INDEPENDENT AUDITOR'S REPORT

Groveport Madison Local School District
Franklin County
4400 Marketing Place, Suite B
Groveport, Ohio 43125

To the Board of Education:

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, the major fund, and the aggregate remaining fund information of the Groveport Madison Local School District, Franklin County, Ohio (the District), as of and for the year ended June 30, 2019, and the related notes to the financial statements, which collectively comprise the District's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for preparing and fairly presenting these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes designing, implementing, and maintaining internal control relevant to preparing and fairly presenting financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to opine on these financial statements based on our audit. We audited in accordance with auditing standards generally accepted in the United States of America and the financial audit standards in the Comptroller General of the United States' *Government Auditing Standards*. Those standards require us to plan and perform the audit to reasonably assure the financial statements are free from material misstatement.

An audit requires obtaining evidence about financial statement amounts and disclosures. The procedures selected depend on our judgment, including assessing the risks of material financial statement misstatement, whether due to fraud or error. In assessing those risks, we consider internal control relevant to the District's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not to the extent needed to opine on the effectiveness of the District's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of management's accounting policies and the reasonableness of their significant accounting estimates, as well as our evaluation of the overall financial statement presentation.

We believe the audit evidence we obtained is sufficient and appropriate to support our audit opinions.

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the major fund, and the aggregate remaining fund information of the Groveport Madison Local School District, Franklin County, Ohio, as of June 30, 2019, and the respective changes in financial position and cash flows thereof and the budgetary comparison for the General fund thereof for the year then ended in accordance with the accounting principles generally accepted in the United States of America.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require this presentation to include *management's discussion and analysis*, and schedules of net pension and other post-employment benefit liabilities and pension and other post-employment benefit contributions listed in the table of contents, to supplement the basic financial statements. Although this information is not part of the basic financial statements, the Governmental Accounting Standards Board considers it essential for placing the basic financial statements in an appropriate operational, economic, or historical context. We applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, consisting of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, to the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not opine or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to opine or provide any other assurance.

Supplementary and Other Information

Our audit was conducted to opine on the District's basic financial statements taken as a whole.

The Schedule of Expenditures of Federal Awards presents additional analysis as required by Title 2 U.S. Code of Federal Regulations (CFR) Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards and is not a required part of the financial statements.

The schedule is management's responsibility, and derives from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. We subjected this information to the auditing procedures we applied to the basic financial statements. We also applied certain additional procedures, including comparing and reconciling this information directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves in accordance with auditing standards generally accepted in the United States of America. In our opinion, this information is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated March 19, 2020, on our consideration of the District's internal control over financial reporting and our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements and other matters. That report describes the scope of our internal control testing over financial reporting and compliance, and the results of that testing, and does not opine on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the District's internal control over financial reporting and compliance.

MANAGEMENT'S DISCUSSION & ANALYSIS
FOR THE FISCAL YEAR ENDED JUNE 30, 2019
UNAUDITED

As management of the Groveport Madison Local School District (the District), we offer readers of the District's financial statements this narrative overview and analysis of the financial activities of the District for the fiscal year ended June 30, 2019. The intent of this discussion and analysis is to look at the District's financial performance as a whole; readers should also review the basic financial statements and notes to enhance their understanding of the District's financial performance.

Financial Highlights

- The assets and deferred outflows of resources of the District exceeded its liabilities and deferred inflows of resources at the close of the most recent fiscal year by \$9.5 million (net position), an increase of \$13.6 million during the fiscal year.
- As of the close of the current fiscal year, the District's governmental funds reported combined ending fund balances of \$34.8 million, a decrease of \$1.2 million from the close of the prior fiscal year.

Overview of the Financial Statements

This discussion and analysis is intended to serve as an introduction to the District's basic financial statements. The District's basic financial statements comprise three components: 1) government-wide financial statements, 2) fund financial statements, and 3) notes to the basic financial statements.

Government-wide financial statements. The government-wide financial statements are designed to provide readers with a broad overview of the District's finances, in a manner similar to private-sector business.

The *statement of net position* presents information on all of the District's assets, deferred outflows of resources, liabilities, and deferred inflows of resources, with the difference reported as net position. Over time, increases or decreases in net position may serve as a useful indicator of whether the financial position of the District is improving or deteriorating.

The *statement of activities* presents information showing how the District's net position changed during the most recent fiscal year. All changes in net position are reported as soon as the underlying event giving rise to the change occurs, regardless of the timing of related cash flows. Thus, revenues and expenses are reported in this statement for some items that will only result in cash flows in future fiscal periods (e.g. uncollected taxes and earned but unused vacation leave).

All activities of the District are accounted for as governmental activities. These activities include instruction, support services, non-instructional services, co-curricular activities, interest and fiscal charges, and bond issuance costs.

The reader will also need to consider non-financial factors such as property tax base, current property tax laws, student enrollment growth, and facility conditions in arriving at their conclusion regarding the overall health of the District.

Fund Financial Statements. A fund is a grouping of related accounts that is used to maintain control over resources that have been segregated for specific activities or objectives. The District, like other state and local governments, uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements. All of the funds of the District can be divided into three categories: governmental funds, proprietary funds, and fiduciary funds.

GROVEPORT MADISON LOCAL SCHOOL DISTRICT
FRANKLIN COUNTY
MANAGEMENT'S DISCUSSION & ANALYSIS
FOR THE FISCAL YEAR ENDED JUNE 30, 2019

Governmental Funds. Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike government-wide financial statements, governmental fund financial statements focus on near-term inflows and outflows of spendable resources, as well as on balances of spendable resources available at the end of the fiscal year. Such information may be useful in evaluating the District's near-term financing requirements.

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for governmental funds with similar information presented for governmental activities in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's near-term financing decisions. Both the governmental fund balance sheet and the governmental fund statement of revenues, expenditures, and changes in fund balances provide a reconciliation to facilitate this comparison between governmental funds and governmental activities.

The District maintains 15 individual governmental funds. Information is presented separately in the governmental fund balance sheet and in the governmental fund statement of revenues, expenditures, and changes in fund balances for the General Fund, which is considered to be a major fund. Data from the other 14 governmental funds are combined into a single, aggregated presentation.

The District adopts an annual appropriated budget for its general fund. A budgetary comparison statement has been provided for the general fund to demonstrate compliance with this budget.

Proprietary Funds. Proprietary funds use the accrual basis of accounting; the same as on the entity-wide statements. Internal service funds are an accounting device used to accumulate and allocate costs internally among the District's various funds. The District uses an internal service fund to account for health claims and premiums. Because these services predominately benefit governmental rather than business-type functions, they have been included within governmental activities in the governmental-wide financial statements.

Fiduciary Funds. Fiduciary funds are used to account for resources held for the benefit of parties outside the District. Fiduciary funds are not reflected in the government-wide financial statements because the resources of those funds are not available to support the District's own programs. The accounting used for fiduciary funds is much like that used in the private sector.

Notes to the basic financial statements. The notes provide additional information that is essential to a full understanding of the data provided in the government-wide and fund financial statements.

Other Information. In addition to the basic financial statements and accompanying notes, this report also presents required supplementary information concerning the District's progress in funding its obligation to provide pension and other post-employment benefits to its employees.

Government-wide Financial Analysis

As noted earlier, net position may serve over time as a useful indicator of a government's financial position. In the case of the District, assets and deferred outflows of resources exceed liabilities and deferred inflows of resources by \$9.5 million at the close of the current fiscal year.

Current and Other Assets, Capital Assets, Net, and Net Investment in Capital Assets increased significantly in comparison with the prior fiscal year-end. Capital Assets, Net and Net Investment in Capital Assets fluctuated primarily as the result of spending down resources related to state and locally funded construction projects, most notably the Ohio Facilities Construction Commission (OFCC) project. Current and Other Assets increased primarily due to the recognition of a Net OPEB Asset for the fiscal year. Although cash and investments related to the OFCC project decreased significantly, pooled cash increased due to increased state foundation revenues and property tax collections.

Current Liabilities decreased due to a decrease in liabilities related to the OFCC project. Long-term Liabilities decreased due to scheduled principal payments. The net pension and net OPEB liabilities and related deferred outflows and inflows of resources all fluctuated significantly in comparison with the prior fiscal year-end. These fluctuations are primarily the result of changes in benefit terms, changes in actuarial assumptions, and greater than expected returns on pension plan investments.

A portion of the District's net position reflects its investment in capital assets (e.g. land, buildings, furniture and equipment), less any related debt used to acquire those assets that is still outstanding. The District uses these capital assets to provide services; consequently, these assets are not available for future spending. Although the District's investment in its capital assets is reported net of related debt, it should be noted that the resources needed to repay this debt must be provided from other sources, since the capital assets themselves cannot be used to liquidate these liabilities.

Charges for services decreased in comparison with the prior fiscal year. This decrease is primarily due to a decrease in tuition revenue received through the state foundation. Operating grants and contributions increased primarily due to an increase in IDEA B Special Education and Title IV-A funding. Unrestricted grants and entitlements increased due to an increase in state foundation funding. Investment earnings increased due to significant cash balances on hand during the fiscal year and an improvement in market conditions. Miscellaneous revenue decreased due to a \$140,000 close-out payment received related to the close out of the Groveport Madison Cruiser Academy in 2017.

GROVEPORT MADISON LOCAL SCHOOL DISTRICT
FRANKLIN COUNTY
MANAGEMENT'S DISCUSSION & ANALYSIS
FOR THE FISCAL YEAR ENDED JUNE 30, 2019

Total Expenses increased significantly in comparison with the prior fiscal year. This increase is primarily the result of a decrease in negative net pension/OPEB expense from \$25.2 million in fiscal year 2018 to \$0.2 million in fiscal year 2019. This decrease in negative net pension/OPEB expense, primarily the result of changes in benefit terms, changes in actuarial assumptions, and greater than expected returns on pension plan investments, resulted in an increase in total expenses, allocated amongst the various expense functions, of \$25.0 million. This increase was partially offset by a decrease for a \$3.0 million loss on disposal of capital assets recorded in 2018. Otherwise, there were slight increases in various functions due to increases in personnel costs.

The statement of activities shows the cost of program services and the charges for services and grants offsetting those services. The table below reflects the costs of program services and the net cost of those services after taking into account program revenues. General revenues including tax revenue, unrestricted State entitlements and investment earnings must support the net cost of program services.

A comparative analysis of fiscal year 2019 to 2018 follows:

Total				

General revenues, consisting primarily of local property taxes and unrestricted state entitlements, comprise 87% of the District's total revenues. The net cost of services column highlights the District's reliance upon general revenues reflecting the need for \$74.0 million in support.

The property tax laws in Ohio create the need to periodically seek voter approval for additional operating funds. Tax revenues generated from a levy do not increase as a result of inflation. An operating levy is approved for a fixed millage rate, but the rate is reduced for inflation with the effect of providing the District the same amount of tax dollars as originally approved. Therefore, school districts such as ours that are dependent upon property taxes as a primary source of revenue must periodically return to the ballot and ask voters for additional resources to maintain current programs. Since the District must rely heavily on voter approval of operating tax issues, management of the resources is of paramount concern to the District's administration and the voting public.

Financial Analysis of the District's Funds

As noted earlier, the District uses fund accounting to ensure and demonstrate compliance with finance-related legal requirements.

Governmental Funds

The focus of the District's governmental funds is to provide information on near-term inflows, outflows, and balances of spendable resources. Such information is useful in assessing the District's financing requirements. In particular, unreserved fund balance may serve as a useful measure of the District's net resources available for spending at the end of the fiscal year.

As of the end of the current fiscal year, the District's governmental funds reported combined ending fund balances of \$34.8 million, a decrease of \$1.2 million from the prior fiscal year.

The schedule below indicates the fund balance and the total change in fund balance for June 30, 2019 and 2018.

	Fund Balance June 30, 2019	Fund Balance June 30, 2018	Change
General Fund	\$ 26,258,383	\$ 23,594,284	\$ 2,664,099
Other Governmental Funds	8,548,993	12,444,226	(3,895,233)
Total	<u>\$ 34,807,376</u>	<u>\$ 36,038,510</u>	<u>\$ (1,231,134)</u>

General Fund

The General Fund is the chief operating fund of the District. At the end of the current fiscal year, unassigned fund balance in the General Fund was \$7.3 million, while total fund balance was \$26.3 million.

A comparative analysis of fiscal year 2019 to 2018 General Fund revenues is as follows:

	Fiscal Year 2019	Fiscal Year 2018	Percent Change
Property Taxes	\$ 34,874,778	\$ 34,665,330	0.6%
Payments in Lieu of Taxes	1,907,698	1,905,429	0.1%
Intergovernmental	45,928,303	44,588,861	3.0%
Investment Income	753,116	126,689	494.5%
Tuition and Fees	842,926	1,415,128	-40.4%
Charges for Services	52,695	42,521	23.9%
Other	358,288	624,313	-42.6%
Total	<u>\$ 84,717,804</u>	<u>\$ 83,368,271</u>	<u>1.6%</u>

Intergovernmental revenue increased significantly due to an increase in state foundation funding. Tuition and Fees decreased in comparison with the prior fiscal year. This decrease is primarily the result of the reduction of tuition funding received through the state foundation. Miscellaneous revenue decreased significantly in comparison with the prior fiscal year. This decrease is related to a close-out receipt received in 2018 related to the closure of the Groveport Madison Cruiser Academy in 2017.

A comparative analysis of fiscal year 2019 to 2018 General Fund expenditures is as follows:

	Fiscal Year 2019	Fiscal Year 2018	Percent Change
Instruction	\$ 51,926,189	\$ 50,118,744	3.6%
Support Services	27,969,268	27,252,953	2.6%

Total	<u>\$ 81,127,126</u>	<u>\$ 78,755,793</u>	<u>3.0%</u>

Total Expenses also increased slightly in comparison with the prior fiscal year. This increase is primarily the result of increases in employee salary and fringe benefit costs.

General Fund Budget Information

The District's budget is prepared in accordance with Ohio law and is based on the budgetary basis of accounting, utilizing cash receipts and disbursements and encumbrances. Changes are made to the District's budget as changes in revenues and spending patterns are experienced.

The variances between the District's original and final estimated resources were insignificant.

The District's final appropriations were slightly less than original appropriations.

Capital Assets

At fiscal year-end, the District had approximately \$79.9 million in capital assets, net of accumulated depreciation, a \$4.1 million increase from the previous fiscal year. This increase represents the amount by which capital outlays (\$5.7 million) exceeded current year depreciation (\$1.7 million) and deletions, net (\$5,872). Detailed information regarding capital asset activity can be found in Note 9 to the basic financial statements.

Debt

At fiscal year-end, the District had \$49.7 million in outstanding long-term bonds, notes and certificates of participation, a decrease of \$1.7 million in comparison with the prior fiscal year. This decrease represents the amount in which current year principal payments (\$1.6 million) and amortization (\$76,109) exceeded current year accretion (\$22,775). Detailed information regarding general long-term obligations can be found in Note 10 to the basic financial statements.

Under current state statutes, the District's general obligation bonded debt issues are subject to a legal limitation based on 9% of the total taxable valuation of real and personal property. At fiscal year-end, the District's general obligation debt was below the legal limit.

RECONCILIATION OF TOTAL GOVERNMENTAL FUND BALANCES TO
NET POSITION OF GOVERNMENTAL ACTIVITIES
JUNE 30, 2019

Total Governmental Fund Balances \$ 34,807,376

Amounts reported for governmental activities in the statement of net position are different because:

Capital assets used in governmental activities are not financial resources and therefore are not reported in the funds. 79,944,398

Other long-term assets are not available to pay for current period expenditures and therefore are deferred in the funds.

Property Taxes Receivable	776,768
Payments in Lieu of Taxes Receivable	700,200
Intergovernmental Receivable	2,161,113
Accrued Interest Receivable	26,776

An internal service fund is used by management to charge the cost of insurance to individual funds. The assets and liabilities of the internal service fund are included in governmental activities in the statement of net position. 5,345,386

The net OPEB asset, net OPEB liability and net pension liability are not due and payable in the current period; therefore, the asset and liabilities and related deferred inflows/outflows are not reported in governmental funds:

Deferred Outflows - Pension	22,979,967
Deferred Outflows - OPEB	2,099,148
Deferred Inflows - Pension	(4,408,711)
Deferred Inflows - OPEB	(7,165,341)
Net Pension Liability	(72,812,797)
Net OPEB Asset	4,198,455
Net OPEB Liability	(7,525,810)

RECONCILIATION OF THE STATEMENT OF REVENUES, EXPENDITURES AND CHANGES
IN FUND BALANCES OF GOVERNMENTAL FUNDS TO THE STATEMENT OF ACTIVITIES
FOR THE FISCAL YEAR ENDED JUNE 30, 2019

Net Change in Fund Balances - Total Governmental Funds \$ (1,231,134)

Amounts reported for governmental activities in the statement of activities are different because:

Governmental funds report capital outlays as expenditures. However, in the statement of activities, the cost of those assets is allocated over their estimated useful lives as depreciation expense.

Capital Outlay	5,733,407
Depreciation	(1,670,343)

The net effect of various miscellaneous transactions involving capital assets (i.e. sales, disposals, trade-ins, and donations).

Sales/Disposals	(5,872)
-----------------	---------

Internal service funds are used by management to charge costs of the employer share of payroll related costs and self insurance to individual funds. The expenditures of the internal service funds are included in governmental activities in the statement of net position.

3,036,266

Revenues in the statement of activities that do not provide current financial resources are not reported as revenues in the funds.

Property Taxes	236,435
Payments in Lieu of Taxes	(20,225)
Intergovernmental Revenues	(243,894)
Other Revenues	348,420

Contractually required contributions are reported as expenditures in governmental funds; however, the statement of net position reports these amounts as deferred outflows.

5,475,567

Except for amounts reported as deferred inflows/outflows, changes in the net pension liability are reported as pension expense in the statement of activities.

(8,439,174)

Except for amounts reported as deferred inflows/outflows, changes in the net OPEB asset and net OPEB liability are reported as OPEB expense in the statement of activities.

8,641,372

The issuance of long-term debt (e.g. bonds, leases) provides current financial resources to governmental funds, while the repayment of the principal of long-term debt consumes the current financial resources of governmental funds. Neither transaction, however, has any effect on net position.

Principal Repayments	1,744,815
Amortization of Premium and Discount and Deferred Amount on Refunding	40,901
Capital Appreciation Bond Accretion	(22,775)
Accrued Interest Payable	7,408

Some expenses reported in the statement of activities do not require the use of current financial resources and therefore are not reported as expenditures in the funds.

Compensated Absences	(58,193)

NOTE 1 – REPORTING ENTITY

The Groveport Madison Local School District (the District) is a body politic and corporate established for the purpose of exercising the rights and privileges conveyed to it by the constitution and laws of the State of Ohio. The District operates under a locally elected five-member Board form of government consisting of five members elected at-large staggered four year terms. The first official body designated as the Groveport Madison Board of Education was formed in 1848. The District provides educational services as authorized by state and/or federal guidelines.

The Board controls the District's 11 instructional/support facilities staffed by 203 non-certificated personnel and 458 certificated full time personnel who provide services to 6,275 students and other community members.

A reporting entity is comprised of the primary government, component units and other organizations that are included to ensure that the financial statements are not misleading. The primary government of the District consists of all funds, departments, boards and agencies that are not legally separate from the District. For the District, this includes general operations, food service, and student related activities of the District. The following activities are included within the reporting entity:

Parochial Schools – Within the District Boundaries are Madison Christian and Brice Christian Academy. Current State legislation provides funding to these parochial schools. The monies are received and disbursed on behalf of the parochial schools by the Treasurer of the District, as directed by the parochial schools. The District accounts for these activities in a special revenue fund for financial reporting purposes.

Component units are legally separate organizations for which the District is financially accountable. The District is financially accountable for an organization if the District appoints a voting majority of the organization's governing board and (1) the District is able to significantly influence the programs or services performed or provided by the organization; or (2) the District is legally entitled to or can otherwise access the organization's resources; or (3) the District is legally obligated or has otherwise assumed the responsibility to finance the deficits of, or provide financial support to, the organization; or (4) the District is obligated for the debt of the organization. Component units may also include organizations that are fiscally dependent on the District in that the District approves the budget, the issuance of debt or the levying of taxes. The District had no component units for the fiscal year ended June 30, 2019.

The following entities which perform activities within the District boundaries for the benefit of its residents are excluded from the accompanying financial statements because the District is not financially accountable for these entities nor are they fiscally dependent on the District.

Parent Teacher Association – The District is not involved in the budgeting or management is not responsible for any debt and has no influence over the organization.

Groveport Community School – The community school began operations in September 2006 and is affiliated with Imagine Schools, a national operator of nonprofit public charter schools. The District is not involved in the budgeting or management of the community school and is not responsible for any debt nor has influence over the community school's operations.

Jointly Governed Organizations

Metropolitan Educational Technology Association – The Metropolitan Educational Technology Association (META), is a jointly governed organization. The organization is composed of over one hundred members including school districts, joint vocational schools, educational service centers, and libraries covering 57 counties in Ohio.

NOTE 1 – REPORTING ENTITY (Continued)

The META helps its members purchase services, insurances, supplies, and other items at a discounted rate. META also provides a variety of services through its data processing center to numerous member districts (“C” sites) around the State of Ohio, with the major emphasis being placed on fiscal services. META also provides services to the District including pupil scheduling, attendance reporting, and grade reporting. The governing board of META is composed of either the superintendent, a designated representative or a member of the board of education for each participating school district in Franklin County (18 school districts) and one representative from each county. META is not dependent upon the continued participation of the District and the District does not maintain an equity interest in or financial responsibility for META. Financial statements for META can be obtained at 2100 City Gate Drive, Columbus, Ohio 43219. The amount paid to META during the fiscal year was \$150,524.

Central Ohio Special Education Regional Resource Center – The Central Ohio Special Education Regional Resource Center (COSERRC) is a jointly governed organization operated by a Governing Board that is composed of superintendents of member school districts in central Ohio which comprise sixty percent of the Board, two parents of children with disabilities, one representative of a chartered nonpublic school, one representative of a county board of Mental Retardation and Developmental Disabilities, representatives of universities and students and persons with disabilities representations. The District participates in the following services of COSERRC: Identification and Program Development Project, Regional Educational Assessment Programming Project, Instructional Resource Center Project, and the Early Childhood Services Project. These projects assist the District in complying with mandates of Public Law 99-456 for educating children with disabilities. There is no financial commitment made by the districts involved in COSERRC. COSERRC is not dependent upon the continued participation of the District and the District does not maintain an equity interest in or financial responsibility for the Council. The amount paid to COSERRC during the fiscal year was \$0.

Eastland-Fairfield Career & Technical Schools – The Eastland-Fairfield Career & Technical Schools is a distinct political subdivision of the State of Ohio operated under the direction of a Board consisting of one representative from each of the participating school districts’ elected boards, which possesses its own budgeting and taxing authority. To obtain financial information write to the Eastland-Fairfield Career & Technical Schools, Dawn Lemley, who serves as Treasurer, at 4300 Amalgamated Place, P.O. Box 419, Groveport, Ohio 43125-0419. The amount paid to Eastland-Fairfield Career & Technical Schools during the fiscal year was \$2,700.

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The financial statements of the District have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP) as applied to governmental units. The GASB is the accepted standard-setting body for establishing governmental accounting and financial reporting principles. The most significant of the District’s accounting policies are described below.

(a) Fund Accounting

The District’s accounts are maintained on the basis of funds, each of which is considered a separate accounting entity. Fund accounting is designed to demonstrate legal compliance and to aid management by segregating transactions related to specific District functions or activities. The operation of each fund is accounted for within a separate set of self-balancing accounts.

FOR THE FISCAL YEAR ENDED JUNE 30, 2019**

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Major Governmental Funds

General Fund — The General Fund is the general operating fund of the District and is used to account for all financial resources except those required to be accounted for in another fund.

Other Governmental Funds — The other governmental funds account for food services, co-curricular activities, federal and state grants, and other resources whose use is restricted for a particular purpose.

Proprietary Funds

Internal Service Funds – Funds provided to account for money received from other funds as payment for providing medical and prescription insurance. Payments are made to a third-party administrator for claims payments, claims administration and stop-loss coverage.

Fiduciary Funds

Fiduciary Funds — Fiduciary funds are used to account for assets held by the District in a trustee capacity or as an agent for individuals, private organizations, other governmental units and/or other funds. The District's fiduciary funds include private purpose trust and agency funds. Private purpose trust funds account for scholarship programs for students. Agency funds are custodial in nature (assets equal liabilities) and do not involve measurement of results of operations. The District's agency funds account for student activities, and the District's flexible spending account.

(b) Basis of Presentation

Government-wide Financial Statements – The statement of net position and the statement of activities display information about the District as a whole. These statements include the financial activities of the primary government, except for the fiduciary funds. Internal service fund activity is eliminated to avoid “doubling up” revenues and expenses. Interfund services provided and used are not eliminated in the process of consolidation.

The government-wide statements are prepared using the economic resources measurement focus. This approach differs from the manner in which governmental fund financial statements are prepared. Governmental fund financial statements therefore include reconciliations with brief explanations to better identify the relationship between the government-wide statements and the statements for governmental funds.

The government-wide statement of activities presents a comparison between direct expenses and program revenues for each function or program of the governmental activities of the District. Direct expenses are those that are specifically associated with a service, program or department and therefore clearly identifiable to a particular function. Program revenues include amounts paid by the recipient of goods or services offered by the program, grants, and contributions that are restricted to meeting the operational or capital requirements of a particular program. Revenues not classified as program revenues are presented as general revenues of the District.

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Fund Financial Statements - Fund financial statements report detailed information about the District. The focus of governmental fund financial statements is on major funds rather than reporting funds by type. Each major fund is presented in a separate column, and all nonmajor funds are aggregated into one column. The internal service fund is presented in a single column on the face of the proprietary fund statements. Fiduciary funds are reported by fund type.

The accounting and financial reporting treatment applied to a fund is determined by its measurement focus. All governmental funds are accounted for using a flow of current financial resources measurement focus.

With this measurement focus, only current assets and current liabilities and deferred inflows of resources generally are included on the balance sheet. Operating statements of these funds present increases (i.e., revenues and other financial sources) and decreases (i.e., expenditures and other financing uses) in fund balance.

Like the government-wide statements, the internal service fund is accounted for on a flow of economic resources measurement focus. All assets and liabilities associated with the operation of this fund are included on the statement of net position. The statement of changes in net position presents increases (i.e. revenues) and decreases (i.e. expenses) in total net position. The statement of cash flows provides information about how the District finances and meets cash flow needs of its proprietary activity.

Proprietary funds distinguish operating revenues and expenses from nonoperating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operation. The principal operating revenues of the District's internal service fund are charges for services. Operating expenses for the internal service fund include claims and purchased service expenses. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

(c) Basis of Accounting

Basis of accounting refers to when revenues and expenditures or expenses are recognized in accounts and reported in the financial statements. Government-wide financial statements are prepared using the accrual basis of accounting. The fund financial statements are prepared using the modified accrual for governmental funds and the accrual basis for proprietary and fiduciary funds.

Revenue Exchange and Non-exchange Transactions

Revenue resulting from exchange transactions is recorded on the accrual basis when the exchange takes place. On a modified accrual basis, revenues are recognized in the accounting period when they become both measurable and available. Available means collectible within the current period or soon enough thereafter to be used to pay liabilities of the current fiscal year. The available period of the District is sixty days after fiscal year-end.

Nonexchange transactions, in which the District receives value without directly giving equal value in return, include property taxes, payments in lieu of taxes, grants, entitlements and donations. On an accrual basis, revenue from property taxes is recognized in the fiscal year in which the taxes are levied, provided they have been advanced or are available to be advanced to the District. Otherwise, they are reported as a deferred inflow of resources. Revenue from payments in lieu of taxes, grants, entitlements and donations is recognized in the fiscal year in which all eligibility requirements have been met. On the modified accrual basis, revenue from nonexchange transactions must also be available before it can be recognized.

FRANKLIN COUNTY
NOTES TO THE BASIC FINANCIAL STATEMENTS
FOR THE FISCAL YEAR ENDED JUNE 30, 2019

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

In applying the susceptible to accrual concept under the modified accrual basis, the following revenue sources are deemed both measurable and available: property taxes available for advance, payments in lieu of taxes, tuition, grants and student fees. Unearned revenue represents amounts under the accrual and modified accrual basis of accounting for which asset recognition criteria have not yet been met because such amounts have not yet been earned.

Deferred Outflows/Inflows of Resources

In addition to assets, the statements of financial position will sometimes report a separate section for deferred outflows of resources. Deferred outflows of resources represent a consumption of net position that applies to a future period and will not be recognized as an outflow of resources (expenses/expenditure) until then. For the District, deferred outflows of resources are reported on the government-wide statement of net position for pensions and other postemployment benefits (OPEB). The deferred outflows of resources related to pension and OPEB plans are explained in Notes 13 and 14. In addition, deferred outflows of resources include a deferred charge on debt refunding. A deferred charge on refunding results from the difference in the carrying value of refunded debt and its reacquisition price. The amount is deferred and amortized over the shorter of the refunded or refunding debt.

In addition to liabilities, the statement of financial position reports a separate section for deferred inflows of resources. Deferred inflows of resources represent an acquisition of net position that applies to a future period(s) and will not be recognized as an inflow of resources (revenue) until that time. For the District, deferred inflows of resources include property taxes, unavailable revenue, pension, and OPEB. Property taxes represent amounts for which there is an enforceable legal claim as of June 30, 2019, but which were levied to finance fiscal year 2020 operations. These amounts have been recorded as a deferred inflow of resources on both the government-wide statement of net position and the governmental funds balance sheet. Unavailable revenue is reported only on the governmental funds balance sheet and represents receivables which will not be collected within the available period. Unavailable revenue includes delinquent property taxes. These amounts are deferred and recognized as an inflow of resources in the period the amounts become available. Deferred inflows of resources related to pension and OPEB plans are reported on the government-wide statement of net position (See Notes 13 and 14).

Expenditures/Expenses

On the accrual basis of accounting, expenses are recorded at the time they are incurred. The fair value of donated commodities used during the fiscal year is reported in the statement of revenues, expenditures changes in fund balances as an expenditure with a like amount reported as intergovernmental revenue. Unused donated commodities are reported as intergovernmental revenue. The measurement focus of governmental fund accounting is on the flow of current financial resources. Expenditures are generally recognized in the accounting period in which the related fund liability is incurred except for (1) principal and interest on general long-term debt, which is recorded when due, and (2) the costs of accumulated unpaid vacation and sick leave are reported as fund liabilities in the period in which they will be liquidated with available financial resources rather than in the period earned by employees. Allocations of cost, such as depreciation, are not recognized in governmental funds.

(d) Budgetary Process

All funds, except agency funds, are legally required to be budgeted and appropriated. The major documents prepared are the tax budget, the certificate of estimated resources, and the appropriations resolution, all of which are prepared on the budgetary basis of accounting. The tax budget demonstrates a need for existing or increased tax rates.

NOTES TO THE BASIC FINANCIAL STATEMENTS
FOR THE FISCAL YEAR ENDED JUNE 30, 2019

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

The certificate of estimated resources establishes a limit on the amount the Board of Education may appropriate. The appropriations resolution is the Board's authorization to spend resources and sets annual limits on expenditures plus encumbrances at the level of control selected by the Board. The legal level of budgetary control selected by the Board is at the fund level. Any budgetary modifications at this level may only be made by the Board of Education.

The certificate of estimated resources may be amended during the year if the projected increases or decreases in revenue are identified by the Treasurer. The amounts reported as the original budgeted amounts on the budgetary statements reflect the amounts on the certificate of estimated resources when the original appropriations were adopted. The amounts reported as the final budgeted amounts on the budgetary statements reflect the amounts on the amended certificate of estimated resources in effect at the time the final appropriations were passed by the Board.

The appropriation resolution is subject to amendment throughout the year with the restriction that appropriations cannot exceed estimated resources. The amounts reported as the original budgeted amounts reflect the first appropriation resolution for that fund that covered the entire fiscal year, including amounts automatically carried forward from prior fiscal years. The amounts reported as the final budgeted amounts represent the final appropriation amounts passed by the Board during the fiscal year.

(e) Cash and Investments

Monies received by the District are pooled in a central bank account, except for certain construction-related funds, with individual fund balance integrity retained throughout. During the fiscal year, investments consisted of STAR Ohio, money market mutual funds, commercial paper, negotiable certificates of deposit, and federal agency securities.

During fiscal year 2019, the District invested in STAR Ohio. STAR Ohio (the State Treasury Asset Reserve of Ohio), is an investment pool managed by the State Treasurer's Office which allows governments within the State to pool their funds for investment purposes. STAR Ohio is not registered with the SEC as an investment company, but has adopted Governmental Accounting Standards Board (GASB). Statement No. 79, "Certain External Investment Pools and Pool Participants." The District measures their investment in STAR Ohio at the net asset value (NAV) per share provided by STAR Ohio. The NAV per share is calculated on an amortized cost basis that provides an NAV per share that approximates fair value.

Investments of the District's cash management pool and investments with an original maturity of three months or less at the time they are purchased by the District are presented on the financial statements as cash equivalents. Investments with an initial maturity of more than three months that were not purchased from the pool are reported as investments.

Following Ohio statutes, the Board of Education has, by resolution, specified the funds to receive an allocation of investment earnings. Investment earnings credited to the General Fund during the fiscal year amounted to \$753,116. Other governmental funds were credited \$168,061.

(f) Prepaid Items

Payments made to vendors for services that will benefit periods beyond the current fiscal year are recorded as prepaid items using the consumption method. A current asset for the prepaid amount is recorded at the time of purchase and an expenditure/expense is reported in the fiscal year which services are consumed.

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

(g) Inventory

On government-wide financial statements, inventories are presented at the lower of cost or market and donated commodities are presented at fair value. Inventories are recorded on a first-in, first-out basis and are expensed when used. On fund financial statements, inventories of governmental funds are stated at cost. Cost is determined on a first-in, first-out basis. The cost of inventory items is recorded as expenditure when purchased. Inventories of governmental funds consist of donated and purchased food held for resale.

(h) Capital Assets and Depreciation

General capital assets are reported in the government-wide statement of net position but are not reported in the fund financial statements.

All capital assets are capitalized at cost (or estimated historical cost) and updated for additions and retirements during the fiscal year. Capital assets acquired before July 1, 2003 are capitalized at an estimated cost using computerized reverse-trending techniques applied against the estimate of current replacement cost. Donated capital assets are recorded at their acquisition values as of the date received.

The District follows the policy of not capitalizing assets with a cost of less than \$1,000 and a useful life of less than one year. The District does not possess any infrastructure.

All reported capital assets, with the exception of land and construction in progress are depreciated. Improvements are depreciated over the remaining useful lives of the related capital assets. Depreciation is computed using the straight-line method over the following useful lives:

Land Improvements	10 – 40
Buildings and Improvements	10 – 40
Furniture and Equipment	5 – 15
Vehicles	5 – 10

(i) Interfund Activity

Exchange transactions between funds are reported as revenues in the seller funds and as expenditure/expenses in the purchaser funds.

Flows of cash or goods from one fund to another without a requirement for repayment are reported as interfund transfers. Interfund transfers are reported as other financing sources/uses in governmental funds. These transfers are eliminated from the statement of activities.

On fund financial statements, short-term interfund loans are classified as due to/from other funds. These amounts are eliminated in the statement of net position.

(j) Restricted Assets

Assets are reported as restricted assets when limitations on their use change the normal understanding of the availability of the asset. Such constraints are either imposed by creditors, contributors, grantors, or laws of other governments or imposed by enabling legislation. The District's restricted assets balance at fiscal year-end was zero.

GROVEPORT MADISON LOCAL SCHOOL DISTRICT
FRANKLIN COUNTY
NOTES TO THE BASIC FINANCIAL STATEMENTS
FOR THE FISCAL YEAR ENDED JUNE 30, 2019

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

(k) *Accrued Liabilities and Long-Term Obligations*

In general, governmental fund payables and accrued liabilities that once incurred, are paid in a timely manner and in full from current financial resources are reported as obligations of the funds. However, claims and judgments, compensated absences, and special termination benefits that will be paid from governmental funds are reported as a liability in the fund financial statements only to the extent that they are due for payment during the current fiscal year.

In the government-wide financial statements, long-term obligations are reported as liabilities in the governmental activities statement of net position. Bond premiums and discounts are deferred and amortized over the life of the bonds using the effective interest rate method. Bonds payable are reported net of the applicable bond premium or discount. Bond issuance costs are expensed in the fiscal year of issuance.

In the fund financial statements, governmental fund types recognize bond premiums and discounts, as well as bond issuance costs, during the current period. The face amount of debt issued is reported as other financing sources. Premiums received on debt issuances are reported as other financing sources while discounts on debt issuances are reported as other financing uses. Issuance costs, whether or not withheld from the actual debt proceeds received, are reported as debt service expenditures.

(l) *Compensated Absences*

Vacation benefits and personal leave are accrued as a liability as the benefits are earned if the employees' rights to receive compensation are attributable to services already rendered and it is probable that the District will compensate the employees for benefits through paid time off or some other means. The District records a liability for accumulated unused vacation and personal leave time when earned for all employees.

Compensated absence leave benefits are accrued as a liability using the vesting method. The liability includes the employees who are currently eligible to receive termination benefits and those the District has identified as probable of receiving payment in the future. The amount is based on the accumulated sick leave and employees' wage rates at fiscal year-end, taking into consideration any limits specified in the District's termination policy. The District records a liability for accumulated unused sick leave for all employees after 15 years of service.

The entire sick leave benefit liability is reported on the government-wide financial statements.

On the governmental fund financial statements, sick leave benefits are recognized as liabilities and expenditures to the extent payments come due each period upon the occurrence of employee resignations and retirements. These amounts are recorded in the account "compensated absences payable" in the funds from which these payments will be made.

The amount is based on accumulated sick leave and employees' wage rates at fiscal year-end, taking into consideration any limits specified in the District's termination policy.

(m) *Pensions/Other Postemployment Benefits (OPEB)*

For purposes of measuring the net OPEB asset, net OPEB liability, net pension liability, deferred outflows of resources and deferred inflows of resources related to pensions/OPEB, and pension/OPEB expense, information about the fiduciary net position of the pension/OPEB plans and additions to/deductions from their fiduciary net position have been determined on the same basis as they are reported by the pension systems.

GROVEPORT MADISON LOCAL SCHOOL DISTRICT
FRANKLIN COUNTY
NOTES TO THE BASIC FINANCIAL STATEMENTS
FOR THE FISCAL YEAR ENDED JUNE 30, 2019

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. The pension/OPEB plans report investments at fair value.

(n) Net Position

Net Position represent the difference between assets and deferred outflows of resources and liabilities and deferred inflows of resources. Net investment in capital assets consists of capital assets, net of accumulated depreciation, reduced by the outstanding balances of any borrowings used for the acquisition, construction, or improvement of those assets. Net position is reported as restricted when there are limitations imposed on their use either through the enabling legislation adopted by the District or through external restrictions imposed by creditors, grantors, or laws or regulations of other governments. At fiscal year-end, none of the District's net position restrictions were the result of enabling legislation.

The District applies restricted resources when an expense is incurred for purposes for which both restricted and unrestricted net position are available.

(o) Fund Balance

GASB Statement No. 54, *Fund Balance Reporting* became effective for years beginning after June 15, 2010. The objective of this Statement is to enhance the usefulness of fund balance information by providing clearer fund balance classifications that can be more consistently applied and by clarifying the existing governmental fund type definitions. This Statement establishes fund balance classifications that comprise a hierarchy based primarily on the extent to which a government is bound to observe constraints imposed upon the use of the resources reported in governmental funds.

In accordance with this guidance, the District classifies its fund balance based on the purpose for which the resources were received and the level of constraint placed on the resources. The District may use the following categories:

Nonspendable - resources that are not in a spendable form (materials and supplies inventory) or have legal or contractual requirements to maintain the balance intact.

Restricted - resources that have external purpose restraints imposed on them by providers, such as creditors, grantors, or other regulators.

Committed – resources that can be used for the specified purposes imposed by a formal action (resolution) of the District Board of Education (the highest level of decision making authority). Those committed amounts cannot be used for any other purpose unless the District Board of Education removes or changes the specified use by taking the same action (resolution) it employed to previously commit those amounts.

Assigned - resources that are constrained by the District's intent to be used for specific purposes, but are neither restricted nor committed. Although no specific resolution has been made, the District Board of Education authorizes the Treasurer to assign fund balance. The Board may also assign fund balance as it does when appropriating fund balance to cover a gap between estimated revenue and appropriations in the subsequent year's appropriated budget.

Unassigned - residual fund balance within the General Fund not classified elsewhere above and all other governmental fund balances which have a negative fund balance.

GROVEPORT MADISON LOCAL SCHOOL DISTRICT
FRANKLIN COUNTY
NOTES TO THE BASIC FINANCIAL STATEMENTS
FOR THE FISCAL YEAR ENDED JUNE 30, 2019

NOTE 2 – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

The District applies restricted resources first when an expense is incurred for purposes which both restricted and unrestricted fund balance/net position are available. The District considers committed, assigned and unassigned fund balances, respectively, to be spent when expenditures are incurred for purposes for which any of the unrestricted fund balance classifications could be used.

(p) *Extraordinary and Special Items*

Extraordinary items are transactions or events that are both unusual in nature and infrequent in occurrence. Special items are transactions or events that are within the control of the District and that are either unusual in nature or infrequent in occurrence. There were no extraordinary events or special items that occurred during the fiscal year.

(q) *Management Estimates*

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenditures/expenses during the reported period. Actual results could differ from those estimates.

NOTE 3 – BUDGETARY BASIS OF ACCOUNTING

While the District is reporting financial position, results of operations, and changes in fund balances in accordance with GAAP, the budgetary basis, as provided by law, is based upon accounting for certain transactions on a basis of cash receipts, disbursements, and encumbrances. The Statement of Revenues, Expenditures, and Changes in Fund Balances - Budget and Actual (Non-GAAP Basis) – for the General Fund is presented on the budgetary basis to provide a meaningful comparison of actual results with the budget. The major differences between the budget basis and GAAP basis are as follows:

1. Revenues are recorded when received in cash (budget basis) as opposed to when susceptible to accrual (GAAP basis).
2. Expenditures are recorded when paid in cash (budget basis) as opposed to when the liability is incurred (GAAP basis).
3. Encumbrances are treated as expenditures (budget basis) rather than an assignment of fund balance (GAAP basis).
4. Advances in and advances out are operating transactions (budget basis) as opposed to balance sheet transactions (GAAP basis).
5. Due to the implementation of GASB 54, some funds were reclassified to the General Fund. These funds are not required to be included in the General Fund Budgetary Statement. Therefore, the activity from these funds is excluded with an adjustment for their change in fund balance.

NOTE 4 – DEPOSITS AND INVESTMENTS

The deposit and investment of the District's monies is governed by the provisions of the Ohio Revised Code (ORC). In accordance with these statutes, the District is authorized to invest in United States and State of Ohio bonds, notes, and other obligations; bank certificates of deposit; banker acceptances; commercial paper notes rated prime and issued by United States corporations; repurchase agreements secured by United States obligations; STAR Ohio; no-load money market mutual funds; and under limited circumstances, corporate debt interests. Earnings on investments are credited to various funds at the discretion of the Board which is in compliance with ORC Section 3315.01.

Investments in stripped principal or interest obligations, reverse repurchase agreements, and derivatives are prohibited. The issuance of taxable notes for the purpose of arbitrage, the use of leverage, and short selling are also prohibited. An investment must mature within five years from the date of purchase unless matched to a specific obligation or debt of the District, and must be purchased with the expectation that it will be held to maturity. Investments may only be made through specified dealers and institutions. Payment for investments may be made only upon delivery of the securities representing the investments, to the treasurer, or qualified trustee, or, if the securities are not represented by a certificate, upon receipt of confirmation of transfer from the custodian.

Protection of the District's deposits is provided by the Federal Deposit Insurance Corporation (FDIC), by eligible securities pledged by the financial institution as security for repayment, or by the financial institutions participation in the Ohio Pooled Collateral System (OPCS), a collateral pool of eligible securities deposited with a qualified trustee and pledged to the Treasurer of State to secure the repayment of all public monies deposited in the financial institution.

NOTE 4 – DEPOSITS AND INVESTMENTS (Continued)

Deposits

Deposits - Custodial credit risk for deposits is the risk that, in the event of bank failure, the District will not be able to recover deposits or collateral securities that are in the possession of an outside party. At fiscal year end, the carrying amount of the District's deposits was \$1,356,659, including \$74,976 in STAR Ohio Plus, and the bank balance was \$1,789,545.

Of the District's bank balance, \$876,705 was covered by the Federal Depository Insurance Corporation (FDIC) and the remaining balance was uninsured and collateralized. The District has no formal policy concerning custodial credit risk. The District's financial institution was approved for a collateral rate of 50 percent through the Ohio Pooled Collateral System.

Ohio law requires that deposits either be insured or be protected by:

1. Eligible securities pledged to the District and deposited with a qualified trustee by the financial institution as security for repayment whose market value at all times shall be at least 105 percent of the deposits being secured; or
2. Participation in the Ohio Pooled Collateral System (OPCS), a collateral pool of eligible securities deposited with a qualified trustee and pledged to the Treasurer of State to secure the repayment of all public monies deposited in the financial institution. OPCS requires the total market value of the securities pledged to be 102 percent of the deposits being secured or a rate set by the Treasurer of State.

Investments

At fiscal year end, the District had the following investments:

Investment Type	Measurement Amount	Percent of Total	Investment Maturities	
			Within 1 Year	1 to 3 Years
Money Market Funds	\$ 857,416	2.6%	\$ 857,416	\$ -
STAR Ohio	6,921,097	20.8%	6,921,097	-
Commercial Paper	3,955,760	11.9%	3,955,760	-

In accordance with GASB Statement No. 79, the District's investment in STAR Ohio is reported at amortized cost. For the fiscal year ended June 30, 2019, there were no limitations or restrictions on any participant withdrawals due to redemption notice periods, liquidity fees, or redemption gates. However, notice must be given 24 hours in advance of all deposits and withdrawals exceeding \$25 million. STAR Ohio reserves the right to limit the transaction to \$100 million, requiring the excess amount to be transacted the following business day(s), but only to the \$100 million limit.

NOTE 4 – DEPOSITS AND INVESTMENTS (Continued)

All other investments are reported at fair value. The District categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the asset. Level 1 inputs are quoted prices in active markets for identical assets; Level 2 inputs are significant other observable inputs; Level 3 inputs are significant unobservable inputs. The District reports its money market investment as a level 1 input and all other District investments as Level 2 inputs.

Credit Risk – Credit risk is the risk that an issuer or counterparty to an investment will be unable to fulfill its obligations. At fiscal year-end, STAR Ohio and money market funds were rated AAAm, while the federal agency securities were rated AA+ by Standard & Poor's and Aaa by Moody's. The District's negotiable certificates of deposit were unrated. The District has no formal policy concerning credit risk.

Concentration of Credit Risk – Concentration of credit risk is the risk of inability to recover the value of deposits, investments, or collateral securities in the possession of an outside party caused by a lack of diversification. The District places no limit on the amount it may invest in any one issuer, however, state statute limits investments in commercial paper and bankers' acceptances to 25% of the interim monies available for investment at any one time. The District's exposure to concentration risk is noted in the preceding table.

Interest Rate Risk – Interest rate risk is the risk that an interest rate change could adversely affect an investment's fair value. As a means of limiting its exposure to fair value losses arising from interest rates and according to state law, the District's investment policy limits investment portfolio maturities to five years or less. The District's exposure to interest rate risk is noted in the preceding table.

The following is a reconciliation of deposits and investments to the Statement of Net Position as of June 30, 2019:

NOTE 5 – PROPERTY TAXES

Property taxes are levied and assessed on a calendar year basis while the District’s fiscal year runs from July through June. First half tax collections are received by the District in the second half of the fiscal year. Second half tax distributions occur in the first half of the following fiscal year.

Property taxes include amounts levied against all real and public utility located in the school district. Real property tax revenue received in calendar year 2019 represents collections of calendar year 2018 taxes. Real property taxes received in calendar year 2019 were levied after April 1, 2018, on the assessed value listed as of January 1, 2018, the lien date. Assessed values for real property taxes are established by State law at thirty-five percent of appraised market value. Real property taxes are payable annually or semi-annually. If paid annually, payment is due December 31; if paid semiannually, the first payment is due December 31 with the remainder payable by June 20. Under certain circumstances, State statute permits alternate payment dates to be established.

Public utility property tax revenue received in calendar year 2019 represents collections of calendar year 2018 taxes. Public utility real and tangible personal property taxes received in calendar year 2019 became a lien December 31, 2017, were levied after April 1, 2018 and are collected in 2019 with real property taxes. Public utility real property is assessed at thirty-five percent of true value; public utility tangible personal property is currently assessed at varying percentages of true value.

Accrued property taxes receivable includes real property and public utility property taxes which are measurable as of fiscal year-end and for which there is an enforceable legal claim. Although total property tax collections for the next fiscal year are measurable, only the amount of real property taxes available as an advance at June 30 was levied to finance current fiscal year operations and is reported as revenue at fiscal year-end. The portion of the receivable not levied to finance current fiscal year operations is offset by a credit to deferred inflows of resources.

The District receives its property taxes from Franklin County. The County Auditor periodically advances to the District its portion of taxes collected. Second-half real property tax payments collected by the County by June 30, 2019, are available to finance fiscal year 2019 operations. The amount available to be advanced can vary based on the date the tax bills are sent. At fiscal year-end, the amount of property taxes that had been advanced, or was available to advance, to the General Fund, Bond Retirement Fund and Permanent Improvement Fund was \$13,996,856, \$763,073 and \$553,562, respectively. On a full accrual basis, collectible delinquent property taxes have been recorded as a receivable and revenue, while on a modified accrual basis the revenue has been deferred inflows of resources.

The assessed values upon which the fiscal year 2019 taxes were collected are:

	<u>2018 Second Half Collections</u>		<u>2019 First Half Collections</u>	
	<u>Amount</u>	<u>Percent</u>	<u>Amount</u>	<u>Percent</u>
Agricultural/Residential and Other Real Estate	\$ 858,750,800	93.2%	\$ 868,121,490	92.9%

NOTE 6 - TAX ABATEMENTS

Under Community Reinvestment Area (CRA) and other property tax abatements entered into by the Village of Obetz, City of Groveport, and the City of Columbus, the District's property tax revenues were reduced by \$3,044,012, \$6,220,259 and \$64,309 during the fiscal year, respectively. During the fiscal year, the District received \$1,015,399 and \$426,800 from the City of Groveport and Village of Obetz, respectively.

NOTE 7 – RECEIVABLES

Receivables at June 30, 2019, consisted of property taxes, payments in lieu of taxes, intergovernmental (due from other governments), interest, and accounts. All receivables are considered collectible in full due to the ability to foreclose for the nonpayment of taxes, the stable condition of State programs, and the current fiscal year guarantee of federal funds. All receivable amounts are expected to be received within one year with the exception of the Ohio Facilities Construction Commission Grant, revenue in lieu of taxes and delinquent property taxes. The Ohio Facilities Construction Commission Grant monies will be collected over the life of the construction of the new facilities. Revenue in lieu of taxes is collected over the term of the agreement. Property and income taxes, although ultimately collectible, include some portion of delinquencies that will not be collected within one year.

During fiscal year 2015, the School District was awarded \$28,285,963 for the construction of a High School from the Ohio Facilities Construction Commission. At June 30, 2019, there was \$1,715,175 still recorded as a receivable.

NOTE 8 – INTERFUND ACTIVITY

(a) Interfund Advances - On an as-needed basis, the District advances cash between funds to eliminate cash deficits. All advances are repaid in the following fiscal year. At fiscal year-end, receivables and payables that resulted from those advance transactions were as follows:

Fund	Due to the General Fund
Title I Disadvantaged Children	47,633
Improving Teacher Quality	11,317
Miscellaneous Federal Grants	1,404
	\$60,354

(b) Interfund Transfers - The primary purpose of interfund transfers is to provide supplemental funding other funds in accordance with Ohio Revised Code Sections 5705.14, 5705.15 and 5705.16. During the fiscal year, the District transferred \$939,437 from the general fund to the debt service fund and permanent improvement fund for debt service payments.

NOTE 10 – LONG TERM LIABILITIES (Continued)

Series 2011 Energy Conservation Note

On December 28, 2011, the District issued \$5,739,650 in unvoted general obligation notes for the purpose of purchasing energy conservation measures throughout the District. The notes were issued for a fifteen year period with an interest rate of 3% and a final maturity at December 1, 2026. These notes are a general obligation of the District for which the full faith and credit of the District is pledged for repayment.

Series 2012 Certificates of Participation - HVAC Lease Purchase Agreement

On May 17, 2012, the District entered into a series of one-year renewable lease-purchase agreements with Huntington National Bank (the Bank), whereas the District leases certain parcels of land to the Bank, and subsequently purchases and installs energy conservation measures at the school facilities located on the land (the Project Facilities), and the Bank, in turn, subleases the land, and leases the Project Facilities to the District. The Bank agreed to pre-pay \$4,445,895 in rental payments to fund the construction project. In turn, the District agreed to pay \$4,445,895 under the sublease at an interest rate of 3.15% maturing June 1, 2027. The lease was refunded in November 2015 paying off balance of the amount outstanding.

Series 2014 School Facilities Improvement Bonds

On August 7, 2014, the District issued \$33,303,594 in general obligation bonds for the purpose of carrying out a School Facilities Commission Project in the District. The bonds were issued for a thirty-eight year period with interest rates ranging from .35% to 5.0% and a final maturity at October 1, 2052. These bonds are a general obligation of the District for which the full faith and credit of the District is pledged for repayment. The bonds were issued at a premium in the amount of \$832,795.

Series 2015 Certificates of Participation

On December 1, 2015, the District entered into a series of one-year renewable lease-purchase agreements with Buckeye Leasing Services (the Bank), whereas the District agrees to finance the acquisition, construction, improvement, furnishing, and equipping of school facilities and lease the school facilities to the Bank, and the Bank, in turn, agrees to sublease the school facilities back to the District. The Bank agreed to pre-pay \$13,575,000 in rental payments. Of this amount, \$9,770,000 will be used to fund the acquisition, construction, improvement, furnishing, and equipping of school facilities and \$3,805,000 was used to refund the Series 2012 HVAC Lease Purchase Agreement. In turn, the District agrees to pay \$13,575,000 under the sublease at interest rates ranging from 2.0% to 4.0% maturing December 31, 2035.

In the event of default, the Bank may (i) request the District to promptly return possession of the school facilities to the Bank; (ii) sublease the school facilities for the account of the District and hold the District liable for all applicable lease payments and other payments due during the then current lease term to the effective date of such subleasing and for the difference between rental and other amounts paid by the sublessee pursuant to such sublease and the amount payable during the then current lease term by the District under the lease; and (iii) exercise any other right, remedy or privilege which may be available to it under the applicable laws of the State or any other applicable law or proceed by appropriate court action to enforce the terms of this lease or to recover damages for the breach of this lease or to rescind this lease as to the school facilities.

Series 2017 Athletic Facility Bond

On June 14, 2017, the District issued \$660,800 in general obligation bonds for the purpose of carrying out a Athletic Facility Project in the District. The bonds were issued for a four year period with an interest rate of 3.45% and a final maturity of February 1, 2021. These bonds are a general obligation of the District for which the full faith and credit of the District is pledged for repayment.

Series 2017 UTGO Refunding Bonds

On October 12, 2017, the District issued \$8,229,732 in refunding bond for the purpose of refunding the 2014 School Facilities Improvement Bonds. The bonds were issued for a twenty-seven year period with an interest rate of 3.62% and a final maturity at October 1, 2044. These bonds are a general obligation of the District for which the full faith and credit of the District is pledged for repayment. The bonds were issued at a premium in the amount of \$1,386,709.

Principal and interest requirements to retire long-term debt at June 30, 2019, are as follows:

Total	<u>\$ 47,849,885</u>	<u>\$ 32,833,925</u>	<u>\$ 80,683,810</u>

Debt service relating to the notes and the certificates of participation are recorded as expenditures in the Permanent Improvement Fund. The general obligation bonds will be paid from the Bond Retirement Fund. Obligations related to employee compensation are paid from the fund benefitting from their service. There is no repayment schedule for the net pension liability and net OPEB liability; however, employer pension and OPEB contributions are made from the fund benefitting from the employee's service. For additional information related to the net pension liability and net OPEB liability see Notes 13 and 14.

The Ohio Revised Code (ORC) provides that voted net general obligation debt of the District shall never exceed 9% and that unvoted indebtedness shall not exceed 1/10 of 1% of the total assessed valuation of the District. At fiscal year-end, the District's voted and unvoted debt limits were \$84,139,807 and \$934,887, respectively, and total applicable debt outstanding was within these limits.

NOTE 11 – CAPITAL LEASE OBLIGATIONS

The District has entered into a lease agreement as lessee for financing the acquisition of a modular unit. The lease agreement qualifies as a capital lease for accounting purposes and, therefore, has been recorded at the present value of future minimum lease payments as of the inception date. The asset acquired through this capital lease had a book value of \$117,645 at June 30, 2019. The future minimum lease obligations and the net present value of these minimum lease payments as of June 30, 2019, were as follows:

Fiscal Year	Principal	Interest	Total
2020	\$ 117,645	\$ 3,412	\$ 121,057

NOTE 12 – RISK MANAGEMENT

The District is exposed to various risks of loss related to torts, theft or, damage to, and destruction of assets, errors and omissions, injuries to employees and natural disasters. During the fiscal year, the District contracted with Argonaut Insurance Company, administered by McGowan Governmental Underwriters, for general liability insurance with a \$1,000,000 single occurrence limit and a \$3,000,000 aggregate. Property is also protected by Argonaut Insurance Company and holds a \$2,500 deductible. The District contracts with Delta Dental for dental coverage and Prudential to provide life insurance coverage for employees. Settled claims have not exceeded commercial coverage in any of the past three fiscal years. There have been no significant reductions in insurance coverage from the prior fiscal year.

On January 1, 2015, the District became self-insured for workers' compensation in connection with formalized risk management programs in an effort to minimize risk exposure and control claims and premium costs. The District contracts with Hunter Consulting Co. to be the third-party administrator for the insurance program. The District paid claims in the amount of \$24,613 during the fiscal year from funds benefitting from the employees' service. The District has purchased stop loss coverage for individual employee claim amounts exceeding the contracted threshold.

On January 1, 2018, the District became self-insured for health insurance in an effort to minimize risk exposure and control claims and premium costs. The District contracted with Anthem to be the third party administrator for the program. A claims liability of \$585,000 at fiscal year-end in the self-insurance internal service fund reflects an estimate of incurred but unpaid claims liability. This liability was estimated by a third party based on claims experience. The District has purchased stop loss coverage for individual employee claim amounts exceeding \$175,000. Unpaid claims at fiscal year-end are recorded as current claims payable because they would be due within 60 days from the end of the fiscal year.

A summary of the changes in the self-insurance claims liability for the fiscal year ended June 30 as follows:

	2018	2019
Claims Liability at July 1	\$ -	\$ 805,000
Incurred Claims	3,782,077	8,524,872
Claims Paid	(2,977,077)	(8,744,872)

NOTE 13 – DEFINED BENEFIT PENSION PLANS

Net Pension Liability

The net pension liability reported on the statement of net position represents a liability to employees for pensions. Pensions are a component of exchange transactions—between an employer and its employees—of salaries and benefits for employee services. Pensions are provided to an employee—on a deferred-payment basis—as part of the total compensation package offered by an employer for employee services each financial period. The obligation to sacrifice resources for pensions is a present obligation because it was created as a result of employment exchanges that already have occurred.

The net pension liability represents the District's proportionate share of each pension plan's collective actuarial present value of projected benefit payments attributable to past periods of service, net of each pension plan's fiduciary net position. The net pension liability calculation is dependent on critical long-term variables, including estimated average life expectancies, earnings on investments, cost of living adjustments and others. While these estimates use the best information available, unknowable future events require adjusting this estimate annually.

Ohio Revised Code limits the District's obligation for this liability to annually required payments. The School District cannot control benefit terms or the manner in which pensions are financed; however, the School District does receive the benefit of employees' services in exchange for compensation including pension.

GASB 68 assumes the liability is solely the obligation of the employer, because (1) they benefit from employee services; and (2) State statute requires all funding to come from these employers. All contributions to date have come solely from these employers (which also includes costs paid in the form of withholdings from employees). State statute requires the pension plans to amortize unfunded liabilities within 30 years. If the amortization period exceeds 30 years, each pension plan's board must propose corrective action to the State legislature. Any resulting legislative change to benefits or funding could significantly affect the net pension liability. Resulting adjustments to the net pension liability would be effective when the changes are legally enforceable.

Plan Description - School Employees Retirement System (SERS)

Plan Description – District non-teaching employees participate in SERS, a cost-sharing multiple-employer defined benefit pension plan administered by SERS. SERS provides retirement, disability and survivor benefits, annual cost-of-living adjustments, and death benefits to plan members and beneficiaries. Authority to establish and amend benefits is provided by Ohio Revised Code Chapter 3309. SERS issues a publicly available, stand-alone financial report that includes financial statements, required supplementary information and detailed information about SERS' fiduciary net position. That report can be obtained by visiting the SERS website at www.ohsers.org under Employers/Audit Resources.

Age and service requirements for retirement are as follows:

NOTE 13 – DEFINED BENEFIT PENSION PLANS – (continued)

	Eligible to Retire on or before August 1, 2017 *	Eligible to Retire on or after August 1, 2017
Full Benefits	Any age with 30 years of service credit	Age 67 with 10 years of service credit; or Age 57 with 30 years of service credit
Actuarially Reduced Benefits	Age 60 with 5 years of service credit Age 55 with 25 years of service credit	Age 62 with 10 years of service credit; or Age 60 with 25 years of service credit

* Members with 25 years of service credit as of August 1, 2017, will be included in this plan.

Annual retirement benefits are calculated based on final average salary multiplied by a percentage that varies based on year of service; 2.2 percent for the first thirty years of service and 2.5 percent for years of service credit over 30. Final average salary is the average of the highest three years of salary.

On each anniversary of the initial retirement, the allowance of all retirees and survivors are increased by the annual rate of increase in the CPI-W measured as of the June preceding the beginning of the applicable calendar year. This cost-of-living adjustment (COLA) shall not be less than 0% nor greater than 2.5%. COLA's have been suspended for calendar years 2018, 2019, and 2020.

Funding Policy – Plan members are required to contribute 10 percent of their annual covered salary and the District is required to contribute 14 percent of annual covered payroll. The contribution requirements of plan members and employers are established and may be amended by the SERS' Retirement Board up to statutory maximum amounts of 10 percent for plan members and 14 percent for employers. The Retirement Board, acting with the advice of the actuary, allocates the employer contribution rate among four of the System's funds (Pension Trust Fund, Death Benefit Fund, Medicare B Fund, and Health Care Fund). For the fiscal year ended June 30, 2019, the allocation to pension, death benefits, and Medicare B was 13.5 percent. The remaining 0.5 percent of the 14 percent employer contribution rate was allocated to the Health Care Fund.

The District's contractually required contribution to SERS was \$877,570 for fiscal year 2019. Of this amount \$52,777 is reported as due to other governments.

Plan Description - State Teachers Retirement System (STRS)

Plan Description – District licensed teachers and other faculty members participate in STRS Ohio, a cost-sharing multiple-employer public employee retirement system administered by STRS. STRS provides retirement and disability benefits to members and death and survivor benefits to beneficiaries. STRS issues a stand-alone financial report that includes financial statements, required supplementary information and detailed information about STRS' fiduciary net position. That report can be obtained by writing to STRS, 275 E. Broad St., Columbus, OH 43215-3771, by calling (888) 227-7877, or by visiting the STRS Web site at www.strsoh.org.

NOTE 13 – DEFINED BENEFIT PENSION PLANS – (continued)

New members have a choice of three retirement plans; a Defined Benefit (DB) Plan, a Defined Contribution (DC) Plan and a Combined Plan. Benefits are established by Ohio Revised Code Chapter 3307. The DB plan offers an annual retirement allowance based on final average salary multiplied by a percentage that varies based on years of service. Effective August 1, 2015, the calculation will be 2.2 percent of final average salary for the five highest years of earnings multiplied by all years of service. Effective July 1, 2017, the cost-of-living adjustment was reduced to zero. Members are eligible to retire at age 60 with five years of qualifying service credit, or age 55 with 26 years of service, or 31 years of service regardless of age. Eligibility changes will be phased in until August 1, 2026, when retirement eligibility for unreduced benefits will be five years of service credit and age 65, or 35 years of service credit and at least age 60.

The DC Plan allows members to place all their member contributions and 9.5 percent of the 14 percent employer contributions into an investment account. Investment allocation decisions are determined by the member. The remaining 4.5 percent of the 14 percent employer rate is allocated to the defined benefit unfunded liability. A member is eligible to receive a retirement benefit at age 50 and termination of employment. The member may elect to receive a lifetime monthly annuity or a lump sum withdrawal.

The Combined Plan offers features of both the DB Plan and the DC Plan. In the Combined Plan, 12 percent of the 14 percent member rate goes to the DC Plan and the remaining 2 percent is applied to the DB Plan. Member contributions to the DC Plan are allocated among investment choices by the member, and contributions to the DB Plan from the employer and the member are used to fund the defined benefit payment at a reduced level from the regular DB Plan. The defined benefit portion of the Combined Plan payment is payable to a member on or after age 60 with five years of service. The defined contribution portion of the account may be taken as a lump sum payment or converted to a lifetime monthly annuity after termination of employment at age 50 or later.

New members who choose the DC plan or Combined Plan will have another opportunity to reselect a permanent plan during their fifth year of membership. Members may remain in the same plan or transfer to another STRS plan. The optional annuitization of a member's defined contribution account or the defined contribution portion of a member's Combined Plan account to a lifetime benefit results in STRS bearing the risk of investment gain or loss on the account. STRS has therefore included all three plan options as one defined benefit plan for GASB 68 reporting purposes.

A DB or Combined Plan member with five or more years of credited service who is determined to be disabled may qualify for a disability benefit. Eligible survivors of members who die before service retirement may qualify for monthly benefits. New members on or after July 1, 2013, must have at least ten years of qualifying service credit that apply for disability benefits. Members in the DC Plan who become disabled are entitled only to their account balance. If a member of the DC Plan dies before retirement benefits begin, the member's designated beneficiary is entitled to receive the member's account balance.

Funding Policy – Employer and member contribution rates are established by the State Teachers Retirement Board and limited by Chapter 3307 of the Ohio Revised Code. For the fiscal year ended June 30, 2019, the employer rate was 14 percent and the plan members were also required to contribute 14 percent of covered salary. The fiscal year 2019 contribution rates were equal to the statutory maximum rates.

The District's contractually required contribution to STRS was \$4,405,621 for fiscal year 2019. Of this amount, \$661,310 is reported as due to other governments.

Pension Liabilities, Pension Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

The net pension liability was measured as of June 30, 2018, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of that date. The District's proportion of the net pension liability was based on the District's share of contributions to the pension plan relative to the contributions of all participating entities. Following is information related to the proportionate share and pension expense:

	<u>SERS</u>	<u>STRS</u>	<u>Total</u>

Actuarial Assumptions - SERS

SERS' total pension liability was determined by their actuaries in accordance with GASB Statement No. 67, as part of their annual actuarial valuation for each defined benefit retirement plan. Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts (e.g., salaries, credited service) and assumptions about the probability of occurrence of events far into the future (e.g., mortality, disabilities, retirements, employment termination). Actuarially determined amounts are subject to continual review and potential modifications, as actual results are compared with past expectations and new estimates are made about the future.

Projections of benefits for financial reporting purposes are based on the substantive plan (the plan as understood by the employers and plan members) and include the types of benefits provided at the time of each valuation and the historical pattern of sharing benefit costs between the employers and plan members to that point. The projection of benefits for financial reporting purposes does not explicitly incorporate the potential effects of legal or contractual funding limitations.

Actuarial calculations reflect a long-term perspective. For a newly hired employee, actuarial calculations will take into account the employee's entire career with the employer and also take into consideration the benefits, if any, paid to the employee after termination of employment until the death of the employee and any applicable contingent annuitant. In many cases actuarial calculations reflect several decades of service with the employer and the payment of benefits after termination.

Key methods and assumptions used in calculating the total pension liability in the latest actuarial valuation, prepared as of June 30, 2018, are presented below:

Wage Inflation	3 percent
Future Salary Increases, including inflation	3.50 percent to 18.20 percent
COLA or Ad Hoc COLA	2.50 percent
Investment Rate of Return	7.50 percent net of investments expense, including inflation
Actuarial Cost Method	Entry Age Normal (Level Percent of Payroll)

NOTE 13 – DEFINED BENEFIT PENSION PLANS – (continued)

For 2018, the mortality rates were based on the RP-2014 Blue Collar Mortality Table with fully generational projection and a five year age set-back for both males and females. Mortality among service retired members, and beneficiaries were based upon the RP-2014 Blue Collar Mortality Table with fully generational projection with Scale BB, 120 percent of male rates, and 110 percent of female rates. Mortality among disable members were based upon the RP-2000 Disabled Mortality Table, 90 percent for male rates and 100 percent for female rates, set back five years is used for the period after disability retirement.

The most recent experience study was completed for the five-year period ended June 30, 2015.

The long-term return expectation for the Pension Plan Investments has been determined using a building-block approach and assumes a time horizon, as defined in SERS' *Statement of Investment Policy*. A forecasted rate of inflation serves as the baseline for the return expectation. Various real return premiums over the baseline inflation rate have been established for each asset class.

The long-term expected nominal rate of return has been determined by calculating an arithmetic weighted averaged of the expected real return premiums for each asset class, adding the projected inflation rate, and adding the expected return from rebalanced uncorrelated asset classes.

The target allocation and best estimates of arithmetic real rates of return for each major asset class are summarized in the following table:

<u>Asset Class</u>	<u>Target Allocation</u>	<u>Long-Term Expected Real Rate of Return</u>
Cash	1.00 %	0.50 %
US Stocks	22.50	4.75
Non-US Stocks	22.50	7.00
Fixed Income	19.00	1.50
Private Equity	10.00	8.00
Real Assets	15.00	5.00
Multi-Asset Strategies	10.00	3.00
Total	<u>100.00 %</u>	

Discount Rate The total pension liability was calculated using the discount rate of 7.50 percent. The projection of cash flows used to determine the discount rate assumed the contributions from employers and from the members would be computed based on contribution requirements as stipulated by State statute. Projected inflows from investment earning were calculated using the long-term assumed investment rate of return (7.50 percent). Based on those assumptions, the plan's fiduciary net position was projected to be available to make all future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefits to determine the total pension liability.

NOTE 13 – DEFINED BENEFIT PENSION PLANS – (continued)

Sensitivity of the District's Proportionate Share of the Net Pension Liability to Changes in the Discount Rate Net pension liability is sensitive to changes in the discount rate, and to illustrate the potential impact the following table presents the net pension liability calculated using the discount rate of 7.50 percent, as well as what each plan's net pension liability would be if it were calculated using a discount rate that is one percentage point lower (6.50 percent), or one percentage point higher (8.50 percent) than the current rate.

	1% Decrease (6.50%)	Current Discount Rate (7.50%)	1% Increase (8.50%)
District's proportionate share of the net pension liability	\$21,641,133	\$15,363,844	\$10,100,758

Actuarial Assumptions - STRS

The total pension liability in the June 30, 2018, actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement:

Inflation	2.50 percent
Projected salary increases	12.50 percent at age 20 to 2.50 percent at age 65
Investment Rate of Return	7.45 percent, net of investment expenses, including inflation
Payroll Increases	3.00 percent
Cost-of-Living Adjustments (COLA)	0.00 percent effective July 1, 2017

For the July 1, 2018, actuarial valuation, post-retirement mortality rates for healthy retirees are based on the RP-2014 Annuitant Mortality Table with 50 percent of rates through age 69, 70 percent of rates between ages 70 and 79, 90 percent of rates between ages 80 and 84, and 100 percent of rates thereafter, projected forward generationally using mortality improvement scale MP-2016. Post-retirement disabled mortality rates are based on the RP-2014 Disabled Mortality Table with 90 percent of rates for males and 100 percent of rates for females, projected forward generationally using mortality improvement scale MP-2016. Pre-retirement mortality rates are based on RP-2014 Employee Mortality Table, projected forward generationally using mortality improvement scale MP-2016.

Actuarial assumptions used in the June 30, 2018, valuation are based on the results of an actuarial experience study for the period July 1, 2011 through June 30, 2016.

STRS' investment consultant develops an estimate range for the investment return assumption based on the target allocation adopted by the Retirement Board. The target allocation and long-term expected rate of return for each major asset class are summarized as follows:

**GROVEPORT MADISON LOCAL SCHOOL DISTRICT

NOTE 13 – DEFINED BENEFIT PENSION PLANS – (continued)

<u>Asset Class</u>	<u>Target Allocation</u>	<u>Long-Term Expected Real Rate of Return*</u>

International Equity	23.00	7.55
Alternatives	17.00	7.09
Fixed Income	21.00	3.00
Real Estate	10.00	6.00
Liquidity Reserves	1.00	2.25
Total	<u>100.00 %</u>	

*10-year annualized geometric nominal returns, which include the real rate of return and inflation of 2.25% and does not include investment expenses. Over a 30-year period, STRS Ohio's investment consultant indicates that the above target allocations should generate a return above the actuarial rate of return, without net value added by management.

Discount Rate The discount rate used to measure the total pension liability was 7.45 percent as of June 30, 2018. The projection of cash flows used to determine the discount rate assumes member and employer contributions will be made at the statutory contribution rates in accordance with rate increases described above. For this purpose, only employer contributions that are intended to fund benefits of current plan members and their beneficiaries are included. Based on those assumptions, STRS' fiduciary net position was projected to be available to make all projected future benefit payments to current plan members as of June 30, 2018. Therefore, the long-term expected rate of return on pension plan investments of 7.45 percent was applied to all periods of projected benefit payment to determine the total pension liability as of June 30, 2018.

Sensitivity of the District's Proportionate Share of the Net Pension Liability to Changes in the Discount Rate The following table presents the District's proportionate share of the net pension liability calculated using the current period discount rate assumption of 7.45 percent, as well as what the School District's proportionate share of the net pension liability would be if it were calculated using a discount rate that is one-percentage-point lower (6.45 percent) or one-percentage-point higher (8.45 percent) than the current rate:

	1% Decrease (6.45%)	Current Discount Rate (7.45%)	1% Increase (8.45%)
District's proportionate share of the net pension liability	\$83,896,632	\$57,448,953	\$35,064,580

Social Security System

Effective July 1, 1991, all employees not otherwise covered by School Employees Retirement System or State Teachers Retirement System have an option to choose Social Security. As of June 30, 2019, three members of the Board of Education have elected Social Security. The District's liability is 6.2 percent of wages paid.

NOTE 14 – DEFINED BENEFIT OPEB PLANS

Net OPEB Asset/Liability

The net OPEB asset/liability reported on the statement of net position represents a(n) asset/liability to employees for OPEB. OPEB is a component of exchange transactions—between an employer and its employees—of salaries and benefits for employee services. OPEB are provided to an employee—on a deferred-payment basis—as part of the total compensation package offered by an employer for employee services each financial period. The obligation to sacrifice resources for OPEB is a present obligation because it was created as a result of employment exchanges that already have occurred.

The net OPEB asset/liability represents the District's proportionate share of each OPEB plan's collective actuarial present value of projected benefit payments attributable to past periods of service, net of each OPEB plan's fiduciary net position. The net OPEB asset/liability calculation is dependent on critical long-term variables, including estimated average life expectancies, earnings on investments, cost of living adjustments and others. While these estimates use the best information available, unknowable future events require adjusting these estimates annually.

Ohio Revised Code limits the District's obligation for this liability to annually required payments. The District cannot control benefit terms or the manner in which OPEB are financed; however, the District does receive the benefit of employees' services in exchange for compensation including OPEB.

GASB 75 assumes the liability is solely the obligation of the employer, because they benefit from employee services. OPEB contributions come from these employers and health care plan enrollees which pay a portion of the health care costs in the form of a monthly premium. The Ohio revised Code permits, but does not require, the retirement systems to provide healthcare to eligible benefit recipients. Any change to benefits or funding could significantly affect the net OPEB asset/liability. Resulting adjustments to the net OPEB asset/liability would be effective when the changes are legally enforceable. The retirement systems may allocate a portion of the employer contributions to provide for these OPEB benefits.

The proportionate share of each plan's unfunded benefits is presented as a long-term net OPEB asset/liability on the accrual basis of accounting. Any liability for the contractually-required OPEB contribution outstanding at the end of the year is included in due to other governments on both the accrual and modified accrual bases of accounting.

Plan Description – School Employees Retirement System (SERS)

Health Care Plan Description - The District contributes to the SERS Health Care Fund, administered by SERS for non-certificated retirees and their beneficiaries. For GASB 75 purposes, this plan is considered a cost-sharing other postemployment benefit (OPEB) plan. SERS' Health Care Plan provides healthcare benefits to eligible individuals receiving retirement, disability, and survivor benefits, and to their eligible dependents. Members who retire after June 1, 1986, need 10 years of service credit, exclusive of most types of purchased credit, to qualify to participate in SERS' health care coverage. In addition to age and service retirees, disability benefit recipients and beneficiaries who are receiving monthly benefits due to the death of a member or retiree, are eligible for SERS' health care coverage.

Most retirees and dependents choosing SERS' health care coverage are over the age of 65 and therefore enrolled in a fully insured Medicare Advantage plan; however, SERS maintains a traditional, self-insured preferred provider organization for its non-Medicare retiree population. For both groups, SERS offers a self-insured prescription drug program. Health care is a benefit that is permitted, not mandated, by statute. The financial report of the Plan is included in the SERS Comprehensive Annual Financial Report which can be obtained on SERS' website at www.ohsers.org under Employers/Audit Resources.

NOTE 14 – DEFINED BENEFIT OPEB PLANS – (continued)

Access to health care for retirees and beneficiaries is permitted in accordance with Section 3309 of the Ohio Revised Code. The Health Care Fund was established and is administered in accordance with Internal Revenue Code Section 105(e). SERS' Retirement Board reserves the right to change or discontinue any health plan or program. Active employee members do not contribute to the Health Care Plan. The SERS Retirement Board established the rules for the premiums paid by the retirees for health care coverage for themselves and their dependents or for their surviving beneficiaries. Premiums vary depending on the plan selected, qualified years of service, Medicare eligibility, and retirement status.

Funding Policy - State statute permits SERS to fund the health care benefits through employer contributions. Each year, after the allocation for statutorily required pensions and benefits, the Retirement Board may allocate the remainder of the employer contribution of 14 percent of covered payroll to the Health Care Fund in accordance with the funding policy. For fiscal year 2019, 0.50 percent of covered payroll was made to health care. An additional health care surcharge on employers is collected for employees earning less than an actuarially determined minimum compensation amount, pro-rated if less than a full year of service credit was earned. For fiscal year 2019, this amount was \$21,600. Statutes provide that no employer shall pay a health care surcharge greater than 2.00 percent of that employer's SERS-covered payroll; nor may SERS collect in aggregate more than 1.50 percent of the total statewide SERS-covered payroll for the health care surcharge. For fiscal year 2019, the School District's surcharge obligation was \$159,873.

The surcharge added to the allocated portion of the 14 percent employer contribution rate is the total amount assigned to the Health Care Fund. The District's contractually required contribution to SERS was \$192,375 for fiscal year 2019. Of this amount \$161,828 is reported as due to other governments.

Plan Description – State Teachers Retirement System (STRS)

Plan Description – The State Teachers Retirement System of Ohio (STRS) administers a cost-sharing Health Plan administered for eligible retirees who participated in the defined benefit or combined pension plans offered by STRS. Ohio law authorizes STRS to offer this plan. Benefits include hospitalization, physicians' fees, prescription drugs and partial reimbursement of monthly Medicare Part B premiums. Medicare Part B premium reimbursements will be discontinued effective January 1, 2020. The Plan is included in the report of STRS which can be obtained by visiting www.strsoh.org or by calling (888) 227-7877.

Funding Policy – Ohio Revised Code Chapter 3307 authorizes STRS to offer the Plan and gives the Retirement Board discretionary authority over how much, if any, of the health care costs will be absorbed by STRS. Active employee members do not contribute to the Health Care Plan. Nearly all health care plan enrollees, for the most recent year, pay a portion of the health care costs in the form of a monthly premium. Under Ohio law, funding for post-employment health care may be deducted from employer contributions, currently 14 percent of covered payroll. For the fiscal year ended June 30, 2019, STRS did not allocate any employer contributions to post-employment health care.

OPEB Assets/Liabilities, OPEB Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to OPEB

The net OPEB liability/(asset) was measured as of June 30, 2018, and the total OPEB liability used to calculate the net OPEB liability/(asset) was determined by an actuarial valuation as of that date. The District's proportion of the net OPEB liability/(asset) was based on the District's share of contributions to the respective retirement systems relative to the contributions of all participating entities. Actuarial Assumptions - SERS

The total OPEB liability is determined by SERS' actuaries in accordance with GASB Statement No. 74, as part of their annual actuarial valuation for each retirement plan. Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts (e.g., salaries, credited service) and assumptions about the probability of occurrence of events far into the future (e.g., mortality, disabilities, retirements, employment terminations). Actuarially determined amounts are subject to continual review and potential modifications, as actual results are compared with past expectations and new estimates are made about the future.

Projections of benefits for financial reporting purposes are based on the substantive plan (the plan as understood by the employers and plan members) and include the types of benefits provided at the time of each valuation and the historical pattern of sharing benefit costs between the employers and plan members to that point. The projection of benefits for financial reporting purposes does not explicitly incorporate the potential effects of legal or contractual funding limitations.

Actuarial calculations reflect a long-term perspective. For a newly hired employee, actuarial calculations will take into account the employee's entire career with the employer and also take into consideration the benefits, if any, paid to the employee after termination of employment until the death of the employee and any applicable contingent annuitant. In many cases, actuarial calculations reflect several decades of service with the employer and the payment of benefits after termination.

NOTES TO THE BASIC FINANCIAL STATEMENTS
FOR THE FISCAL YEAR ENDED JUNE 30, 2019**

NOTE 14 – DEFINED BENEFIT OPEB PLANS – (continued)

Key methods and assumptions used in calculating the total OPEB liability in the latest actuarial valuation date of June 30, 2018, are presented below:

Wage Inflation	3.00 percent
Future Salary Increases, including inflation	3.50 percent to 18.20 percent
Investment Rate of Return	7.50 percent net of investments expense, including inflation
Municipal Bond Index Rate:	
Measurement Date	3.62 percent
Prior Measurement Date	3.56 percent
Single Equivalent Interest Rate, net of plan investment expense, including price inflation:	
Measurement Date	3.70 percent
Prior Measurement Date	3.63 percent
Medical Trend Assumption	
Medicare	5.375 to 4.75 percent
Pre-Medicare	7.25 to 4.75 percent

Mortality rates were based on the RP-2014 Blue Collar Mortality Table with fully generational projection and Scale BB, 120 percent of male rates and 110 percent of female rates. RP-2000 Disabled Mortality Table with 90 percent for male rates and 100 percent for female rates set back five years.

The most recent experience study was completed for the five-year period ended June 30, 2015.

The long-term expected rate of return on plan assets is reviewed as part of the actuarial five-year experience study. The most recent study covers fiscal years 2010 through 2015 and was adopted by the Board on April 21, 2016. Several factors are considered in evaluating the long-term rate of return assumption including long-term historical data, estimates inherent in current market data, and a log-normal distribution analysis in which best-estimate ranges of expected future real rates of return were developed by the investment consultant for each major asset class. These ranges were combined to produce the long-term expected rate of return, 7.50 percent, by weighting the expected future real rates of return by the target asset allocation percentage and then adding expected inflation. The capital market assumptions developed by the investment consultant are intended for use over a 10-year horizon and may not be useful in setting the long-term rate of return for funding pension plans which covers a longer timeframe. The assumption is intended to be a long-term assumption and is not expected to change absent a significant change in the asset allocation, a change in the inflation assumption, or a fundamental change in the market that alters expected returns in future years.

NOTE 14 – DEFINED BENEFIT OPEB PLANS – (continued)

The target asset allocation and best estimates of arithmetic real rates of return for each major asset class, as used in the June 30, 2015 five-year experience study, are summarized as follows:

Asset Class	Target Allocation	Long-Term Expected Real Rate of Return
Cash	1.00 %	0.50 %
US Stocks	22.50	4.75
Non-US Stocks	22.50	7.00
Fixed Income	19.00	1.50
Private Equity	10.00	8.00
Real Assets	15.00	5.00
Multi-Asset Strategies	10.00	3.00
Total	100.00 %	

Discount Rate The discount rate used to measure the total OPEB liability at June 30, 2018 was 3.70 percent. The discount rate used to measure total OPEB liability prior to June 30, 2018 was 3.63 percent. The projection of cash flows used to determine the discount rate assumed that contributions will be made from members and the System at the state statute contribution rate of 2.00 percent of projected covered employee payroll each year, which includes a 1.50 percent payroll surcharge and 0.50 percent of contributions from the basic benefits plan. Based on these assumptions, the OPEB plan's fiduciary net position was projected to become insufficient to make future benefit payments during the fiscal year ending June 30, 2025. Therefore, the long-term expected rate of return on OPEB plan assets was used to present value the projected benefit payments through the fiscal year ending June 30, 2024 and the Fidelity General Obligation 20-year Municipal Bond Index rate of 3.62 percent, as of June 30, 2018 (i.e. municipal bond rate), was used to present value the projected benefit payments for the remaining years in the projection. The total present value of projected benefit payments from all years was then used to determine the single rate of return that was used as the discount rate. The projection of future benefit payments for all current plan members was until the benefit payments ran out.

Sensitivity of the District's Proportionate Share of the Net OPEB Liability to Changes in the Discount Rate and Changes in the Health Care Cost Trend Rates The net OPEB liability is sensitive to changes in the discount rate and the health care cost trend rate. The following table presents the net OPEB liability of SERS, what SERS' net OPEB liability would be if it were calculated using a discount rate that is 1 percentage point lower (2.70 percent) and higher (4.70 percent) than the current discount rate (3.70 percent). Also shown is what SERS' net OPEB liability would be based on health care cost trend rates that are 1 percentage point lower (6.25 percent decreasing to 3.75 percent) and higher (8.25 percent decreasing to 5.75 percent) than the current rate.

Actuarial Assumptions – STRS

Key methods and assumptions used in the latest actuarial valuation, reflecting experience study results used in the June 30, 2018, actuarial valuation are presented below:

Salary increases	12.50 percent at age 20 to 2.50 percent at age 65
Payroll Increases	3.00 percent
Investment Rate of Return	7.45 percent, net of investment expenses, including inflation
Health Care Cost Trends	
Pre-Medicare	6.00 percent initial, 4.00 percent ultimate
Medicare	5.00 percent initial, 4.00 percent ultimate
Perscription Drug Cost Trends	
Pre-Medicare	8.00 percent initial, 4.00 percent ultimate
Medicare	negative 5.23 percent initial, 4.00 percent ultimate

Projections of benefits include the historical pattern of sharing benefit costs between the employers and retired plan members.

For healthy retirees the mortality rates are based on the RP-2014 Annuitant Mortality Table with 50 percent of rates through age 69, 70 percent of rates between ages 70 and 79, 90 percent of rates between ages 80 and 84, and 100 percent of rates thereafter, projected forward generationally using mortality improvement scale MP-2016. For disabled retirees, mortality rates are based on the RP-2014 Disabled Mortality Table with 90 percent of rates for males and 100 percent of rates for females, projected forward generationally using mortality improvement scale MP-2016.

Actuarial assumptions used in the June 30, 2018, valuation are based on the results of an actuarial experience study for the period July 1, 2011 through June 30, 2016.

STRS' investment consultant develops an estimate range for the investment return assumption based on the target allocation adopted by the Retirement Board. The target allocation and long-term expected rate of return for each major asset class are summarized as follows:

* 10 year annualized geometric nominal returns, which include the real rate of return and inflation of 2.25 percent and does not include investment expenses. Over a 30-year period, STRS' investment consultant indicates that the above target allocations should generate a return above the actual rate of return, without net value added by management.

Discount Rate The discount rate used to measure the total OPEB asset was 7.45 percent as of June 30, 2018. The projection of cash flows used to determine the discount rate assumes STRS Ohio continues to allocate no employer contributions to the health care fund. Based on these assumptions, the OPEB plan's fiduciary net position was not projected to be sufficient to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on health care plan investments of 7.45 percent was used to measure the total OPEB asset as of June 30, 2018.

Sensitivity of the District's Proportionate Share of the Net OPEB Asset to Changes in the Discount and Health Care Cost Trend Rate The following table represents the net OPEB asset as of June 30, 2018, calculated using the current period discount rate assumption of 7.45 percent, as well as what the net OPEB liability would be if it were calculated using a discount rate that is one percentage point lower (6.45 percent) or one percentage point higher (8.45 percent) than the current assumption. Also shown is the net OPEB asset as if it were calculated using health care cost trend rates that are one percentage point lower or one percentage point higher than the current health care cost trend rates.

NOTES TO THE BASIC FINANCIAL STATEMENTS
FOR THE FISCAL YEAR ENDED JUNE 30, 2019**

NOTE 15 – CONTINGENCIES

- (a) **Grants** - The District received financial assistance from federal and State agencies in the form of grants. The expenditure of funds received under these programs generally requires compliance with terms and conditions specified in the grant agreements and is subject to audit by the grantor agencies. Any disallowed claims resulting from such audits could become a liability of the General Fund or other applicable funds.
- (b) **Foundation Funding** – District foundation funding is based on the annualized full-time equivalent (FTE) enrollment of each student. The Ohio Department of Education (ODE) is legislatively required to adjust/reconcile funding as enrollment information is updated by schools throughout the State, which can extend past the fiscal year end. As of the date of this report, additional ODE adjustments for fiscal year 2019 have been finalized.
- (c) **Litigation** - The District is not party to any litigation that, in the opinion of management, would have a material effect on the financial statements.

NOTE 16 – ENCUMBRANCES

The District encumbers funds with purchase orders to assign funds for those purchases of goods and services. Encumbrances as of fiscal year end were as follows:

	Encumbrances
General Fund	\$ 1,486,117
Other Governmental Funds	3,920,160
Total	\$ 5,406,277

NOTE 17 – SET ASIDES

The District is required by State statute to annually set aside in the general fund an amount based on a statutory formula for the purchase of an equal amount for the acquisition and construction of capital improvements. The following cash basis information describes the change in the year end set-aside amounts for each reserve:

Set-aside cash balance as of June 30, 2018	\$ -
Current fiscal year set-aside requirement	1,051,946
Offset: Permanent Improvement Levy	(1,486,217)
Total	\$ (434,271)
 Set Aside Restricted Balance June 30, 2019	 \$ -

Capital acquisition offsets and qualifying disbursements presented in the table were limited to those necessary to reduce the fiscal year-end balance to zero. During fiscal year 2015, the District issued \$33,303,594 in capital related debt based on a building project undertaken by the District. These proceeds may be used as qualifying disbursements to reduce the capital acquisition to zero for future fiscal years. The District still has \$33,238,391 in qualifying disbursements that may be used to reduce the set-aside requirement for future fiscal years.

NOTE 18 – COMPLIANCE AND ACCOUNTABILITY

Fund Balance Deficits - Fund balances at fiscal year-end included the following individual deficits:

<u>Fund Name</u>	<u>Deficit</u>
Other Governmental Funds	
Title VI-B IDEA	\$ (23,848)
Title I School Improvement	(12,461)
Title III Limited English Proficiency	(2,265)
Title I Disadvantaged Children	(60,153)
IDEA Preschool	(1,250)
Title II Improving Teacher Quality	(4,340)
Miscellaneous Federal Grant	(1,974)
	<u>\$ (106,291)</u>

These fund deficits resulted from the application of accounting principles generally accepted in the United States of America. The General Fund is liable for the deficits in the Other Governmental Funds and provides operating transfers when cash is required, not when accruals occur.

NOTE 19 – CHANGE IN ACCOUNTING PRINCIPLES

For fiscal year ending June 30, 2019, the District has implemented the following:

GASB Statement No. 83 "Certain Asset Retirement Obligations" will enhance comparability of financial statements among governmental by establishing uniform criteria for governments to recognize and measure certain asset retirement obligations, including obligations that may not have been previously reported. The implementation of this statement did not have an effect on the financial statements of the District.

GASB Statement No. 88 "Certain Disclosures Related to Debt, Including Direct Borrowings and Direct Placements" improves the information that is disclosed in the notes of the governmental financial statements related to debt, including debt borrowings and direct placements. This statement also clarifies which liabilities governments should include when disclosing information related to debt. The implementation of this statement did not have a significant effect on the financial statements of the District.

**NOTES TO THE SCHEDULE OF EXPENDITURES OF FEDERAL AWARDS
2 CFR 200.510(b)(6)
FOR THE YEAR ENDED JUNE 30, 2019**

NOTE A – BASIS OF PRESENTATION

The accompanying Schedule of Expenditures of Federal Awards (the Schedule) includes the federal award activity of Groveport Madison Local School District (the District) under programs of the federal government for the year ended June 30, 2019. The information on this Schedule is prepared in accordance with the requirements of Title 2 U.S. Code of Federal Regulations Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). Because the Schedule presents only a selected portion of the operations of the District, it is not intended to and does not present the financial position, changes in net position, or cash flows of the District.

NOTE B – SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Expenditures reported on the Schedule are reported on the cash basis of accounting. Such expenditures are recognized following the cost principles contained in Uniform Guidance wherein certain types of expenditures may or may not be allowable or may be limited as to reimbursement.

NOTE C – INDIRECT COST RATE

The District has elected not to use the 10-percent de minimis indirect cost rate as allowed under the Uniform Guidance.

NOTE D - CHILD NUTRITION CLUSTER

The District commingles cash receipts from the U.S. Department of Agriculture with similar State grants. When reporting expenditures on this Schedule, the District assumes it expends federal monies first.

NOTE E – FOOD DONATION PROGRAM

The District reports commodities consumed on the Schedule at the fair value. The District allocated donated food commodities to the respective program that benefitted from the use of those donated food commodities.

NOTE F - TRANSFERS BETWEEN PROGRAM YEARS

Federal regulations require schools to obligate certain federal awards by June 30. However, with ODE’s consent, schools can transfer unobligated amounts to the subsequent fiscal year’s program. The District transferred the following amounts from 2019 to 2020 programs:

<u>Program Title</u>	<u>CFDA Number</u>	<u>Amount</u>

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS REQUIRED BY *GOVERNMENT AUDITING STANDARDS*

Groveport Madison Local School District
Franklin County
4400 Marketing Place, Suite B
Groveport, Ohio 43125

To the Board of Education:

We have audited, in accordance with auditing standards generally accepted in the United States and the Comptroller General of the United States' *Government Auditing Standards*, the financial statements of the governmental activities, the major fund, and the aggregate remaining fund information of the Groveport Madison Local School District, Franklin County, (the District) as of and for the year ended June 30, 2019, and the related notes to the financial statements, which collectively comprise the District's basic financial statements and have issued our report thereon dated March 19, 2020.

Internal Control Over Financial Reporting

As part of our financial statement audit, we considered the District's internal control over financial reporting (internal control) to determine the audit procedures appropriate in the circumstances to the extent necessary to support our opinions on the financial statements, but not to the extent necessary to opine on the effectiveness of the District's internal control. Accordingly, we have not opined on it.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, when performing their assigned functions, to prevent, or detect and timely correct misstatements. A *material weakness* is a deficiency, or combination of internal control deficiencies resulting in a reasonable possibility that internal control will not prevent or detect and timely correct a material misstatement of the District's financial statements. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all internal control deficiencies that might be material weaknesses or significant deficiencies. Given these limitations, we did not identify any deficiencies in internal control that we consider material weaknesses. However, unidentified material weaknesses may exist.

Compliance and Other Matters

As part of reasonably assuring whether the District's financial statements are free of material misstatement, we tested its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could directly and materially affect the determination of financial statement amounts. However, opining on compliance with those provisions was not an objective of our audit and accordingly, we do not express an opinion. The results of our tests disclosed no instances of noncompliance or other matters we must report under *Government Auditing Standards*.

Purpose of this Report

This report only describes the scope of our internal control and compliance testing and our testing results, and does not opine on the effectiveness of the District's internal control or on compliance. This report is an integral part of an audit performed under *Government Auditing Standards* in considering the District's internal control and compliance. Accordingly, this report is not suitable for any other purpose.

INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE WITH REQUIREMENTS APPLICABLE TO EACH MAJOR FEDERAL PROGRAM AND ON INTERNAL CONTROL OVER COMPLIANCE REQUIRED BY THE UNIFORM GUIDANCE

Groveport Madison Local School District
Franklin County
4400 Marketing Place, Suite B
Groveport, Ohio 43125

To the Board of Education:

Report on Compliance for each Major Federal Program

We have audited the Groveport Madison Local School District's (the District) compliance with the applicable requirements described in the U.S. Office of Management and Budget (OMB) *Compliance Supplement* that could directly and materially affect each of the Groveport Madison Local School District's major federal programs for the year ended June 30, 2019. The *Summary of Auditor's Results* in the accompanying schedule of findings identifies the District's major federal programs.

Management's Responsibility

The District's Management is responsible for complying with federal statutes, regulations, and the terms and conditions of its federal awards applicable to its federal programs.

Auditor's Responsibility

Our responsibility is to opine on the District's compliance for each of the District's major federal programs based on our audit of the applicable compliance requirements referred to above. Our compliance audit followed auditing standards generally accepted in the United States of America; the standards for financial audits included in the Comptroller General of the United States' *Government Auditing Standards*; and the audit requirements of Title 2 U.S. *Code of Federal Regulations* Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance). These standards and the Uniform Guidance require us to plan and perform the audit to reasonably assure whether noncompliance with the applicable compliance requirements referred to above that could directly and materially affect a major federal program occurred. An audit includes examining, on a test basis, evidence about the District's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances.

We believe our audit provides a reasonable basis for our compliance opinion on each of the District's major programs. However, our audit does not provide a legal determination of the District's compliance.

Basis for Qualified Opinion on Child Nutrition Cluster

As described in finding 2019-001 in the accompanying schedule of findings, the District did not comply with requirements regarding procurement and suspension and debarment applicable to its *CFDA 10.553/10.555/10.559 Child Nutrition Cluster* major federal program. Compliance with this requirement is necessary, in our opinion, for the District to comply with requirements applicable to this program.

Qualified Opinion on Child Nutrition Cluster

In our opinion, except for the noncompliance described in the *Basis for Qualified Opinion on Child Nutrition Cluster* paragraph, the Groveport Madison Local School District complied, in all material respects, with the requirements referred to above that could directly and materially affect its *CFDA 10.553/10.555/10.559 Child Nutrition Cluster* for the year ended June 30, 2019.

Unmodified Opinion on the Other Major Federal Program

In our opinion, the Groveport Madison Local School District complied in all material respects with the requirements referred to above that could directly and materially affect its other major federal program identified in the *Summary of Auditor's Results* section of the accompanying schedule of findings for the year ended June 30, 2019.

Report on Internal Control over Compliance

The District's management is responsible for establishing and maintaining effective internal control over compliance with the applicable compliance requirements referred to above. In planning and performing our compliance audit, we considered the District's internal control over compliance with the applicable requirements that could directly and materially affect a major federal program, to determine our auditing procedures appropriate for opining on each major federal program's compliance and to test and report on internal control over compliance in accordance with the Uniform Guidance, but not to the extent needed to opine on the effectiveness of internal control over compliance. Accordingly, we have not opined on the effectiveness of the District's internal control over compliance.

A deficiency in internal control over compliance exists when the design or operation of a control over compliance does not allow management or employees, when performing their assigned functions, to prevent, or to timely detect and correct, noncompliance with a federal program's applicable compliance requirement. A *material weakness in internal control over compliance* is a deficiency, or combination of deficiencies in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a federal program's compliance requirement will not be prevented, or timely detected or corrected. A *significant deficiency in internal control over compliance* is a deficiency or a combination of deficiencies in internal control over compliance with a federal program's applicable compliance requirement that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies. Therefore, we cannot assure we have identified all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies. However, we identified a certain deficiency in internal control over compliance that we consider to be a material weakness, described in the accompanying schedule of findings as item 2019-001.

The District's response to our internal control over compliance finding is described in the accompanying corrective action plan. We did not subject the District's response to the auditing procedures applied in the audit of compliance and, accordingly, we express no opinion on it.

This report only describes the scope of our tests of internal control over compliance and the results of this testing based on the Uniform Guidance requirements. Accordingly, this report is not suitable for any other purpose.

1. Noncompliance and Material Weakness: Procurement, Suspension & Debarment

CFDA Number and Title:	CFDA # 10.553/10.555/10.559 Child Nutrition Cluster
Federal Award Identification Number / Year:	None / 2019

Repeat Finding from Prior Audit?	No

2 CFR § 200.320(b) states; “Small purchase procedures are those relatively simple and informal procurement methods for securing services, supplies, or other property that do not cost more than the Simplified Acquisition Threshold. If small purchase procedures are used, price or rate quotations must be obtained from an adequate number of qualified sources.”

Ohio Rev. Code § 149.351 requires that all records that are the property of the public office shall not be removed, destroyed, mutilated, transferred, or otherwise damaged or disposed of, in whole or in part, except as provided by law or under the rules adopted by the records commission provided for under **Ohio Rev. Code § 149.38 through 149.42**.

In January 2017, the District adopted a policy to define the threshold used in evaluating the methods of procurement to be followed. The policy of the District states, “Small purchase procedures provide for relatively simple and informal procurement methods for securing services, supplies, and other property that does not exceed the competitive bid threshold of \$250,000. Small purchase procedures require that price or rate quotations shall be obtained from three (3) qualified sources.

In October of 2018, the District hired a vendor to replace an old freezer; however, the District did not maintain three price and/or rate quotations as some documents were lost in the move between admin. buildings.

Failure to maintain underlying documentation demonstrating procurement provisions of **2 CFR § 200.320(b)** and failure to safeguard records in accordance with **Ohio Rev. Code § 149.351**, as well as, adhering to the District’s internal policy on small purchases resulted in a qualification over Procurement, Suspension, and Debarment.

We recommend the District ensure price quotations are obtained and maintained for small purchases. In addition, the District should evaluate their internal control process for maintaining all accounting records, specifically those documents that help ensure compliance with Federal regulations.
