We have reviewed the Independent Auditor's Report of the Green Local School District, Summit County, prepared by Moore, Stephens, Apple, for the audit period July 1, 2000 through June 30, 2001. Based upon this review, we have accepted these reports in lieu of the audit required by Section 117.11, Revised Code. The Auditor of State did not audit the accompanying financial statements and, accordingly, we are unable to express, and do not express an opinion on them.

Our review was made in reference to the applicable sections of legislative criteria, as reflected by the Ohio Constitution, and the Revised Code, policies, procedures and guidelines of the Auditor of State, regulations and grant requirements. The Green Local School District is responsible for compliance with these laws and regulations.

Report of Independent Auditors

To the Board of Education

PO Box 218

Green, Ohio 44232

We have audited the accompanying general purpose financial statements of the Green Local School District as of and for the year ended June 30, 2001. These general purpose financial statements are the responsibility of the Green Local School District's management. Our responsibility is to express an opinion on these general purpose financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the general purpose financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the general purpose financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall general purpose financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the general purpose financial statements referred to above present fairly, in all material respects, the financial position of the Green Local School District as of June 30, 2001 and the results of its operations and cash flows of its proprietary fund types for the year then ended in conformity with accounting principles generally accepted in the United States of America.

In accordance with Government Auditing Standards, we have also issued our report dated December 11, 2001 on our consideration of the Green Local School District's internal control over financial reporting and our tests of its compliance with certain provisions of laws, regulations, contracts and grants. That report is an integral part of an audit performed in accordance with Government Auditing Standards and should be read in conjunction with this report in considering the results of our audit.

Our audit was performed for the purpose of forming an opinion on the general purpose financial statements of Green Local School District, taken as a whole. The accompanying schedule of expenditures of federal awards is presented for purposes of additional analysis as required by U.S. Office of Management and Budget Circular A-133, Audits of States, Local Governments, and Non-Profit Organizations, and is not a required part of the general-purpose financial statements. Such information has been subjected to the auditing procedures applied in the audit of the general-purpose financial statements and, in our opinion, is fairly stated, in all material respects, in relation to the general-purpose financial statements taken as a whole.

NOTES TO THE GENERAL PURPOSE FINANCIAL STATEMENTS

June 30, 2001

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies followed in the preparation of these financial statements are summarized below. These policies conform to generally accepted accounting principles (GAAP) for local governmental units prescribed in the statements issued by the Governmental Accounting Standards Board and other recognized authoritative sources.

1. *Description of the Entity*

The Green Local School District (the District) is a body politic and corporate established for the purpose of exercising the rights and privileges conveyed to it by the constitution and laws of the State of Ohio. The District is a local district as defined by Section 3311.03 of the Ohio Revised Code. The District operates under a five member elected Board of Education and is responsible for the provision of public education to residents of the District.

Average daily membership (ADM) as of October 1, 2000 was 3,844. The District employed 336 certificated employees and 177 non-certificated employees.

The District's reporting entity has been defined in accordance with GASB Statement No. 14, "The Financial Reporting Entity". When applying GASB Statement No. 14, management has considered all potential component units. The basic, but not the only, criterion for including a potential component unit within the reporting entity is the District's ability to exercise significant oversight responsibility. The most significant manifestation of this ability is financial interdependence. Other manifestations of the ability to exercise oversight responsibility include, but are not limited to, the selection of the governing authority, the designation of management, the ability to significantly influence operations, and the accountability for fiscal matters.

A second criterion used in evaluating potential component units is the scope of public service. Application of this criteria involves considering whether the activity benefits the District and/or its citizens. A third criterion used to evaluate potential component units for inclusion or exclusion from the reporting entity is the existence of special financing relationships, regardless of whether the District is able to exercise oversight responsibilities. Based upon the application of these criteria, the District has no component units.

The following organizations are described due to their relationship with the District:

1. *Description of the Entity - Continued*

The District is associated with certain organizations which are defined as Jointly Governed Organizations. These organizations include the Northeast Ohio Network for Education Technology (NEONET) and Interval Opportunity School. These organization are more fully described in Note L to the general purpose financial statements.

2. *Basis of Presentation - Fund Accounting*

The District uses funds and account groups to report on its financial position and the results of its operations. Fund accounting is designed to demonstrate legal compliance and to aid financial management by segregating transactions related to certain District functions or activities.

A fund is defined as a fiscal and accounting entity with a self-balancing set of accounts recording cash and other financial resources, together with all related liabilities and residual equities or balances, and changes therein, which are segregated for the purpose of carrying on specific activities or attaining certain objectives in accordance with special regulations, restrictions or limitations. An account group is a financial reporting device designed to provide accountability for certain assets and liabilities that are not recorded in the funds because they do not directly affect net expendable available financial resources.

For financial statement reporting purposes, the various funds of the District are grouped into the following generic fund types under the broad fund categories governmental, proprietary, and fiduciary:

Governmental Fund Types:

Governmental funds are those through which most governmental functions of the District are financed. The acquisition, use and balances of the District's expendable financial resources and the related current liabilities (except those accounted for in proprietary funds) are accounted for through governmental funds. The following are the District's governmental fund types:

General Fund - This fund is the operating fund of the District and is used to account for all financial resources except those required to be accounted for in another fund. The general fund balance is available to the District for any

purpose provided it is expended or transferred according to the general laws of Ohio.

Special Revenue Funds - These funds are established to account for the proceeds of specific revenue sources (other than expendable trusts or major capital projects) that are legally restricted to expenditure for specified purposes.

Debt Service Fund - This fund is used to account for the accumulation of resources for, and the payment of, general long-term debt principal, interest, and related costs.

Capital Projects Funds - These funds are used to account for financial resources to be used for the acquisition or construction of major capital facilities (other than those financed by proprietary funds and trust funds).

Proprietary Fund Types:

Proprietary funds are used to account for the District's ongoing activities which are similar to those found in the private sector. The following are the District's proprietary fund types:

Enterprise Funds - These funds are used to account for operations that are financed and operated in a manner similar to private business enterprises where the intent of the governing body is that costs (expenses, including depreciation) of providing goods or services to the general public on a continuing basis be financed or recovered primarily through user charges or where the governing body has decided that periodic determination of revenues earned, expenses incurred, and/or net income is appropriate for capital maintenance, public policy, management control, accountability or other purposes.

Internal Service Funds - These funds account for the financing of services provided by one department or agency to another department or agency of the District on a cost-reimbursement basis.

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - (Continued)

2. *Basis of Presentation - Fund Accounting - (Continued)*

Fiduciary Fund Types:

Fiduciary funds are used to account for assets held by the District in a trustee capacity or as an agent for individuals, private organizations, other governmental units and other funds. These include expendable trust and agency funds. Expendable trust funds are accounted for in essentially the same manner as governmental funds. Agency funds are custodial in nature (assets equal liabilities) and do not involve measurement of results of operations.

Account Groups:

To make a clear distinction between fixed assets related to specific funds and those of general government, and between long-term liabilities related to specific funds and those of a general nature, the following account groups are used:

General Fixed Assets Account Group - This account group is established to account for all fixed assets of the District, other than those accounted for in the proprietary fund types.

General Long-Term Obligations Account Group - This account group is established to account for all long-term obligations of the District except those accounted for in the proprietary fund types.

3. *Measurement Focus and Basis of Accounting*

The accounting and reporting treatment applied to a fund is determined by its measurement focus. All governmental fund types and expendable trust funds are accounted for using a flow of current financial resources measurement focus. With this measurement focus, only current assets and current liabilities are generally included on the combined balance sheet. Operating statements of these funds present increases (i.e., revenues and other financing sources) and decreases (i.e., expenditures and other financing uses) in net current assets.

All proprietary funds are accounted for on a flow of economic resources measurement focus. With this measurement focus, all assets and all liabilities associated with the operation of these funds are included on the combined balance sheet. Fund equity (i.e., net total assets) is segregated into contributed capital and retained earnings components. Proprietary fund type operating

statements present increases (e.g., revenues) and decreases (e.g., expenses) in net total assets.

Basis of accounting refers to when revenues and expenditures or expenses are recognized in the accounts and reported in the financial statements. Basis of accounting relates to the timing of the measurements made.

The modified accrual basis of accounting is followed for the governmental, expendable trust and agency funds. Under this basis, revenues are recognized in the accounting period when they become both measurable and available. "Measurable" means the amount of the transaction can be determined and "available" means collectible within the current fiscal year or soon enough thereafter to be used to pay liabilities of the current fiscal year. The available period for the District is sixty days after year end. In applying the accrual concept under the modified accrual basis, the following revenue sources are deemed both measurable and available: investment earnings, tuition, grants and entitlements.

The District reports deferred revenues on its combined balance sheet. Deferred revenues arise in the governmental funds when a potential revenue does not meet with the measurable and available criteria for recognition in the current period. In subsequent periods, when both revenue recognition criteria are met, the liability for deferred revenue is removed from the combined balance sheet and revenue is recognized. Property taxes measurable as of June 30, 2001 and delinquent property taxes, whose availability is indeterminate, and which are intended to finance fiscal year 2002 operations, have been recorded as deferred revenue as more fully described in Note C.

The measurement focus of governmental fund accounting is on decreases in net financial resources (expenditures) rather than expenses. Expenditures are generally recognized in the accounting period in which the fund liability is incurred, if measurable. Principal and interest on general long-term debt are recorded as fund liabilities when due or when amounts have been accumulated in the debt service fund for payments to be made early in the following year, and the costs of accumulated unpaid vacation and sick leave are reported as fund liabilities in the period in which they will be liquidated with available financial resources rather than in the period earned by employees. Allocations of cost, such as depreciation and amortization, are not recognized in the governmental funds.

3. *Measurement Focus and Basis of Accounting - Continued*

The accrual basis of accounting is utilized for reporting purposes by the proprietary fund types. Revenues are recognized when they are earned and become measurable, and expenses are recognized when they are incurred, if measurable. Unbilled service charges receivable is recognized as revenue at year end. The fair value of donated commodities used during the year is reported in the operating statement as an expense with a like amount reported as donated commodities nonoperating revenue.

4. *Budgetary Data*

The budgetary process is prescribed by provisions of the Ohio Revised Code and entails the preparation of budgetary documents within an established timetable. The major documents prepared are the Tax Budget, the Certificate of Estimated Resources, and the Appropriation Resolution, all of which are prepared on the budgetary basis of accounting. The Certificate of Estimated Resources and the Appropriations Resolution are subject to amendment throughout the year with the legal restriction that appropriations cannot exceed estimated resources, as certified. All funds, other than agency funds, are legally required to be budgeted and appropriated. The legal level of budgetary control is at the object level within each function. Any budgetary modification at this level may only be made by resolution of the Board of Education.

Tax Budget:

Prior to January 15, the Superintendent and Treasurer submit to the Board of Education a proposed operating budget for the fiscal year commencing the following July 1. The budget includes proposed expenditures and the means of financing for all funds. Public hearings are publicized and conducted to obtain taxpayers' comments. The express purpose of this budget document is to reflect the need for existing (or increased) tax rates.

By no later than January 20, the Board-adopted budget is filed with the Summit County Budget Commission for rate determination.

Estimated Resources:

Prior to April 1, the Board of Education accepts, by formal resolution, the tax rates as determined by the Budget Commission and receives the Commission's Certificate of Estimated Resources which states the projected revenue of each fund. Prior to June 30, the District must revise its budget so that total contemplated expenditures from any fund during the ensuing year will not exceed the amount stated in the Certificate of Estimated Resources. The revised budget then serves as the basis for the appropriation measure. On or about July 1, the Certificate is amended to include any unencumbered cash balances from the preceding year.

The Certificate may be further amended during the year if projected increases or decreases in revenue are identified by the District Treasurer. The amounts reported in the budgetary statements reflect the amounts in the final Amended Certificate issued during fiscal year 2001.

Appropriations:

By October 1, the annual appropriation resolution must be legally enacted by the Board of Education at the fund, function, and object level of expenditures, which are the legal levels of budgetary control. Prior to the passage of the annual appropriation resolution, the Board may pass a temporary resolution to meet the ordinary expenses of the District. Appropriations by fund must be within the estimated resources as certified by the County Budget Commission, and the total of expenditures and encumbrances may not exceed the appropriation at any level of control. Any revisions that alter the total of any fund appropriation or alter total function appropriations within a fund, or alter object appropriations within functions, must be approved by the Board of Education. The Board may pass supplemental fund appropriations so long as the total appropriations by fund does not exceed the amounts set forth in the most recent Certificate of Estimated Resources. During the year, several supplemental fund appropriations were legally enacted, however, the amount of the increases were not significant. The budget figures which appear in the statements of budgetary comparisons represent the final appropriation amounts, including all amendments and modifications. Formal budgetary integration is employed as a management control device during the year for all funds, consistent with statutory provisions.

Encumbrances:

As part of formal budgetary control, purchase orders, contracts and other commitments for the expenditure of monies are encumbered and recorded as the equivalent of expenditures on the non-GAAP budgetary basis in order to reserve that portion of the applicable appropriation and to determine and maintain legal compliance. Prior year encumbrances are reappropriated by the District when current year appropriations are passed by the Board of Education. On the GAAP basis, encumbrances outstanding at year end are reported as a reservation of fund balances for subsequent year expenditures for governmental funds. At year end, the District's transfers in/out did not agree by \$2,059 on a non-GAAP basis. This is a result of a \$2,059 "transfers out" being made from the General Fund to the Agency Fund. Agency fund activity is not disclosed in the financial statements.

Lapsing of Appropriations:

At the close of each year, the unencumbered balance of each appropriation reverts to the respective fund from which it was appropriated and becomes subject to future appropriation. Encumbered appropriations are carried forward to the succeeding fiscal year and need not be reappropriated.

Budgetary Basis of Accounting:

While the District is reporting financial position, results of operations, and changes in fund balance on the basis of generally accepted accounting principles (GAAP basis); the budgetary basis as provided by law is based upon accounting for certain transactions on a basis of cash receipts and disbursements. The Combined Statement of Revenues, Expenditures and Changes in Fund Balances - Budget Basis and Actual - All Governmental Fund Types and Similar Trust Funds and the Combined Statement of Revenues, Expenses and Changes in Fund Equity - Budget Basis and Actual - All Proprietary Fund Types are presented on the budgetary basis to provide a meaningful comparison of actual results with the budget and to demonstrate compliance with state statute. The major differences between the budget basis and the GAAP basis are:

To improve cash management, cash received by the District is pooled. Monies for all funds, including proprietary funds, are maintained in this pool. Individual fund integrity is maintained through the District's records. Each fund's interest in the pool is represented as "Equity in Pooled Cash and Cash Equivalents" on the combined balance sheet.

During the fiscal year 2001, investments were limited to STAROhio and repurchase agreements.

Except for nonparticipating investment contracts, investments are reported at fair value which is based on quoted market prices. Nonparticipating investment contracts such as repurchase agreements are reported at cost.

The District has invested funds in the State Treasury Asset Reserve of Ohio (STAROhio) during 2001. STAROhio is an investment pool managed by the State Treasurer's Office, which allows governments within the State to pool their funds for investment purposes. STAROhio is not registered with the SEC as an investment company, but does operate in a manner consistent with Rule 2a7 of the Investment Company Act of 1940. Investments in STAROhio are valued at STAROhio's share price, which is the price the investment could be sold for on

Legal Requirements:

State statutes require the classification of moneys held by the District into three categories.

Active deposits are public deposits necessary to meet current demands on the treasury. Such monies must be maintained either as cash in the District treasury, in commercial accounts payable or withdrawable on demand, including negotiable order of withdrawal (NOW) accounts or in money market deposit accounts.

Inactive deposits are public deposits the Board of Education has identified as not required for use within the current two year period of designation of depositories. Inactive deposits must either be evidenced by certificates of deposits maturing not later than the end of the current period of designation of depositories, or by savings or deposit accounts including, but not limited to, passbook accounts.

Interim deposits are deposits of interim monies. Interim monies are those monies which are not needed for immediate use but which will be needed before the end of the current period of designation of depositories. Interim deposits must be evidenced by time certificates of deposit maturing not more than one year from the date of deposit or by savings accounts, including passbook accounts.

Protection of the District's deposits is provided by the Federal Deposit Insurance Corporation, by eligible securities pledged by the financial institution as security for repayment, by surety company bonds deposited with the Treasurer by the financial institution or by a single collateral pool established by the financial institution to secure the repayment of all public monies deposited with the institution.

Interim monies may be deposited or invested in the following securities:

1. United States Treasury Notes, Bills, Bonds, or any other obligation or security issued by the United States Treasury or any other obligation guaranteed as to principal or interest by the United States;

All federal agency securities shall be direct issuances of federal government agencies or instrumentalities;
 3. Written repurchase agreements in the securities listed above, provided that the market value of the securities subject to the repurchase agreement must exceed the principal value of the agreement by at least two percent and be marked to market daily, and that the term of the agreement must not exceed thirty days;
 4. Bonds and other obligations of the State of Ohio;
 5. No-load money market mutual funds consisting exclusively of obligations described in division (1) or (2) of this section and repurchase agreements secured by such obligations, provided that investments in securities described in this division are made only through eligible institutions; and
 6. The State Treasurer's investment pool (STAROhio).

Investments in stripped principal or interest obligations, reverse repurchase agreements and derivatives are prohibited. The issuance of taxable notes for the purpose of arbitrage, the use of leverage and short selling are also prohibited. An investment must mature within five years from the date of purchase unless matched to a specific obligation or debt of the District, and must be purchased with the expectation that it will be held to maturity. Investments may only be made through specified dealers and institutions. Payment for investments may be made only upon delivery of the securities representing the investment to the Treasurer or, if the securities are not represented by a certificate, upon receipt of confirmation of transfer from the custodian.

5. *Pooled Cash and Investments - Continued*

The following information classifies deposits and investments by categories of risk as defined in GASB Statement No. 3 "Deposits with Financial Institutions (including Repurchase Agreements), and Reverse Agreements".

Deposits:

At year end, the carrying amount of the District's cash deposits, was \$(34,878) and the bank balance was \$108,069. Of the bank's balance:

1. \$100,000 was covered by the federal depository insurance, by collateral held by the School District, or by collateral held by a qualified third party trustee in the name of the School District;
2. \$8,069 was uninsured and uncollateralized as defined by the Governmental Accounting Standards Board because the collateral pledged by the financial institution or their trust departments or agents is not in the School District's name, due to the fact that the pledging bank has an investment and securities pool used to collateralize all public deposits. This pool had a market value at June 30, 2000 in excess of 110% of the public funds on deposit.

Statutory provisions require that collateral pledged for deposits be held in trust by an institution other than the pledging bank.

Investments:

The District's investments are required to be categorized to give an indication of the level of risk assumed by the district at year end.

Category 1 includes investments that are insured or registered or for which the securities are held by the District or its agent in the District's name.

Category 2 includes uninsured and unregistered investments which are held by the counterparty's trust department or agent in the District's name.

6. *Inventory*

Inventories of governmental funds are stated at cost while inventories of proprietary funds are stated at the lower of cost or market. For all funds, cost is determined on a first-in, first-out basis. Inventory in governmental funds consists of expendable supplies held for consumption. The costs of inventory items are recorded as expenditures in the governmental fund types when purchased and as expenses in the proprietary fund types when used. Reported materials and supplies inventory are equally offset by a fund balance reserve in the governmental funds which indicates that it does not constitute available spendable resources even though it is a component of net current assets. Inventory in the enterprise funds consists of purchased food, donated commodities and school supplies held for resale.

7. *Fixed Assets and Depreciation*

General fixed assets are not capitalized in the funds used to acquire or construct them. Instead, capital acquisition and construction are reflected as expenditures in governmental funds and the related assets are reported in the general fixed assets account group. Fixed assets utilized in the proprietary funds are capitalized in the respective fund. All fixed assets are capitalized at cost (or estimated historical cost) and updated for the cost of additions and retirements during the year.

Donated fixed assets are recorded at their fair market values as of the date donated. The District has established a capitalization threshold for fixed assets at \$500. Books, records, movies, and other learning aids kept at the District Library are also included for reporting purposes. The District does not possess any infrastructure.

The cost of normal maintenance and repairs that do not add to the value of the asset or materially extend an asset's life are not capitalized. Improvements are capitalized and depreciated over the remaining useful lives of the related fixed assets, as applicable. The District's policy is not to capitalize interest costs incurred as part of construction.

Assets in the general fixed assets account group are not depreciated. Depreciation of furniture and equipment in the proprietary fund types is computed using the straight-line basis over an estimated useful life of five to ten years.

8. *Intergovernmental Revenues*

For governmental funds, intergovernmental revenue, such as grants awarded on a non-reimbursement basis and entitlements, are recorded as receivables and revenues when measurable and available. Reimbursement-type grants are recorded as receivables and revenues when the related expenditures are incurred. Other than commodities, grants and entitlements received for proprietary fund operating purposes are recognized as non-operating revenues in the accounting period in which they are earned and become measurable. 8. *Intergovernmental Revenues - Continued*

Grants and entitlements amounted to approximately 37 percent of the District's operating revenue during the 2001 fiscal year.

9. *Prepaid Items*

Payments made to vendors for services that will benefit periods beyond June 30, 2001 are recorded as prepaid items. A current asset for the prepaid amount is recorded at the time of the purchase and an expenditure/expense is reported in the year in which services are consumed.

10. *Short-Term, Interfund Assets/Liabilities*

During the course of operations, numerous transactions occur between individual funds for goods provided or services rendered. These receivables and payables are classified as "due from other funds" or "due to other funds." Short-term interfund loans are classified as interfund receivables/payables.

11. *Compensated Absences*

Vacation benefits are accrued as a liability as the benefits are earned if the employees' rights to receive compensation are attributable to services already rendered and it is probable that the District will compensate the employees for the benefits through paid time off or some other means. Sick leave benefits are accrued as a liability using the vesting method. The liability includes the employees who are currently eligible to receive termination benefits and those the District has identified as probable of receiving payment in the future. The amount is based on accumulated sick leave and employees' wage rates at fiscal year end, taking into consideration any limits specified in the District's termination policy.

NOTE A - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - Continued

11. *Compensated Absences*

For governmental funds, the District records a liability for accumulated unused vacation time when earned for all employees with more than one year of service. The District records a liability for accumulated unused sick leave for classified employees after one year of current service with the District and for certified employees and administrators after one year of service. The current portion of unpaid compensated absences is the amount expected to be paid using available expendable resources. These amounts are recorded in the account "compensated absences payable" in the fund from which the employees who have accumulated unpaid leave are paid. The remainder is reported in the general long-term obligations account group. In proprietary funds, the entire amount of compensated absences is reported as a fund liability.

Employees earn vacation at rates specified by Union Contractual Agreement based on credited service. Administrative and 260 day employees are entitled to vacation ranging from 10 to 20 days.

All employees are entitled to a sick leave credit equal to one and one-quarter days for each month of service. This sick leave will either be absorbed by time off due to illness or injury or, within certain limitations, be paid to the employee upon retirement. The amount paid to an employee upon retirement is limited to thirty-three and one-third percent of the value of the first 132 days of sick leave. The total maximum is 44 days. At June 30, 2001, a current liability of \$53,123 and \$22,215 in the general and enterprise funds, respectively, has been provided for earned but unused sick leave severance. Also, the District has recorded an estimated long-term liability of \$1,363,652 for severance pay and sick leave payable. The amount has been recorded in the general long-term obligations account group since the liability will not require the use of current expendable available financial resources. These amounts are included in Compensated Absences on the Combined Balance Sheet.

12. *Contributed Capital*

Contributed capital represents resources from other funds, other governments and private sources provided to enterprise funds and is not subject to repayment. These assets are recorded at their fair market value on the date contributed. Depreciation on those assets acquired or constructed with contributed resources is expensed and closed to unreserved retained earnings at year end.

13. *Long-Term Debt*

Long-term debt is recognized as a liability of a governmental fund when due, or when resources have been accumulated in the debt service fund for payment early in the following year. For other long-term obligations, only that portion expected to be financed from expendable, available financial resources is reported as a fund liability of a governmental fund. The remaining portion of such obligations is reported in the general long-term obligations account group. Long-term liabilities expected to be financed from proprietary fund operations are accounted for in those funds.

Under Ohio Law, a debt retirement fund must be created and used for the payment of all debt principal and interest. Generally accepted accounting principles require the allocation of the debt liability among the debt service fund and the general long-term obligations account group, with principal and interest payments on matured general long-term debt reported in the debt service fund. To comply with GAAP reporting requirements, the District's debt retirement fund has been split among the appropriate funds and account group. Debt service fund resources used to pay both the principal and interest have also been allocated accordingly.

14. *Interfund Transactions*

Quasi-external transactions are accounted for as revenues, expenditures or expenses. Transactions that constitute reimbursements to a fund for expenditures/expenses initially made from it that are properly applicable to another fund, are recorded as expenditures/expenses in the reimbursing fund and as reductions of expenditures/expenses in the fund that is reimbursed.

Nonrecurring or nonroutine permanent transfers of equity are reported as residual equity transfers. All other interfund transfers are reported as operating transfers.

15. *Fund Equity*

The District records reservations for portions of fund equity which are legally segregated for specific future use or which do not represent available, spendable resources and, therefore, are not available for expenditure. Undesignated fund balance indicates that portion of fund equity which is available for reappropriation in future periods. Fund equity reserves are established for property taxes, encumbrances, inventory, budget stabilization, textbooks and materials and prepaid items.

16. PROPRIETARY FUND ACCOUNTING

Under the guidelines of GASB Statement No. 20, "Accounting and Financial Reporting and Other Governmental Entities that use Proprietary Fund Accounting", the District has elected not to apply Financial Accounting Standards Board Statements and Interpretations issued after November 30, 1989 to its proprietary activities.

17. ESTIMATES

The preparation of the financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

18. TOTAL COLUMNS ON GENERAL PURPOSE FINANCIAL STATEMENTS

Total columns on the general purpose financial statements are captioned (Memorandum Only) to indicate that they are presented only to facilitate financial analysis. Data in these columns do not present financial position, results of operations, or cash flows in conformity with generally accepted accounting principles. Neither is such data comparable to a consolidation. Interfund eliminations have not been made in the aggregation of this data.

For the fiscal year 2001, the School District has implemented GASB Statement No. 33, "Accounting and Financial Reporting for Nonexchange Transactions" and GASB Statement No. 36, "Recipient Reporting for Certain Shared Nonexchange Revenue." At June 30, 2001, there was no effect on beginning fund balance due to this implement action.

NOTE B - FUND DEFICITS

Fund balances at June 30, 2001 included the following individual fund deficits:

Drug Free Schools	22
Title II	1,376
D.P.I.A.	2,408

The general fund's deficit balance resulted from adjustments for accrued liabilities. Property tax and State entitlement monies received in July and August are sufficient to cover this deficit and will be used to liquidate these liabilities.

The special revenue and internal service deficit fund balances resulted from adjustments for accrued liabilities. The general fund is liable for any deficit in these funds and provides operating transfers when cash is required, not when accruals occur.

NOTE C - PROPERTY TAX

Real property taxes are levied on assessed values which equal 35% of appraised value. The County Auditor reappraises all real property every six years with a triennial update. The last update was completed for tax year 1999.

Real property taxes become a lien on all non-exempt real property located in the County on January 1. Real property taxes are payable annually or semiannually. If paid annually, payment is due December 31; if paid semiannually, the first payment is due December 31 with the remainder payable by June 20 of the following year. Under certain circumstances, state statute permits later payment dates to be established.

The full tax rate applied to real property for tax (calendar) year 2000 was \$42.49 per \$1,000 of assessed valuation. After adjustment of the rate for inflationary increases in property values, the effective tax rate was \$28.60 per \$1,000 of assessed valuation for real property classification as residential/agricultural and \$28.60 per \$1,000 of assessed valuation for all other real property. Real property owners' tax bills are further reduced by homestead and rollback deductions, when applicable. The amount of these homestead and rollback reductions is reimbursed to the District by the State of Ohio.

Owners of tangible personal property are required to file a list of such property including costs, by April 30 of each year. The property is assessed for tax purposes at varying statutory percentages of cost. The tax rate applied to tangible personal property for tax (calendar) year 2001 was \$42.49 per \$1,000 of assessed valuation.

NOTE C - PROPERTY TAX – Continued

The Summit County Treasurer collects property tax on behalf of all taxing districts within the County. The Summit County Auditor periodically remits to the taxing districts their portions of the taxes collected.

Accrued property taxes receivable represent delinquent taxes outstanding and real property, personal property and public utility taxes which became measurable as of June 30, 2001. Although total property tax collections for the next fiscal year are measurable, only the amount available as an advance at June 30 is intended to finance current year operations. The receivable is therefore offset by a credit to deferred revenue for that portion not intended to finance current year operations. The amount available as an advance at June 30, 2001 and recognized as revenue was \$599,559.

The District has established a medical self-insurance fund which is accounted for in the internal service fund. The purpose of this fund is to pay medical and dental claims of the District's employees and their covered dependents and minimize the total cost of medical insurance to the District. A third party administrator, Professional claims Management, Inc. located in Canton, Ohio, reviews and pays all claims. For the plan year ended June 30, 2001, medical claims exceeding \$50,000 per covered individual, per year, or \$1,487,923 in the aggregate per year are covered through private insurance carriers. The self-insurance fund is funded by expenditures for health insurance out of the general fund and enterprise fund.

The claims liability of \$114,925 reported in the fund at June 30, 2001 is based on the requirements of Governmental Accounting Standards Board Statement No. 10, which requires that a liability for unpaid claims cost, including estimates of cost relating to incurred but not reported claims, be reported. Changes in the fund's claims liability amount in fiscal year 2000 and 2001 were:

	Balance at Beginning of Year	Current Year Claims	Claim Payments	Balance at End of Year
2000	277,999	1,506,224	1,595,410	188,813

NOTE I - STATE SCHOOL FUNDING DECISION

On September 6, 2001 the Ohio Supreme Court issued its latest opinion regarding the State's school funding plan. The decision identified aspects of the current plan that require modification if the plan is to be considered constitutional, including.

- A change in the school districts that are used as the basis for determining the base cost support amount. Any change in the amount of funds distributed to school districts as a result of this change must be retroactive to July 1, 2001, although a time line for distribution is not specified.
- Fully funding parity aid no later than the beginning of fiscal year 2004 rather than fiscal year 2006.

The Supreme Court relinquished jurisdiction over the case based on anticipated compliance with its order.

NOTE I - STATE SCHOOL FUNDING DECISION - Continued

In general, it is expected that the decision would result in an increase in State funding for most Ohio school districts. However, as of October 25, 2001, the Ohio General Assembly is still analyzing the impact this Supreme Court decision will have on funding for individual school districts. Further, the State of Ohio, in a motion filed September 17, 2001, asked the Court to reconsider and clarify the parts of the decision changing the school districts that are used as the basis for determining the base costs support amount and the requirement that changes be made retroactive to July 1, 2001.

On November 2, 2001, the Court granted this motion for reconsideration. The Court may re-examine and re-determine any issue upon such reconsideration.

As of the date of these financial statements, the School District is unable to determine what effect, if any, this decision will have on its future State funding and on its financial operations.

NOTE J – DEFINED BENEFIT PENSION PLANS

1. *State Teachers' Retirement System (STRS)*

The District contributes to the State Teachers' Retirement System of Ohio (STRS), a cost-sharing multiple employer public employee retirement system administered by the State Teachers' Retirement Board. STRS provides basic retirement benefits, disability, survivor, and health care benefits based on eligible service credit to members and beneficiaries. Benefits are established by Chapter 3307 of the Ohio Revised Code. STRS issues a publicly available financial report that includes financial statements and required supplementary information for STRS.

The report may be obtained by writing to the State Teachers' Retirement System, 275 East Broad Street, Columbus, Ohio 43215-3771.

Plan members are required to contribute 9.3 percent of their annual covered salary and the District is required to contribute 14 percent; 10.5 percent was the portion used to fund pension obligations. Contribution rates are established by STRS, upon recommendation of its consulting actuary, not to exceed statutory maximum rates of 10 percent for members and 14 percent for employers. The District's required contributions for pension obligations to STRS for the fiscal years ended June 30, 2001, 2000, and 1999, were \$1,754,616, \$1,583,424 and \$1,559,952, respectively; 83 percent has been contributed for fiscal year 2001 and 100 percent

for the fiscal years 2000 and 1999. \$308,807, representing the unpaid contribution for fiscal year 2001, is recorded as a liability within the respective funds.

2. *School Employees Retirement System (SERS)*

The District contributes to the School Employees Retirement System of Ohio (SERS), a cost-sharing multiple employer public employee retirement system administered by the School Employee Retirement Board. SERS provides basic retirement benefits, disability, survivor, and health care benefits based on eligible service credit to members and beneficiaries. Benefits are established by Chapter 3309 of the Ohio Revised Code. SERS issues a publicly available financial report that includes financial statements and required supplementary information for SERS. The report may be obtained by writing to the School Employees Retirement System, 45 North Fourth Street, Columbus, Ohio 43215-3634.

Plan members are required to contribute 9 percent of their annual covered salary and the District is required to contribute 14 percent; 9.02 percent was the portion used to fund pension obligations. The contribution rates are not determined actuarially, but are established by SERS's Retirement Board within the rates allowed by State statute. The adequacy of the contribution rates is determined annually. The District's required contributions for pension obligations to SERS for the fiscal years ended June 30, 2001, 2000, and 1999, were \$451,093, \$423,388, and \$460,518, respectively; 44 percent has been contributed for fiscal year 2001 and 100 percent for the fiscal years 2000 and 1999. \$276,875, representing the unpaid contribution for fiscal year 2001, is recorded as a liability within the respective funds and the general long-term obligations account group.

3. *Postemployment Benefits*

The District provides comprehensive health care benefits to retired teachers and their dependents through the State Teachers' Retirement System (STRS), and to retired non-certified employees and their dependents through the School Employees Retirement System (SERS). Benefits include hospitalization, physicians' fees, prescription drugs and reimbursement of monthly Medicare premiums. Benefit provisions and the obligations to contribute are established by the Systems based on authority granted by State statute. Both systems are funded on a pay-as-you-go basis.

NOTE J – DEFINED BENEFIT PENSION PLANS – Continued

3. *Postemployment Benefits - Continued*

The State Teachers' Retirement Board has statutory authority over how much, if any, of the health care costs will be absorbed by STRS. Most benefit recipients pay a portion of health care cost in the form of a monthly premium. By Ohio law, the cost of coverage paid from STRS funds shall be included in the employer contribution rate, currently 14 percent of covered payroll. For the fiscal year end June 30, 2000, the board allocated employer contributions equal to eight percent of covered payroll to the Health Care Reserve Fund.

STRS pays health care benefits from the health care reserve fund. The balance in the fund was \$3,419 billion at June 30, 2000 (latest data available). For the year ended June 30, 2000, net health care costs paid by STRS were \$283,137,000 and STRS had 99,011 eligible benefit recipients.

For SERS, coverage is made available to service retirees with ten or more years of qualifying service credit, disability, and survivor benefit recipients. Members retiring on or after August 1, 1989, with less than twenty-five years of service credit must pay a portion of their premium for health care. The portion is based on years of service up to a maximum of 75 percent of the premium.

For this fiscal year, employer contributions to fund health care benefits were 9 percent of covered payroll. In addition, SERS levies a surcharge to fund health care benefits equal to 14 percent of the difference between a minimum pay and the member's pay, pro-rated for partial service credit. For fiscal year 2000, the minimum pay has been established at \$12,400.

The target level for the health care reserve is 125 percent of the annual health care expenses. Expenses for health at June 30, 2000, were \$140.7 million. At June 30, 1999 SERS had net assets available for payment of health care benefits of \$252.3 million. SERS has approximately 50,000 participants currently receiving health care benefits.

NOTE K- FEDERAL AND STATE GRANTS (Intergovernmental Receipts)

During the year ended June 30, 2001, the District received grants-in-aid from federal and state sources, for specific purposes that are subject to review and audit by the grantor agencies or their designee. Such audits could lead to a request for reimbursement to the grantor agency for expenditures disallowed under terms of the grant. Based on prior experience, the District's management believes such disallowances, if any, would be immaterial.

NOTE L - SEGMENT INFORMATION FOR ENTERPRISE FUNDS

The District maintains only one enterprise fund which provides lunchroom/cafeteria services, therefore, segment information for the year ended June 30, 2001 is not presented in these notes.

NOTE M - JOINTLY GOVERNED ORGANIZATION

Northeast Ohio Network for Educational Technology (NEONET):

NEONET is a jointly governed organization created as a regional council of governments made up of public Districts and county boards of education from Summit and Portage Counties. The primary function of NEONET is to provide data processing services to its member districts with the major emphasis being placed on accounting, inventory control and payroll services. Other areas of service provided by NEONET include student scheduling, registration, grade reporting, and test scoring. Each member district pays an annual fee for the services provided by NEONET. NEONET is governed by a board of directors comprised of each Superintendent within the Organization. The Summit County Educational Service Center serves as the fiscal agent of the organization and receives funding from the State Department of Education. Each district has one vote in all matters and each member district's control over budgeting and financing of NEONET is limited to its voting authority and any representation it may have on the board of directors. The continued existence of NEONET is not dependent on the District's continued participation and no equity interest exists.

A. Restricted Assets

Restricted assets in the general fund represent cash and cash equivalents set aside to establish a budget stabilization and textbook and material reserve. This reserve is required by State statute and can be used only after receiving approval from the State Superintendent of Public Instruction. A fund balance reserve has also been established

B. Set-Aside Requirements

State of Ohio House Bill 412 requires the District to set-aside a portion of the general operating resources for future use. For the fiscal year ended June 30, 2001, the following table disclosed the required set-asides:

	<u>Textbooks</u>	<u>Capital Acquisition</u>	<u>Budget Stabilization</u>	<u>Totals</u>
Set-aside Cash Balance as of June 30, 2000	\$ 84,459	\$ 0	\$ 357,921	\$ 442,380

**Independent Auditors' Report on Compliance and on Internal Control Over
Financial Reporting Based on an Audit of General Purpose Financial Statements
Performed in Accordance with Government Auditing Standards**

To the Board of Education
Green Local School District
Green, Ohio 44232

We have audited the general purpose financial statements of the Green Local School District (the District), as of and for the year ended June 30, 2001 and have issued our report thereon dated December 11, 2001. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audit contained in Government Auditing Standards, issued by the Comptroller General of the United States.

Compliance

As part of obtaining reasonable assurance about whether Green Local School District's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grants, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance that are required to be reported under Government Auditing Standards.

Internal Control over Financial Reporting

In planning and performing our audit, we considered Green Local School District's internal control over financial reporting in order to determine our auditing procedures for the purpose of expressing our opinion on the general purpose financial statements and not to provide assurance on the internal control over financial reporting. Our consideration of the internal control over financial reporting would not necessarily disclose all matters in the internal control over financial reporting that might be material weaknesses. A material weakness is a condition in which the design or operation of one or more of the internal components does not reduce to a relatively low level the risk that misstatements in amounts that would be material in relation to the financial statements being audited may occur and not be detected within a timely period by employees in the

normal course of performing their assigned functions. We noted no matters involving the internal control over financial reporting and its operation that we consider to be material weaknesses.

This report is intended for the information of the Board of Education, management, federal awarding agencies and pass-through entities and the Auditor of State and is not intended to be and should not be used by anyone other than these specified parties.

Compliance

We have audited the compliance of Green Local School District with the types of compliance requirements described in the U.S. Office of Management and Budget (OMB) Circular A-133 Compliance Supplement that are applicable to each of its major federal programs for the year ended June 30, 2001. Green Local School District's major federal programs are identified in the summary of auditors' results section of the accompanying schedule of findings and questioned costs. Compliance with the requirements of laws, regulations, contracts and grants applicable to each of its major federal programs is the responsibility of Green Local School District's management. Our responsibility is to express an opinion on Green Local School District's compliance based on our audit.

We conducted our audit of compliance in accordance with auditing standards generally accepted in the United States of America, auditing standards; the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States; and OMB Circular A-133, Audits of States, Local Governments, and Non-Profit Organizations. Those Standards and OMB Circular A-133 require that we plan and perform the audit to obtain reasonable assurance about whether noncompliance with the types of compliance requirements referred to above that could have a direct and material effect on a major federal program occurred. An audit includes examining, on a test basis, evidence about Green Local School District's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion. Our audit does not provide a legal determination on Green Local School District's compliance with those requirements.

In our opinion, Green Local School District complied, in all material respects, with the requirements referred to above that are applicable to each of its major federal programs for the year ended June 30, 2001.

Internal Control Over Compliance

The management of Green Local School District is responsible for establishing and maintaining effective internal control over compliance with requirements of laws, regulations, contracts and grants applicable to federal programs. In planning and performing our audit, we considered Green Local School District's internal control over compliance with requirements that could have a direct and material effect on a major federal program in order to determine our auditing procedures for the purpose of expressing our opinion on compliance and to test and report on internal control over compliance in accordance with OMB Circular A-133.

Our consideration of the internal control over compliance would not necessarily disclose all matters in the internal control that might be material weaknesses. A material weakness is a condition in which the design or operation of one or more of the internal control components does not reduce to a relatively low level the risk that noncompliance with applicable requirements of laws, regulations, contracts and grants that would be material in relation to a major federal program being audited may occur and not be detected within a timely period by employees in the normal course of performing their assigned functions. We noted no matters involving the internal control over compliance and its operation that we consider to be material weaknesses.

This report is intended for the information of the Board of Education, management, federal awarding agencies and pass-through entities and the Auditor of State and is not intended to be and should not be used by anyone other than these specified parties.
