Actuarial Cost Method.....	Individual Entry Age	

Mortality rates were based on the RP-2000 Combined Mortality Table for males or females, as appropriate, with adjustments for mortality improvements based on Projection Scale AA.

**NOTE 9 PENSION AND OTHER POSTEMPLOYMENT BENEFITS (OPEB) PLANS
(Continued)**

The actuarial assumptions used in the December 31, 2014 valuation were based on the results of an actuarial experience study dated December 31, 2010.

An estimate range for investment return assumption is developed and based on the target allocation adopted by the OPERS Retirement Board. The target allocation and long-term expected rate of return for each major asset class are summarized as follows:

Asset Class	Target Allocation	Long-Term Expected Real Rate of Return*
Fixed Income.....	23.00%	2.31%
Domestic Equity.....	19.90%	5.84%
Real Estate.....	10.00%	4.25%
Private Equity.....	10.00%	9.25%
International Equities.....	19.10%	7.40%
Other Investments.....	18.00%	4.59%
Total Fund.....	100.00%	5.28%

*10-year annualized geometric nominal returns, which include the real rate of return and inflation and does not include investment expenses.

Discount Rate - The discount rate used to measure the total pension liability was 8%. The projection of cash flows used to determine the discount rate assumes that employer and employee contributions will be made at statutory contribution rates. In each period of the projection, employer contributions were assumed to be applied first to the service cost of all members, with any remaining amount included in projected employer contributions for current members. Therefore, the long-term expected rate of return of 8% was applied to all periods of projected benefit payments to determine the total pension liability as of December 31, 2014.

Sensitivity of the State's proportionate share of the Net Pension Liability to changes in the Discount Rate – The following table represents the net pension liability as of December 31, 2014, calculated using the current period discount rate assumption of 8%. Also shown is what the net pension liability would be if it were calculated using a discount rate that is one percentage point lower (7%) or one percentage point higher (9%) than the current assumption:

	1% Decrease (7%)	Current Discount Rate (8%)	1% Increase (9%)
Net Pension Liability:			
Primary Government.....	\$ 4,592,661	\$ 2,496,359	\$ 730,833
Ohio Facilities Construction Commission.....	\$ 9,306	\$ 5,058	\$ 1,481
Ohio State University.....	\$ 1,955,831	\$ 1,059,519	\$ 304,734

Additional information regarding the pension plan fiduciary net position is available in the separately issued OPERS financial report by visiting the OPERS Web site at <https://www.opers.org/investments/cafr.shtml> .

Other Postemployment Benefits (OPEB)

OPERS maintains a cost-sharing multiple employer defined benefit post-employment healthcare plan, which includes a medical plan, prescription drug program and Medicare Part B premium reimbursement, to qualifying members of both the defined benefit and combined plans. Members of the defined contribution plan do not qualify for ancillary benefits, including post-employment healthcare coverage.

In order to qualify for post-employment healthcare coverage, age-and-service retirees under the defined benefit and combined plans must have ten or more years of qualifying Ohio service credit. Healthcare coverage for disability benefit recipients and qualified survivor benefit recipients is available. The healthcare coverage provided by OPERS meets the definition of an OPEB as described in GASB Statement 45.

**NOTE 9 PENSION AND OTHER POSTEMPLOYMENT BENEFITS (OPEB) PLANS
(Continued)**

The Ohio Revised Code permits, but does not mandate, OPERS to provide OPEB benefits to its eligible recipients. Authority to establish and amend benefits is provided in Chapter 145 of the Ohio Revised Code.

The Ohio Revised Code provides the statutory authority requiring public employers to fund postretirement healthcare through their contributions to OPERS. A portion of each employer's contribution to OPERS is set aside for the funding of postretirement healthcare benefits.

Employer contribution rates are expressed as a percentage of covered payroll of active members. For fiscal year 2015, state employers contributed at a rate of 14 percent of covered payroll and law enforcement employers contributed at 18.1 percent. These are the maximum contribution rates permitted by the Ohio Revised Code. Active members do not make contributions to the OPEB plan.

OPERS' Post Employment Health Care plan was established under, and is administrated in accordance with, Internal Revenue Code 401(h). Each year, the OPERS Board of Trustees determines the portion of the employer contribution rate that will be set aside for funding of postemployment healthcare benefits. The contribution rates for regular and law enforcement employees were as follows:

	Employer Share	
	Defined Benefit Plan	Combined Plan
July 1, 2014 through June 30, 2015.....	2.00%	2.00%

The OPERS Board of Trustees is also authorized to establish rules for the payment of a portion of the healthcare benefits provided by the retiree or their surviving beneficiaries. Payment amounts vary depending on the number of covered dependents and the coverage selected.

Changes to the health care plan were adopted by the OPERS Board of Trustees on September 19, 2012, with a transition plan commencing January 1, 2014. With the recent passage of pension legislation under Senate Bill 343 and the approved healthcare changes, OPERS expects to be able to consistently allocate four percent of the employer contributions toward the healthcare fund after the end of the transition period.

Employer contributions required and made for the last three fiscal years for the defined benefit plan and the defined benefit portion of the combined plan were as follows (dollars in thousands):

	2015	2014	2013
<i>Primary Government:</i>			
Regular Employees	\$ 51,394	\$ 38,693	\$ 69,437
Law Enforcement Employees.....	608	447	757
Total	<u>\$ 52,002</u>	<u>\$ 39,140</u>	<u>\$ 70,194</u>

Major Discretely Presented Component Units:

Ohio Facilities Construction Commission	\$ 107	\$ 81	\$ 136
Ohio State University.....	23,400	17,016	27,816

Members of the defined contribution plan may access a Retiree Medical Account upon retirement. During fiscal year 2015, employers paid 4.5 percent of their share into members' accounts. Currently, an employee's interest in the medical account for qualifying healthcare expenses vests on the basis of length of service, with 100 percent vesting attained after five years of credited service for employees hired prior to July 1, 2015. Members who elect the member-directed plan after July 1, 2015, will vest at 15 years of service at a rate of 10 percent each year starting with the sixth year of participation. Employers make no further contributions to a member's medical

NOTE 9 PENSION AND OTHER POSTEMPLOYMENT BENEFITS (OPEB) PLANS
(Continued)

account after retirement, nor do employers have any further obligation to provide postemployment healthcare benefits.

Employer contributions required and made for the last three fiscal years for the defined contribution plan were as follows (dollars in thousands):

	2015	2014	2013
Primary Government.....	\$ 1,684	\$ 1,208	\$ 2,011

Major Discretely Presented Component Units:

Ohio State University.....	\$ 1,026	\$ 736	\$ 1,075
----------------------------	----------	--------	----------

The number of active contributing participants for the primary government was 65,398 as of June 30, 2015.

Early Retirement Incentives (ERI)

State agencies, or departments within agencies, may offer voluntary ERI under Section 145.297, Ohio Revised Code. Through the ERI Program, the State can offer to purchase up to a maximum of five years worth of service credit from OPERS on behalf of employees who would then meet the age and service requirements to qualify for retirement. The ERI plan must remain in effect for at least one year and the employees must be given at least thirty days' notice before terminating the plan.

State agencies are also required under Section 145.298, Ohio Revised Code, to offer a generally similar ERI when terminating a number of employees that equals or exceeds the lesser of 350 employees or 40 percent of the agency's workforce, as a result of a closure of the agency or a lay-off within a six-month period. Under these circumstances, qualifying employees must decide whether to accept the offer in the time between the announcement of the layoffs and the effective date. The amount of service credit offered cannot exceed five years.

The ERI agreements establish an obligation to pay specific amounts on fixed dates. State agencies that implement an ERI must pay their obligation to OPERS within a maximum of two years after the agreement is finalized, so the State does not discount the amount of the liability incurred under the agreement.

As of June 30, 2015, the State had no significant liability balances relative to existing ERI agreements with state employees covered by OPERS. During fiscal year 2015, the State did not incur any significant expenditures/expenses related to ERI agreements.

B. State Teachers Retirement System of Ohio (STRS)

Pension Benefits

STRS is a cost-sharing, multiple-employer public employee retirement system that administers three separate pension plans – a defined benefit plan, a defined contribution plan, and a combined plan with features of both the defined benefit plan and the defined contribution plan. STRS benefits are established under Chapter 3307, Ohio Revised Code.

STRS also provides death, survivors', disability, healthcare, and supplemental benefits to members in the defined benefit and combined plans.

STRS issues a stand-alone financial report, copies of which may be obtained by making a written request to State Teachers Retirement System of Ohio, Attention: Chief Financial Officer, 275 East Broad Street, Columbus, Ohio 43215-3771, by calling (888) 227-7877, or by visiting the STRS Web site at www.strsoh.org/publications/annualreports/cafrs.html.

The Ohio Legislature passed Substitute Senate Bill 342 in September 2012. The pension reform bill went into effect January 2013 with most plan changes starting July 1, 2013 or later. Changes to the pension plan include

NOTE 9 PENSION AND OTHER POSTEMPLOYMENT BENEFITS (OPEB) PLANS
(Continued)

increasing the age and service requirements for retirement, increasing the period for determining final average salary, changing to a lower fixed benefit formula, increasing the member contributions to the system, and reducing the cost-of-living adjustment.

Participants in the defined benefit plan may retire after 30 years of credited service regardless of age, or at or after age 55 with 25 years of credited service, or at or after age 60 with five years of credited service. Members retiring before age 65 with less than 30 years of service credit receive a percentage reduction in benefit amounts. Retirees are entitled to a maximum annual retirement benefit, payable in monthly installments for life, equal to the greater of the "formula benefit" calculation or the "money-purchase benefit" calculation. Beginning August 1, 2015, eligibility requirements for an unreduced benefit will change.

Under the "formula benefit" calculation, the retirement allowance is based on years of credited service and the final average salary, which is the average of the member's three highest salary years. The annual allowance is determined by multiplying the final average salary by 2.2 percent for the first 30 years of credited service. Each year over 30 years is incrementally increased by .1 percent, starting at 2.5 percent for the 31st year of contributing service up to a maximum allowance of 100 percent of final average salary. Upon reaching 35 years of Ohio service, the first 31 years of Ohio contributing service are multiplied by 2.5 percent, and each year over 31 years is incrementally increased by .1 percent starting at 2.6 percent for the 32nd year.

Under the "money-purchase benefit" calculation, a member's lifetime contributions, plus interest at specified rates, are matched by an equal amount from contributed employer funds. This total is then divided by an actuarially determined annuity factor to determine the maximum annual retirement allowance. Benefits are increased annually by three percent of the original base amount. Effective August 1, 2013, the money purchase benefit was eliminated.

Retirees can also choose a "partial lump-sum" option plan. Under this option, retirees may take a lump-sum payment that equals from six to 36 times their monthly service retirement benefit. Subsequent monthly benefits are reduced proportionally.

Employees hired after July 1, 2001, and those with less than five years of service credit at that date, may choose to participate in the combined plan or the defined contribution plan, in lieu of participation in the defined benefit plan.

Participants in the defined contribution plan are eligible to retire at age 50. Employee and employer contributions are placed into individual member accounts, and members direct the investment of their accounts by selecting from various professionally managed investment options. Retirees may choose to receive either a lump-sum distribution or a monthly annuity for life. Employer contributions become vested after one year of service, while employee contributions vest immediately.

Participants in the combined plan may start to collect the defined benefit portion of the plan at age 60 with five years of service. The annual allowance is determined by multiplying the final average salary by one percent for each year of Ohio contributing service credit. Participants in the combined plan may also participate in the partial lump-sum option plan, as described previously, for the portion of their retirement benefit that is provided through the defined benefit portion of the plan. The defined contribution portion of the plan may be taken as a lump sum or as a lifetime monthly annuity.

A retiree of STRS or any other Ohio public retirement system is eligible for re-employment as a teacher after two months from the date of retirement. Members and the employer make contributions during the period of re-employment. Upon termination or the retiree reaches the age of 65, whichever comes later, the retiree is eligible for an annuity benefit or a lump-sum payment in addition to the original retirement allowance. Alternatively, the retiree may receive a refund of member contributions with interest before age 65, once employment is terminated.

**NOTE 9 PENSION AND OTHER POSTEMPLOYMENT BENEFITS (OPEB) PLANS
(Continued)**

Employer and employee required contributions to STRS are established by the Board and limited under the Ohio Revised Code to employer and employee rates of 14 percent and are based on percentages of covered employees' gross salaries, which are calculated annually by the retirement system's actuary.

Contribution rates for fiscal year 2015 were 14 percent for employers and 12 percent for employees for the defined benefit, defined contribution, and combined plans. For the defined benefit and combined plans, all employer contributions are used to fund pension obligations. For the defined contribution plan, 9.5 percent of the employer's share is deposited into individual employee accounts, while 4.5 percent is paid to the defined benefit plan.

At June 30, 2015, the State reports a liability of \$99.4 million for its proportionate share of the net pension liability. Ohio State University Discretely Presented Component Unit reports a liability of \$1.1 billion for its proportionate share. The net pension liability was measured as of June 30, 2014. The total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of July 1, 2014. The State's proportion of the net pension liability is determined by a measure of the State's proportionate relationship of employer contributions made to STRS to the total contributions made to STRS by all employers and non-employer contributing entities to the plan. The State's proportion of the net liability is based on the State's long-term share of contributions to the plan as compared to the total projected long-term contributions of employers and all non-employer contributing entities. At June 30, 2014, the State's proportion was 0.409 percent and Ohio State University Discretely Presented Component Unit's proportion was 4.4 percent.

For the year ended June 30, 2015, the State recognized pension expense of \$4.6 million and Ohio State University Discretely Presented Component Unit recognized \$50.5 million. At June 30, 2015, the State and Ohio State University Discretely Presented Component Unit report deferred outflows of resources and deferred inflows of resources related to pensions from the following sources (dollars in thousands):

	Primary Government	Ohio State University
Deferred Outflows of Resources		
Differences Between Expected and Actual Experience.....	\$ 957	\$ 10,310
Contributions subsequent to measurement date.....	5,710	66,547
Total.....	<u>\$ 6,667</u>	<u>\$ 76,857</u>

Deferred Inflows of Resources

Net Difference between Projected and Actual Earnings		
on Pension Plan investments.....	\$ (18,395)	\$ (198,123)
Total.....	<u>\$ (18,395)</u>	<u>\$ (198,123)</u>

Deferred Outflows of Resources of \$5.7 million related to pensions resulting from State contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in the year ended June 30, 2016. Ohio State University Discretely Presented Component Unit will recognize \$66.6 million as reduction of its net pension liability. Other amounts reported as Deferred Outflows of Resources and Deferred Inflows of Resources related to pensions will be recognized in pension expense as follows:

	Primary Government	Ohio State University
YEAR ENDED JUNE 30:		
2016.....	\$ (4,359)	\$ (46,953)
2017.....	(4,359)	(46,953)
2018.....	(4,359)	(46,953)
2019.....	(4,359)	(46,953)

**NOTE 9 PENSION AND OTHER POSTEMPLOYMENT BENEFITS (OPEB) PLANS
(Continued)**

Actuarial Assumptions:

The Total Pension Liability in the July 1, 2014 actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement:

Inflation	2.75 percent
Salary Increases	12.25 percent at age 20 to 2.75 percent at age 70
Investment Rate of Return	7.75 percent, net of pension plan investment expense, including inflation
COLA or Ad Hoc COLA	N/A
Actuarial Cost Method	Entry Age

Mortality rates were based on the RP-2000 Combined Mortality Table for males or females, as appropriate, with adjustments for mortality improvements based on Projection 2022-Scale AA.

The actuarial assumptions used in the July 1, 2014 valuation were based on the results of an actuarial experience study dated July 1, 2012.

An estimate range for investment return assumption is developed and based on the target allocation adopted by the STRS Retirement Board. The target allocation and long-term expected rate of return for each major asset class are summarized as follows:

Asset Class	Target Allocation	Long-Term Expected Real Rate of Return*
Domestic Equity.....	31%	8.00%
International Equity.....	26%	7.85%
Alternatives.....	14%	8.00%
Fixed Income.....	18%	3.75%
Real Estate.....	10%	6.75%
Liquidity Reserves.....	1%	3.00%
Total Fund.....	100%	7.61%

*10-year annualized geometric nominal returns, which include the real rate of return and inflation and does not include investment expenses.

Discount Rate - The discount rate used to measure the total pension liability was 7.75%. The projection of cash flows used to determine the discount rate assumes that employer and employee contributions will be made at statutory contribution rates. In each period of the projection, employer contributions are assumed to be applied first to the service cost of all members, with any remaining amount included in projected employer contributions for current members. Therefore, the long-term expected rate of return of 7.75% was applied to all periods of projected benefit payments to determine the total pension liability as of June 30, 2014.

Sensitivity of the State's proportionate share of the Net Pension Liability to changes in the Discount Rate – The following table represents the net pension liability as of June 30, 2015, calculated using the current period discount rate assumption of 7.75%. Also shown is what the net pension liability would be if it were calculated using a discount rate that is one percentage point lower (6.75%) or one percentage point higher (8.75%) than the current assumption:

	1% Decrease (6.75%)	Current Discount Rate (7.75%)	1% Increase (8.75%)
Primary Government.....	\$ 142,346	\$ 99,431	\$ 63,139
Ohio State University Discretely Presented Component Unit.....	\$ 1,533,130	\$ 1,070,914	\$ 680,034

**NOTE 9 PENSION AND OTHER POSTEMPLOYMENT BENEFITS (OPEB) PLANS
(Continued)**

Additional information regarding the pension plan fiduciary net position is available in the separately issued STRS financial report by visiting the STRS Web site at www.strsoh.org/publications/annualreports/cafrs.html.

Other Postemployment Benefits (OPEB)

Ohio law authorizes STRS to offer a cost-sharing, multiple-employer healthcare plan. STRS provides access to healthcare to eligible retirees who participate in the defined benefit plan or combined plan. Benefits include hospitalization, physician’s fees, prescription drugs and reimbursement of monthly Medicare Part B premiums. Retirees enrolled in the defined contribution plan receive no post-employment healthcare benefits.

Chapter 3307, Ohio Revised Code, gives the STRS board discretionary authority over how much, if any, of associated healthcare costs are absorbed by the healthcare plan. All benefit recipients, for the most recent year, pay a portion of the healthcare costs in the form of a monthly premium.

Under Ohio law, funding for the post-employment healthcare may be deducted from employer contributions. Of the 14 percent employer contribution rate, one percent of the covered payroll was allocated to post-employment healthcare for the fiscal years ending June 30, 2013 and 2014. Effective July 1, 2014, zero percent of covered payroll is allocable to postemployment healthcare. The 14 percent employer contribution rate is the maximum rate established under Ohio law.

The employer contribution is financed on a pay-as-you-go basis. As of June 30, 2014 (the most recent information available), net position available for future healthcare benefits were \$3.58 billion. Employer contributions required and made for the last three fiscal years for the defined benefit and the defined benefit portion of the combined plans were as follows (dollars in thousands):

	2015	2014	2013
Primary Government.....	\$ -	\$ 414	\$ 432
<i>Major Discretely Presented Component Units:</i>			
Ohio State University.....	\$ -	\$ 3,387	\$ 3,446

The number of eligible benefit recipients for STRS as a whole was 169,244 as of June 30, 2014 (the most recent information available); a breakout of the number of eligible recipients for the primary government and its component units, as of June 30, 2015, is unavailable.

**C. State Highway Patrol Retirement System (SHPRS)
Pension Benefits**

SHPRS, a component unit of the State, was established in 1941 by the General Assembly as a single-employer, defined benefit pension plan and is administered by the State. The plan covers all employees of the State Highway Patrol.

The plan issues a stand-alone financial report that includes financial statements and required supplementary information, and the State reports the plan as a pension trust fund. Copies of the financial report may be obtained by writing to the Ohio State Highway Patrol Retirement System, 1900 Polaris Parkway, Suite 201, Columbus, Ohio 43240-4037, or by calling (614) 431-0781.

SHPRS is authorized under Chapter 5505, Ohio Revised Code, to provide retirement and disability benefits to retired members and survivor benefits to qualified dependents of deceased members of the Ohio State Highway Patrol. In addition to providing pension benefits, SHPRS is authorized by Chapter 5505, Ohio Revised Code, to provide a post-employment healthcare plan, which is considered to be an other post-employment benefit.

Chapter 5505, Ohio Revised Code, requires contributions by active members and the Ohio State Highway Patrol. The employer and employee contribution rates are established by the General Assembly, and any change in the rates requires legislative action. By law, the employer rate may not exceed three times the employee contribution rate, nor be less than nine percent of the total salaries of contributing members.

**NOTE 9 PENSION AND OTHER POSTEMPLOYMENT BENEFITS (OPEB) PLANS
(Continued)**

Substitute Senate Bill 345 was signed into law in September 2012. The main components of the bill grant the SHPRS Board authority to set employee contribution rates and cost-of-living adjustment rates. Employee contribution rates will range between ten and 14 percent and cost-of-living adjustments will range between zero and three percent. The bill also increases the final average salary period from three years to five years for members retiring after 2014. The cost-of-living adjustment eligibility age increases from 53 years to 60 years of age. The cost-of-living adjustment for 2014 was set at one and one-half percent, while the cost-of-living adjustment for 2015 is set at one and one-quarter percent.

SHPRS' financial statements are prepared using the accrual basis of accounting, under which expenses are recorded when the liability is incurred and revenues are recorded when they are earned and become measureable.

All investments are reported at fair value. Fair value is "the amount that the plan can reasonably expect to receive for an investment in a current sale, between a willing buyer and a willing seller – that is, other than in a forced or liquidation sale."

Securities traded on a national exchange are valued at the last reported sales price at the current exchange rate. The fair value of real estate and private equity investments are based on information provided by the Fund's managers or by independent appraisals. For actuarial purposes, assets are valued with a method that amortizes the difference between actual and assumed return over a closed, four-year period.

Employees are eligible for pension and healthcare benefits upon reaching both an age and service requirement. Employees with at least 15 years of service credit, but less than 20 years of service credit, may retire at age 55. Employees with at least 20 years of service credit, but less than 25 years of service credit may retire at age 52 or age 48 with reduced benefits. Employees with more than 25 years of service may retire at age 48. Membership data for SHPRS is presented in the table below:

Membership Data as of December 31, 2014

Active Members.....	1,622
Retirees receiving benefits.....	1,557
Retirees not receiving benefits.....	<u>10</u>
	<u>3,189</u>

The pension benefit is a percentage of the member's final average salary, which is the average of the member's three highest salary years. For members with at least 15 years of service credit, but less than 20 years of service credit, the percentage is determined by multiplying 1.5 percent times the number of years of service credit. For members with 20 or more years of service credit, the percentage is determined by multiplying 2.5 percent for the first 20 years of service, plus 2.25 percent for the next five years of service, plus two percent for each year in excess of 25 years of service. A member's pension may not exceed 79.25 percent of the final average salary.

The employer and employee contribution rates, as of December 31, 2014, were 26.5 percent and 11.5 percent, respectively.

During calendar year 2014, all of the employees' contributions funded pension benefits while 22.2 percent of the employer's contributions funded pension benefits. The difference in the total employer rates charged and the employer rates applicable to the funding of pension benefits is applied to the funding of postemployment healthcare benefits.

**NOTE 9 PENSION AND OTHER POSTEMPLOYMENT BENEFITS (OPEB) PLANS
(Continued)**

The State's net pension liability was measured as of December 31, 2014, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of December 31, 2013. The total pension liability at December 31, 2014 determined using the following actuarial assumptions, applied to all periods included in the measurement: an investment rate of return of eight percent compounded annually, projected salary increase of four percent attributable to inflation and additional projected salary increases ranging from 0.3 percent to ten percent attributable to seniority and merit, and price inflation of three percent annually. Mortality rates were based on the RP-2000 Combined Healthy Male and Female Tables, projected to 2020 using Projection Scale AA.

The discount rate used to measure the total pension liability was eight percent. The projection of cash flows used to determine the discount rate assumes that employer and employee contributions will be made at statutory contribution rates. In each period of the projection, employer contributions were assumed to be applied first to the service cost of all members, with any remaining amount included in projected employer contributions for current members. Therefore, the long-term expected rate of return of eight percent was applied to all periods of projected benefit payments to determine the total pension liability as of December 31, 2014.

An estimate range for investment return assumptions is developed and based on the target allocation adopted by the SHPRS' Retirement Board. The target allocation and long-term expected rate of return for each major asset class are summarized as follows:

Asset Class	Target Allocation	Long-Term Expected Real Rate of Return*
Cash.....	0.0%	-0.1%
Domestic Equity - Large Cap.....	25.0%	5.7%
Domestic Equity - Small Cap.....	10.0%	6.5%
International Equity.....	15.0%	6.5%
Emerging Markets.....	5.0%	8.7%
Domestic Corporate Fixed Income.....	7.8%	1.5%
Domestic Government Fixed Income.....	7.8%	0.9%
Treasury Inflation Protected Securities.....	0.0%	1.0%
High Yield Bonds.....	3.5%	2.8%
Real Estate.....	5.0%	4.5%
Private Equity.....	10.0%	8.8%
Hedge Funds.....	8.0%	3.8%
Other Alternatives.....	3.0%	4.1%
Total Fund.....	100.0%	

*10-year annualized geometric nominal returns, which include the real rate of return and inflation and does not include investment

Regarding sensitivity of the State's proportionate share of the Net Pension Liability to changes in the Discount Rate, the following table (dollars in thousands) represents the net pension liability as of December 31, 2014, calculated using the current period discount rate assumption of eight percent. Also shown is what the net pension liability would be if it were calculated using a discount rate that is one percentage point lower or one percentage point higher than the current assumption.

State's Proportionate Share of the Net Pension Liability

1% Decrease (7.00%)	Current Discount Rate (8.00%)	1% Increase (9.00%)
\$ 414,090	\$ 303,684	\$ 211,233

**NOTE 9 PENSION AND OTHER POSTEMPLOYMENT BENEFITS (OPEB) PLANS
(Continued)**

Detailed information about SHPRS' pension plan fiduciary net position is available in the separately issued SHPRS financial report. The pension plan's fiduciary net position has been determined on the same basis used by the pension plan. SHPRS uses the accrual basis of accounting, under which expenses are recorded when incurred and revenues are recorded when earned and measurable. Member and employer contributions are recognized in the period in which the contributions are due. Benefits and refunds are recognized when due and payable in accordance with the terms of the plan. Investment purchases and sales are recorded at the trade date.

The Schedule of Changes in Net Pension Liability is presented below (dollars in thousands).

<u>Fiscal year ending December 31, 2014</u>	
Total Pension Liability	
Service Cost.....	\$ 17,657
Interest on the Total Pension Liability.....	79,175
Benefit Payments.....	(64,526)
Refunds.....	(2,177)
Net Change in Total Pension Liability.....	30,129
Total Pension Liability - Beginning.....	1,014,217
Total Pension Liability - Ending (a).....	<u>\$ 1,044,346</u>

of Total Pension Liability.....	70.9%
Covered Employee Payroll*.....	89,878
Net Pension Liability as a Percentage	
of Covered Employee Payroll.....	337.9%
Notes to Schedule:.....	N/A

*Reported 2014 payroll. Does not include members of the DROP.

For the year ended June 30, 2015, the State recognized pension expense of \$31.7 million. At June 30, 2015, the State reports deferred outflows of resources related to pensions from the following sources:

Deferred Outflows of Resources

Net Difference between Projected and Actual Earnings	
on Pension Plan investments.....	\$ 9,501
Contributions subsequent to the measurement date.....	13,360
Total.....	<u>\$ 22,861</u>

**NOTE 9 PENSION AND OTHER POSTEMPLOYMENT BENEFITS (OPEB) PLANS
(Continued)**

Deferred Outflows of Resources of \$13.4 million related to pensions resulting from State contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in the year ended June 30, 2016. Other amounts reported as Deferred Outflows of Resources and Deferred Inflows of Resources related to pensions will be recognized in pension expense as follows:

YEAR ENDED JUNE 30:

2016.....	\$	2,375
2017.....		2,375
2018.....		2,375
2019.....		2,376

Other Postemployment Benefits (OPEB)

The healthcare coverage provided by SHPRS is considered to be an OPEB as described in GASB Statement 45. Healthcare benefits are not guaranteed and are subject to change at any time. The OPEB valuation is based on the substantive plan as it is currently presented to plan members, including a historical pattern of cost-sharing between the plan and benefit recipients.

During calendar year 2014, 4.3 percent of the employer’s contributions funded healthcare benefits. Active members do not make contributions to the OPEB plan. The cost of retiree healthcare benefits is recognized as claims are incurred and premiums are paid. The number of active contributing plan participants, as of December 31, 2014, was 1,622.

The State’s annual OPEB cost is calculated based on the annual required contribution (ARC), an amount actuarially determined in accordance with the parameters of GASB Statement 45. The ARC represents a level of funding that, if paid on an ongoing basis, is projected to cover the normal cost each year and amortize any unfunded actuarial liabilities or funding excess over a period not to exceed thirty years. The components of the State’s annual OPEB cost for the year, the amount actually contributed to the plan, and changes in the State’s net OPEB obligation to SHPRS were as follows (dollars in thousands):

Annual Required Contribution (ARC).....	\$	24,533
Interest on Net OPEB Obligation.....		6,405
Adjustment to ARC.....		(4,936)
Annual OPEB Cost.....		26,002
Contributions Made.....		(4,973)
Increase (Decrease) in Net OPEB Obligation.....		21,029
Net OPEB Obligation, Beginning of Year.....		128,101
Net OPEB Obligation, End of Year.....	\$	149,130

The State’s annual OPEB cost, percentage of annual OPEB cost contributed, and net OPEB obligation for the last three calendar years, were as follows (dollars in thousands):

For the Year Ended December 31,	Annual OPEB Cost	Percentage of Annual OPEB Cost Contributed	Net OPEB Obligation
2014.....	\$ 26,002	19.1%	\$ 149,131
2013.....	25,520	16.1%	128,101
2012.....	24,955	8.7%	106,686

As of December 31, 2014, the most recent actuarial valuation, the plan was 27.6 percent funded. The actuarial accrued liability was \$376.7 million, and the actuarial value of assets was \$103.8 million, resulting in an unfunded actuarial liability (UAAL) of \$272.9 million. The covered payroll (annual payroll of active employees covered by the plan) was \$99.2 million, and the ratio of the UAAL to the covered payroll was 275 percent.

**NOTE 9 PENSION AND OTHER POSTEMPLOYMENT BENEFITS (OPEB) PLANS
(Continued)**

The Schedule of Funding Progress for OPEB, displayed in the following table, presents multi-year trend information about whether the actuarial value of the plan assets is increasing or decreasing over time, relative to the actuarial accrued liabilities for benefits.

SHPRS Schedule of Funding Progress Last Three Calendar Years – OPEB (dollars in thousands)						
(A)	(B)	(C)	(D)	(E)	(F)	(G)
Valuation Year	Actuarial Accrued Liability (AAL)	Valuation Assets	Unfunded Actuarial Accrued Liability (UAAL) (B)-(C)	Ratio of Assets to AAL (C)/(B)	Active Member Payroll	UAAL as Percentage of Active Member Payroll (D)/(F)
2014	\$ 376,683	\$ 103,813	\$ 272,870	27.6%	\$ 99,212	275.0%
2013	438,562	102,084	336,478	23.3%	98,520	341.5%
2012	411,468	99,818	311,650	24.3%	98,117	317.6%

Actuarial valuations involve estimates of the value of reported amounts and assumptions about the probability of events far into the future. Actuarially determined amounts are subject to continual revision as actual results are compared to past expectations and new estimates are made about the future. Projections of benefits for financial reporting purposes are based on the substantive plan (the plan as understood by the employer and the plan members) and include the types of benefits provided at the time of each valuation and the historical pattern of sharing of benefit costs between the employer and plan members to that point. The actuarial methods and assumptions do not explicitly incorporate the potential effects of legal or contractual funding limitations on the pattern of cost sharing in the future. Actuarial calculations reflect a long-term perspective. The actuarial methods and assumptions used include techniques that are designed to reduce short-term volatility in actuarial accrued liabilities and the actuarial value of assets.

Healthcare benefits are advance funded by the employer using the entry-age, normal actuarial cost method for the Schedule of Funding Progress for the actuarial valuation, dated December 31, 2014, for OPEB. Assumptions used in preparing the Schedule of Funding Progress and in determining the annual required contribution include: a five percent rate of return on investments; projected salary increase of four percent attributable to inflation and additional projected salary increases ranging from .3 percent to ten percent a year attributable to seniority and merit; and an annual healthcare cost increase of nine percent annually, reduced by declining percentages ranging from 8.25 percent to four percent through 2029. There are no cost-of-living adjustments for OPEB benefits. Maximum contribution rates were not considered in the projection of actuarially accrued liabilities for OPEB benefits.

The unfunded actuarial accrued liability is being amortized using the level-percentage of projected payroll method over an open period of 30 years.

**D. Alternative Retirement Plan (ARP)
Pension Benefits**

The ARP is a defined contribution retirement plan that is authorized under Section 3305.02, Ohio Revised Code. The ARP provides at least three or more alternative retirement plans for academic and administrative employees of Ohio’s institutions of higher education, who otherwise would be covered by OPERS or STRS. Unclassified civil service employees hired on or after August 1, 2005, are also eligible to participate in the ARP.

The Board of Trustees of each public institution of higher education enters into contracts with each approved retirement plan provider. Once established, full-time faculty and unclassified employees who are hired subsequent to the establishment of the ARP, or who had less than five years of service credit under the existing retirement plans, may choose to enroll in the ARP. The choice is irrevocable for as long as the employee remains continuously employed in a position for which the ARP is available. For those employees that choose to join the ARP, any prior employee contributions that had been made to OPERS or STRS would be transferred to the ARP.

**NOTE 9 PENSION AND OTHER POSTEMPLOYMENT BENEFITS (OPEB) PLANS
(Continued)**

The Ohio Board of Regents has designated the companies that are eligible to serve as plan providers for the ARP.

Ohio law requires that employee contributions be made to the ARP in an amount equal to those that would otherwise have been required by the retirement system that applies to the employee’s position. For the fiscal year ended June 30, 2015, these contribution rates are ten percent for OPERS and 12 percent for STRS. Employees may also voluntarily make additional contributions to the ARP.

For the year ended June 30, 2015, each public institution of higher education was required to contribute .77 percent of a participating employee’s salary to OPERS in cases when the employee would have otherwise been enrolled in OPERS.

Ohio law also requires each public institution of higher education to contribute 4.5 percent of a participating employee’s gross salary, for the year ended June 30, 2015, to STRS in cases when the employee would have otherwise been enrolled in STRS.

The employer contribution amount is subject to actuarial review every third year to determine if the rate needs to be adjusted to mitigate any negative financial impact that the loss of contributions may have on OPERS and STRS. The Board of Trustees of each public institution of higher education may also make additional payments to the ARP based on the gross salaries of employees multiplied by a percentage the respective Board of Trustees approves.

The ARP vesting of all contributions made on behalf of participants is based on the employer’s vesting requirements. The contributions are directed to one of the investment management companies as chosen by the participants. The ARP does not provide disability benefits, annual cost-of-living adjustments, postretirement healthcare benefits, or death benefits. Benefits are entirely dependent on the sum of the contributions and related investment income generated by each participant’s choice of investment options.

For the State’s major discretely presented component units, employer and employee contributions required and made for the year ended June 30, 2015, for the ARP follow (dollars in thousands):

<u>Major Component Units:</u>	<u>OPERS</u>	<u>STRS</u>
Ohio State University:		
Employer Contributions	\$ 26,586	\$ 30,331
Employee Contributions	20,095	24,012

NOTE 10 GENERAL OBLIGATION BONDS

At various times since 1921, Ohio voters, by 20 constitutional amendments (the last adopted May 2014 for a ten-year extension of the local government infrastructure program adopted in 2005), have authorized the incurrence of general obligation debt for the construction and improvement of common school and higher education facilities, highways, local infrastructure improvements, research and development of coal technology, natural resources, research and development support for high-tech business, business site development, and veterans compensation. Issuances for highway capital improvements, natural resources, and conservation are, in part, used for acquisition, construction or improvement of capital assets. In practice, general obligation bonds are retired over periods of 10 to 25 years.

A 1999 constitutional amendment provided for the issuance of Common School Capital Facilities Bonds and Higher Education Capital Facilities Bonds. As of June 30, 2015, the General Assembly had authorized the issuance of \$4.77 billion in Common Schools Capital Facilities Bonds, of which \$4.47 billion has been issued. As of June 30, 2015, the General Assembly had also authorized the issuance of \$3.54 billion in Higher Education Capital Facilities Bonds, of which \$2.92 billion has been issued.

NOTE 10 GENERAL OBLIGATION BONDS (Continued)

Through the approval of the November 1995 amendment, voters authorized the issuance of Highway Capital Improvements Bonds in amounts up to \$220 million in any fiscal year (plus any prior fiscal years' principal amounts not issued under the new authorization), with no more than \$1.2 billion outstanding at any time. As of June 30, 2015, the General Assembly has authorized the issuance of approximately \$3.43 billion in Highway Capital Improvements Bonds, of which \$2.69 billion has been issued.

Constitutional amendments in 1995 and 2005 allowed for the issuance of \$3.75 billion of general obligation bonds for infrastructure improvements (Infrastructure Bonds). Issuances are limited to \$150 million in any fiscal year (plus any obligations unissued from previous fiscal years). As of June 30, 2015, the General Assembly had authorized \$3.75 billion of these bonds to be sold (excluding any amounts for unaccreted discount on capital appreciation bonds at issuance), of which \$3.45 billion had been issued (net of \$214 million in unaccreted discounts at issuance). Voters in May 2014 approved a constitutional amendment for an additional \$1.88 billion of debt as a ten-year extension of the program authorized in 2005. The annual issuance amount increased to \$175 million in the first five fiscal years and \$200 million in each following year.

Coal Research and Development Bonds and Parks, Recreation, and Natural Resources Bonds may be issued as long as the outstanding principal amounts do not exceed \$100 and \$200 million, respectively. As of June 30, 2015, the General Assembly had authorized the issuance of \$251 million in Coal Research and Development Bonds, of which \$222 million had been issued. Legislative authorizations for the issuance of Natural Resources Capital Facilities Bonds totaled \$443 million, as of June 30, 2015, of which \$418 million had been issued.

Constitutional amendments in 2000 and 2008 allowed for outstanding Conservation Projects Bonds of up to \$400 million. No more than \$50 million may be issued during a fiscal year. As of June 30, 2015, the General Assembly had authorized the issuance of approximately \$500 million in Conservation Projects Bonds of which \$350 million had been issued.

Through approval of the May 2010 and November 2005 amendments, voters authorized the issuance of \$1.2 billion of Third Frontier Research and Development Bonds. Obligations that may be issued are limited to \$175 million in any fiscal year (plus any obligations unissued from previous fiscal years). As of June 30, 2015, the General Assembly had authorized the issuance of \$1.2 billion in Third Frontier Research and Development Bonds, of which \$661 million had been issued.

The issuance of \$150 million of Site Development Bonds was also authorized through the approval of the November 2005 amendment. Not more than \$30 million may be issued in each of the first three years, beginning with fiscal year 2006, and not more than \$15 million may be issued in any of the subsequent fiscal years. The General Assembly had authorized the issuance of \$150 million in Site Development Bonds as of June 30, 2015, of which all \$150 million had been issued.

A 2009 constitutional amendment provides for the issuance of up to \$200 million in Veterans Compensation Bonds. No obligations may be issued after December 31, 2013. As of June 30, 2015, the General Assembly had authorized all \$200 million in Veterans' Compensation Bonds, of which \$83.9 million had been issued.

General obligation bonds outstanding and future general obligation debt service requirements, as of June 30, 2015, are presented in the table on the following page. For the variable-rate bonds, using the assumption that current interest rates remain the same over their term, the interest and net swap payment amounts are based on rates as of June 30, 2015. As rates vary, variable-rate bond interest payments and net swap payments vary.

NOTE 10 GENERAL OBLIGATION BONDS (Continued)

Hedging Derivatives

As of June 30, 2015, approximately \$302.3 million of Infrastructure Improvement Bonds and Common Schools Bonds have associated cash flow hedges with a fair value of (\$34.7) million. The value of these bonds is reported as part of the Bonds and Notes Payable section and the negative fair value of the cash flow hedges is reported in the Other Noncurrent Liabilities section on the Statement of Net Position. The fair value increased \$3.4 million during fiscal year 2015. This increase is reported on the Statement of Net Position as part of Deferred Outflows of Resources. Fair value of the cash flow hedges is determined using the zero-coupon method. For information on the State's deferred outflows of resources and deferred inflows of resources, see NOTE 18.

Terms and objectives of the State's hedging derivatives are provided in the following table.

Hedging Derivatives							
As of June 30, 2015							
<i>(dollars in thousands)</i>							
Issue	Type of Cash Flow Hedge	Notional Amount	Underlying Index	Counterparty's Swap Rate at 06/30/2015	State's Swap Rate at 06/30/2015	Effective Date	Termination (Maturity) Date
Infrastructure Improvements, Series 2001B	Pay-fixed interest rate swap	\$57,100	SIFMA Index	0.07%	4.63%	11/29/2001	8/1/2021
Objective: Convert Series 2001B variable-rate bonds into a synthetic fixed rate to minimize exposure to changing interest rates							
Embedded Option: JPMorgan Chase may elect to terminate its portion of the swap if the SIFMA index averages 7 percent or higher over a 180-day period.							
Credit Quality Ratings of Counterparty:		50% Aa3/A+/AA- JPMorgan Chase; 50% Aa2/AA-/AA Wells Fargo					
Infrastructure Improvements, Refunding Series 2004A	Pay-fixed interest rate swap	\$53,760	LIBOR (See terms below)	0.37%	3.51%	3/3/2004	2/1/2023
Objective: Convert Series 2004A variable-rate bonds into a synthetic fixed rate to minimize exposure to changing interest rates							
Credit Quality Ratings of Counterparty:		Aa2/AA-/AA Wells Fargo					
Terms: 63% of 1-month LIBOR + 25 basis points							
Common Schools, Series 2003D	Pay-fixed interest rate swap	\$67,000	LIBOR (see terms below)	0.37%	3.41%	9/14/2007	3/15/2024
Objective: Convert Series 2003D variable-rate bonds into a synthetic fixed rate to minimize exposure to changing interest rates							
Credit Quality Ratings of Counterparty:		50% Aa3/A+/AA- JPMorgan Chase; 50% Aa2/AA-/AA Wells Fargo					
Terms: 65% of 1-month LIBOR + 25 basis points							
Common Schools, Series 2006B	Pay-fixed interest rate swap	\$62,205	LIBOR (see terms below)	0.37%	3.20%	11/21/2014	6/15/2026
Objective: Convert Series 2006B variable-rate bonds into a synthetic fixed rate to minimize exposure to changing interest rates							
Credit Quality Ratings of Counterparty:		A1/AA-/AA- US Bank National Association					
Terms: 65% of 1-month LIBOR + 25 basis points							
Common Schools, Series 2006C	Pay-fixed interest rate swap	\$62,205	LIBOR (see terms below)	0.37%	3.20%	6/15/2006	6/15/2026
Objective: Convert Series 2006C variable-rate bonds into a synthetic fixed rate to minimize exposure to changing interest rates							
Credit Quality Ratings of Counterparty:		Aa3/AA-/AA Royal Bank of Canada					
Terms: 65% of 1-month LIBOR + 25 basis points							

The State was not exposed to credit risk because these swaps had negative fair values at June 30, 2015. However, should interest rates change and the fair values of the swaps become positive, the State would be exposed to credit risk in the amount of the derivative's positive fair value.

NOTE 10 GENERAL OBLIGATION BONDS (Continued)

Each swap counterparty is required to post collateral to a third party when their respective credit rating, as determined by specified nationally recognized credit rating agencies, falls below the trigger level defined in the swap agreement. This arrangement protects the State by mitigating credit risk, and therefore termination risk, inherent in the swap. Collateral on all swaps must be in the form of cash or U.S. government securities and held by a third-party custodian. Net payments are made on the same date, as specified in the agreements.

The combination of the variable-rate bonds and a floating-to-fixed swap creates a low-cost, long-term synthetic fixed-rate debt that protects the State from rising interest rates.

These swaps expose the State to basis risk or a mismatch between the floating rate received on the swap and the variable rate paid on the underlying variable-rate bonds. A mismatch would increase or decrease the interest cost paid by the State.

For Infrastructure Improvements, Series 2001B, the SIFMA municipal swap index has proven to be an effective proxy for the State's variable-rate debt and substantially mitigates basis risk.

For Infrastructure Improvements, Series 2004A and for Common Schools, Series 2003D, 2006B, and 2006C, the State assumes the risk of reductions in marginal federal tax rates or elimination of the tax preference for municipal securities, given that the variable swap receipt is based on a taxable index (LIBOR). Those changes would increase the interest rates on the underlying variable-rate debt but would not impact the variable-rate swap receipt based on the LIBOR index.

The State retains the right to terminate any swap agreement at the market value prior to maturity. The State has termination risk under the contracts, particularly upon the occurrence of an additional termination event (ATE), as defined in the swap agreements. An ATE occurs if either the credit rating of the bonds associated with a specific swap or the credit rating of the swap counterparty falls below a threshold defined in each swap agreement. If the swap was terminated, the variable-rate bonds would no longer carry a synthetic interest rate. Also, if at the time of the termination the swap has a negative fair value, the State may be liable to the counterparty for a payment. Other termination events include failure to pay, bankruptcy, merger without assumption, and illegality. No termination events have occurred.

Advance Refundings

During fiscal year 2015, there were four advance refundings of general obligations bonds. Details on the advanced refundings are presented in the table on the following page.

Proceeds of the refunding (new) bonds are placed in irrevocable trusts to provide for all future debt service payments of the refunded (old) bonds. These refunded amounts are considered defeased and no longer outstanding. The various trust accounts' assets and liabilities for the defeased bonds are not included in the State's financial statements.

In prior years, the State defeased certain bond issues by placing the proceeds of new bonds in irrevocable trusts to provide for all future debt service payments on the old bonds. Accordingly, the various trust accounts' assets and liabilities for the defeased bonds are not included in the State's financial statements. For these prior year defeasances, Common School Bonds of \$215.4 million, Higher Education Bonds of \$300.3 million, and Infrastructure Improvement Bonds of \$149.4 million are considered defeased and no longer outstanding as of June 30, 2015.

NOTE 11 REVENUE BONDS AND NOTES

The State Constitution permits state agencies and authorities to issue bonds and notes that are not supported by the full faith and credit of the State. These bonds and notes pledge income derived from user fees and rentals on the acquired or constructed assets to pay the debt service.

The Treasurer of State and the Buckeye Tobacco Settlement Financing Authority (BTSFA) issue revenue bonds and notes for the primary government. The Treasurer of State issues bonds and notes on behalf of the Ohio Department of Transportation. The Ohio State University issues revenue bonds and notes as a major discretely presented component unit.

A. Primary Government

The Treasurer of State, since fiscal year 1998, has issued a total of \$2.15 billion in State Infrastructure Bank Bonds for various transportation construction projects financed by the Department of Transportation. The State has pledged federal highway receipts and loan repayments received under the State Infrastructure Bank Loan Program as the primary source of moneys for meeting the principal and interest requirements on the bonds.

Issuances for the State Infrastructure Bank are, in part, used for the acquisition, construction, or improvement of capital assets. Total pledged federal highway receipts and loan repayments through the maturity of the bonds in 2025 are estimated at approximately \$933.1 million. For fiscal year 2015, principal and interest payments on the revenue bonds was \$239.5 million and pledged receipts was \$170.4 million.

BTSFA is authorized by the Ohio General Assembly to issue and to sell obligations, the aggregate principle amount of which shall not exceed \$6 billion, exclusive of obligations issued to refund, renew, or advance refund other obligations issued or incurred. On October 29, 2007, BTSFA successfully securitized 100 percent of the projected tobacco settlement receipts for the next 45 years through the issuance of five series of asset-backed revenue bonds, aggregating in the amount of \$5.53 billion. The future tobacco settlement receipts, including related investment earnings and net of specified operating and enforcement expenses, have been pledged to repay the bonds, which are payable through 2052. Annual principal and interest payments on the bonds will require 100 percent of the net tobacco settlement receipts. As of June 30, 2015, the total principal and interest payments remaining to be paid on the bonds were \$17.55 billion. Principal and interest paid and total net tobacco settlement receipts for fiscal year 2015 were \$322.3 million and \$286.7 million, respectively. In the event that the assets of BTSFA have been exhausted, no amounts will thereafter be paid on the bonds. After the bonds and any related operating expenses have been fully paid, any remaining tobacco settlement receipts will become payable to the State. The bonds include fixed rate serial bonds, fixed rate current interest turbo term bonds, and capital appreciation turbo term bonds which will convert to fixed rate current interest turbo term bonds. They were

NOTE 11 REVENUE BONDS AND NOTES (Continued)

issued to fund long-lived capital projects at state-supported institutions of higher education and to pay the State's share of the cost of rebuilding elementary and secondary school facilities across the State. Additional information on these bonds can be found in BTSFA's stand-alone financial report.

Revenue bonds and notes outstanding and future bond service requirements for the primary government, as of June 30, 2015, are presented in the following tables.

**Primary Government-Governmental Activities

For the year ended June 30, 2015, NOTE 15 summarizes changes in revenue bonds and notes.

In prior years, the Treasurer of State defeased certain bond issues by placing the proceeds of new bonds in irrevocable trusts to provide for all future debt service payments on the old bonds. Accordingly, the various trust accounts' assets and liabilities for the defeased bonds are not included in the State's financial statements. For these prior year defeasances, Economic Development Bonds of \$165.8 million and Revitalization Bonds of \$64.9 million are considered defeased and no longer outstanding as of June 30, 2015.

NOTE 11 REVENUE BONDS AND NOTES (Continued)

B. Major Discretely Presented Component Units

Future bond service requirements for revenue bonds and notes reported for the major discretely presented component units, as of June 30, 2015, are shown in the following table.

Total	<u>\$ 2,851,984</u>	<u>\$ 3,668,619</u>	<u>\$ 6,520,603</u>

The bonds and notes of the state universities and state community colleges are payable from the institutions' available receipts, including student fees, rental income, and gifts and donations, as may be provided for in the respective bond and note agreements. The proceeds of the bonds and notes are used for the construction of educational and student resident facilities and auxiliary facilities such as dining halls, hospitals, parking facilities, bookstores and athletic facilities. The State is not obligated for the debt of its discretely presented component units.

NOTE 12 SPECIAL OBLIGATION BONDS

Under the authority of Chapter 154, Ohio Revised Code, the Treasurer of State is the issuer of special obligation bonds that finance the cost of capital facilities for state-supported institutions of higher education, mental health and developmental disabilities institutions, parks and recreation, cultural and sports facilities, correctional facilities, office buildings for state departments and agencies, and, in some cases, related facilities for local governments. These issuances are, in part, used for acquisition, construction, or improvement of capital assets.

NOTE 12 SPECIAL OBLIGATION BONDS (Continued)

Pledges of lease rental payments from appropriations made to the General Fund and the Highway Safety and Highway Operating special revenue funds, moneys held by trustees pursuant to related trust agreements, and other receipts, as required by the respective bond documents, secure the special obligation bonds. The lease rental payments are reported in the fund financial statements as interfund transfers.

Special obligation bonds outstanding, bonds authorized but unissued, and future debt service requirements, as of June 30, 2015, are presented in the following tables.

**Primary Government-Governmental Activities
Summary of Special Obligation Bonds
As of June 30, 2015
(dollars in thousands)**

	Fiscal Years		Maturing Through Fiscal Year	Outstanding Balance	Authorized but Unissued

Total	\$ 1,906,844	\$ 472,741	\$ 2,379,585

For the year ended June 30, 2015, NOTE 15 summarizes changes in special obligation bonds.

During fiscal year 2015, Treasurer of State Lease Rental had four current/advance refunding issues. Details on advanced refunding for fiscal year 2015 are presented in the following table.

**Primary Government — Governmental Activities
Special Obligation Bonds
Details of Advance Refundings
For the Year Ended June 30, 2015
(dollars in thousands)**

Refunding Bond Issue	Date of Refunding	Amount of Refunding Bonds Issued	True Interest Cost Rates of Refunding Bonds	Carrying Amount of Bonds Refunded (in substance)	Refunding Bond Proceeds Placed in Escrow	Reduction (Increase) in Debt Service Payments	Gain / (Loss) Resulting from Refunding
Treasurer of State Lease Rental Bonds:							
Cultural Facilities Bonds 2015 Series A.....	2/26/2015	\$ 9,920	1.57%	\$ 9,110	\$ 9,768	\$615/4 yrs	\$ 538
Adult Correctional Facilities Bonds 2015 Series A....	2/26/2015	10,030	1.54%	10,255	11,812	923/5 yrs	806
Administrative Facilities Bonds 2015 Series C.....	2/26/2015	11,185	1.52%	10,270	11,918	1,006/5 yrs	890
Juvenile Correctional Bonds 2015 Series A.....	2/26/2015	11,180	1.37%	10,540	11,023	474/3 yrs	468
Total		\$ 42,315		\$ 40,175	\$ 44,521		\$ 2,702

These refunded amounts are considered defeased and no longer outstanding. The various trust accounts' assets and liabilities for the defeased bonds are not included in the State's financial statements.

NOTE 12 SPECIAL OBLIGATION BONDS (Continued)

In prior years, the Treasurer of State defeased certain bond issues by placing the proceeds of new bonds in irrevocable trusts to provide for all future debt service payments on the old bonds. Accordingly, the various trust accounts' assets and liabilities for the defeased bonds are not included in the State's financial statements. For these prior year defeasances, \$40.2 million of lease rental special obligations bonds are considered defeased and no longer outstanding as of June 30, 2015.

NOTE 13 CERTIFICATES OF PARTICIPATION

As of June 30, 2015, approximately \$231.8 million in certificate of participation (COP) obligations were reported in governmental activities.

In fiscal year 2015, the Ohio department of Administrative Services participated in the issuance of \$33.6 million of COP obligations to finance the cost of acquisition of the Enterprise Data Center Solutions (EDCS).

Beginning in fiscal year 2013, the Ohio Department of Administrative Services participated in the issuance of \$72 million of COP obligations to finance the upgrade of the Ohio Multi-Agency Radio Communications System (MARCS).

Beginning in fiscal year 2005, the Ohio Department of Administrative Services participated in the issuance of \$185.2 million of COP obligations to finance the acquisition of the Ohio Administrative Knowledge System (OAKS), a statewide Enterprise Resource Planning (ERP) system. These issuances are, in part, used for the acquisition, construction, or improvement of capital assets.

Beginning in fiscal year 2008, the Ohio Department of Administrative Services participated in the issuance of \$58.1 million of COP obligations to finance the cost of acquisition of the State Taxation Accounting and Revenue System (STARS).

In fiscal year 2015, the Ohio Treasurer of State's Office participated in the issuance of \$8.8 million of COP obligations to finance the cost of acquisition of the Treasury Management System (TMS).

Under the COP financing arrangements, the State is required to make rental payments from the General Fund (subject to biennial appropriations) that approximate the interest and principal payments made by trustees to certificate holders.

Obligations outstanding and future commitments for the primary government under COP financing arrangements, as of June 30, 2015, are presented in the following tables.

Primary Government — Governmental Activities
Summary of Certificate of Participation Obligations
As of June 30, 2015
(dollars in thousands)

	Fiscal Years Issued	Interest Rates	Maturing Through Fiscal Year	Outstanding Balance

For the year ended June 30, 2015, NOTE 15 summarizes changes in COP obligations.

NOTE 14 OTHER NONCURRENT LIABILITIES

As of June 30, 2015, in addition to bonds, notes, and certificates of participation obligations discussed in NOTES 10 through 13, the State reports the following noncurrent liabilities in its financial statements (dollars in thousands):

Non-Current Liabilities	
Governmental Activities:	
Compensated Absences	\$ 421,817
Net Pension Liability.....	2,703,806
Net OPEB Obligation.....	149,131
Capital Leases Payable	2,072
Derivatives.....	45,873
Pollution Remediation Liabilities.....	1,568
Estimated Claims Payable	2,186
Liability for Escheat Property	236,773
Total Governmental Activities	<u>3,563,226</u>
Business-Type Activities:	
Compensated Absences	37,338
Net Pension Liability.....	195,669
Capital Leases Payable	13,094
Workers' Compensation:	
Benefits Payable	16,389,400
Other	2,311,425
Unemployment Compensation:	
Intergovernmental Payable	978,459
Prize Awards Payable	518,232
Tuition Benefits Payable	342,800
Total Business-Type Activities	<u>20,786,417</u>
Total Primary Government	<u>\$ 24,349,643</u>

For the year ended June 30, 2015, NOTE 15 summarizes the changes in other noncurrent liabilities. Explanations of certain significant noncurrent liability balances reported in the financial statements follow:

NOTE 14 OTHER NONCURRENT LIABILITIES (Continued)

A. Compensated Absences

For the primary government, the compensated absences liability, as of June 30, 2015, was \$459.2 million, of which \$421.8 million is allocable to governmental activities and \$37.3 million is allocable to business-type activities.

As of June 30, 2015, major discretely presented component units reported a total of \$167.2 million in compensated absences liabilities, as detailed by major discretely presented component unit in NOTE 15.

B. Net Pension Liability and Net OPEB Obligation

The State recognizes a net pension liability in the amount of \$2.9 billion, as of June 30, 2015, for the primary government of which \$2.7 billion is allocable to governmental activities and \$195.7 million is allocable to business-type activities. The net pension liability represents the State's proportionate share of the difference between the total pension liability and the fiduciary net position for OPERS, STRS, and SHPRS.

For the primary government, the State recognizes a net OPEB obligation in the amount of \$149.1 million as of June 2015. The net OPEB obligation represents the cumulative difference between the annual OPEB cost and the employer's contributions to the SHPRS. The SHPRS is a blended component unit reported as a fiduciary pension trust fund. See NOTE 9 for further details.

C. Lease Agreements

The State's primary government leases office buildings and computer and office equipment. Although the lease terms vary, most leases are renewable subject to biennial appropriations by the General Assembly. If the likelihood of the exercise of a fiscal funding clause in the lease agreement is, in the management's judgment, remote, then the lease is considered noncancelable for financial reporting purposes and is reported as a fund expenditure/expense for operating leases or as a liability for capital leases.

Operating leases (leases on assets not recorded in the Statement of Net Position) contain various renewable options as well as some purchase options. Any escalation clauses, sublease rentals, and contingent rents are considered immaterial to the future minimum lease payments and current rental expenditures. Operating lease payments are recorded as expenditures or expenses of the related funds when paid or incurred. The primary government's total operating lease expenditures/expenses for fiscal year 2015 were approximately \$77.7 million. Fiscal year 2016 future minimum lease commitments for operating leases judged to be noncancelable, as of June 30, 2015, were \$4 million.

Assets acquired through capital leasing are valued at the lower of fair value or the present value of the future minimum lease payments at the lease's inception. Capital leases are used for the acquisition of capital assets. Future minimum lease commitments for capital leases judged to be noncancelable, as of June 30, 2015, are below (dollars in thousands):

Year Ending June 30,	Capital Leases		
	Governmental Activities	Business- Type Activities	Total
2016.....	\$ 727	\$ 5,594	\$ 6,321
2017.....	541	-	541
2018.....	409	-	409
2019.....	335	7,500	7,835
2020.....	186	-	186
Total Minimum Lease Payments.....	2,198	13,094	15,292
Amount for Interest.....	(126)	-	(126)
Present Value of Net Minimum Lease Payments.....	\$ 2,072	\$ 13,094	\$ 15,166

NOTE 14 OTHER NONCURRENT LIABILITIES (Continued)

As of June 30, 2015, the primary government had the following capital assets under capital leases (dollars in thousands):

	Capital Assets		
	Governmental Activities	Business- Type Activities	Total
Equipment	\$ 9,985	\$ 110,771	\$ 120,756
Vehicles	4,416	-	4,416
Total	<u>\$ 14,401</u>	<u>\$ 110,771</u>	<u>\$ 125,172</u>

Amortization expense for the proprietary funds within the Statement of Activities is included with depreciation expense. Capital leases are reported under the "Refund and Other Liabilities" account in the proprietary and discretely presented component unit funds.

Future minimum lease commitments for capital leases judged to be noncancelable and capital assets under capital leases for the major discretely presented component unit funds, as of June 30, 2015, are presented in the table below (dollars in thousands):

Capital Leases	
Major Discretely Presented Component Units	
Year Ending June 30,	Ohio State University
2016.....	\$ 1,957
2017.....	1,789
2018.....	690
2019.....	625
2020.....	560
2021-2025.....	1,121
Total Minimum Lease Payments.....	6,742
Amount for Interest.....	(348)
Present Value of Net Minimum Lease Payments.....	<u>\$ 6,394</u>
Equipment & Vehicles.....	\$ 15,203
Total	<u>\$ 15,203</u>

D. Derivatives

For governmental activities, the State has reported \$(45.9) million of investment and hedging derivatives as of June 30, 2015. Additional information regarding the State's derivatives is included in NOTE 4, NOTE 10, and NOTE 18.

E. Litigation Liabilities

In instances when the unfavorable outcome of a pending litigation has been assessed to be probable, liabilities are recorded in the financial statements. As of June 30, 2015, no noncurrent liabilities ultimately payable from various governmental funds have been recorded for this purpose. For information on the State's loss contingencies arising from pending litigation, see NOTE 20.

F. Pollution Remediation Liabilities

The State recognizes a liability for pollution remediation in the amount \$1.6 million, as of June 30, 2015. This represents the cost to the State to the extent that is probable for future clean up and reclamation of polluted sites within the State. See NOTE 20 for further detail.

NOTE 14 OTHER NONCURRENT LIABILITIES (Continued)

G. Estimated Claims Payable

The State reported \$2.2 million in estimated claims for defaulted loans under the Ohio Enterprise Bond Programs at the Development Services Agency, Office of Loan Administration, as of June 30, 2015. The program is included in governmental activities and is accounted for in the nonmajor governmental funds. See NOTE 16 for additional information.

The following table reflects the Ohio Enterprise Bond Fund future debt service obligations as of June 30, 2015 (dollars in thousands):

Year Ending June 30,	Principal Due
2016.....	\$ 486
2017.....	500
2018.....	522
2019.....	541
2020.....	137
Total	\$ 2,186

H. Liability for Escheat Property

The State records a liability for escheat property to the extent that it is probable that the escheat property will be reclaimed and paid to claimants. As of June 30, 2015, the liability totaled approximately \$236.8 million.

I. Worker’s Compensation

Benefits Payable

As discussed in NOTE 21, the Worker’s Compensation Enterprise Fund provides benefits to employees for losses sustained from job-related injury, disease, or death. The Bureau has computed a reserve for compensation, as of June 30, 2015, in the amount of approximately \$16.39 billion. The reserve, which includes estimates for reported claims and claims incurred but not reported, is included in the “Benefits Payable” balance reported for the enterprise fund.

J. Unemployment Compensation

As of June 30, 2015, the State’s Unemployment Compensation Fund is recognizing an intergovernmental payable liability for repayable advances from the Federal government of \$978.5 million. These advances were used for the payment of compensation benefits.

K. Prize Awards Payable

Future installment payments for the prize awards payable are reported at present value based upon interest rates that the Treasurer of State provides to the Lottery Commission Enterprise Fund. The interest rates, ranging from 2 to 9 percent, represent the expected long-term rate of return on the assets restricted for the payment of prize awards. Once established for a particular prize award, the interest rate does not fluctuate with changes in the expected long-term rate of return. The difference between the present value and gross amount of the obligations is amortized into income over the terms of the obligations using the interest method. The State reduces prize liabilities by an estimate of the amount of the prize that will ultimately be unclaimed. As of June 30, 2015, this payable totals \$518.2 million.

NOTE 14 OTHER NONCURRENT LIABILITIES (Continued)

Future payments of prize awards, stated at present value, as of June 30, 2015, follow (dollars in thousands):

Year Ending June 30,	
2016.....	\$ 82,911
2017.....	73,562
2018.....	66,997
2019.....	60,377
2020.....	51,791
2021-2025.....	178,194
2026-2030.....	93,342
2031-2035.....	45,807
2036-2040.....	4,734
2041-2045.....	200
	657,915
Unamortized Discount	(139,683)
Net Prize Liability	\$ 518,232

L. Tuition Benefits Payable

The actuarial present value of future tuition benefits payable from the Tuition Trust Authority Enterprise Fund was approximately \$342.8 million, as of June 30, 2015. The valuation method reflects the present value of estimated tuition benefits that will be paid in future years and is adjusted for the effects of projected tuition increases in state universities and state community colleges and termination of participant contracts under the plan.

The following assumptions were used in the actuarial determination of tuition benefits payable: 4.5 percent rate of return, compounded annually, on the investment of current and future assets, a tuition inflation assumption equal to the maximum amount of tuition and mandatory fee increases permitted by the State of Ohio biennial budget of 5.5 percent, as well as a 2.5 percent Consumer Price Index inflation rate.

As of June 30, 2015, the market value of actuarial net position available for the payment of the tuition benefits payable was \$399.9 million.

M. Other Liabilities

The Workers' Compensation Enterprise Fund reports approximately \$2.31 billion in other noncurrent liabilities, as of June 30, 2015, of which 1) \$1.81 billion is comprised of the compensation adjustment expenses liability for estimated future expenses to be incurred in the settlement of claims, as discussed further in NOTE 21, 2) \$397.9 million relates to transition credit liabilities, 3) \$2.4 million is contingent liabilities, 4) \$86.1 million represents premium payment security deposits collected in advance from private employers to reduce credit risk for premiums collected in subsequent periods, and 5) \$19.5 million consists of other miscellaneous liabilities.

NOTE 15 CHANGES IN NONCURRENT LIABILITIES

A. Primary Government

Changes in noncurrent liabilities, for the year ended June 30, 2015, are presented for the primary government in the following table.

**Primary Government
Changes in Noncurrent Liabilities
For the Fiscal Year Ended June 30, 2015
(dollars in thousands)**

Governmental Activities:	Balance June 30, 2014 (as restated)	Additions	Reductions	Balance June 30, 2015	Amount Due Within One Year
Bonds and Notes Payable:

The State makes payments on bonds and notes payable and certificate of participation obligations that pertain to its governmental activities from the debt service funds. The General Fund and the nonmajor governmental funds will primarily liquidate the other noncurrent liabilities balance attributable to governmental activities.

NOTE 15 CHANGES IN NONCURRENT LIABILITIES (Continued)

For fiscal year 2015, the State's primary government included interest expense on its debt issues in the following governmental functions rather than reporting it separately as interest expense. The related borrowings are essential to the creation or continuing existence of the programs they finance and accordingly, such expense is not reported separately on the Statement of Activities under the expense category for interest on long-term debt. The various state subsidy programs supported by the borrowings provide direct state assistance to local governments for their respective capital and construction or research projects.

	<i>(in 000s)</i>
Governmental Activities:

*Liability is reported under the "Refund and Other Liabilities" account.

NOTE 16 CONDUIT DEBT

The State of Ohio, by action of the General Assembly, created various financing authorities for the expressed purpose of making available to non-profit and, in some cases, for profit private entities, lower cost sources of capital financing for facilities and projects found to be for a public purpose. Fees are assessed to recover related processing and application costs incurred. The authorities' debt instruments represent a limited obligation payable solely from payments made by the borrowing entities. Most of the bonds are secured by the property financed. Upon repayment of the bonds, ownership of acquired property transfers to the entity served by the bond issuance. This debt is not deemed to constitute debt of the State or a pledge of the faith and credit of the State. Accordingly, these bonds are not reflected in the accompanying financial statements.

NOTE 16 CONDUIT DEBT (Continued)

Ohio Enterprise Bond Fund bonds are issued through the Treasurer of State for the purpose of financing eligible projects of private industry organizations. The actual bonds are sold through private placement. These bonds are not general obligations of the State of Ohio or of any political subdivision and are not payable from any tax source; therefore, the rights of the holders of the bonds for payments of amounts due are limited solely to the pledged receipts deposited into the Ohio Enterprise Bond Fund Accounts. The bonds represent conduit debt and are not reflected in the accompanying financial statements. The scheduled payment of the bonds currently outstanding is, however, guaranteed through the Development Services Agency, Office of Loan Administration, under Chapter 166, Ohio Revised Code. As of June 30, 2015, a liability of \$2.2 million has been recorded in the accompanying financial statements for guarantees extended to defaulted organizations. See NOTE 14G. for additional information. The cumulative guarantee payments made for defaulted organizations with bonds currently outstanding is \$3.1 million. Recoveries for guarantee payments are submitted to the Attorney General's Office for collection; however, no amounts are expected to be recovered from guarantee payments made through June 30, 2015.

The Development Services Agency also participates in the issuance of Hospital Facilities Bonds, as authorized under Chapter 140, Ohio Revised Code. These revenue bonds are payable solely from payments made by the borrowing entities and are secured by the property financed. This debt is not deemed to constitute debt of the State or a pledge of the faith and credit of the State. Accordingly, these bonds are not reflected in the accompanying financial statements.

Under Chapter 5531, Ohio Revised Code, the Ohio Department of Transportation is authorized to issue State Infrastructure Bond Program debt issuances through the Treasurer of State for highway and transit capital projects of eligible Ohio political subdivisions. These bonds are not general obligations of the State of Ohio or of any political subdivision and are not payable from any tax source; therefore, the rights of the holders of the bonds for payments of amounts due are limited to the pledged receipts and those special funds pledged by each debt issuance. The bonds represent conduit debt and are not reflected in the accompanying financial statements. The scheduled payment of the bonds currently outstanding is, however, guaranteed through the State Infrastructure Bank program of the Ohio Department of Transportation. In the event of a borrower's default, amounts recovered from the secured capital project would be used to replenish any reserve funds and any remaining amounts would be transferred to the State Infrastructure Bank accounts. Any amounts provided to repay bonds using appropriations of the Ohio Department of Transportation would be submitted to the Attorney General's Office for collection. Currently, guarantees are outstanding through fiscal year 2039, when the bonds mature, and no circumstances presently exist that indicate that the State will be required to make any payments as a result of these guarantees.

As of June 30, 2015, revenue bonds and notes outstanding that represent conduit debt for the State were as follows (dollars in thousands):

	<u>Outstanding Amount</u>
Primary Government:	
Development Services Agency:	
Ohio Enterprise Bond Program	\$ 195,940
Hospital Facilities Bonds	4,885
Ohio Department of Transportation:	
State Transportation Infrastructure Bond Fund Program.....	<u>34,785</u>
Total Primary Government	<u>\$ 235,610</u>

NOTE 17 FUND DEFICITS AND FUND BALANCE REPORTING

NOTE 17 FUND DEFICITS AND FUND BALANCE REPORTING (Continued)

As of June 30, 2015, the Budget Stabilization Fund had a fund balance of \$1.48 billion which was included as a part of the unassigned fund balance in the General Fund.

B. Fund Deficits

The following individual funds reported deficits that are reflected in the State's basic financial statements, as of June 30, 2015 (dollars in thousands):

Primary Government:

Major Proprietary Funds:	
Unemployment Compensation.....	\$ (335,816)
Nonmajor Proprietary Funds:	
Office of Auditor of State.....	(5,505)
<i>Total Primary Government</i>	<u>\$ (341,321)</u>

Discretely Presented Component Units:

Major Component Units:	
Ohio Facilities Construction Commission	\$ (3,672,306)
Nonmajor Component Units:	
Ohio Capital Fund.....	(55,823)
Cincinnati State Community College.....	(26,953)
Owens State Community College.....	(14,813)
<i>Total Component Units</i>	<u>\$ (3,769,895)</u>

The Unemployment Compensation Fund deficit disclosed above is due to outstanding federal loans previously required to maintain benefit levels.

Deficits for the other funds are due to the timing of revenue recognition and the accrual of expenses not recorded under the cash basis of accounting.

NOTE 18 DEFERRED OUTFLOWS OF RESOURCES AND DEFERRED INFLOWS OF RESOURCES

A. Deferred Outflows of Resources

Details on deferred outflows of resources for the primary government, as of June 30, 2015, follow (dollars in thousands):

NOTE 18 DEFERRED OUTFLOWS OF RESOURCES AND DEFERRED INFLOWS OF RESOURCES (Continued)

As of June 30, 2015, the Ohio Facilities Construction Commission, a major discretely presented component unit fund, reported deferred outflows of resources totaling approximately \$687 thousand related to net pension asset/liability. In addition, the Ohio State University, another major discretely presented component unit fund, reported deferred outflows of resources totaling approximately \$219 million for net pension asset/liability and \$8.1 million for losses on debt-related transactions.

B. Deferred Inflows of Resources

The deferred inflows of resources for the primary government, as of June 30, 2015, are comprised of the following (dollars in thousands).

Primary Government - Deferred Inflows of Resources				
	Net Pension Asset/Liability	Resources from the Sale of Future Revenues	Unavailable Resources	Total
Governmental Activities:				
Major Governmental Funds:				
General	\$ -	\$ 818,300	\$ 823,219	\$ 1,641,519

Nonmajor Proprietary Funds	749	-	-	749
Total Business-Type Activities	<u>\$ 4,086</u>	<u>\$ -</u>	<u>\$ -</u>	<u>\$ 4,086</u>
Total Primary Government.....				<u>\$ 2,205,475</u>

As of June 30, 2015, the Ohio Facilities Construction Commission, a major discretely presented component unit fund, reported deferred inflows of resources totaling approximately \$96 thousand related to net pension asset/liability and \$3.59 billion pertaining to resources from the sale of future revenues. In addition, the Ohio State University, another major discretely presented component unit fund, reported deferred inflows of resources of \$218.6 million for net pension asset/liability, \$20 million for gains on debt-related transactions, and approximately \$455.1 million related to service concession arrangements.

NOTE 19 JOINT VENTURES AND RELATED ORGANIZATIONS

A. Joint Ventures

Great Lakes Protection Fund (GLPF)

The Great Lakes Protection Fund is an Illinois non-profit organization that was formed to further federal and state commitments to the restoration and maintenance of the Great Lakes Basin's ecosystem. The governors of seven of the eight states that border on the Great Lakes comprise the GLPF's membership. Under the GLPF's articles of

NOTE 19 JOINT VENTURES AND RELATED ORGANIZATIONS (Continued)

incorporation, each state is required to make a financial contribution. Income earned on the contributions provides grants to projects that advance the goals of the Great Lakes Toxic Substances Control Agreement and the binational Great Lakes Water Quality Agreement.

Each governor nominates two individuals to the GLPF's board of directors who serve staggered two-year terms. All budgetary and financial decisions rest with the board, except when they are restricted by the GLPF's articles of incorporation.

Annually, one-third of the GLPF's net earnings is allocated and paid to the member states in proportion to their respective cash contributions to the GLPF. The allocation is based on the amount and period of time the state's contributions were invested. GLPF earnings distributions are to be used by the states to finance projects that are compatible with the GLPF's objectives. Ohio applies its distribution (approximately \$304 thousand) to operations of its own protection program, known as the Lake Erie Protection Program, which is modeled after the GLPF.

Required contributions and contributions received from the states, which border the Great Lakes, as of December 31, 2014 (the GLPF's year-end), are presented below (dollars in thousands):

	Contribution Required	Contribution Received	Contribution Percentage
Michigan	\$ 25,000	\$ 25,000	30.9%
Indiana*	16,000	-	-
Illinois	15,000	15,000	18.4%
Ohio	14,000	14,000	17.3%
New York	12,000	12,000	14.8%
Wisconsin	12,000	12,000	14.8%
Minnesota	1,500	1,500	1.9%
Pennsylvania	1,500	1,500	1.9%
Total	<u>\$ 97,000</u>	<u>\$ 81,000</u>	<u>100.00%</u>

*The State of Indiana has not yet elected to join the Great Lakes Protection Fund.

Summary Financial information for the GLPF, for the fiscal year ended December 31, 2014, was as follows (dollars in thousands):

Cash and Investments	\$ 130,329
Other Assets	116
Total Assets	<u>\$ 130,445</u>
Total Liabilities	\$ 1,996
Total Net Position	128,449
Total Liabilities and Net Position	<u>\$ 130,445</u>
Total Revenues and Other Additions.....	\$ 7,213
Total Expenditures and Other Deductions.....	(8,181)
Change in Net Position	<u>\$ (968)</u>

In the event of the Fund's dissolution, the State of Ohio would receive a residual portion of the Fund's assets equal to the lesser of the amount of such assets multiplied by the ratio of its required contribution to the required contributions of all member states, or the amount of its required contribution.

Local Community and Technical Colleges

The State's primary government has an ongoing financial responsibility for the funding of six local community colleges and eight technical colleges. With respect to the local community colleges, State of Ohio officials appoint three members of each college's respective nine-member board of trustees; county officials appoint the remaining six members.

NOTE 19 JOINT VENTURES AND RELATED ORGANIZATIONS (Continued)

The governing boards of the technical colleges consist of either seven or nine trustees, of which State officials appoint two or three members, respectively; the remaining members are appointed by the local school boards located in the respective technical college district.

The Ohio General Assembly appropriates moneys to these institutions from the General Fund to subsidize operations so that higher education can become more financially accessible to Ohio residents. The primary government also provides financing for the construction of these institutions' capital facilities by meeting the debt service requirements for the Tobacco Settlement revenue bonds issued by the Buckeye Tobacco Settlement Financing Authority, the Higher Education Capital Facilities general obligation bonds issued by the Ohio Public Facilities Commission (OPFC), and the Higher Education Facilities special obligation bonds, previously issued by the OPFC, for these purposes. The bonds provide funding for capital appropriations, which are available to the local community and technical colleges for spending on capital construction.

Fiscal year 2015 expenses that were included in the "Higher Education Support" function under governmental activities in the Statement of Activities for state assistance to the local community and technical colleges are presented below (dollars in thousands).

	Operating Subsidies	Capital Subsidies	Total
Local Community Colleges:			
Cuyahoga	\$ 63,829	\$ 7,988	\$ 71,817
Eastern Gateway.....	5,955	135	6,090

Total Technical Colleges	<u>91,268</u>	<u>14,979</u>	<u>106,247</u>
Total	<u>\$ 256,434</u>	<u>\$ 28,914</u>	<u>\$ 285,348</u>

Information for obtaining complete financial statements for each of the primary government's joint ventures is available from the Ohio Office of Budget and Management.

B. Related Organizations

Officials of the State's primary government appoint a voting majority of the governing boards of the Ohio Housing Finance Agency, the Ohio Water Development Authority, the Petroleum Underground Storage Tank Release Compensation Board, the Higher Education Facility Commission, and the Ohio Legal Assistance Foundation. However, the primary government's accountability for these organizations does not extend beyond making the appointments.

NOTE 19 JOINT VENTURES AND RELATED ORGANIZATIONS (Continued)

During fiscal year 2015, the State had the following related-party transactions with its related organizations:

- The General Fund reports a \$161.8 million loans receivable balance due from the Ohio Housing Finance Agency. The State made the loans to finance and support the agency's housing programs.
- Separate funds, established for the Ohio Housing Finance Agency, the Petroleum Underground Storage Tank Release Compensation Board, and the Higher Education Facility Commission, were accounted for on the primary government's Ohio Administrative Knowledge System. The primary purpose of the funds is to streamline payroll and other administrative disbursement processing for these organizations. The financial activities of the funds, which do not receive any funding support from the primary government, have been included in the agency funds.
- From the Job, Family and Other Human Services Fund, the Public Defender's Office paid the Ohio Legal Assistance Foundation approximately \$3 million for administrative services performed under contract for the distribution of state funding to nonprofit legal aid societies.

NOTE 20 CONTINGENCIES AND COMMITMENTS

A. Litigation

The State, its units, and employees are parties to numerous legal proceedings, which normally occur in governmental operations. Pending litigation affecting the Department of Natural Resources and the Bureau of Workers' Compensation/Industrial Commission is discussed below. All other legal proceedings are not, in the opinion of management after consultation with the Attorney General, likely to have a material adverse effect on the State's financial position.

Department of Natural Resources (DNR)

In *State ex rel. Merrill v. Ohio Dept. of Natural Resources*, a class action case brought by owners of property bordering Lake Erie, the plaintiffs sought declaratory relief as to title for shoreline land consistent with their deeds (that the phrase "natural shoreline" is not synonymous with "ordinary high-water mark" and therefore the legal boundary of their properties extends beyond the point claimed by DNR). Plaintiffs also sought a writ of mandamus to compel appropriations from the State and DNR for taking of this land. On December 11, 2007, the Lake County Common Pleas Court granted plaintiffs' Motion for Summary Judgment as to the plaintiff's declaratory judgment count. The count seeking a writ of mandamus was stayed pending resolution of the declaratory judgment action. On appeal, the Eleventh District issued its opinion substantially affirming the trial court's granting of Summary Judgment to Plaintiffs-Appellees. The State and other defendants subsequently sought review and on September 14, 2011, the Ohio Supreme Court reversed the lower court holdings that the phrase "natural shoreline" means "a moveable boundary consisting of the water's edge." Instead, the Court held the phrase to mean the "line at which water usually stands when free from disturbing causes." While the Court did not provide as to how to apply this definition, it did reject the various definitions litigated in the lower courts. Specifically, the Supreme Court rejected the various contentions that "natural shoreline" meant "ordinary high water mark," "ordinary low water mark" or "a moveable boundary consisting of the water's edge".

Upon remand, the Lake County Common Pleas Court issued an order that, among other things: 1) established the "natural shoreline" as a factual matter; 2) voided and invalidated all leases between DNR and the plaintiff landowners consistent with the Court's ruling as to the "natural shoreline;" 3) required DNR to return all submerged land lease fees collected since 1998 that were predicated on the voided leases; and 4) certified a class with regard to the previously stayed mandamus action. The State appealed the trial court's order to the Eleventh District. The Eleventh District affirmed the trial court's ruling, and on May 15, 2014, the State appealed to the Ohio Supreme Court. The Ohio Supreme Court refused to accept the State's appeal. The case was returned to the trial court where the trial court agreed to 1) reconsider class certification, and 2) determine whether the State's prior error in claiming public trust ownership to the ordinary high water mark determination constituted a "taking" of property that must be compensated. Briefing is expected to conclude in the first quarter of calendar year 2016. The ultimate outcome of this litigation cannot be presently determined. Accordingly, no provision for any liability resulting from this case has been reported in the financial statements

NOTE 20 CONTINGENCIES AND COMMITMENTS (Continued)

Bureau of Workers' Compensation/Industrial Commission (BWC/IC)

In the *San Allen, Inc. dba Corky and Lenny's v. BWC* class action case, plaintiffs alleged that non-group-rated employers subsidize group-rated employers, and that this bias in premiums violated various provisions of the Ohio Constitution. Plaintiffs asked the court to declare the group rating plan unconstitutional and require BWC to repay to the class members all excessive premiums collected by BWC, with interest and attorney fees. The parties agreed to settle this global class-action on July 23, 2014, with payment from BWC in the amount of \$420 million. The class action settlement was paid in fiscal year 2015.

B. Federal Awards

The State of Ohio receives significant awards from the Federal Government in the form of grants and entitlements, including certain non-cash programs. Receipt of grants is generally conditioned upon compliance with terms and conditions of the grant agreements and applicable federal regulations, including the spending of resources for eligible purposes. Substantially all grants are subject to either the Federal Single Audit or to financial compliance audits by the grantor agencies of the federal government or their designees. Disallowances and sanctions as a result of these audits may become liabilities to the State.

Federal Single Audit

As a result of the fiscal year 2014 State of Ohio Single Audit (issued in February 2015), \$36 thousand of federal expenditures were in question as not being appropriate under the terms of the respective grants. No provision for any liability or adjustments has been recognized for these questioned costs in the state's financial statements for the fiscal year ended June 30, 2015.

Department of Job and Family Services (JFS)

The Hamilton County Department of Job and Family Services' (HCDJFS) receives federal funding from JFS. JFS conducted an audit of HCDJFS records for the July 1, 2001 — June 30, 2004 period and issued findings on May 1, 2008. Thereafter, the HHS-OIG conducted an audit of HCDJFS on behalf of Administration for Children and Families (ACF), a division of the U.S. Dept. of Health and Human Services (HHS), and issued disallowances. JFS appealed the majority of the findings to the HHS Departmental Appeals Board (DAB). By Decision No. 2643 dated June 17, 2015, the DAB upheld the disallowances finding improper use of cost pools, lack of source documentation, and an unreliable financial management system caused the disallowances to be upheld. Total disallowances include a Title XX, Social Services Block Grant held in abeyance. In fiscal year 2015, an intergovernmental liability has been recorded for the amount estimated to be repaid to HHS (see NOTE 6) and an intergovernmental receivable has been recorded for the amount estimated to be recovered from HCDJFS (see NOTE 5.)

C. Tobacco Settlement

In November 1998, the Attorneys General of 46 states, five U.S. territories, and the District of Columbia signed the Master Settlement Agreement (MSA) with the nation's largest tobacco manufacturers. This signaled the end of litigation brought by the Attorneys General against the manufacturers in 1996 for state healthcare expenses attributed to smoking-related claims. The remaining four states (Florida, Minnesota, Mississippi, and Texas) settled separately.

According to the MSA, participating tobacco manufacturers are required to adhere to a variety of new marketing and lobbying restrictions and provide payments to the states in perpetuity.

As of October 23, 2007, the State transferred future rights to the Master Settlement Agreement revenue to the Buckeye Tobacco Settlement Financing Authority (BTSFA).

While BTSFA's share of the total base payments to the states through 2052 will not change over time, estimating the amount of annual payments that actually will be received in any given year can be complex, since under the terms of the MSA, payments are subject to a number of adjustment factors, including an inflation adjustment, a volume adjustment, and a potential adjustment for market share losses of participating manufacturers. Some of these adjustments, such as the inflation adjustment, result in BTSFA receiving higher payments. Other factors, such as the volume adjustment and the market share adjustment can work to reduce the amount of the State's annual payments.

NOTE 20 CONTINGENCIES AND COMMITMENTS (Continued)

In addition to the base payments, BTSFA will receive payments from the Strategic Contribution Fund. The Strategic Contribution Fund was established to reward states that played leadership roles in the tobacco litigation and settlement negotiations. Allocations from the fund are based on a state’s contribution to the litigation and settlement with the tobacco companies. These payments are also subject to the adjustment factors outlined in the MSA.

During fiscal year 2015, Ohio received \$285.8 million, which is approximately \$110.4 million or 27.9 percent less than the pre-adjusted base payment for the year.

As of June 30, 2015, the estimated tobacco settlement receivable in the amount of \$465.2 million is included in “Other Receivables” reported for the governmental funds. The receivable includes \$259.8 million for payments withheld from BTSFA beginning fiscal year 2008 and \$34.1 million for payments withheld from the State for fiscal years 2006 and 2007. These amounts were withheld by the cigarette manufacturers when they exercised the market share loss provisions of the MSA. The moneys are on deposit in an escrow account until pending litigation between the States and the manufacturers is resolved. Both the Authority and the State contend that they have met their obligations under the MSA and are due the payments withheld.

The Tobacco Settlement receipts provide funding for the construction of primary and secondary school capital facilities, education technology for primary and secondary education and for higher education, programs for smoking cessation and other health-related purposes, biomedical research and technology, and assistance to tobacco-growing areas in Ohio.

The BTSFA revenue bonds are secured by and payable solely from the tobacco settlement receipts and other collateral pledged under an indenture between BTSFA and U.S. Bank National Association, as trustee. In the event that the assets of BTSFA have been exhausted, no amounts will thereafter be paid on the bonds.

The enforcement of the terms of the MSA has been challenged by lawsuits and may continue to be challenged in the future. In the event of an adverse court ruling, BTFSA may not have adequate financial resources to make payment on the bonds.

A schedule of pre-adjusted base payments and payments from the Strategic Contribution Fund for the State of Ohio in future years follows (dollars in thousands):

Year Ending June 30,	Pre-adjusted MSA Base Payments	Pre-Adjusted Payments from the Strategic Contribution Fund	Total
2016.....	\$ 376,307	\$ 24,791	\$ 401,098
2017.....	380,940	25,096	406,036
2018.....	431,325	—	431,325
2019.....	436,331	—	436,331
2020.....	441,189	—	441,189
2021-2025.....	2,287,980	—	2,287,980
2026-2030.....	2,440,318	—	2,440,318
2031-2035.....	2,607,356	—	2,607,356
2036-2040.....	2,777,330	—	2,777,330
2041-2045.....	2,956,978	—	2,956,978
2046-2050.....	3,146,926	—	3,146,926
2051-2052.....	1,316,176	—	1,316,176
Total	<u>\$ 19,599,156</u>	<u>\$ 49,887</u>	<u>\$ 19,649,043</u>

NOTE 20 CONTINGENCIES AND COMMITMENTS (Continued)

D. Construction Commitments

As of June 30, 2015, the Ohio Department of Transportation had total contractual commitments of approximately \$3.18 billion for highway construction projects. Funding for future projects is expected to be provided from federal, primary government, general obligation and revenue bonds, and local government sources in amounts of \$1.47 billion, \$1.17 billion, \$443.5 million, and \$101.2 million, respectively.

As of June 30, 2015, other major non-highway construction commitments for the primary government’s budgeted capital projects funds and major discretely presented component unit funds were as follows (dollars in thousands):

Primary Government	
Mental Health/Developmental Disabilities Facilities Improvements	\$ 49,689
Parks and Recreation Improvements	33,264
Administrative Services Building Improvements	41,931
Youth Services Building Improvements	5,747
Adult Correctional Building Improvements	50,823
Highway Safety Building Improvements	83
Ohio Parks and Natural Resources	30,242
Transportation Building Improvements.....	27,736
Total	<u>\$ 239,515</u>
Major Discretely Presented Component Units	
Ohio State University	\$ 320,201

E. Pollution Remediation Activities

During fiscal year 2015, the State was involved in remediation activities for pollution as described in the following paragraph. These activities include site investigation, cleanup, and monitoring. The associated estimated cost of remediation activities is shown below (in general, projects with a liability of less than \$1 million at June 30 are not listed).

The Ohio Department of Transportation has been named as a responsible party to remediate pollution resulting from contaminated soil on the agency-owned property and contaminated groundwater on the surrounding properties. The June 30 liability to eliminate the pollution and continue monitoring activities is estimated to be \$1.6 million. Cost was estimated by the onsite coordinators using actual invoices to date.

The liability described above is reported as “Other Noncurrent Liabilities-Due in One Year” and “Other Noncurrent Liabilities-Due in More Than One Year” for governmental activities in the government-wide Statement of Net Position. The reported liability for these activities is an estimate and is subject to change over time. Variances in the final costs may result from changes in technology, changes in responsible parties, results of environmental studies, and changes in laws and regulations. Future recoveries from other responsible parties may also reduce the final cost paid by the State.

Capital assets may be created during the pollution remediation process. These capital assets will be reported in accordance with the State’s capital assets policy. As of June 30, 2015, no capital assets were created nor reported as a result of any pollution remediation process.

F. Encumbrances

At June 30, 2015, the State has significant encumbrances of \$511.5 million in the General Fund, \$985.8 million in the Job, Family and Other Human Services Special Revenue Fund, and \$4.23 billion in the nonmajor governmental funds.

NOTE 21 RISK FINANCING

A. Workers' Compensation Benefits

The Ohio Workers' Compensation System, which the Ohio Bureau of Workers' Compensation and the Industrial Commission of Ohio administer, is the exclusive provider of workers' compensation insurance to private and public employers in Ohio who are not self-insured. The Workers' Compensation Enterprise Fund (Fund) provides benefits to employees for losses sustained from job-related injury, disease, or death.

"Benefits Payable" of \$16.39 billion is reported in the Fund as of June 30, 2015. This amount represents reserves for indemnity and medical claims resulting from work-related injuries or illnesses, including actuarial estimates for both reported claims and claims incurred but not reported. The liability is based on the estimated ultimate cost of settling claims, including the effects of inflation and other societal and economic factors and projections as to future events, including claims frequency, severity, persistency, and inflationary trends for medical claims reserves. The compensation adjustment expenses liability, which is included in "Other Liabilities" in the amount of approximately \$1.81 billion, is an estimate of future expenses to be incurred in the settlement of claims. The estimate for this liability is based on projected claim-related expenses, estimated costs of the managed care Health Partnership Program, nonincremental adjustment expense, and the reserve for compensation.

Management of the Bureau of Workers' Compensation and the Industrial Commission believes that the recorded reserves for compensation and compensation adjustment expenses make for a reasonable and appropriate provision for expected future losses. While management uses available information to estimate the reserves for compensation and compensation adjustment expenses, future changes to the reserves for compensation and compensation adjustment expenses may be necessary based on claims experience and changing claims frequency and severity conditions. The methods of making such estimates and for establishing the resulting liabilities are reviewed quarterly and updated based on current circumstances. Any adjustments resulting from changes in estimates are recognized in the current period.

Benefits payable and the compensation adjustment expenses liability have been discounted at four percent to reflect the present value of future benefit payments. The selected discount rate approximates an average yield on United States government securities with durations similar to the expected claims underlying the Fund's reserves. The undiscounted reserves for the benefits and compensation adjustment expenses totaled \$30.7 billion, as of June 30, 2015, and \$31.7 billion, as of June 30, 2014. For additional information, refer to the Fund's separate audited financial report, for the fiscal year ended June 30, 2015.

Changes in the balance of benefits payable and the compensation adjustment expenses liability for the Workers' Compensation Program during the past two fiscal years are presented in the table below.

Primary Government
Changes in Workers' Compensation Benefits Payable
and Compensation Adjustment Expenses Liability
Last Two Fiscal Years
(dollars in millions)

	Fiscal Year 2015	Fiscal Year 2014
Benefits Payable and Compensation		
Adjustment Expenses Liability, as of July 1	\$ 18,722	\$ 19,190

and Compensation Adjustment Benefit Payments		
and Other Adjustments	<u>(1,922)</u>	<u>(1,984)</u>
Benefits Payable and Compensation		
Adjustment Expenses Liability, as of June 30	<u>\$ 18,195</u>	<u>\$ 18,722</u>

NOTE 21 RISK FINANCING (Continued)

B. State Employee Healthcare Plan

Employees of the State’s primary government have the option of participating in the Ohio Med PPO Plan (Plan). The Plan is managed by two third party administrators (TPAs), Medical Mutual of Ohio (MMO) and United Healthcare (UHC). The two TPAs are responsible for processing claims for separate regions throughout the State.

When it is probable that a loss has occurred and the amount of the loss can be reasonably estimated, liabilities are reported in the governmental and proprietary funds for claims that have been incurred but not reported. The Plan’s actuaries calculate estimated claims liabilities based on prior claims data, employee enrollment figures, medical trends, and experience.

Governmental and proprietary funds pay a share of the costs for claims settlement based on the number of employees opting for plan participation and the type of coverage selected by participants. The payments are reported in the Payroll Withholding and Fringe Benefits Agency Fund (Agency Fund) until such time that the accumulated resources are distributed to MMO or UHC for claims settlement.

For governmental funds, claims are recognized as expenditures to the extent that the amounts are payable with expendable available financial resources. For governmental and business-type activities, claims are recognized in the Statement of Activities as expenses when incurred.

As of June 30, 2015, approximately \$139 million in total assets was available in the Agency Fund to cover healthcare claims. Changes in the balance of claims liabilities for the Plan during the past two fiscal years were as follows (dollars in thousands):

Ohio Med PPO		
	Fiscal Year 2015	Fiscal Year 2014
Claims Liabilities, as of July 1	\$ 48,216	\$ 45,843
Incurred Claims	467,729	455,827
Claims Payments	(467,731)	(453,454)
Claims Liabilities, as of June 30	<u>\$ 48,214</u>	<u>\$ 48,216</u>

As of June 30, 2015, the resources on deposit in the Agency Fund exceeded the estimated claims liability by approximately \$90.8 million, thereby resulting in a funding surplus. Eighty-five percent or \$77.2 million of the surplus, representing the employer share, was reallocated back to the governmental and proprietary funds, with a resulting reduction in expenditures/expenses.

C. Other Risk Financing Programs

The primary government has established programs to advance fund potential losses for vehicular liability and theft in office. The potential amount of loss arising from these risks, however, is not considered material in relation to the State’s financial position.

NOTE 22 SUBSEQUENT EVENTS

Bond Issuances

Subsequent to June 30, 2015, the State issued major debt as detailed in the table below:

Debt Issuances			
Subsequent to June 30, 2015			
<i>(dollars in thousands)</i>			
	<u>Date Issued</u>	<u>Net Interest Rate or True Interest Cost</u>	<u>Amount</u>

Infrastructure Assets Accounted for Using the Modified Approach

Pavement Network

The Ohio Department of Transportation conducts annual condition assessments of its Pavement Network. The State manages its pavement system by means of annual, visual inspections by trained pavement technicians. Technicians rate the pavement using a scale of 1 (minimum) to 100 (maximum) based on a Pavement Condition Rating (PCR). This rating examines items such as cracking, potholes, deterioration of the pavement, and other factors. It does not include a detailed analysis of the pavement's subsurface conditions.

Ohio accounts for its pavement network in two subsystems: *Priority*, which comprises interstate highways, freeways, and multi-lane portions of the National Highway System, and *General*, which comprises two-lane routes outside of cities.

For the Priority Subsystem, it is the State's intention to maintain at least 75 percent of the pavement at a PCR level of at least 65, and to allow no more than 25 percent of the pavement to fall below a 65 PCR level. For the General Subsystem, it is the State's intention to maintain at least 75 percent of the pavement at a PCR level of at least 55, and to allow no more than 25 percent of the pavement to fall below a 55 PCR level.

Bridge Network

The Ohio Department of Transportation conducts annual inspections of all bridges in the State's Bridge Network. The inspections cover major structural items such as piers and abutments, and assign a General Appraisal Condition Rating (GACR) from 0 (minimum) to nine (maximum) based on a composite measure of these major structural items.

It is the State's intention to maintain at least 85 percent of the square feet of deck area at a general appraisal condition rating level of at least five, and to allow no more than 15 percent of the number of square feet of deck area to fall below a general appraisal condition rating level of five.

WILLIAM
MCKINLEY

TWENTY-FIFTH
PRESIDENT OF
THE UNITED STATES

OUR EARNEST PRAYER IS THAT GOD
WILL GRACIOUSLY VOUCHSAFE PROSPERITY,
HAPPINESS AND PEACE TO ALL
OUR NEIGHBORS, AND LIKE BLESSINGS
TO ALL THE PEOPLES AND THE

President William McKinley Memorial

- West side of the Ohio Statehouse on South High Street
- Unveiled in 1906
- Twenty-fifth President of the United States, was assassinated in 1901
- The statue gazes west across High Street to the site of the former Neil House Hotel, where William McKinley and his wife Ida lived when McKinley was in Columbus

NONMAJOR SPECIAL REVENUE FUNDS

Special Revenue Funds account for specific revenues that are legally restricted to expenditure for particular purposes.

Education Fund

The Education Fund accounts for programs administered by the Department of Education, the Ohio Board of Regents, and other various state agencies, which prescribe the State's minimum educational requirements and which provide funding and assistance to local school districts for basic instruction and vocation and technical job training, and to the State's colleges and universities for post-secondary education.

Highway Operating Fund

The Highway Operating Fund accounts for programs administered by the Department of Transportation, which is responsible for the planning and design, construction, and maintenance of Ohio's highways, roads, and bridges and for Ohio's public transportation programs.

Community and Economic Development Fund

The Community and Economic Development Fund accounts for programs administered by the Department of Development and other various state agencies, which were created to assure the efficient use of resources for the State's community and economic growth and development.

Health Fund

The Health Fund accounts for public health programs primarily administered by the Department of Health, which promotes the prevention and treatment of diseases and illnesses through technical assistance, health education, and research.

Mental Health and Developmental Disabilities Fund

The Mental Health and Developmental Disabilities Fund accounts for mental health care and developmental disabilities programs primarily administered by the Department of Mental Health and the Department of Developmental Disabilities, which provide assistance, services, and medical care to those individuals with mental health and developmental disability problems.

Highway Safety Fund

The Highway Safety Fund accounts for public safety programs primarily administered by the Department of Public Safety, which enforces traffic-related laws for the purpose of reducing accidents, deaths, injuries, and property damages on Ohio's highways.

Natural Resources Fund

The Natural Resources Fund accounts for environmental programs administered by the Department of Natural Resources, the Environmental Protection Agency, and other various state agencies, which promote, protect, and manage the State's natural resources and environment.

Wildlife and Waterways Safety Fund

The Wildlife and Waterways Safety Fund accounts for programs administered by the Department of Natural Resources' Divisions of Wildlife and Watercraft, which promote, protect, and manage the State's wildlife and waterways and which provide technical assistance and education to the public.

Tobacco Settlement Fund

The Tobacco Settlement Fund accounts for various health, education, economic, and law enforcement-related programs funded with moneys received under the Master Settlement Agreement with the nation's largest tobacco companies.

NONMAJOR DEBT SERVICE FUNDS

Debt Service Funds account for the resources accumulated and payments made for principal and interest on long-term debt of the governmental funds.

Coal Research/Development General Obligations Fund

The Coal Research/Development General Obligations Fund accounts for the payment of principal and interest on general obligation bonds that have been authorized under Section 15 of Article VIII, Ohio Constitution, to finance coal research and development projects.

Improvements General Obligations Fund

The Improvements General Obligations Fund accounts for the payment of principal and interest on general obligation bonds that have been authorized under Section 2f of Article VIII, Ohio Constitution, to finance the improvement of higher education facilities, public schools, and natural resources.

Highway Improvements General Obligations Fund

The Highway Improvements General Obligations Fund accounts for the payment of principal and interest on general obligation bonds that have been authorized under Section 2g of Article VIII, Ohio Constitution, to finance the acquisition of rights-of-way and the construction and reconstruction of the State's highways and urban extensions.

Development General Obligations Fund

The Development General Obligations Fund accounts for the payment of principal and interest on general obligation bonds that have been authorized under Section 2h of Article VIII, Ohio Constitution, to finance the construction, improvement, and development of higher education facilities, public schools, and natural resources.

Highway General Obligations Fund

The Highway General Obligations Fund accounts for the payment of principal and interest on general obligation bonds that have been authorized under Section 2i of Article VIII, Ohio Constitution, to finance the construction of the State's highways.

Public Improvements General Obligations Fund

The Public Improvements General Obligations Fund accounts for the payment of principal and interest on general obligation bonds that have been authorized under Section 2i of Article VIII, Ohio Constitution, to finance water pollution controls and improvements at higher education facilities, parks, and natural resources.

Vietnam Conflict Compensation General Obligations Fund

The Vietnam Conflict Compensation General Obligations Fund accounts for the payment of principal and interest on general obligation bonds that have been authorized under Section 2j of Article VIII, Ohio Constitution, to provide funding for the compensation to Ohioans that served in the military during the Vietnam Conflict.

Local Infrastructure Improvements General Obligations Fund

The Local Infrastructure Improvements General Obligations Fund accounts for the payment of principal and interest on general obligation bonds that have been authorized under Section 2k of Article VIII, Ohio Constitution, to finance the cost of local government's public infrastructure improvement projects.

State Projects General Obligations Fund

The State Projects General Obligations Fund accounts for the payment of principal and interest on general obligation bonds that have been authorized under Section 2l of Article VIII, Ohio Constitution, to finance capital improvements at state and local parks and other natural resources-related projects.

Highway Capital Improvements General Obligations Fund

The Highway Capital Improvements General Obligations Fund accounts for the payment of principal and interest on general obligation bonds that have been authorized under Section 2m of Article VIII, Ohio Constitution, to finance capital improvements to the state highway system.

Higher Education Capital Facilities General Obligations Fund

The Higher Education Capital Facilities General Obligations Fund accounts for the payment of principal and interest on general obligation bonds that have been authorized under Section 2n of Article VIII, Ohio Constitution, to finance the costs of capital facilities for state-supported and state-assisted institutions of higher education, including those for technical education.

Common Schools Capital Facilities General Obligations Fund

The Common Schools Capital Facilities General Obligations Fund accounts for the payment of principal and interest on general obligation bonds that have been authorized under Section 2n of Article VIII, Ohio Constitution, to finance the costs of facilities for a system of common schools throughout Ohio.

Conservation Projects General Obligations Fund

The Conservation Projects General Obligations Fund accounts for the payment of principal and interest on general obligation bonds that have been authorized under Section 2o of Article VIII, Ohio Constitution, to finance the purchase of additional “greenspace” land or interest in land devoted to natural areas, open spaces, and agriculture.

Third Frontier Research/Development General Obligations Fund

The Third Frontier Research/Development General Obligations Fund accounts for the payment of principal and interest on general obligation bonds that have been authorized under Section 2p of Article VIII, Ohio Constitution, to finance research and development in support of Ohio industry, commerce, and business.

Job Ready Site Development General Obligations Fund

The Job Ready Site Development General Obligations Fund accounts for the payment of principal and interest on general obligation bonds that have been authorized under Section 2p of Article VIII, Ohio Constitution, to finance the development of sites for industry, distribution, commerce, and research and development.

Persian Gulf Conflict Compensation General Obligations Fund

The Persian Gulf Conflict Compensation General Obligations Fund accounts for the payment of principal and interest on general obligation bonds that have been authorized under Section 2r of Article VIII, Ohio Constitution, to pay compensation to veterans of the Persian Gulf, Afghanistan, and Iraq Conflicts.

Infrastructure Bank Revenue Bonds Fund

The Infrastructure Bank Revenue Bonds Fund accounts for the payment of principal and interest on revenue bonds issued to finance various highway construction projects sponsored by the Department of Transportation.

Lease Rental Special Obligations Fund

The Lease Rental Special Obligations Fund accounts for the payment of principal and interest on special obligation bonds issued to finance the construction of higher education facilities, mental health facilities, parks and recreation projects and facilities, and Ohio Facilities Construction Commission projects.

MARCS Certificates of Participation Fund

The MARCS Certificates of Participation Fund accounts for the payment of certificate of participation-related obligations that finance the State's statewide public service wireless communication system, known as the Multi Agency Radio Communications (MARCS).

OAKS Certificates of Participation Fund

The OAKS Certificates of Participation Fund accounts for the payment of certificate of participation-related obligations that finance the State's enterprise resource planning system project, known as the Ohio Administrative Knowledge System (OAKS).

STARS Certificates of Participation Fund

The STARS Certificates of Participation Fund accounts for the payment of certificates of participation related obligations that finance the State's Taxation Accounting and Revenue System, known as STARS.

TMS Certificates of Participation Fund

The TMS Certificates of Participation Fund accounts for the payment of certificates of participation related obligations that finance the State's Treasury Management System, known as TMS.

EDCS Certificates of Participation Fund

The EDCS Certificates of Participation Fund accounts for the payment of certificates of participation related obligations that finance the Enterprise Data Center Solutions, known as EDCS.

NONMAJOR CAPITAL PROJECTS FUNDS

Capital Projects Funds account for the acquisition and construction of major capital facilities other than those financed by proprietary funds and trust funds.

Infrastructure Bank Obligations Fund

The Infrastructure Bank Obligations Fund accounts for revenue bond proceeds that finance various highway construction projects sponsored by the Department of Transportation.

Mental Health/Developmental Disabilities Facilities Improvements Fund

The Mental Health/Developmental Disabilities Facilities Improvements Fund accounts for special obligation bond proceeds that finance the construction of mental health and developmental disabilities facilities.

Parks and Recreation Improvements Fund

The Parks and Recreation Improvements Fund accounts for special obligation bond proceeds that finance the capital improvement of parks and recreation facilities.

Administrative Services Building Improvements Fund

The Administrative Services Building Improvements Fund accounts for special obligation bond proceeds that finance capital improvements for the Department of Administrative Services.

Youth Services Building Improvements Fund

The Youth Services Building Improvements Fund accounts for special obligation bond proceeds that finance capital improvements for the Department of Youth Services.

Adult Correctional Building Improvements Fund

The Adult Correctional Building Improvements Fund accounts for special obligation bond proceeds that finance capital improvements for the Department of Rehabilitation and Correction.

Highway Safety Building Improvements Fund

The Highway Safety Building Improvements Fund accounts for special obligation bond proceeds that finance capital improvements for the Department of Public Safety.

Ohio Parks and Natural Resources Fund

The Ohio Parks and Natural Resources Fund accounts for general obligation bond proceeds that finance capital improvements for state and local parks and other natural resources-related projects.

Highway Capital Improvement Fund

The Highway Capital Improvement Fund accounts for general obligation bond proceeds that finance capital improvements to the state highway system.

Transportation Building Improvements Fund

The Transportation Building Improvements Fund accounts for special obligation bond proceeds that finance capital improvements for the Department of Transportation.

MARCS Project Fund

The MARCS Project Fund accounts for certificates of participation proceeds that finance the costs of the Multi Agency Radio Communications (MARCS) project for the statewide, secure, reliable public service wireless communication for public safety and first responders.

STARS Project Fund

The STARS Project Fund accounts for certificate of participation proceeds that finance the costs of the State's Taxation Accounting and Revenue System (STARS) technology project.

TMS Project Fund

The TMS Project Fund accounts for certificate of participation proceeds that finance the costs of the State's Treasury Management System (TMS) technology project.

EDCS Project Fund

The EDCS Project Fund accounts for certificate of participation proceeds that finance the costs of the State's Enterprise Data Center Solutions (EDCS) technology project.

AGENCY FUNDS

Agency Funds account for resources the State holds in a purely custodial capacity (assets equal liabilities) for individuals, private organizations, or other governments.

Holding and Distribution Fund

The Holding and Distribution Fund accounts for assets held until such time that a determination has been made to refund amounts to the individuals, private organizations, or other governments.

Centralized Child Support Collections Fund

The Centralized Child Support Collections Fund accounts for assets temporarily held for custodial parents.

Retirement Systems Fund

The Retirement Systems Fund accounts for assets held in the custody of the Treasurer of State for the Ohio Public Employees Retirement System, Ohio Police and Fire Pension Fund, School Employees Retirement System of Ohio, and State Teachers Retirement System of Ohio. While legal custodian, the Treasurer of State does not manage or provide investment services to the foregoing retirement systems.

Payroll Withholding and Fringe Benefits Fund

The Payroll Withholding and Fringe Benefits Fund primarily accounts for assets held to liquidate the State's payroll withholding obligations.

Other Fund

The Other Fund accounts for assets held for others, which are not accounted for in another agency fund.

NONMAJOR DISCRETELY PRESENTED COMPONENT UNIT FUNDS

Nonmajor Discretely Presented Component Unit Funds account for the financial activities of the State of Ohio's component units, organizations that are legally separate from the State's primary government and for which the primary government is financially accountable.

Ohio Turnpike and Infrastructure Commission Fund

The Ohio Turnpike and Infrastructure Commission Fund accounts for the operations of the Ohio Turnpike and Infrastructure Commission, including its projects to construct, maintain and operate public roadways, express or limited access highways, superhighways, or motorways necessary for safe movement of traffic including bridges, tunnels, overpasses, underpasses, interchanges, entrance plazas, approaches, and toll booths. The Commission's Financial Statements are presented for the fiscal year end December 31, 2014. The Commission is located in Berea, Ohio.

Ohio Air Quality Development Authority Fund

The Ohio Air Quality Development Authority Fund accounts for the Ohio Air Quality Development Authority's operations, including programs that assist Ohio's businesses, government agencies, and not-for-profit organizations with financing projects that increase energy efficiency and reduce air pollution. The Authority's financial statements are presented for the fiscal year ended December 31, 2014

Ohio Capital Fund

The Ohio Capital Fund accounts for the operations of the State's venture capital program.

JobsOhio Fund

The JobsOhio Fund accounts for the operations of the nonprofit corporation, JobsOhio, including promoting economic development, job creation, job retention, job training, and the recruitment of business to the State of Ohio.

University of Cincinnati Fund

The University of Cincinnati Fund accounts for the operations of University of Cincinnati and The University of Cincinnati Foundation. The university is located in Cincinnati, Ohio.

Ohio University Fund

The Ohio University Fund accounts for the operations of Ohio University and the Ohio University Foundation. The university is located in Athens, Ohio.

Miami University Fund

The Miami University Fund accounts for the operations of Miami University and the Miami University Foundation. The university is located in Oxford, Ohio.

University of Akron Fund

The University of Akron Fund accounts for the operations of the University of Akron, the University of Akron Foundation, and the University of Akron Research Foundation.

Bowling Green State University Fund

The Bowling Green State University Fund accounts for the operations of Bowling Green State University and the Bowling Green State University Foundation.

Kent State University Fund

The Kent State University Fund accounts for the operations of Kent State University and the Kent State University Foundation.

University of Toledo Fund

The University of Toledo Fund accounts for the operations of the University of Toledo, the University of Toledo Foundation, and the University of Toledo Physicians, Clinical Faculty, Inc.

Cleveland State University Fund

The Cleveland State University Fund accounts for the operations of Cleveland State University, the Cleveland State University Foundation, and the Euclid Avenue Housing Corporation.

Youngstown State University Fund

The Youngstown State University Fund accounts for the operations of Youngstown State University and the Youngstown State University Foundation.

Wright State University Fund

The Wright State University Fund accounts for the operations of Wright State University and the Wright State University Foundation. The university is located in Dayton, Ohio.

Shawnee State University Fund

The Shawnee State University Fund accounts for the operations of Shawnee State University and the Shawnee State University Development Foundation. The university is located in Portsmouth, Ohio.

Northeast Ohio Medical University Fund

The Northeast Ohio Medical University Fund accounts for the operations of Northeast Ohio Medical University and NEOMED Foundation. The college is located in Rootstown, Ohio.

Central State University Fund

The Central State University Fund accounts for the operations of Central State University and the Central State University Foundation. The university is located in Wilberforce, Ohio with a branch campus in Dayton, Ohio.

Terra State Community College Fund

The Terra State Community College Fund accounts for the operations of Terra State Community College and Terra College Foundation. The college is located in Fremont, Ohio.

Columbus State Community College Fund

The Columbus State Community College Fund accounts for the operations of Columbus State Community College and the Columbus State Community College Development Foundation, Inc.

Clark State Community College Fund

The Clark State Community College Fund accounts for the operations of Clark State Community College and the Clark State Community College Foundation. The college is located in Springfield, Ohio.

Edison State Community College Fund

The Edison State Community College Fund accounts for the operations of Edison State Community College and the Edison Foundation, Inc. The college is located in Piqua, Ohio.

Southern State Community College Fund

The Southern State Community College Fund accounts for the operations of Southern State Community College and the Southern State Community College Foundation. The college is located in Hillsboro, Ohio.

Washington State Community College Fund

The Washington State Community College Fund accounts for the operations of Washington State Community College and the Washington State Foundation. The college is located in Marietta, Ohio.

Cincinnati State Community College Fund

The Cincinnati State Community College Fund accounts for the operations of Cincinnati State Technical and Community College.

Northwest State Community College Fund

The Northwest State Community College Fund accounts for the operations of Northwest State Community College and the Northwest State Community College Foundation. The college is located in Archbold, Ohio.

Owens State Community College Fund

The Owens State Community College Fund accounts for the operations of Owens State Community College and the Owens State Community College Foundation. The college is located in Toledo, Ohio with a branch campus in Findlay, Ohio.

**OHIO FACILITIES
 CONSTRUCTION
 COMMISSION**

Net Change in Fund Balances..... **\$ 211,162**

The change in net position reported for governmental activities in the Statement of Activities is different because:

Governmental funds report capital outlays as expenditures. However, in the Statement of Activities, the cost of those assets is allocated over their estimated useful lives and reported as depreciation expense. This is the amount by which capital outlays were in excess/deficient over depreciation in the current period.

<i>Capital Outlay Expenditures</i>	(41,408)
<i>Depreciation Expense</i>	(1,390)
<i>Excess / (Deficiency) of Capital Outlay Over Depreciation Expense</i>	(42,798)

Expenses for compensated absences reported in the Statement of Activities are not reported as expenditures in the governmental funds. (10)

Some revenues and expenses reported in the Statement of Activities are not reported as revenue and expenditures in the governmental funds. Under the modified accrual basis of accounting used in the governmental funds, expenditures are not recognized for transactions that are not normally paid with expendable available financial resources. In the Statement of Activities, however, which is presented on the accrual basis, expenses, liabilities, and deferred resources are reported regardless of when financial resources are available. This adjustment combines the changes in the following balances:

<i>Decrease in Net Pension Asset / (Liability)</i>	80
--	----

Change in Net Position..... **\$ 168,434**

Statistical Section

The Ohio Holocaust and Liberators Memorial

- South side of the Ohio Statehouse
- Unveiled by Governor John Kasich and architect Daniel Libeskind in June 2014.
- The memorial honors those who lost their lives and thanks the brave men and women of Ohio who fought during the Second World War.

[THIS PAGE LEFT BLANK INTENTIONALLY]

STATISTICAL SECTION

This section of the State of Ohio's Comprehensive Annual Financial Report presents detailed information as a context for understanding the information in the financial statements, note disclosures, and required supplementary information.

	<u>Pages</u>
Financial Trends	256-269
<p>These schedules contain trend information to assist the reader in understanding how the State's financial performance and condition have changed over time.</p>	
Revenue Capacity	270-283
<p>These schedules contain information to assist the reader in assessing the State's two most significant own-source revenues: income taxes and sales taxes.</p>	
Debt Capacity	284-293
<p>These schedules present information to assist the reader in assessing the affordability of the State's current levels of outstanding debt and its ability to issue additional debt in the future.</p>	
Economic and Demographic Information	294-297
<p>These schedules offer economic and demographic indicators to assist the reader in understanding the environment within which the State's financial activities take place.</p>	
Operating Information	298-305
<p>These schedules contain service and infrastructure data to assist the reader in understanding how the information in the State's financial report relates to the services the State provides and to the activities it performs.</p>	

Sources: Unless otherwise noted, the information in these schedules is derived from the comprehensive annual financial reports for the relevant year.

Ohio Office of Budget and Management

Notes:

Beginning in fiscal year 2011, restricted net position categories have been revised to correspond with the categories presented for restricted fund balance.

Ohio Building Authority ceased operations December 31, 2011.

When practical, net position reported on the above table has been restated for prior period adjustments, corrections, and reclassifications. However, restatements do not include changes in reporting entity. For comparative purposes, however, the effects of such adjustments and corrections on the revenue and expense activity reported for the applicable fiscal years on the "Changes in Net Position" table may not have been determined for presentation on that table.

Source:

Ohio Office of Budget and Management

Notes:

During fiscal year 2014, Ohio House Bill 59 line item restructuring resulted in increases to Public Assistance and Medicaid expenses and decreases to Health and Human Services expenses.

Ohio Building Authority ceased operations December 31, 2011.

On February 1, 2013, the State granted a 25-year franchise on its spirituous liquor system.

Activity of the Liquor Control Enterprise Fund ceased as of January 31, 2013.

Balances have been restated for prior period adjustments, corrections, and reclassifications, when practical.

Notes:

During fiscal year 2014, Ohio House Bill 59 line item restructuring resulted in increases to Public Assistance and Medicaid expenditures and decreases to Health and Human Services expenditures.

Revenues, expenditures, and other financing sources (uses) have been restated for prior period adjustments, corrections, and reclassifications, when practical.

Notes:

As a result of implementing GASB Statement 54: *Fund Balance Reporting and Governmental Fund Type Definitions*, fund balances have been classified in new categories beginning in fiscal year 2011.

When practical, fund balances reported on the above table have been restated for prior period adjustments, corrections, and reclassifications; however, restatements do not include changes in reporting entity. For comparative purposes, however, the effects of such adjustments and corrections on the revenue and expenditure activity reported for the applicable fiscal years on the "Changes in Fund Balances for Governmental Funds" table and the "Condensed Statement of Revenues, Expenditures and Changes in Fund Balances for the General Fund" table may not have been determined for presentation on each of the two respective tables.

Ohio Office of Budget and Management

Notes:

As a result of implementing GASB Statement 54: *Fund Balance Reporting and Governmental Fund Type Definitions*, the General Fund is reporting balances and activities previously reported within special revenue funds beginning in fiscal year 2011.

The July 1 fund balances, revenues, and expenditures have been restated for prior period adjustments, corrections, and reclassifications, when practical.

Notes:

- (A) - In January 2007, the Classic Lotto game replaced the Super Lotto game.
 (B) - Raffle to Riches was a new game started in 2007.
 (C) - In April 2008, the new EZ Play game was introduced.
 (D) - In August 2007, the game Ten-OH! was introduced.
 (E) - In 2009, the Keno game was introduced.
 (F) - In fiscal year 2010, the Power Ball / Power Play was introduced.
 (G) - In fiscal year 2011, the Kicker was retired and the Megaplier was added.
 Kicker was reintroduced in 2012 as an add-on to Classic Lotto.
 (H) - August 2012, the Ten-Oh game was replaced by Pick 5.
 (I) - In fiscal year 2015, the EZPLAY TAP game was introduced.

Limitations on Debt

A 1999 amendment to the Ohio Constitution provides an annual debt service "cap" on general obligation bonds and other direct obligations payable from the General Revenue Fund (GRF) or net state lottery proceeds. Generally, such bonds may not be issued if the future fiscal year debt service on the new bonds and previously issued bonds exceeds five percent of total estimated GRF revenues plus net state lottery proceeds during the fiscal year of issuance. Application of the cap may be waived in a particular instance by a three-fifths vote of each house of the General Assembly and may be changed by future constitutional amendments. Direct obligations of the State include, for example, special obligation bonds issued by the Ohio Building Authority and the Treasurer of State that are paid from GRF appropriations, but exclude bonds such as highway bonds that are paid from highway user receipts.

Source:

Ohio Office of Budget and Management

Note:

(A) Debt Service Expenditures reflect the restructuring of net debt service payments into later fiscal years.

Notes (continued):

- (E) Gross revenues consist of operating revenues and investment income.
- (G) The final debt service payments on the Bureau of Workers' Compensation Revenue Bonds were made during fiscal year 2014.
- (H) During fiscal year 2013, the Bureau of Workers' Compensation (BWC) adjusted its premium rates and recorded a premium rebate.
- (I) Investment income for fiscal year 2010 increased by approximately \$2 billion as a result of the implementation of a strategy to diversify fixed and equity investments, a comprehensive update to BWC's investment policy, and the selection of investment managers to execute its passive investment strategy.
- (J) In June 2007, House Bill 100 passed granting BWC the authority to assess employers in future periods for amounts needed to fund the Disabled Worker's Relief Fund. The net impact of this change was a \$1.9 billion increase in operating revenues during fiscal year 2007.

Sources: Various state agencies, as noted above.

Notes:

- (A) The number of school districts include only those with enrollment.
- (B) Data for the year indicated was not readily available.
- (C) In fiscal year 2007, the Ohio Instructional Grant began to be phased out and was replaced by the Ohio College Opportunity Grant.
- (D) The Ohio Instructional Grant and Student Choice Grant were eliminated at the end of fiscal year 2009.
- (E) Data includes hunting licenses, fishing licenses, permits, and boating licenses.
- (F) Represents clients served by the Department of Mental Health & Addiction Services and Department of Developmental Disabilities.
- (G) Department of Aging began using a new reporting system in fiscal year 2012, resulting in lower count for Congregate Meals served.
- (H) Beginning in fiscal year 2014, the Department of Mental Health and the Department of Alcohol & Drug Addiction Services merged to form the Department of Mental Health & Addiction Services (MHAS).
- (I) In fiscal year 2014 the Ohio Department of Medicaid was formed and the Medicaid and Medicaid Waiver operations were transferred to the new agency from the Ohio Department of Job and Family Services.
- (J) In fiscal year 2015 a number of clients transferred from the PASSPORT program to the MyCare Ohio program.

Notes:

- (A) The Priority Subsystem includes the interstate highways, freeways, and multi-lane portions of the National Highway System. The General Subsystem consists of two-lane routes outside of cities.
- (B) Three buildings were previously classified as armories/readiness centers.
Changes in federal regulation have changed the classifications of the three buildings.
