Independent Accountants' Report on Applying Agreed-Upon Procedures

Ohio Department of Medicaid
50 West Town Street, Suite 400
Columbus, Ohio 43215

RE: Francisco Garabis, M.D. NPI: 1992747240
Program Year 2: Meaningful Use Stage 1, Year 1

We have performed the procedures enumerated below, which were agreed to by the Ohio Department of Medicaid (ODM), on Dr. Francisco Garabis's (hereafter referred to as the Provider) compliance with the requirements of the Medicaid Provider Incentive Program (MPIP) for the year ended December 31, 2013. The Provider is responsible for compliance with the MPIP requirements. The sufficiency of these procedures is solely the responsibility of ODM. Consequently, we make no representation regarding the sufficiency of the procedures enumerated below either for the purpose for which this report has been requested or for any other purpose.

1. We reviewed the MPIP system and determined that the provider had met the pre-payment approval requirements, was approved for incentive payment by ODM and received an incentive payment.

We compared the date of pre-payment approval with the date of the incentive payment and determined that pre-approval occurred prior to payment. In addition, we compared the payment amount with the MPIP payment schedule and determined that ODM issued the correct payment amount.

2. We reviewed information contained in the Ohio e-license center and verified the Provider's type and license to practice in Ohio during both the patient volume and meaningful use attestation periods.

We also searched the Provider's information as contained in the Medicaid Information Technology System (MITS) and determined that the Provider had an active Ohio Medicaid Agreement during the attestation periods for patient volume and for meaningful use.

3. We obtained the list of all encounters during the patient volume attestation period from the Provider. We scanned the list for any duplicate patient encounters. We selected five patient encounters of non-Medicaid recipients from the Provider's electronic health record (EHR) system and traced the encounter to the list to identify any unrecorded encounters.

We found no duplicates and no unrecorded encounters.

Applying Agreed-Upon Procedures

4. We obtained the Medicaid encounters from the Quality Decision Support System (QDSS) for the patient volume attestation period and compared this to both the Medicaid encounters reported by the Provider in the MPIP system and the Medicaid encounters provided in procedure 3 above.

We found the variance between these reported numbers was greater than 20 percent. We determined that the Provider's Medicaid encounter list was more accurate and should be used in calculation of the Provider's Medicaid patient volume (see procedure 5).

5. We calculated the Provider's Medicaid patient volume using data from procedures 3 and 4 above.

The Provider met the 30 percent patient volume requirement.

6. We found that the location where the Provider worked was now using a newer version of the same software reported in the MPIP system. The new version of the EHR software was able to produce reports showing the Provider's use of EHR in 2013. We verified that this newer version of this software was approved by the Office of the National Coordinator of Health IT.

7. We obtained a report listing of all of the Provider's patients during an alternative meaningful use attestation period (March 19, 2013 to June 16, 2013) and compared this number to the number of all patients seen during the same attestation period to verify that 80 percent of all unique patients were in the EHR system.

We found the Provider met the required 80 percent threshold. The Provider could not provide a report that matched the attestation period as identified in the MPIP system and we used the alternative attestation period to complete this procedure.

8. ODM requested that we determine if Provider had multiple locations and, if so, to perform additional procedures.

We did not perform this procedure as the Provider did not report multiple locations.

9. We compared supporting documentation obtained from the Provider for the alternative meaningful use attestation period (identified in procedure 7) with the requirements of the 13 core measures and determined if the measure or exclusion criterion was met. For those measures that require only unique patients be counted, we scanned the detailed data for each query to identify any duplicate patients.

We found no duplicates. See Meaningful Use Results below.

10. Using the five additional meaningful use measures attested to by the Provider, we determined that at least one of the public health objectives was selected. We compared supporting documentation obtained from the Provider for the alternative meaningful use attestation period (identified in procedure 7) with the requirements of each menu measures and determined if each measure or exclusion criterion was met. For those measures that require only unique patients be counted, we scanned detailed data for each query to identify any duplicate patients.

We found no duplicates. See Meaningful Use Results below.

Applying Agreed-Upon Procedures

11. We obtained the clinical quality measures (core, alternate and additional) attested to by the Provider for the original attestation period. We determined if the Provider reported on the three core and additional clinical quality measures. For any core measures reported at zero, we verified that an alternate measure was reported. We compared supporting documentation obtained from the Provider for the attestation period with the criteria required for the identified measures and determined if the measures or exclusion criteria was met.

See Meaningful Use Results below.

Meaningful Use Results

We found that the Provider met the 13 Meaningful Use Core Measures, met five Meaningful Use Menu Measures, and met six Clinical Quality Measures.

Responsible Party's Written Representation

The Provider declined to submit a signed representation letter acknowledging responsibility for maintaining records and complying with applicable MPIP regulations; making available all documentation related to compliance; responding fully to our inquiries; reporting any non-compliance subsequent to the end of the engagement period; and disclosing all communications received from regulatory agencies alleging noncompliance with the Ohio MPIP rules.

This agreed-upon procedures engagement was conducted in accordance with the American Institute of Certified Public Accountants' attestation standards. We were not engaged to and did not conduct an examination or review, the objective of which would be the expression of an opinion or conclusion, respectively, on the Provider's compliance with the requirements of the Medicaid Provider Incentive Program. Accordingly, we do not express such an opinion or conclusion. Had we performed additional procedures, other matters might have come to our attention that would have been reported.

This report is intended solely for the information and use of the Provider and the Ohio Department of Medicaid, and is not intended to be, and should not be used by anyone other than the specified parties.
