NOTES TO THE SCHEDULE OF FEDERAL AWARDS RECEIPTS AND EXPENDITURES JUNE 30, 2015

NOTE A - SIGNIFICANT ACCOUNTING POLICIES

The accompanying Schedule of Federal Awards Receipts and Expenditures (the Schedule) reports the Beachwood City School District's (the District's) federal award programs' receipts and disbursements. The Schedule has been prepared on the cash basis of accounting.

NOTE B - CHILD NUTRITION CLUSTER

The District commingles cash receipts from the U.S. Department of Agriculture with similar State grants. When reporting expenditures on this Schedule, the District assumes it expends federal monies first.

NOTE C - FOOD DONATION PROGRAM

The District reports commodities consumed on the Schedule at the fair value. The District allocated donated food commodities to the respective program that benefitted from the use of those donated food commodities.

INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS REQUIRED BY GOVERNMENT AUDITING STANDARDS

Beachwood City School District Cuyahoga County 24601 Fairmount Boulevard Beachwood, Ohio 44122

To the Board of Education:

We have audited, in accordance with auditing standards generally accepted in the United States and the Comptroller General of the United States' *Government Auditing Standards*, the financial statements of the governmental activities, each major fund, and the aggregate remaining fund information of the Beachwood City School District, Cuyahoga County, (the District) as of and for the year ended June 30, 2015, and the related notes to the financial statements, which collectively comprise the District's basic financial statements and have issued our report thereon dated December 21, 2015, wherein we noted the District adopted Governmental Accounting Standards Board Statement No. 68, Accounting and Financial Reporting for Pensions – an Amendment of GASB Statement No. 27 and Statement No. 71, Pension Transition for Contributions Made Subsequent to the Measurement Date,

Internal Control Over Financial Reporting

As part of our financial statement audit, we considered the District's internal control over financial reporting (internal control) to determine the audit procedures appropriate in the circumstances to the extent necessary to support our opinions on the financial statements, but not to the extent necessary to opine on the effectiveness of the District's internal control. Accordingly, we have not opined on it.

A deficiency in internal control exists when the design or operation of a control does not allow management or employees, when performing their assigned functions, to prevent, or detect and timely correct misstatements. A material weakness is a deficiency, or combination of internal control deficiencies resulting in a reasonable possibility that internal control will not prevent or detect and timely correct a material misstatement of the District's financial statements. A significant deficiency is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all internal control deficiencies that might be material weaknesses or significant deficiencies. Given these limitations, we did not identify any deficiencies in internal control that we consider material weaknesses. However, unidentified material weaknesses may exist.

Beachwood City School District Cuyahoga County Independent Auditor's Report on Internal Control Over Financial Reporting and on Compliance and Other Matters Required by *Government Auditing Standards* Page 2

Compliance and Other Matters

As part of reasonably assuring whether the District's financial statements are free of material misstatement, we tested its compliance with certain provisions of laws, regulations, contracts, and grant agreements, noncompliance with which could directly and materially affect the determination of financial statement amounts. However, opining on compliance with those provisions was not an objective of our audit and accordingly, we do not express an opinion. The results of our tests disclosed no instances of noncompliance or other matters we must report under *Government Auditing Standards*.

Purpose of this Report

This report only describes the scope of our internal control and compliance testing and our testing results, and does not opine on the effectiveness of the District's internal control or on compliance. This report is an integral part of an audit performed under *Government Auditing Standards* in considering the District's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

INDEPENDENT AUDITOR'S REPORT ON COMPLIANCE WITH REQUIREMENTS APPLICABLE TO THE MAJOR FEDERAL PROGRAM AND ON INTERNAL CONTROL OVER COMPLIANCE REQUIRED BY OMB CIRCULAR A-133 AND THE SCHEDULE OF FEDERAL AWARDS RECEIPTS AND EXPENDITURES

Beachwood City School District Cuyahoga County 24601 Fairmount Boulevard Beachwood, Ohio 44122

To the Board of Education:

Report on Compliance for the Major Federal Program

We have audited the Beachwood City School District's (the District) compliance with the applicable requirements described in the U.S. Office of Management and Budget (OMB) *Circular A-133, Compliance Supplement* that could directly and materially affect the Beachwood City School District's major federal program for the year ended June 30, 2015. The *Summary of Auditor's Results* in the accompanying schedule of findings identifies the District's major federal program.

Management's Responsibility

The District's Management is responsible for complying with the requirements of laws, regulations, contracts, and grants applicable to its federal program.

Auditor's Responsibility

Our responsibility is to opine on the District's compliance for the District's major federal program based on our audit of the applicable compliance requirements referred to above. Our compliance audit followed auditing standards generally accepted in the United States of America; the standards for financial audits included in the Comptroller General of the United States' *Government Auditing Standards*; and OMB Circular A-133, *Audits of States, Local Governments, and Non-Profit Organizations*. These standards and OMB Circular A-133 require us to plan and perform the audit to reasonably assure whether noncompliance with the applicable compliance requirements referred to above that could directly and materially affect a major federal program occurred. An audit includes examining, on a test basis, evidence about the District's compliance with those requirements and performing such other procedures as we considered necessary in the circumstances.

We believe our audit provides a reasonable basis for our compliance opinion on the District's major program. However, our audit does not provide a legal determination of the District's compliance.

Cuyahoga County
Independent Auditor's Report On Compliance With Requirements
Applicable to the Major Federal Program And On Internal Control
Over Compliance Required By OMB Circular A-133 and the
Schedule of Federal Awards Receipts and Expenditures
Page 2

Opinion on the Major Federal Program

In our opinion, the Beachwood City School District complied, in all material respects with the compliance requirements referred to above that could directly and materially affect its major federal program for the year ended June 30, 2015.

Report on Internal Control Over Compliance

The District's management is responsible for establishing and maintaining effective internal control over compliance with the applicable compliance requirements referred to above. In planning and performing our compliance audit, we considered the District's internal control over compliance with the applicable requirements that could directly and materially affect a major federal program, to determine our auditing procedures appropriate for opining on each major federal program's compliance and to test and report on internal control over compliance in accordance with OMB Circular A-133, but not to the extent needed to opine on the effectiveness of internal control over compliance. Accordingly, we have not opined on the effectiveness of the District's internal control over compliance.

A deficiency in internal control over compliance exists when the design or operation of a control over compliance does not allow management or employees, when performing their assigned functions, to prevent, or to timely detect and correct, noncompliance with a federal program's applicable compliance requirement. A material weakness in internal control over compliance is a deficiency, or combination of deficiencies, in internal control over compliance, such that there is a reasonable possibility that material noncompliance with a federal program compliance requirement will not be prevented, or timely detected and corrected. A significant deficiency in internal control over compliance is a deficiency, or a combination of deficiencies, in internal control over compliance with federal program's applicable compliance requirement that is less severe than a material weakness in internal control over compliance, yet important enough to merit attention by those charged with governance.

Our consideration of internal control over compliance was for the limited purpose described in the first paragraph of this section and would not necessarily identify all deficiencies in internal control over compliance that might be material weaknesses or significant deficiencies. We did not identify any deficiencies in internal control over compliance that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

This report only describes the scope of our internal control compliance tests and the results of this testing based on OMB Circular A-133 requirements. Accordingly, this report is not suitable for any other purpose.

Report on Schedule of Federal Awards Receipts and Expenditures Required by OMB Circular A-

We have also audited the financial statements of the governmental activities, each major fund and the aggregate remaining fund information of the Beachwood City School District (the District) as of and for the year ended June 30, 2015, and the related notes to the financial statements, which collectively comprise the District's basic financial statements. We issued our unmodified report thereon dated December 21, 2015. Our opinion also explained that the District adopted Governmental Accounting Standards No. 68 and 71 during the year. We conducted our audit to opine on the District's basic financial statements. The accompanying schedule of federal awards receipts and expenditures presents additional analysis required by the U.S. Office of Management and Budget Circular A-133, Audits of States, Local Governments, and Non-Profit Organizations and is not a required part of the basic financial statements. The schedule is management's responsibility, and was derived from and relates directly to the underlying accounting and other records management used to prepare the basic financial statements. We subjected this schedule to the auditing procedures we applied to the basic financial statements. We also applied certain additional procedures, including comparing and reconciling this schedule directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves, in accordance with auditing standards generally accepted in the United States of America. In our opinion, this schedule is fairly stated, in all material respects, in relation to the basic financial statements taken as a whole.

INTRODUCTORY SECTION

24601 Fairmount Boulevard Beachwood, OH 44122 Phone: 216.464.2600

December 21, 2015

Board of Education Beachwood City School District 24601 Fairmount Blvd. Beachwood, Ohio 44122-2298

Dear Board Members:

The comprehensive annual financial report of the Beachwood City School District (the "School District") for the fiscal year ended June 30, 2015, is hereby submitted. Responsibility for both the accuracy of the data and the completeness and fairness of the presentation, including all disclosures, rests with the School District. To the best of our knowledge and belief, the enclosed data are accurate in all material respects and are reported in a manner designed to present fairly the financial position and results of operations of the various funds and account groups of the School District. All disclosures necessary to enable the reader to gain an understanding of the School District's financial activities have been included.

This report includes all funds of the School District. The School District provides a full range of primary and secondary educational services primarily to the residents of the City of Beachwood, Ohio. However, the City of Beachwood, Ohio, and the Beachwood Public Library have not met the established criteria for inclusion in the reporting entity and, accordingly, are excluded from this report.

Management's Discussion and Analysis (MD&A) immediately follows the Independent Auditor's Report and provides an overview and analysis of the basic financial statements.

The School District

The School District was formed in 1915 and is located in a prosperous suburban area east of Cleveland, Ohio. The community's tax base is evenly distributed between commercial and residential property. The School District serves 1,563 students from Pre-K through 12th grade in five instructional facilities.

Major Initiatives

Mission and Vision

All of our efforts as educators in the School District are driven by our mission statement: To develop intellectual entrepreneurs with a social conscience. The mission of the Beachwood City School District is short in length and powerful in vision. We believe that we must develop adults who are seekers of knowledge, creative, flexible, and reflective — in other words, an intellectual capacity. These adults are risk-takers,

visionaries, brokers, passionate, and committed to excellence. Beachwood students also enjoy experiences where they learn to be globally responsible, altruistic, and environmentally, culturally and politically sensitive.

Board of Education Goals

The goals adopted by our Board of Education serve as a framework for both our academic and administrative operations. These goals are compelling and focused. They are embraced by our entire staff and serve as the basis for building and department strategies and tactics. And they resulted in a year of great synergy and growth.

- Goal # 1 To use a continuous improvement process in support of systems and programs that promote high standards of performance and high expectations for learning.
- Goal # 2 To develop a culture of accountability that relies on data, research, evaluation and assessment as tools to measure the effectiveness of programs and the satisfaction of stakeholders.
- Goal # 3 To continue to develop and support systems, programs, instructional standards and professional development to enhance students' knowledge, skills and performance in every curriculum area.
- Goal # 4 To maintain open and effective communication with the public, staff and students in order to be aware of attitudes, opinions and ideas.
- $Goal \ \# \ 5 To \ continue \ to \ integrate \ advanced \ technology \ into \ all \ phases \ of \ the \ educational \ and \ administrative \ processes.$
- $Goal \# 6-To\ provide\ the\ necessary\ financial\ resources\ for\ the\ support\ of\ our\ instructional\ programs\ through\ prudent\ management\ and\ fiscal\ responsibility.$
- Goal # 7 To ensure that students and staff have a safe and appropriate place to learn and work.

Major Initiatives and Accomplishments

2014-2015 Academic Achievements:

A distinguishing characteristic of Beachwood City Schools is the district's attention to the individual needs of each student. The relatively small size of our student population aids us in that process. So too, do the district's abundant resources. The Beachwood City School District is often referred to as a "family" and that label is earned. Nobody is a mere number in Beachwood. It is that personal attention to individual needs that drives our curriculum, our programs, our instruction, and our extra-curriculur opportunities. It is an attitudinal quality that few public school districts can demonstrate to the same degree.

Student Learning Standards

Several years' work revamping curriculum and instruction to conform to Ohio's New Learning Standards culminated in the 2014-2015 school year with the implementation of new state assessment instruments administered from Grades 3-12 across all core academic areas. Beachwood City Schools leveraged this process of curriculum realignment to create accelerated tracks in mathematics and science beginning in Grade 4. Approximately a third of all Beachwood students were targeted to be challenged in these advanced tracks. We are confident that this effort has been effective in tapping our students' full potential. Our belief appears to have been validated by the just-released raw data from the aforementioned battery of assessments.

District Report Card

At this time, Beachwood has received its preliminary data from the spring 2015 testing. This data will be used by the Ohio Department of Education (ODE) to create the district's "State Report Card." The raw data is

promising, showing almost all tests' passage rates above the 90% mark and the students tapped for accelerated tracks in mathematics and science performing almost entirely within the ODE's top two performance categories, Accelerated and Advanced.

Academic Distinctions

Beachwood Schools' impressive array of course offerings, quality programs, and extracurricular activities match those of much larger public schools. At the same time, Beachwood's relatively small size ensures that we can offer educational opportunities to meet the needs of each student. This is why our schools are often compared to the finest private schools in the area.

Beachwood High School's graduation rate for the class of 2015 was a proud 100 percent. Our high school offers 27 Advanced Placement and 21 Honors courses across various content areas. In addition, the University Hospitals-Beachwood High School Medical Academy and the Design & Innovation Program in partnership with Cleveland State University's Washkewicz College of Engineering offer our students unique opportunities.

In its second year, the Medical Academy offered students monthly physician-led seminars on varied medical specialties and a "summer camp" experience where students dissected lungs, participated in triage simulations in the emergency room, and rotated through the hospital departments. In addition, a credit-bearing Anatomy & Physiology summer course was taught by a second year resident from University Hospitals.

The Design & Innovation Program completed its second year and can boast that 100% of its first-year students returned for the second-year course progression. The program has grown from a handful to more than 50 students enrolled in the Intro to Design & Innovation survey course. Third-year students have subdivided into a software engineering focused cohort and a cohort focused more on other engineering disciplines.

Beachwood's middle and elementary schools have been recognized for excellence in a variety of manners over the past several years. The middle school was redesignated as a National School to Watch and named by the ODE as one of the top 10 middle schools in Ohio. Bryden Elementary, our K-2 building, was honored as the top public school in Ohio based upon students' fall testing results of third graders. Most recently, Hilltop Elementary, our 3-5 building, was named a 2015 National Blue Ribbon School of Excellence by the United States Department of Education. This award was announced on September 29, 2015.

Student and Staff Successes

Beachwood's students competed in a host of state and national competitions during the 2014-2015 school year. Our high school Robotics Team placed fourth in Ohio and one of six qualifying Beachwood Destination Imagination teams placed seventh out of 77 teams in the international DI Global Finals competition. Two middle school students placed in the state Power of the Pen competition with one bringing home the "Best of the Best" award. Our high school marketing class's Junior Achievement chapter won national Company of the Year honors. Beachwood High School's newspaper, The Beachcomber, won its third consecutive first-place rating at the Ohio Scholastic Media Conference. Ten students placed at the Northeast Ohio Science and Engineering Fair with four taking first place honors and one scoring Grand Prize honors. Our school libraries were awarded "Outstanding School Library District" awards for 2015 by the Ohio Educational Library Media Association. One Beachwood librarian won the "Information Technology Innovation Award." Our district won its 8th consecutive "Best Communities for Music Education" from the NAMM Foundation.

Athletics

Beachwood's athletic programs continued to shine in 2014-2015. The 2014 fall sports season yielded conference championships in football and boys soccer. The football team qualified for the state playoffs and the boys soccer team advanced to the regional finals, the farthest in school history. Seven athletes earned All-Ohio honors. The winter season saw a conference championship for girls basketball and a sectional championship for the boys basketball team, an indoor track state championship in the 4x200 relay as well as a swimmer qualifying for the state championships. Two athletes earned All-Ohio honors. Our baseball team won the conference championship in the spring 2015 season and the boys tennis team qualified two doubles teams for the state tournament.

Facilities

During the summer of 2015, construction documents were finalized and bids approved for the complete renovation of the Beachwood High School auditorium. The facility will be state-of-the-art when it is complete in July 2015 and will house multiple school programs and events as well as those of our community-at-large. In addition, the district embarked on two major project studies exploring athletic field upgrades and possible elementary renovations or consolidation into a new construction facility.

Financial Policies

The School District has not adopted any new financial policies that had significant impact on the 2015 financial statements.

Accounting and Budgetary Controls

In developing and evaluating the School District's accounting system, consideration is given to the adequacy of internal accounting controls. Internal accounting controls are designed to provide reasonable but not absolute assurance regarding:

- (1) the safeguarding of assets against loss from unauthorized use or disposition; and
- (2) the reliability of financial records for preparing financial statements and maintaining accountability for the assets.

The concept of reasonable assurance recognizes that the cost of internal control should not exceed the benefits likely to be derived and that the evaluation of cost and benefits requires estimates and judgments by management.

All internal control evaluations occur within the above framework. We believe that the School District's internal accounting controls adequately safeguard assets and provide reasonable assurance of proper recording of financial transactions.

Long-Term Financial Planning

The School District is required by law to submit for Board approval a five year forecast which delineates projected revenues, expenditures and anticipated timing for new property tax ballot issues. The five year forecast must be approved by the Board of Education on or before October 31st of each school year and must be amended as necessary by no later than May 31st of each school year. School districts are not able to enter into contracts unless the School District demonstrates financial ability to pay for the contract over the life of the contract. The School District cannot include anticipated revenue through ballot issues as part of its certification of funds process.

GASB Statement 68 "Accounting and Financial Reporting for Pensions" Implementation:

The school district implemented GASB Statement 68 which had a significant impact on its net position. Historically the school district accounted for pension costs under GASB 27 which focused on a funding approach to pensions. This approach limited pension costs to annual contributions required by law which may or may not be sufficient to fully fund each plan's net pension liability. GASB 68 takes an earning approach to pension accounting. GASB notes that pension obligations whether funded or unfunded are part of the "employment exchange". GASB noted that the unfunded portion of this pension is a present obligation of the government and should be reported by the government as a liability since they receive the benefit of the exchange.

As a result of implementing GASB 68, the District is reporting a net pension liability and deferred inflows/outflows of resources related to pension on the accrual basis of accounting. This implementation had

the effect of restating net position at June 30, 2014, for governmental activities from \$57,281,765 to \$7,419.655.

See note 12 in the notes to the financial statements for a more in depth explanation of the financial impact.

Significant Local Economic Events

The economic condition and outlook for the community has been challenging, especially considering the economic downturn in the Midwest as well as the rest of the country. However, there are some bright spots on the horizon as the City continues to enjoy economic development. The commercial tax duplicate has decreased slightly by 1.6% mainly due to tax exempt properties removed from the tax duplicate. The community's tax base is fairly evenly distributed between commercial and residential property. Forty-seven percent of the School District's valuation is comprised of residential property and fifty-three percent is comprised of commercial or public utility property.

In 1990, The City of Beachwood annexed 400 acres from a neighboring community (Chagrin Highlands) in order to develop a proposed \$500 million, 633-acre corporate complex featuring office space, a retail mall and at least one hotel. The School District signed an agreement with the Warrensville Heights School District to share in any future tax revenue. Under the agreement, the School District will receive 30% of the tax revenue from all future development. Originally, Warrensville Heights School District was the sole beneficiary of school tax revenues. The School District considers the successful negotiation of tax-sharing a major accomplishment that will enhance school revenues in the future.

In 2009, Eaton Corporation, a Fortune 100 company, purchased 50 acres of property in the Chagrin Highlands area, through a tax incremental financing program approved by the City of Beachwood, Warrensville Heights Schools, State of Ohio and the Cleveland Cuyahoga County Port Authority. Revenue for the School District is not expected until joint programming has been developed with Warrensville Heights Schools and further discussion on the tax sharing agreement.

As of the date of this financial statement, it is expected that tax revenue sharing will be forthcoming in the next couple of years. The School District is currently in discussion with the Warrensville Heights School District to determine revenue trigger points and how and when tax revenue will be remitted to the School District from Warrensville Heights Schools. University Hospitals built a 1,000 bed hospital, The Ahuja Medical Center, on the Chagrin Highlands site. The Ahuja Medical Center opened in January, 2011. The District has contacted Ahuja to be a conduit for joint educational programming for the Beachwood and Warrensville School Districts. Joint educational programming is a condition of the revenue sharing agreement.

The School District was notified in July 2014 that it lost its tax appeal with the Cleveland Clinic over its tax exempt application which dates back to 2002. The School District chose not to further litigate the decision.

Prospects for the Future

House Bill 920, which was enacted in 1976 by the Ohio legislature, has severely limited schools in their funding initiatives. This law prohibits school districts from realizing additional revenue from previously voted millage due to reappraisal of property values. Although the School District's total operating millage is 79.3 mills, the effective millage levied and collected is 35.28 and 42.25 respectively, for residential and commercial property.

The State's budget bill, House Bill 64, which passed in June 2015, contained funding decreases for public schools which collected tangible personal property taxes. The House and Senate provided relatively flat funding for the two year budget bill, however the Governor vetoed this provision and enacted decreases commencing FY 17. The amount of funding loss for the School district is \$1.3 Million dollars. In addition, increases to private and community schools were also part of the budget bill. Payment for the private and community schools comes directly from the local school district.

The State of Ohio in its pursuit of "choice" in education continues to erode tax dollars earmarked for public education. The State passed a bill with the "Jon Petersen Special Needs Scholarship" provision which allows private entities and private schools to become providers of special education services. Depending on the nature of the identification of the disability these providers will take from \$7,196 to \$20,000 in funding from public schools. The School District receives on average \$553 per student from the State of Ohio for educating all of its students irrespective of disabilities. The original budget bill also contained parity language where public schools would receive no fewer dollars per pupil than the private schools in their district. The Governor also vetoed this provision.

While the State has set a 5% maximum number for students, there is no individual school cap. To date the School District has \$245,256 approved with more applications submitted. School districts are being further taxed by having its individual education plan team identifying these students which has increased the case loads of staff members.

In May 2010, the School District placed a \$30 million, 30 year 2.5 mill bond issue on the ballot to renovate the School District's 50 year old High School. The bond issue passed with an overwhelming 71% passage rate.

Other Information

Independent Audit

The Ohio Revised Code requires an annual audit of the School District's financial statements and its compliance with certain sections of the Ohio Revised Code. The Ohio Auditor of State conducted the School District's 2015 fiscal year audit. The Independent Auditor's Report appears at the beginning of the Financial Section of this report.

GFOA Certificate of Achievement

The Government Finance Officers Association of the United States and Canada (GFOA) awarded the Certificate of Achievement for Excellence in Financial Reporting to the Beachwood City School District for its Comprehensive Annual Financial Report for the fiscal year ended June 30, 2014. (This was the 27th consecutive year that the School District earned this prestigious award.) In order to be awarded a Certificate of Achievement, a governmental agency must publish an easily readable and efficiently organized comprehensive annual financial report. This report must satisfy both generally accepted accounting principles and applicable legal requirements.

The Certificate of Achievement is valid for a period of one year. We believe that our current report continues to conform with the reporting standards required for the awarding of the Certificate of Achievement for Excellence in Financial Reporting from the GFOA.

Acknowledgments

The publication of this report continues the School District's commitment toward presenting the financial reporting of the School District in a highly professional manner. It substantially increases the accountability of the School District to the taxpayers.

Sincere appreciation is extended to the Board of Education, who continues to strive for excellence in the schools at all levels. The commitment to our students, staff and community begins with them. Without their support, this report would not be possible.

Special recognition must be extended to the members of the Treasurer's Office: Kathleen Stroski, Assistant Treasurer; April Yuhas, Payroll Coordinator, Kelly Wright, Purchasing Agent; Rita Miklacic, EMIS coordinator and LaJour Sims, Financial Processing Coordinator; who assisted with the development of the Comprehensive

Treasurer; April Yuhas, Payroll Coordinator, Kelly Wright, Purchasing Agent; Rita Miklacic, EMIS coordinator and LaJour Sims, Financial Processing Coordinator; who assisted with the development of the Comprehensive Annual Financial Report and the annual audit. The department members have our sincere gratitude for their professional, efficient and dedicated service.

Audit Committee

The School District has an active audit committee, comprised of 3 members of the community (two of whom are CPA's, and one a small business entrepreneur), one Board member (also a CPA) and the School District's Treasurer. The Superintendent also serves in the capacity of an ex-officio member of this committee. A special thank you to the audit committee members who provided counsel and assisted in improving internal controls, reviewing the audit and making appropriate recommendations to the Board of Education. Mr. Michael Ritter, Mr. Robert Marks and Ms. Patty Rubin along with Mr. Michael Zawatsky (Board Member) are to be commended for their efforts.

Beachwood City School District Ohio

For its Comprehensive Annual Financial Report for the Fiscal Year Ended

June 30, 2014

Executive Director/CEO

FINANCIAL

SECTION

INDEPENDENT AUDITOR'S REPORT

Beachwood City School District Cuyahoga County 24601 Fairmount Boulevard Beachwood, Ohio 44122

To the Board of Education:

Report on the Financial Statements

We have audited the accompanying financial statements of the governmental activities, each major fund, and the aggregate remaining fund information of the Beachwood City School District, Cuyahoga County, Ohio (the District), as of and for the year ended June 30, 2015, and the related notes to the financial statements, which collectively comprise the District's basic financial statements as listed in the table of contents.

Management's Responsibility for the Financial Statements

Management is responsible for preparing and fairly presenting these financial statements in accordance with accounting principles generally accepted in the United States of America; this includes designing, implementing, and maintaining internal control relevant to preparing and fairly presenting financial statements that are free from material misstatement, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to opine on these financial statements based on our audit. We audited in accordance with auditing standards generally accepted in the United States of America and the financial audit standards in the Comptroller General of the United States' *Government Auditing Standards*. Those standards require us to plan and perform the audit to reasonably assure the financial statements are free from material misstatement.

An audit requires obtaining evidence about financial statement amounts and disclosures. The procedures selected depend on our judgment, including assessing the risks of material financial statement misstatement, whether due to fraud or error. In assessing those risks, we consider internal control relevant to the District's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not to the extent needed to opine on the effectiveness of the District's internal control. Accordingly, we express no opinion. An audit also includes evaluating the appropriateness of management's accounting policies and the reasonableness of their significant accounting estimates, as well as our evaluation of the overall financial statement presentation.

We believe the audit evidence we obtained is sufficient and appropriate to support our audit opinions.

Beachwood City School District Cuyahoga County Independent Auditor's Report Page 2

Opinion

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, each major fund, and the aggregate remaining fund information of the Beachwood City School District, Cuyahoga County, Ohio, as of June 30, 2015, and the respective changes in financial position and, where applicable, cash flows thereof and the budgetary comparison for the General Fund thereof for the year then ended in accordance with the accounting principles generally accepted in the United States of America.

Emphasis of Matter

As discussed in Note 3 to the financial statements, during the year ended June 30, 2015, the District adopted Governmental Accounting Standards Board Statement No. 68, Accounting and Financial Reporting for Pensions – an amendment of GASB Statement No. 27 and Statement No. 71, Pension Transition for Contributions Made Subsequent to the Measurement Date. We did not modify our opinion regarding this matter.

Other Matters

Required Supplementary Information

Accounting principles generally accepted in the United States of America require this presentation to include *Management's discussion and analysis* and schedules of net pension liabilities and pension contributions listed in the table of contents, to supplement the basic financial statements. Although this information is not part of the basic financial statements, the Governmental Accounting Standards Board considers it essential for placing the basic financial statements in an appropriate operational, economic, or historical context. We applied certain limited procedures to the required supplementary information in accordance with auditing standards generally accepted in the United States of America, consisting of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, to the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not opine or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to opine or provide any other assurance.

Supplementary and Other Information

Our audit was conducted to opine on the District's basic financial statements taken as a whole.

The introductory section, the financial section's combining statements, individual fund statements and schedules and the statistical section information present additional analysis and are not a required part of the basic financial statements.

The statements and schedules are management's responsibility, and derive from and relate directly to the underlying accounting and other records used to prepare the basic financial statements. We subjected these statements and schedules to the auditing procedures we applied to the basic financial statements. We also applied certain additional procedures, including comparing and reconciling statements and schedules directly to the underlying accounting and other records used to prepare the basic financial statements or to the basic financial statements themselves in accordance with auditing standards generally accepted in the United States of America. In our opinion, these statements and schedules are fairly stated in all material respects in relation to the basic financial statements taken as a whole.

Beachwood City School District Cuyahoga County Independent Auditor's Report Page 3

We did not subject the introductory section and statistical section information to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we express no opinion or any other assurance on them.

Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated December 21, 2015, on our consideration of the District's internal control over financial reporting and our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements and other matters. That report describes the scope of our internal control testing over financial reporting and compliance, and the results of that testing, and does not opine on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the District's internal control over financial reporting and compliance.

Beachwood City School District Management's Discussion and Analysis For the Fiscal Year Ended June 30, 2015 Unaudited

The discussion and analysis of the Beachwood City School District's financial performance provides an overall review of the School District's financial activities for the fiscal year ended June 30, 2015. The intent of this discussion and analysis is to look at the School District's financial performance as a whole; readers should also review the transmittal letter, notes to the basic financial statements, and financial statements to enhance their understanding of the School District's financial performance.

Financial Highlights

Key financial highlights for 2015 are as follows:

- In total, Net Position increased by \$1,472,325 which represents a 19.8% increase from 2014's restated net position. The District continues to pay down its outstanding debt and shorten repayment periods. The Middle School bonds were originally set to mature in 2022. Upon refinancing, the bonds will mature in 2021. Net Investment in Capital Assets increased from \$23,764,063 to \$25,923,161.
- Equity in Pooled Cash and Cash equivalents increased slightly by \$461,748, as operations remained relatively flat and stable in fiscal year 2015.
- Accrued wages and benefits increased \$297,109 due to the retirement of nineteen staff members who were owed severance payments upon retirement.
- General revenues accounted for \$34,178,294 in revenue or 83 percent of all revenues. Program specific revenues in the form of charges for services and sales, grants and contributions accounted for \$7,246,513 or 17 percent of total revenues of \$41,424,807.
- The School District had \$39,952,482 in expenses related to governmental activities; only \$7,246,513 of these expenses was offset by program specific charges for services, grants, or contributions. General revenues (primarily taxes) of \$34,178,294 mostly provided for these programs.
- Total assets of governmental funds increased \$413,153 as total liabilities decreased by \$3,051,775 due primarily to defeasance of debt payments.
- The general fund balance decreased by \$1,105,203 or 3.8% primarily was a result of decreased property tax collections.
- The permanent improvement fund balance increased by \$470,219 due to the delay in the district's High School Auditorium project which will commence in Fiscal Year 16.
- Among major funds, the general fund had \$31,802,595 in operating revenues and \$32,648,226 in operating expenditures. The general fund's fund balance decreased to \$27,851,435 from \$28,956,638.

Using this Generally Accepted Accounting Principles Report (GAAP)

This Annual Report consists of a series of financial statements and notes to those statements. These statements are organized so the reader can understand the School District as a financial

Beachwood City School District Management's Discussion and Analysis For the Fiscal Year Ended June 30, 2015 Unaudited

whole, an entire operating entity. The statements then proceed to provide a detailed look at specific financial activities.

The *Statement of Net Position* and *Statement of Activities* provide information about the activities of the whole School District, presenting both an aggregate and longer term view of the School District's finances. Fund financial statements provide the next level of detail. For governmental funds, these statements tell how services were financed in the short term, as well as what remains for future spending. The fund financial statements also look at the School District's most significant funds, with all other non-major funds presented in total in one column. In the case of the School District, the general fund is by far the most significant fund.

Reporting the School District as a Whole

Statement of Net Position and Statement of Activities

While this document contains the large number of funds used by the School District to provide programs and activities, the view of the School District as a whole looks at all financial transactions and asks the question, "How did we do financially during fiscal year 2015?" The Statement of Net Position and Statement of Activities answer this question. These statements include *all assets and deferred outflows of resources*, *all liabilities and deferred inflows of resources* using the *accrual basis of accounting* similar to the accounting used by most private-sector companies. This basis of accounting takes into accounts all of the current year's revenues and expenses regardless of when cash is received or paid.

These two statements report the School District's *net position* and changes in that position. This change in net position is important because it tells the reader that, for the School District as a whole, the *financial position* of the School District has improved or diminished. The causes of this change may be the result of many factors, some financial, some not. Non-financial factors include the School District's property tax base, current property tax laws in Ohio restricting revenue growth, facility conditions, required educational programs, and other factors.

In the Statement of Net Position and Statement of Activities, the School District has one type of activity, Governmental Activities -- All of the School District's programs and services are reported here.

Reporting the School District's Most Significant Funds

Fund Financial Statements

The analysis of these major funds begins on page 28. Fund financial reports provide detailed information about the School District's major funds. The School District uses many funds to account for a multitude of financial transactions. However, these fund financial statements focus on the School District's most significant funds. The School District's major governmental funds are the General Fund, Bond Retirement, Building and Permanent Improvement Funds.

<u>Governmental Funds</u> Most of the School District's activities are reported in governmental funds, which focus on how money flows into and out of those funds and the balances left at year-end available for spending in future periods. These funds are reported using an accounting method called *modified accrual* accounting, which measures cash and all other *financial assets*

Beachwood City School District Management's Discussion and Analysis For the Fiscal Year Ended June 30, 2015 Unaudited

that can readily be converted to cash. The governmental fund statements provide a detailed *short-term view* of the School District's general government operations and the basic services it provides. Governmental fund information shows whether there are more or fewer financial resources that can be spent in the future to finance educational programs. The relationship (or differences) between governmental activities (reported in the Statement of Net Position and Statement of Activities) and governmental funds is reconciled in the financial statements.

The School District as a Whole

The Statement of Net Position provides the perspective of the School District as a whole. Table 1 provides a summary of the School District's net position for 2015 compared to 2014:

	Table 1 Governmental Activities		
	2015	Restated 2014	
Assets Current and Other	2010		
Assets	\$59,229,202	\$61,206,905	
Capital Assets	61,907,281	62,836,677	
Total Assets	121,136,483	124,043,582

Total Deferred Inflows of			
Resources	28,851,562	22,232,256	
Net Position			
Net Investment In Capital Assets	25,923,161	23,764,063	
Restricted	4,560,481	4,657,530	
Unrestricted	(21,591,662)	(21,001,938)	
Total Net Position	\$8,891,980	\$7,419,655	

During 2015, the School District adopted GASB Statement 68, "Accounting and Financial Reporting for Pensions—an Amendment of GASB Statement 27," which significantly revises accounting for pension costs and liabilities. For reasons discussed

below, many end users of this financial statement will gain a clearer understanding of the School District's actual financial condition by adding deferred inflows related to pension and the net pension liability to the reported net position and subtracting deferred outflows related to pension.

Governmental Accounting Standards Board standards are national and apply to all government financial reports prepared in accordance with generally accepted accounting principles. When accounting for pension costs, GASB 27 focused on a funding approach. This approach limited pension costs to contributions annually required by law, which may or may not be sufficient to fully fund each plan's *net pension liability*. GASB 68 takes an earnings approach to pension accounting; however, the nature of Ohio's statewide pension systems and state law governing those systems requires additional explanation in order to properly understand the information presented in these statements.

Under the new standards required by GASB 68, the net pension liability equals the School District's proportionate share of each plan's collective:

- 1. Present value of estimated future pension benefits attributable to active and inactive employees' past service
- 2. Minus plan assets available to pay these benefits

GASB notes that pension obligations, whether funded or unfunded, are part of the "employment exchange" – that is, the employee is trading his or her labor in exchange for wages, benefits, and the promise of a future pension. GASB noted that the unfunded portion of this pension promise is a present obligation of the government, part of a bargained-for benefit to the employee, and should accordingly be reported by the government as a liability since they received the benefit of the exchange. However, the School District is not responsible for certain key factors affecting the balance of this liability. In Ohio, the employee shares the obligation of funding pension benefits with the employer. Both employer and employee contribution rates are capped by State statute. A change in these caps requires action of both Houses of the General Assembly and approval of the Governor. Benefit provisions are also determined by State statute. The employee enters the employment exchange with the knowledge that the employer's promise is limited not by contract but by law. The employer enters the exchange also knowing that there is a specific, legal limit to its contribution to the pension system. In Ohio, there is no legal means to enforce the unfunded liability of the pension system as against the public employer. State law operates to mitigate/lessen the moral obligation of the public employer to the employee, because all parties enter the employment exchange with notice as to the law. The pension system is responsible for the administration of the plan.

Most long-term liabilities have set repayment schedules or, in the case of compensated absences (i.e. sick and vacation leave), are satisfied through paid time-off or termination payments. There is no repayment schedule for the net pension liability. As explained

above, changes in pension benefits, contribution rates, and return on investments affect the balance of the net pension liability, but are outside the control of the local government. In the event that contributions, investment returns, and other changes are insufficient to keep up with required pension payments, State statute does not assign/identify the responsible party for the unfunded portion. Due to the unique nature of how the net pension liability is satisfied, this liability is separately identified within the long-term liability section of the statement of net position.

In accordance with GASB 68, the School District's statements prepared on an accrual basis of accounting include an annual pension expense for their proportionate share of each plan's *change* in net pension liability not accounted for as deferred inflows/outflows.

As a result of implementing GASB 68, the School District is reporting a net pension liability and deferred inflows/outflows of resources related to pension on the accrual basis of accounting. This implementation also had the effect of restating net position at June 30, 2014, from \$57,281,765 to \$7,419,655.

Total governmental assets and deferred outflows decreased by \$2,554,931 while total governmental liabilities and deferred inflows of resources decreased by \$4,027,256 resulting in an increase of net position of \$1,472,325.

The decrease in governmental assets and deferred outflows is due primarily to a decrease in Property Taxes Receivable. In 2014 there was a one time "catch up" payment for property taxes by a major taxpayer. The decrease in governmental liabilities was due to current year principal payments on long-term general obligation bonds. Total liabilities and deferred inflows of resources totaled \$115,540,028 of which 69% is long-term liabilities.

Table 2 shows the changes in net position for fiscal year 2014 with revenue and expense comparisons to fiscal year 2015:

companies to instant your worth.	Tal	Table 2

Change in Net Position	\$1,472,325	\$9,179,149				
Beginning Net Position (restated)	7,419,655	1,759,494				
Ending Net Position	\$8,891,980	\$7,419,655				

Governmental Activities

The information necessary to restate the 2014 beginning balances and the 2014 pension expense amounts for the effects of the initial implementation of GASB 68 is not available. Therefore, 2014 functional expenses still include pension expense of \$2,943,357, computed under GASB 27 for governmental activities. GASB 27 required recognizing pension expense equal to the contractually required contributions to the plan. Under GASB 68, pension expense represents additional amounts earned, adjusted by deferred inflows/outflows. The contractually required contribution is no longer a component of pension expense. Under GASB 68, the 2015 statements report pension expense of \$2,184,317 for governmental activities.

Consequently, in order to compare 2015 total program expenses to 2014, the following adjustments are needed:

Total 2015 program expenses under GASB 68	\$39,952,482
Pension expense under GASB 68	(2,184,317)
2015 contractually required contributions	2,878,901
Adjusted 2015 program expenses	40,647,066
Total 2014 program expenses under GASB	(39,265,760)
Increase (decrease) in program expenses not related to pension	\$1,381,306

The unique nature of property taxes in Ohio creates the need to routinely seek voter approval for operating funds. The overall revenue generated by the levy will not increase solely as a result of inflation. As an example, a homeowner with a home valued at \$100,000 and taxed at 1.0 mill would pay \$35.00 annually in taxes. If three years later the home was reappraised and its value increased to \$200,000 (and this inflationary increase in value is comparable to other property owners), the effective tax rate would become .5 mills and the owner would still pay \$35.00. Thus, school districts dependent upon property taxes are hampered by a lack of revenue growth and must regularly return to the voters to maintain a constant level of service. Property taxes made up 67 percent of revenues for governmental activities for the School District in fiscal year 2015.

Instruction comprises 54 percent of governmental program expenses. Interest expense was 3.4 percent. Interest expense was attributable to the outstanding bonds and borrowing for capital projects.

The Statement of Activities shows the cost of program services and the charges for services and grants offsetting those services. Table 3 shows, for governmental activities, the total cost of services and the net cost of services. That is, it identifies the cost of these services supported by tax revenue and unrestricted State entitlements with comparisons to 2014.

	Table 3 – Governmental Activities							
	Total Cost of Services 2015	Net Cost of Services 2015	Total Cost of Services 2014	Net Cost of Services 2014				
Instruction	\$21,435,948	\$17,648,011	\$20,174,366	\$17,123,125

The dependence upon tax revenues for governmental activities is apparent. Over 82 percent of instruction activities are supported through taxes and other general revenues and for all

governmental activities general revenue support is also 82 percent. The community, as a whole, is by far the primary support for the School District's students.

The School District's Funds

Information about the School District's major funds starts on page 28. These funds are accounted for using the modified accrual basis of accounting. All governmental funds had total revenues of \$41,560,883 and expenditures of \$42,689,446. The net change in fund balance for the year was most significant in the general fund, with an decrease of \$1,105,203 due to a decrease in property tax collections.

The net fund balance decreased in the bond retirement fund by \$381,672 due to lower collections in property taxes over the previous year.

The permanent improvement fund increased \$470,219 due to the delayed start of the High School Auditorium Project. The School District had several paving projects and roofing repairs.

The building fund balance decreased \$46,691 as the HS project was completed.

Budgeting Highlights

The School District's budget is prepared according to Ohio law and is based on accounting for certain transactions on a basis of cash receipts, disbursements, and encumbrances. The most significant budgeted fund is the General Fund.

During the course of fiscal year 2015, the School District amended its general fund budget numerous times, none significant. The School District uses site-based budgeting and the budgeting systems are designed to tightly control total site budgets but provide flexibility for site management.

For the general fund, actual revenue was \$511,201 less than the final budget estimates of \$32,671,848. The School District's ending un-obligated cash balance was \$653,723 more than the final budgeted amount as expenditures were less than anticipated in the areas of instruction and operation and pupil transportation.

There were twelve amendments to the original appropriations during fiscal year 2015. The budget increased predominantly due to amendments to the general fund budget.

Capital Assets and Debt Administration

Capital Assets

At the end of fiscal 2015, the School District had \$61,907,281 invested in land, buildings, equipment, buses and other vehicles, all in governmental activities. See Note 9 to the basic financial statements for more detailed information on capital asset activity. Table 4 shows fiscal 2015 balances compared to 2014:

Table 4 – Capital Assets at June 30th Net of Depreciation

	Governmental Activities					
	2015 2014					
Construction in Progress	\$378,338	\$36,436,519				
Land	978,708	978,708				
Land Improvements	1,594,196	1,707,069				
Buildings and Improvements	56,806,770	21,435,062				
Equipment	1,585,253	1,809,427				
Vehicles	564,016	469,892				
Totals	\$61,907,281	\$62,836,677				

The primary increase in building and improvements is due to the addition of the High School renovation project.

For fiscal year 2015, Ohio law required school districts to set aside three percent of certain revenues for capital improvements. For fiscal year 2015, this amounted to \$248,713 for the set aside. For fiscal year 2015, the School District had qualifying disbursements or offsets exceeding this requirement.

Debt

At June 30, 2015, the School District had \$35,886,923 in bonds and notes outstanding, \$2,785,652 due within one year. Table 5 summarizes bonds and notes outstanding. See Note 15 to the basic financial statements for more detailed information on long-term debt activity.

Under the current Ohio Revised Code, the School District's general obligation bonded debt issuances are subject to a legal limitation on both voted and un-voted debt. The limitation is based on 9% and .1%, respectively, of the total assessed value of real and personal property. At June 30, 2015, the School Districts' voted general obligation bonded debt of \$33,001,923 is below the legal limit of \$63,871,284 (voted). In addition, the School District had no un-voted debt at June 30, 2015. Moody's rating for the School District is Aaa, the highest rating Moody's assigns to debt issues.

	Covernmental	C

Table 5 - Outstanding Debt at Year End

8	,	
	Governmental	Governmental
	Activities	Activities
	2015	2014
General Obligation Bonds		
2010 Tax Anticipation Notes	\$2,885,000	\$3,440,000
2007 Advanced Refunded Bonds	129,997	204,997
2010 School Improvement Bonds	3,400,000	4,525,000
2010 School Improvement Premium	136,960	182,612
2010 Qualified School Construct Bonds	11,260,000	11,260,000
2012 School Improvement Bonds	1,650,000	2,460,000
2013 Refunding	5,275,000	5,420,000
2014 Refunding Tax Exempt Bonds	11,149,966	11,149,966
Total	\$35,886,923	\$38,642,575

The general obligation bonds were issued for the purpose of school improvements. They are to be repaid from the bond retirement fund.

For the Future

The School District closed out its fiscal year on June 30, 2015 on a positive note as the administration and Board of Education continued to reduce costs for greater efficiency.

The School District concluded successful negotiations with its Beachwood Federation of Teachers (BFT) and enjoys positive relationships with the Beachwood Union of Support Staff (BUSS) and Beachwood Educational Interpreters Union (BEIU).

The School District's current major initiative is to complete a renovation of the High School Auditorium and is reviewing its athletic facility needs. The School District will also upgrade the pool at the High School.

The Board of Education and administration of the School District are committed to careful financial planning and prudent fiscal management. An excellent working and supportive relationship exists between the School District, the City of Beachwood, the industrial community and the residents of the City.

Contacting the School District's Financial Management

This financial report is designed to provide our citizens, taxpayers, investors, and creditors with a general overview of the School District's finances and to show the School District's accountability for the money it receives. If you have any questions about this report or need additional information, contact Michele Mills, MBA, Director of Finance/Treasurer at 216-464-8164 or E-mail at mm@beachwoodschools.org

Note 1 - Description of the School District and Reporting Entity

The Beachwood City School District (the "School District") is a body politic and corporate established for the purpose of exercising the rights and privileges conveyed to it by the constitution and laws of the State of Ohio. The School District is a city school district as defined by Section 3311.02 of the Ohio Revised Code. The School District operates under an elected Board of Education (five members) and is responsible for the provision of public education to residents of the School District.

The Board controls the School District's five instructional facilities and one support facility staffed by 157 certificated teaching personnel, 136 non-certificated support personnel and 12 administrators.

The School District is located east of Cleveland, Ohio, in a prosperous suburb consisting of residences and significant office and retail commercial development. The enrollment for the School District during the 2015 fiscal year was 1,563. The School District operates an early childhood center, two elementary schools, a middle school, and a high school.

Reporting Entity

A reporting entity is comprised of the primary government, component units, and other organizations that are included to ensure that the financial statements are not misleading. The primary government of the School District consists of all funds, departments, boards, and agencies that are not legally separate from the School District. For Beachwood City School District, this includes general operations, food service, preschool, consortiums and student related activities of the School District.

Component units are legally separate organizations for which the School District is financially accountable. The School District is financially accountable for an organization if the School District appoints a voting majority of the organization's governing board and (1) the School District is able to significantly influence the programs or services performed or provided by the organization; or (2) the School District is legally entitled to or can otherwise access the organization's resources; the School District is legally obligated or has otherwise assumed the responsibility to finance the deficits of, or provide financial support to, the organization; or the School District is obligated for the debt of the organization. Component units may also include organizations that are fiscally dependent on the School District in that the School District approves the budget, the issuance of debt, or the levying of taxes. The School District has no component units.

The School District participates in two jointly governed organizations and one public entity risk pool. These organizations are presented respectively in Note 17 and Note 11B to the basic financial statements. These organizations are:

Jointly Governed Organizations:
Ohio Schools' Council Association
Lake Geauga Computer Association

Public Entity Risk Pool:

Sheakley Uniservice, Inc. Workers' Compensation Group Rating Program

Note 2 - Summary of Significant Accounting Policies

The financial statements of the School District have been prepared in conformity with generally accepted accounting principles (GAAP) as applied to governmental units. The Governmental Accounting Standards Board (GASB) is the accepted standard-setting body for establishing governmental accounting and financial reporting principles. The more significant of the School District's accounting policies are described as below.

A. Pensions

For purposes of measuring the net pension liability, information about the fiduciary net position of the pension plans and additions to/reductions from their fiduciary net position have been determined on the same basis as they are reported by the pension systems. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. The pension systems report investments at fair value.

B. Basis of Presentation

The School District's basic financial statements consist of government-wide statements, including a statement of net position and a statement of activities, and fund financial statements, which provide a more detailed level of financial information.

Government-wide Financial Statements The statement of net position and the statement of activities display information about the School District as a whole. These statements include the financial activities of the primary government, except for fiduciary funds. The activity of the internal service fund is eliminated to avoid "doubling up" revenues and expenses.

The statement of net position presents the financial condition of the governmental activities of the School District at year-end. The government-wide statement of activities presents a comparison between direct expenses and program revenues for each function program of the School District's governmental activities. Direct expenses are those that are specifically associated with a service, program, or department and therefore clearly identifiable to a particular function. Program revenues include charges paid by the recipient of the goods or services offered by the program and grants and contributions that are restricted to meeting the operational or capital requirements of a particular program. Revenues, which are not classified as program revenues, are presented as general revenues of the School District, with certain limited exceptions. The comparison of direct expenses with program revenues identifies the extent to which each governmental function is self-financing or draws from the general revenues of the School District.

Fund Financial Statements During the school year, the School District segregates transactions related to certain School District functions or activities in separate funds in order to aid financial management and to demonstrate legal compliance. Fund financial statements are designed to present financial information of the School District at this more detailed level. The focus of governmental fund financial statements is on major funds rather than reporting funds by type. Each major fund is presented in a separate

column. Non-major funds are aggregated and presented in a single column. The internal service fund is presented in a single column on the face of the proprietary fund statements. Fiduciary funds are reported by fund type.

C. Fund Accounting

The School District uses funds to maintain its financial records during the fiscal year. Fund accounting is designed to demonstrate legal compliance and to aid management by segregating transactions related to certain School District functions or activities. A fund is defined as a fiscal and accounting entity with a self-balancing set of accounts. The various funds of the School District are grouped into the categories governmental, proprietary, and fiduciary.

Governmental Funds Governmental funds focus on the sources, uses, and balances of current financial resources. Expendable assets are assigned to the various governmental funds according to the purposes for which they may or must be used. Current liabilities are assigned to the fund from which they will be paid. The difference between governmental fund assets and liabilities is reported as fund balance. The following are the School District's major governmental funds:

General Fund - The General Fund is used to account for all financial resources, except those required to be accounted for in another fund. The General Fund is available to the School District for any purpose provided it is expended or transferred according to the general laws of Ohio.

Bond Retirement Fund - The Bond Retirement Fund is used to account for the accumulation of resources received from property taxes for the payment of general long-term debt, principal, interest and related costs.

Permanent Improvement Fund – The Permanent Improvement Fund accounts for resources received from property taxes to be used for the acquisition, construction, or improvement of capital facilities other than those financed by proprietary and trust funds.

Building Fund – the Building Fund accounts for resources received from bond issues passed by the electorate in the form of property taxes to be used for the construction or improvement of capital facilities.

Proprietary Fund - Proprietary funds focus on the determination of the changes in net position, financial position, and cash flows. Proprietary funds are classified as enterprise or internal service; the School District has one internal service fund and no enterprise funds.

Internal Service Fund - The Internal Service Fund is a self-insurance program, which provides vision, dental and prescription drug benefits to employees.

Fiduciary Funds - Fiduciary fund reporting focuses on net position and changes in net position. The fiduciary fund category is split into four classifications: pension trust funds, investment trust funds, private-purpose trust funds, and agency funds. Trust funds are used to account for assets held by the School District under a trust agreement for

individuals, private organizations, or other governments and are therefore not available to support the School District's own programs. The School District has no trust funds. Agency funds are custodial in nature (assets equal liabilities) and do not involve measurement of results of operations. The School District's agency funds account for student activities and money due to the State retirement systems.

D. Measurement Focus

The accounting and financial reporting treatment applied to a fund is determined by its measurement focus.

Government-wide Financial Statements The government-wide financial statements are prepared using the economic resources measurement focus. All assets and all liabilities associated with the operation of the School District are included on the Statement of Net Position.

Fund Financial Statements All governmental funds are accounted for using a flow of current financial resources measurement focus. With this measurement focus, only current assets and current liabilities generally are included on the balance sheet. The statement of revenues, expenditures and changes in fund balances reports on the sources (i.e., revenues and other financing sources) and uses (i.e., expenditures and other financing uses) of current financial resources. This approach differs from the manner in which the governmental activities of the government-wide financial statements are prepared. Governmental fund financial statements therefore, include a reconciliation with brief explanations to better identify the relationship between the government-wide statements and the statements for governmental funds.

Like the government-wide statements, all proprietary fund types are accounted for on a flow of economic resources measurement focus. All assets and all liabilities associated with the operation of these funds are included on the statement of net position. The statement of changes in fund net position presents increases (i.e., revenues) and decreases (i.e., expenses) in net total assets. The statement of cash flows provides information about how the School District finances and meets the cash flow needs of its proprietary activity.

E. Basis of Accounting

Basis of accounting determines when transactions are recorded in the financial records and reported on the financial statements. Government-wide financial statements are prepared using the accrual basis of accounting. Governmental funds use the modified accrual basis of accounting. Proprietary funds and fiduciary funds also use the accrual basis of accounting. Differences in the accrual and modified accrual bases of accounting arise in the recognition of revenue, the recording of deferred inflows and deferred outflows of resources and in the presentation of expenses versus expenditures.

Revenues - **Exchange and Non-exchange Transactions** Revenue resulting from exchange transactions, in which each party gives and receives essentially equal value, is recorded on the accrual basis when the exchange takes place. On a modified accrual basis, revenue is recorded in the fiscal year in which the resources are measurable and become available. "Measurable" means the amount of the transaction can be determined, and

"available" means collectible within the current fiscal year or soon enough thereafter to be used to pay liabilities of the current fiscal year. For the School District, available means expected to be received within sixty days of fiscal year end.

Non-exchange transactions, in which the School District receives value without directly giving equal value in return, include property taxes, grants, entitlements, and donations. On an accrual basis, revenue from property taxes is recognized in the fiscal year for which the taxes are levied. See Note 7. Revenue from grants, entitlements, and donations is recognized in the fiscal year in which all eligibility requirements have been satisfied. Eligibility requirements include timing requirements, which specify the year when the resources are required to be used or the fiscal year when use is first permitted; matching requirements, in which the School District must provide local resources to be used for a specified purpose; and expenditure requirements, in which the resources are provided to the School District on a reimbursement basis. On a modified accrual basis, revenue from non-exchange transactions must also be available before it can be recognized.

Under the modified accrual basis, the following revenue sources are considered to be both measurable and available at fiscal year end: property taxes available as an advance, grants, investment earnings, tuition, student fees and rentals.

Deferred Outflows/Inflows of Resources - In addition to assets, the government-wide statement of net position will report a separate section for deferred outflows of resources. Deferred outflows of resources, represents a consumption of net position that applies to a future period and will not be recognized as an outflow of resources (expense/expenditure) until then. For the District, deferred outflows of resources have been reported for the following two items related the District's net pension liability: (1) the difference between expected and actual experience of the pension systems, and (2) the District's contributions to the pension systems subsequent to the measurement date.

In addition to liabilities, both the government-wide statement of net position and the governmental fund financial statements report a separate section for deferred inflows of resources. Deferred inflows of resources represent an acquisition of net position that applies to a future period and will not be recognized as an inflow of resources (revenue) until that time. For the District, deferred inflows of resources include property taxes, payments in lieu of taxes and unavailable revenue. Property taxes and payments in lieu of taxes represent amounts for which there is an enforceable legal claim as of June 30, 2015, but which were levied to finance fiscal year 2016 operations. These amounts have been recorded as a deferred inflow of resources on both the government-wide statement of net position and the governmental fund financial statements. Unavailable revenue is reported only on the governmental funds balance sheet, and represents receivables which will not be collected within the available period. For the District unavailable revenue includes, but is not limited to, delinquent property taxes and intergovernmental grants. These amounts are deferred and recognized as an inflow of resources in the period the amounts become available.

The District also reports a deferred inflow of resources for the net difference between

projected and actual earnings on pension plan investments related to the District's net pension liability. This deferred inflow of resources is only reported on the government-wide statement of net position.

Expenditures/Expenses - On the accrual basis of accounting, expenses are recognized at the time they are incurred. The measurement focus of governmental fund accounting is on decreases in net financial resources (expenditures) rather than expenses. Expenditures are generally recognized in the accounting period in which the related fund liability is incurred, if measurable. Allocations of cost, such as depreciation and amortization, are not recognized in governmental funds.

F. Budgetary Data

All funds, other than agency funds, are legally required to be budgeted and appropriated. The major documents prepared are the tax budget, the appropriation resolution and the certificate of estimated resources, which are prepared on the budgetary basis of accounting. The tax budget demonstrates a need for existing or increased tax rates. The certificate of estimated resources establishes a limit on the amounts that the Board of Education may appropriate. The appropriation resolution is the Board's authorization to spend resources and sets annual limits on expenditures plus encumbrances at a level of control selected by the Board. The legal level of control has been established by the Board of Education at the fund level.

The certificate of estimated resources may be amended during the year if projected increases or decreases in revenue are identified by the School District Treasurer. The amounts reported as the original budgeted amounts in the budgetary statements reflect the amounts in the certificate when the original appropriations were adopted. The amounts reported as the final budgeted amounts in the budgetary statements reflect the amounts in the amended certificate in effect at the time the final appropriations were passed.

The appropriation resolution is subject to amendment by the Board of Education throughout the year with the restriction that appropriations may not exceed estimated revenues. The amounts reported as the original budgeted amounts reflect the first appropriation for that fund that covered the entire fiscal year, including amounts automatically carried over from prior years. The amounts reported as the final budgeted amounts represent the final appropriation amounts passed by the Board during the year.

Encumbrances

As part of formal budgetary control, purchase orders, contracts, and other commitments for the expenditure of monies are recorded as the equivalent of expenditures on the non-GAAP budgetary basis in order to reserve that portion of the applicable appropriation and to determine and maintain legal compliance.

Lapsing of Appropriations

At the close of each fiscal year, the unencumbered balance of each appropriation reverts to the respective fund from which it was appropriated and becomes subject to future

appropriation. Encumbered appropriations are carried forward to the succeeding fiscal year and are re-appropriated.

G. Cash and Investments

To improve cash management, cash received by the School District is pooled. Monies for all funds are maintained in this pool. Individual fund integrity is maintained through The School District records. Each fund's interest in the pool is presented as "Equity in Pooled Cash and Cash Equivalents" on the financial statements.

During fiscal year 2015, investments were limited to demand deposits, certificates of deposit, money market, federal agency discount notes, US treasuries, commercial paper and STAR Ohio.

Except for nonparticipating investment contracts, investments are reported at fair value, which is based on quoted market prices. For investments in open-end mutual funds, fair value is determined by the fund's share price. Nonparticipating investment contracts such as nonnegotiable certificates of deposit and repurchase agreements are reported at cost.

The School District has invested funds in the State Treasury Asset Reserve of Ohio (STAR Ohio) during fiscal year 2015. STAR Ohio is an investment pool managed by the State Treasurer's Office, which allows governments within the State to pool their funds for investment purposes. STAR Ohio is not registered with the SEC as an investment company but does operate in a manner consistent with Rule 2a7 of the Investment Company Act of 1940. Investments in STAR Ohio are valued at STAR Ohio's share price, which is the price the investment could be sold for on June 30, 2015.

Interest on pooled cash and investments is only allocated to governmental, enterprise and fiduciary fund types as required by state statute. Following Ohio statutes, the Board of Education has specified the funds to receive an allocation of interest earnings. Interest revenue credited to the General Fund from other funds during fiscal year 2015 amounted to \$58,560.

For presentation on the financial statements, investments of the cash management pool and investments with an original maturity of three months or less at the time they are purchased by the School District are considered to be cash equivalents. Investments with an initial maturity of more than three months that are not purchased from the pool are reported as investments.

H. Prepaid Items

Payments made to vendors for services that will benefit periods beyond June 30, 2015, are recorded as prepaid items using the consumption method. A current asset for the prepaid amount is recorded at the time of purchase and an expenditure/expense is reported in the year which services are consumed.

I. Materials and Supplies Inventory

On government-wide financial statements, inventories are presented at the lower of cost or market on a first-in, first-out basis and are expensed when used.

On fund financial statements, inventories of governmental funds are stated at cost while inventories of enterprise funds are stated at the lower of cost or market. For all funds, cost is determined on a first-in, first-out basis and is determined by physical count. Inventory in governmental funds consists of expendable supplies held for consumption. The cost of inventory items is recorded as an expenditure in the governmental fund types when used (consumption method). Inventories in the General Fund and other non-major governmental funds consist of donated food, purchased food, and school supplies held for resale and are expensed when used.

J. Restricted Assets

Assets are reported as restricted assets when limitations on their use change in nature or normal understanding of the availability of the asset. Such constraints are either imposed by creditors, contributors, grantors, or laws of other government or imposed by enabling legislation. By Statute, money must be set aside to create a reserve for budget stabilization. Restricted assets in the General Fund include the amount required by State statute to be set aside for budget stabilization. See Note 16 for additional information regarding set-asides.

K. Capital Assets

General capital assets are those assets not specifically related to activities reported in the proprietary funds. These assets generally result from expenditures in the governmental funds. These assets are reported in the governmental activities column of the government-wide statement of net position but are not reported on the fund financial statements.

All capital assets are capitalized at cost (or estimated historical cost) and updated for additions and reductions during the year. Donated capital assets are recorded at their fair market values as of the date received. The School District maintains a capitalization threshold of one thousand dollars with the exception of any items deemed by the Business Manager to be capitalized. The School District does not possess any infrastructure. Improvements are capitalized; the costs of normal maintenance and repairs that do not add to the value of the asset or materially extend an asset's life are not capitalized. Interest incurred during the construction of general capital assets is not capitalized.

All reported capital assets, other than land and construction in progress, are depreciated. Depreciation is computed using the straight-line method over the following useful lives:

Description	Estimated Lives
Land Improvements	30 years
Buildings/Bldg Improvements	20-50 years
Vehicles	10 years
Equipment	5 – 10 years

L. Inter-fund Balances

On fund financial statements, receivables and payables resulting from short-term interfund loans are classified as "inter-fund receivables/payables". These amounts are eliminated in the governmental activities columns of the statement of net position.

M. Compensated Absences

The School District reports compensated absences in accordance with the provision of GASB Statement No. 16, "Accounting for Compensated Absences." Vacation benefits are accrued as a liability as the benefits are earned if the employees' rights to receive compensation are attributable to services already rendered and it is probable that the School District will compensate the employees for the benefits through paid time off or some other means. The School District records a liability for accumulated unused vacation time when earned for all employees.

Sick leave benefits are accrued as a liability using the vesting method. The liability includes the employees who are currently eligible to receive termination benefits and those the School District has identified as probable of receiving payment in the future. The amount is based on accumulated sick leave and employees' wage rates at fiscal year end, taking into consideration any limits specified in the School District's termination policy. The School District records a liability for accumulated unused sick leave for all employees after ten years of service.

The long-term compensated absence liability is reported on the government-wide financial statements. The short-term compensated absence liability amounts are recorded in the account "accrued wages and benefits" in the fund from which the employees who have accumulated leave are paid.

N. Accrued Liabilities and Long-Term Obligations

All payables, accrued liabilities and long-term obligations are reported in the government-wide financial statements.

In general, governmental fund payables and accrued liabilities that once incurred are paid in a timely manner and in full from current financial resources, are reported as obligations of the funds. However, claims and judgments, compensated absences, special termination benefits and contractually required pension contributions that will be paid from governmental funds are reported as a liability in the fund financial statements only to the extent that they are due for payment during the current year. Bonds and other long-term obligations are recognized as a liability on the governmental fund financial statements when due.

O. Net Position

Net Position represents the difference between assets and deferred outflows of resources and liabilities and deferred inflows of resources. Net investment in capital assets consists of capital assets, net of accumulated depreciation, reduced by the outstanding balances of any borrowings used for the acquisition, construction or improvement of those assets. Net position is reported as restricted when there are limitations imposed on their use through external restrictions imposed by creditors, grantors or laws or regulations of other governments. Net position restricted for other purposes include resources restricted for non-public schools and community involvement

The School District applies restricted resources when an expense is incurred for purposes for which both restricted and unrestricted net position are available.

P. Fund Balance

Fund balance is divided into five classifications based primarily on the extent to which the School District is bound to observe constraints imposed upon the use of the resources in the governmental funds. The classifications are as follows:

Nonspendable The nonspendable fund balance category includes amounts that cannot be spent because they are not in spendable form, or legally or contractually required to be maintained intact. The "not in spendable form" criterion includes items that are not expected to be converted to cash. It also includes the long-term amount of loans receivable, as well as property acquired for resale, unless the use of the proceeds from the collection of those receivables or from the sale of those properties is restricted, committed, or assigned.

Restricted Fund Balance is reported as restricted when constraints placed on the use of resources are either externally imposed by creditors (such as through debt covenants), grantors, contributors, or laws or regulations of other governments or is imposed by law through constitutional provisions.

Committed The committed fund balance classification includes amounts that can be used only for the specific purposes imposed by a formal action (resolution) of the School District Board of Education. Those committed amounts cannot be used for any other purpose unless the School District Board of Education removes or changes the specified use by taking the same type of action (resolution) it employed to previously commit those amounts. Committed fund balance also incorporates contractual obligations to the extent that existing resources in the fund have been specifically committed for use in satisfying those contractual requirements.

Assigned Amounts in the assigned fund balance classification are intended to be used by the School District for specific purposes but do not meet the criteria to be classified as restricted or committed. In governmental funds other than the general fund, assigned fund balance represents the remaining amount that is not restricted or committed. In the general fund, assigned amounts represent intended uses established by the School District Board of Education. This amount is the projected deficit for the following school year.

Unassigned Unassigned fund balance is the residual classification for the general fund and includes all spendable amounts not contained in the other classifications. In other governmental funds, the unassigned classification is used only to report a deficit balance resulting from overspending for specific purposes for which amounts had been restricted, committed, or assigned.

The School District applies restricted resources first when expenditures are incurred for purposes for which either restricted or unrestricted (committed, assigned, and unassigned) amounts are available. Similarly, within unrestricted fund balance, committed amounts are reduced first followed by assigned, and then unassigned amounts when expenditures are incurred for purposes for which amounts in any of the unrestricted fund balance classifications could be used.

Q. Operating Revenues and Expenses

Operating revenues are those revenues that are generated directly from the primary activity of the proprietary funds. For the School District, these revenues are for a self-insurance program for vision claims. Operating expenses are necessary costs incurred to provide the good or service that is the primary activity of the fund. Revenues and expenditures not meeting this definition are reported as non-operating.

R. Inter-fund Transactions

Transfers between governmental and business-type activities on the government-wide statements are reported in the same manner as general revenues. Exchange transactions between funds are reported as revenues in the seller funds and as expenditures/expenses in the purchaser funds. Flows of cash or goods from one fund to another without a requirement for repayment are reported as inter-fund transfers. Inter-fund transfers are reported as other financing sources/uses in governmental funds and after non-operating revenues/expenses in the proprietary fund. Repayments from funds responsible for particular expenditures/expenses to the funds that initially paid for them are not presented on the financial statements.

S. Extraordinary and Special Items

Extraordinary items are transactions or events that are both unusual in nature and infrequent in occurrence. Special items are transactions or events that are within the control of the School District and that are either unusual in nature or infrequent in occurrence. Neither type of transaction occurred during fiscal year 2015.

T. Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the amounts reported on the financial statements and accompanying notes. Actual results may differ from those estimates.

Note 3 - Change in Accounting Principle and Restatement of Net Position

For fiscal year 2015, the School District implemented the Governmental Accounting Standards Board (GASB) Statement No. 68, "Accounting and Financial Reporting for Pensions" and GASB Statement No. 71, "Pension Transition for Contributions Made Subsequent to the Measurement Date—an amendment of GASB Statement No. 68." GASB 68 established standards for measuring and recognizing pension liabilities, deferred outflows of resources deferred inflows of resources and expense/expenditure. The implementation of this pronouncement had the following effect on net position as reported June 30, 2014:

Net position June 30, 2014	\$57,281,765
Adjustments:	
Net Pension Liability	(52,805,467)
Deferred Outflow - Payments Subsequent to Measurement Date	2,943,357
Restated Net Position June 30, 2014	\$7,419,655

Other than employer contributions subsequent to the measurement date, the School District made no restatement for deferred inflows/outflows of resources as the information needed to generate these restatements was not available.

Note 4 - Budgetary Basis of Accounting

While the School District is reporting financial position, results of operations, and changes in fund balances on the basis of generally accepted accounting principles (GAAP), the budgetary basis as provided by law is based upon accounting for certain transactions on a basis of cash receipts, disbursements, and encumbrances. The Statement of Revenues, Expenditures, and Changes in Fund Balance - Budget (Non-GAAP Basis) and Actual presented for the General is presented on the budgetary basis to provide a meaningful comparison of actual results with the budget. The major differences between the budget basis and fund financial statements are the following:

- 1. Revenues are recorded when received in cash (budget basis) as opposed to when susceptible to accrual (GAAP basis).
- 2. Expenditures and expenses are recorded when paid in cash (budget basis) as opposed to when the liability is incurred (GAAP basis).
- 3. Encumbrances are treated as expenditures (budget basis) rather than as restricted, committed or assigned fund balance (GAAP basis).

The following table summarizes the adjustments necessary to reconcile the GAAP basis statements to the budgetary basis statements for the General Fund.

Net Change in Fund Balance

	<u>General</u>
GAAP Basis	\$(1,105,203)
Net adjustments for	
revenue accruals	401,092
Net adjustments `	
expenditure accruals	(2,444,489)
Encumbrances	
outstanding at	
year end (Budget Basis)	(299,478)
Budget Basis	\$(3,448,078)

Note 5 - Fund Balances

Fund balance is classified as nonspendable, restricted, committed, assigned and/or unassigned based primarily on the extent to which the School District is bound to observe constraints imposed upon the use of resources in the government funds. The constraints placed on fund balance for the major governmental funds and all other governmental funds are presented below:

Fund Balances	General	Bond Retirement	Permanent Improvement Fund	Building Fund	Non Major Governmental Funds	Total
Nonspendable -					4- 0.4	***
Inventory	\$ 79,722	\$	<u> </u>	\$ -	\$7,812	\$87,534
Restricted for						
Budget Stabilization	134,873	0	0	0	0	134,873

Building Funds	0	0	0	652	0	652
Total Restricted	134,873	2,572,826	829,039	652	761,798	4,299,188
Committed						
Encumbrances	446,142	0	473,946	298	85,984	1,006,370
Assigned to						
Other Purposes	2,498,306	0	0	0	0	2,498,306
_	2,770,500		<u> </u>	<u> </u>		2,770,300
Unassigned	24,692,392	0	0	0	0	24,692,392
Total Fund Balances	\$27,851,435	\$2,572,826	\$1,302,985	\$950	\$855,594	\$32,583,790
_ ,=	<u> </u>		+== ++= +			

Encumbrances for the general fund are as follows: \$73,142 for outstanding special education tuition, \$47,056 for legal fees and \$212,737 for utilities and maintenance related expenditures. Permanent improvement encumbrances are related to outstanding building projects.

Note 6 - Deposits and Investments

State statutes classify monies held by the School District into three categories.

Active deposits are public deposits necessary to meet current demands on the treasury. Such monies must be maintained either as cash in the School District Treasury, in commercial accounts payable or withdrawable on demand, including negotiable order of withdrawal (NOW) accounts, or in money market deposit accounts.

Inactive deposits are public deposits the Board of Education has identified as not required for use within the current five-year period of designation of depositories. Inactive deposits must either be evidenced by certificates of deposit maturing not later than the end of the current period of designation of depositories, or by savings or deposit accounts including, but not limited to, passbook accounts.

Interim deposits are deposits of interim monies. Interim monies are those monies which are not needed for immediate use but which will be needed before the end of the current period of designation of depositories. Interim deposits must be evidenced by time certificates of deposit maturing not more than one year from the date of deposit, or by savings or deposit accounts, including passbook accounts.

Protection of the School District's deposits is provided by the Federal Deposit Insurance Corporation (FDIC), by eligible securities pledged by the financial institution as security for repayment, by surety company bonds deposited with the Treasurer by the financial institution, or by a single collateral pool established by the financial institution to secure the repayment of all public monies deposited with the institution. Interim monies may be invested in the following securities:

- 1. United States Treasury bills, bonds, notes, or any other obligation or security issued by the United States Treasury, or any other obligation guaranteed as to principal and interest by the United States;
- 2. Bonds, notes, debentures, or any other obligation or security issued by any federal government agency or instrumentality including, but not limited to, the Federal National Mortgage Association, Federal Home Loan Bank, Federal Farm Credit Bank, Federal Home Loan Mortgage Corporation, Government National Mortgage Association, and Student Loan Marketing Association. All federal agency securities shall be direct issuances of federal government agencies or instrumentalities;
- 3. Written repurchase agreements in the securities listed above provided that the market value of the securities subject to the repurchase agreement must exceed the principal value of the agreement by at least 2 percent and be marked to market daily, and the term of the agreement must not exceed thirty days;
- 4. Bonds and other obligations of the State of Ohio;
- 5. No-load money market mutual funds consisting exclusively of obligations described in division (1) or (2) and repurchase agreements secured by such obligations, provided that investments in securities described in this division are made only through eligible institutions;

- 6. The State Treasurer's investment pool (STAR Ohio);
- 7. Certain Banker's acceptances and commercial paper notes for the period not to exceed one hundred and eighty days from the date of purchase in an amount not to exceed twenty-five percent of the interim moneys available for investment at any one time; and,
- 8. Under limited circumstances, debt interests rated in either of the two highest rating classifications by at least two nationally recognized rating agencies.

Investments in stripped principal or interest obligations reverse repurchase agreements, and derivatives are prohibited. The issuance of taxable notes for the purpose of arbitrage, the use of leverage, and short selling are also prohibited. An investment must mature within five years from the date of purchase, unless matched to a specific obligation or debt of the School District, and must be purchased with the expectation that it will be held to maturity. Investments may only be made through specified dealers and institutions. Payment for investments may be made only upon delivery of the securities representing the investments to the Treasurer or qualified trustee or, if the securities are not represented by a certificate, upon receipt of confirmation of transfer from the custodian.

Cash on Hand

At fiscal year end, the School District had \$6,200 un-deposited cash on hand which is included on the balance sheet of the School District as part of "Equity in Pooled Cash and Cash Equivalents".

Deposits

At fiscal year end, the carrying amount of the School District's deposits was \$9,731,353. Based on the criteria described in GASB 40, "Deposits and Investment Risk Disclosures", as of June 30, 2015, \$922,098 of the District's bank balance of \$10,169,097 was exposed to custodial risk as discussed below, while \$9,246,999 was covered by Federal Deposit Insurance Corporation. Although all State statutory requirements for the deposit of money had been followed, non-compliance with federal requirements could potentially subject the School District to a successful claim by the FDIC.

Custodial credit risk is the risk that, in the event of bank failure, the School District's deposits may not be returned. All deposits are collateralized with eligible securities in amounts equal to at least 105% of the carrying value of the deposits. Such collateral, as permitted by the Ohio Revised Code, is held in single financial collateral pools at Federal Reserve Banks, or at member banks of the Federal Reserve System, in the name of the respective depository bank and pledged as a pool of collateral against all of the public deposits it holds or as specific collateral held at the Federal Reserve Bank in the name of the School District.

Investments

As of June 30, 2015, the School District had the following investments. All investments are in an internal investment pool.

	Fair Value	Maturity
Federal National Mortgage	\$752,505	12/30/2019
Federal Home Loan Mortgage	997,310	03/12/2018
Federal Home Loan Bank	1,001,660	04/27/2018
Federal Farm Credit	874,834	08/27/2018
Federal Home Loan Mortgage	250,078	06/16/2017
Federal National Mortgage	870,056	11/06/2018
Federal Home Loan Mortgage	1,630,249	06/10/2019
Federal Home Loan Mortgage	499,200	05/28/2020
Federal Home Loan Mortgage	993,580	04/29/2019
Federal National Mortgage	752,062	09/18/2019
Federal Farm Credit	351,481	05/19/2020
Federal Home Loan Mortgage	750,277	06/15/2020
Federal Home Loan Bank	1,000,120	12/19/2017
Federal Home Loan Bank	1,000,780	09/21/2015
Federal Farm Credit	999,612	05/09/2016
Federal Home Loan Bank	375,034	08/25/2017
Federal Home Loan Mortgage	499,720	07/17/2017
Federal Home Loan Mortgage	1,000,810	12/11/2018
Federal Home Loan Mortgage	499,908	01/28/2016
STAR Ohio	8,233,113	33 days
Total	\$23,332,389	J

Interest Rate Risk

As a means of limiting its exposure to fair value losses caused by rising interest rates, the School District's policy requires that operating funds be invested primarily in short-term investments maturing within five years from the date of purchase and that the School District's Investment portfolio be structured so that securities mature to meet cash requirements for ongoing operations and/or long-term debt payments. The stated intent of the policy is to avoid the need to sell securities prior to maturity.

Credit Risk

The Federal Home Loan Bank Notes carry a rating of AA+ by Standard & Poor's, Federal Farm Credits carry a rating of AA+ by Standard & Poor's and STAR Ohio carries a rating of AAAm by Standard & Poor's. Ohio law requires that STAR Ohio maintain the highest rating provided by at least one nationally recognized standard rating service. The School District has no investment policy that would further limit its investment choices.

Custodial Credit Risk

For an investment, custodial credit risk is the risk that in the event of the failure of the counterparty, the School District will not be able to recover the value of its investments or collateral securities that are in the possession of an outside party. The Federal Home Loan Bank Notes and Federal Farm Credits are exposed to custodial credit risk in that they are uninsured, unregistered and held by the counterparty's trust department or agent but not

in the School District's name. The School District has no investment policy dealing with investment custodial risk beyond the requirement in State statute that prohibits payment for investments prior to the delivery of the securities representing such investments to the treasurer of qualified trustee.

Concentration of Credit Risk

The School District places no limit on the amount it may invest in any one issuer. The School District's investments in the Federal Home Loan Bank Notes represents 55.3%, Federal Farm Credits 9.5%, with STAR Ohio representing 35.2% of the School District's total investments.

Note 7 - Property Taxes

Property taxes are levied and assessed on a calendar year basis, while the School District's fiscal year runs from July through June. First-half tax distributions are received by the School District in the second half of the fiscal year. Second-half tax distributions are received in the first half of the following fiscal year.

Property taxes include amounts levied against all real, public utility, and tangible personal (used in business) property located in the School District. Real property tax revenue received in calendar year 2015 represents collections of calendar year 2014 taxes. Real property taxes received in calendar year 2014 were levied after April 1, 2014, on the assessed value listed as of January 1, 2015, the lien date. Assessed values for real property taxes are established by State law at thirty-five percent of appraised market value. Real property taxes are payable annually or semi-annually. If paid annually, payment is due December 31; if paid semi-annually, the first payment is due December 31 with the remainder payable by June 20. Under certain circumstances, State statute permits earlier or later payment dates to be established.

Public utility property tax revenue received in calendar 2015 represents collections of calendar year 2014 taxes. Public utility real and tangible personal property taxes received in calendar year 2014 become a lien December 31, 2013, were levied after April 1, 2014 and are collected in 2015 with real property taxes. Public utility real property is assessed at thirty-five percent of true value; public utility tangible personal property currently is assessed at varying percentages of true value.

The Cuyahoga County Fiscal Officer collects property taxes on behalf of the School District. The County Fiscal Officer periodically advances to the School District its portion of the taxes collected. These tax "advances" are based on three-year historical cash flow collection rates and occur eight times annually. Second-half real property tax payments collected by the County by June 30, 2015, are available to finance fiscal year 2015 operations. The amount available to be advanced can vary based on the date the tax bills are sent.

Accrued property taxes receivable represents delinquent taxes outstanding and real property, public utility property, and tangible personal property taxes, which became measurable as of June 30, 2015 and for which there is an enforceable legal claim. Although total property tax collections for the next fiscal year are measurable, only the delayed settlement of personal property tax and the amount available as an advance at June 30 were levied to finance current fiscal year operations, which is recognized as revenue. The receivable is therefore offset by a credit to deferred inflows of resources for

that portion not levied to finance current year operations. The amount available as an advance at June 30, 2015 was \$4,738,688 for the General Fund, \$589,906 in the Bond Retirement Fund, and \$280,911 in the Permanent Improvement Fund.

The assessed values upon which the fiscal year 2015 taxes were collected are:

	2014 Second- Half Collections		2015 First- Half Collections	
	Amount	Percent	Amount	Percent
Agricultural/Residential	\$334,775,570	47.22%	\$334,673,420	47.16%
Industrial/Commercial	361,985,610	51.05	362,270,490	51.05
Public Utility	12,248,200	1.73	12,737,020	1.79
Total Assessed Value	\$709,009,380	100.00%	\$709,680,930	100.00%
Tax rate per \$1,000 of Assessed valuation	\$86.40		\$86.40	

Note 8 - Receivables

Receivables at June 30, 2015, consisted of taxes, accounts (rent and student fees), intergovernmental, accrued interest, and loans. All receivables are considered collectible in full because of the ability to foreclose for the nonpayment of taxes, the stable condition of State programs, and the current year guarantee of federal funds.

Note 10 - Inter-fund Transactions

As of June 30, 2015, on the fund financial statements, the Consortium fund, which is a Non-Major governmental fund, owed the General Fund \$2,198,932. The School District's consortium funds provide services to local surrounding school districts. Costs are billed on a per pupil basis. The School District incurs administrative and operational costs that are billed to the consortium districts but are costs that are incurred by the general fund. Over time, the consortium funds owe the general fund these dollars.

During the year ended June 30, 2015, the General Fund transferred \$259,572 to Other Non-major Governmental Funds. The transfers were made to move unrestricted balances to support programs and projects accounted for in other funds.

Note 11 - Risk Management

A. Property and Liability

The School District is exposed to various risks of loss related to torts; theft of, damage to, and destruction of assets; errors and omissions; injuries to employees and natural disasters. During fiscal year 2015, the School District contracted with Liberty Mutual for property, general liability insurance and boiler and machinery coverage in the amounts of \$96,521,849, \$2,000,000, and \$50,000,000 respectively. The deductible varies from \$1,000 to \$5,000.

Umbrella Liability insurance and Excess Umbrella Liability insurance are covered by Liberty Mutual with a \$10,000,000 single occurrence limit on both policies and no deductibles unless a claim doesn't fall under an underlying policy which would create the need for a \$10,000 self- insured retainer. Vehicles are also covered by Liberty Mutual and have a \$500 deductible for collision. Automobile liability has a \$1,000,000 combined single limit, \$5,000 medical payments, and \$1,000,000 uninsured motorists. Settled claims have not exceeded this commercial coverage.

The School District contracted with Cincinnati Insurance Company for public employee dishonesty coverage, with a \$50,000 limit and a \$500 deductible.

B. Workers' Compensation

The School District participates in the Sheakley Uniservice, Inc. Group Rating Program (GRP), an insurance purchasing pool. The GRP's business and affairs are conducted by a three member Board of Directors consisting of the President, the President-elect and the Immediate Past President of the Ohio School Boards Association. The Executive Director of the OSBA, or his designee, serves as coordinator of the program. Each year, the participating school districts pay the enrollment fee of the GRP to cover the costs of administering the program.

The intent of the GRP is to achieve the benefit of a reduced premium for the School District by virtue of its grouping and representation with other participants in the GRP.

The workers' compensation experience of the participating school districts is calculated as one experience and a common premium rate is applied to all school districts in the GRP. Each participant pays its workers' compensation premium to the State based on the rate for the GRP rather than its individual rate. Total savings are then calculated and each participant's individual performance is compared to the overall savings percentage of the GRP. A participant will then either receive money from or be required to contribute to the "Equity Pooling Fund". The "equity pooling" arrangement insures that each participant shares equally in the overall performance of the GRP. Participation in the GRP is limited to school districts that can meet the GRP's selection criteria.

C. Self-Insurance Program

The self-insurance program for dental of the School District employees and their covered dependents has been administered by Medical Mutual since September 1, 2006. Self-insured medical, prescription drug and dental claims are administered by Anthem. Self-insured vision claims are administered by Vision Service Plan (VSP). The district only began to self-insure medical claims commencing January 1, 2015. Under the program, the School District is obligated for claim payments. During fiscal year 2015, total claims expense of \$2,150,868 was recognized, which represents actual claims processed and paid as of June 30, 2015. Individual funds are charged for these medical expenses based on an estimate of total cost for the School District as prepared by the plan administrator, and are recorded as revenues of the Internal Service Fund.

Changes for the aggregate liability for claims for the current and past fiscal years are as follows:

Year	Beginning Balance	Claims Incurred	Claims Paid	Ending Balance
2014	\$86,200	\$892,294	\$889,094	\$89,400
2015	89,400	2,150,868	1,752,968	487,300

Note 12 - Defined Benefit Pension Plans

Net Pension Liability

The net pension liability reported on the statement of net position represents a liability to employees for pensions. Pensions are a component of exchange transactions—between an employer and its employees—of salaries and benefits for employee services. Pensions are provided to an employee—on a deferred-payment basis—as part of the total compensation package offered by an employer for employee services each financial period. The obligation to sacrifice resources for pensions is a present obligation because it was created as a result of employment exchanges that already have occurred.

The net pension liability represents the School District's proportionate share of each pension plan's collective actuarial present value of projected benefit payments attributable to past periods of service, net of each pension plan's fiduciary net position. The net pension liability calculation is dependent on critical long-term variables, including

estimated average life expectancies, earnings on investments, cost of living adjustments and others. While these estimates use the best information available, unknowable future events require adjusting this estimate annually.

Ohio Revised Code limits the School District's obligation for this liability to annually required payments. The School District cannot control benefit terms or the manner in which pensions are financed; however, the School District does receive the benefit of employees' services in exchange for compensation including pension.

GASB 68 assumes the liability is solely the obligation of the employer, because (1) they benefit from employee services; and (2) State statute requires all funding to come from these employers. All contributions to date have come solely from these employers (which also includes costs paid in the form of withholdings from employees). State statute requires the pension plans to amortize unfunded liabilities within 30 years. If the amortization period exceeds 30 years, each pension plan's board must propose corrective action to the State legislature. Any resulting legislative change to benefits or funding could significantly affect the net pension liability. Resulting adjustments to the net pension liability would be effective when the changes are legally enforceable.

The proportionate share of each plan's unfunded benefits is presented as a long-term *net pension liability* on the accrual basis of accounting. Any liability for the contractually-required pension contribution outstanding at the end of the year is included in *intergovernmental payable* on both the accrual and modified accrual bases of accounting.

Plan Description - School Employees Retirement System (SERS)

Plan Description – School District non-teaching employees participate in SERS, a cost-sharing multiple-employer defined benefit pension plan administered by SERS. SERS provides retirement, disability and survivor benefits, annual cost-of-living adjustments, and death benefits to plan members and beneficiaries. Authority to establish and amend benefits is provided by Ohio Revised Code Chapter 3309. SERS issues a publicly available, stand-alone financial report that includes financial statements, required supplementary information and detailed information about SERS' fiduciary net position. That report can be obtained by visiting the SERS website at www.ohsers.org under Employers/Audit Resources.

Age and service requirements for retirement are as follows:

	Eligible to	Eligible to
	Retire on or before	Retire on or after
	August 1, 2017 *	August 1, 2017
Full Benefits	Any age with 30 years of service credit	Age 67 with 10 years of service credit; or Age 57 with 30 years of service credit
Actuarially Reduced Benefits	Age 60 with 5 years of service credit Age 55 with 25 years of service credit	Age 62 with 10 years of service credit; or Age 60 with 25 years of service credit

^{*} Members with 25 years of service credit as of August 1, 2017, will be included in this plan.

Annual retirement benefits are calculated based on final average salary multiplied by a percentage that varies based on year of service; 2.2 percent for the first thirty years of service and 2.5 percent for years of service credit over 30. Final average salary is the average of the highest three years of salary.

One year after an effective benefit date, a benefit recipient is entitled to a three percent cost-of-living adjustment (COLA). This same COLA is added each year to the base benefit amount on the anniversary date of the benefit.

Funding Policy — Plan members are required to contribute 10 percent of their annual covered salary and the School District is required to contribute 14 percent of annual covered payroll. The contribution requirements of plan members and employers are established and may be amended by the SERS' Retirement Board up to statutory maximum amounts of 10 percent for plan members and 14 percent for employers. The Retirement Board, acting with the advice of the actuary, allocates the employer contribution rate among four of the System's funds (Pension Trust Fund, Death Benefit Fund, Medicare B Fund, and Health Care Fund). For the fiscal year ended June 30, 2015, the allocation to pension, death benefits, and Medicare B was 13.18 percent. The remaining 0.82 percent of the 14 percent employer contribution rate was allocated to the Health Care Fund.

The School District's contractually required contribution to SERS was \$778,586 for fiscal year 2015. Of this amount \$35,357 is reported as an intergovernmental payable.

Plan Description - State Teachers Retirement System (STRS)

Plan Description – The School District's licensed teachers and other faculty members participate in STRS Ohio, a cost-sharing multiple-employer public employee retirement system administered by STRS. STRS provides retirement and disability benefits to members and death and survivor benefits to beneficiaries. STRS issues a stand-alone financial report that includes financial statements, required supplementary information and detailed information about STRS' fiduciary net position. That report can be obtained by writing to STRS, 275 E. Broad St., Columbus, OH 43215-3771, by calling (888) 227-7877, or by visiting the STRS Web site at www.strsoh.org.

New members have a choice of three retirement plans; a Defined Benefit (DB) Plan, a Defined Contribution (DC) Plan and a Combined Plan. Benefits are established by Ohio Revised Code Chapter 3307. The DB plan offers an annual retirement allowance based on final average salary multiplied by a percentage that varies based on years of service. Effective August 1, 2015, the calculation will be 2.2 percent of final average salary for the five highest years of earnings multiplied by all years of service. With certain exceptions, the basic benefit is increased each year by two percent of the original base benefit. For members retiring August 1, 2013, or later, the first two percent is paid on the fifth anniversary of the retirement benefit. Members are eligible to retire at age 60 with five years of qualifying service credit, or age 55 with 25 years of service, or 30 years of service regardless of age. Age and service requirements for retirement will increase effective August 1, 2015, and will continue to increase periodically until they reach age 60 with 35 years of service or age 65 with five years of service on August 1, 2026.

The DC Plan allows members to place all their member contributions and 9.5 percent of the 14 percent employer contributions into an investment account. Investment allocation decisions are determined by the member. The remaining 4.5 percent of the 14 percent employer rate is allocated to the defined benefit unfunded liability. A member is eligible to receive a retirement benefit at age 50 and termination of employment. The member may elect to receive a lifetime monthly annuity or a lump sum withdrawal.

The Combined Plan offers features of both the DB Plan and the DC Plan. In the Combined Plan, member contributions are allocated among investment choices by the member, and employer contributions are used to fund the defined benefit payment at a reduced level from the regular DB Plan. The defined benefit portion of the Combined Plan payment is payable to a member on or after age 60 with five years of services. The defined contribution portion of the account may be taken as a lump sum payment or converted to a lifetime monthly annuity at age 50.

New members who choose the DC plan or Combined Plan will have another opportunity to reselect a permanent plan during their fifth year of membership. Members may remain in the same plan or transfer to another STRS plan. The optional annuitization of a member's defined contribution account or the defined contribution portion of a member's Combined Plan account to a lifetime benefit results in STRS bearing the risk of investment gain or loss on the account. STRS has therefore included all three plan options as one defined benefit plan for GASB 68 reporting purposes.

A DB or Combined Plan member with five or more years of credited service who is determined to be disabled may qualify for a disability benefit. Eligible survivors of members who die before service retirement may qualify for monthly benefits. New members on or after July 1, 2013, must have at least ten years of qualifying service credit that apply for disability benefits. Members in the DC Plan who become disabled are entitled only to their account balance. If a member of the DC Plan dies before retirement benefits begin, the member's designated beneficiary is entitled to receive the member's account balance.

Funding Policy — Employer and member contribution rates are established by the State Teachers Retirement Board and limited by Chapter 3307 of the Ohio Revised Code. The statutory maximum employee contribution rate was increased one percent July 1, 2014, and will be increased one percent each year until it reaches 14 percent on July 1, 2016. For the fiscal year ended June 30, 2015, plan members were required to contribute 12 percent of their annual covered salary. The School District was required to contribute 14 percent; the entire 14 percent was the portion used to fund pension obligations. The fiscal year 2015 contribution rates were equal to the statutory maximum rates.

The School District's contractually required contribution to STRS was \$2,141,448 for fiscal year 2015. Of this amount \$275,191 is reported as an intergovernmental payable.

Pension Liabilities, Pension Expense, and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

The net pension liability was measured as of June 30, 2014, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of

that date. The School District's proportion of the net pension liability was based on the School District's share of contributions to the pension plan relative to the contributions of all participating entities. Following is information related to the proportionate share and pension expense:

	SERS	STRS	Total
Proportionate Share of the Net	· · · · · · · · · · · · · · · · · · ·		
Pension Liability	\$10,298,462	\$34,171,300	\$44,469,762
Proportion of the Net Pension			
Liability	0.203489%	0.1404870%	
Pension Expense	\$605,634	\$1,578,683	\$2,184,317

At June 30, 2015, the School District reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	SERS	STRS	Total
Deferred outflow of resources:			
Difference between expected and actual			
experience	\$87,651	\$328,973	\$416,624
School District contributions subsequent			
to the measurement date	778,586	2,100,315	\$2,878,901
Total Deferred Outflows of Resources	\$866,237	\$2,429,288	\$3,295,525
	0	0	
Deferred Inflows of Resources:			
Net difference between projected and acutal			
earnings on pension plan investments	\$1,671,469	\$6,321,820	\$7,993,289
Total Deferred Inflows of Resources	\$1,671,469	\$6,321,820	\$7,993,289

\$2,878,901 reported as deferred outflows of resources related to pension resulting from School District contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in the year ending June 30, 2016. Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pension will be recognized in pension expense as follows:

Fiscal Year Ending June 30:	SERS	STRS	Total
2016	\$395,955	\$1,498,212	\$1,894,167
2017	395,955	1,498,212	1,894,167
2018	395,954	1,498,212	1,894,166
2019	395,954	1,498,211	1,894,165
Total	\$1,583,818	\$5,992,847	\$7,576,665

Actuarial Assumptions - SERS

SERS' total pension liability was determined by their actuaries in accordance with GASB Statement No. 67, as part of their annual actuarial valuation for each defined benefit retirement plan. Actuarial valuations of an ongoing plan involve estimates of the value of reported amounts (e.g., salaries, credited service) and assumptions about the probability of occurrence of events far into the future (e.g., mortality, disabilities, retirements, employment termination). Actuarially determined amounts are subject to continual review and potential modifications, as actual results are compared with past expectations and new estimates are made about the future.

Projections of benefits for financial reporting purposes are based on the substantive plan (the plan as understood by the employers and plan members) and include the types of benefits provided at the time of each valuation and the historical pattern of sharing benefit costs between the employers and plan members to that point. The projection of benefits for financial reporting purposes does not explicitly incorporate the potential effects of legal or contractual funding limitations.

Actuarial calculations reflect a long-term perspective. For a newly hired employee, actuarial calculations will take into account the employee's entire career with the employer and also take into consideration the benefits, if any, paid to the employee after termination of employment until the death of the employee and any applicable contingent annuitant. In many cases actuarial calculations reflect several decades of service with the employer and the payment of benefits after termination.

Key methods and assumptions used in calculating the total pension liability in the latest actuarial valuation, prepared as of June 30, 2014, are presented below:

Wage Inflation
Substitute Salary Increases, including inflation
COLA or Ad Hoc COLA
Investment Rate of Return
Actuarial Cost Method

3.25 percent
4.00 percent to 22 percent
3 percent
7.75 percent net of investments expense, including inflation
Entry Age Normal

For post-retirement mortality, the table used in evaluating allowances to be paid is the 1994 Group Annuity Mortality Table set back one year for both men and women. Special mortality tables are used for the period after disability retirement.

The most recent experience study was completed June 30, 2010.

The long-term return expectation for the Pension Plan Investments has been determined using a building-block approach and assumes a time horizon, as defined in SERS' Statement of Investment Policy. A forecasted rate of inflation serves as the baseline for the return expectation. Various real return premiums over the baseline inflation rate have been established for each asset class. The long-term expected nominal rate of return has been determined by calculating a weighted averaged of the expected real return premiums for each asset class, adding the projected inflation rate, and adding the expected return from rebalancing uncorrelated asset classes. The target allocation and best estimates of arithmetic real rates of return for each major assets class are summarized in the following table:

Asset Class	Target Allocation	Long-Term Expected Real Rate of Return
Cash	1.00 %	0.00 %
US Stocks	22.50	5.00
Non-US Stocks	22.50	5.50
Fixed Income	19.00	1.50
Private Equity	10.00	10.00
Real Assets	10.00	5.00
Multi-Asset Strategies	15.00	7.50
Total	100.00 %	

Discount Rate The total pension liability was calculated using the discount rate of 7.75 percent. The projection of cash flows used to determine the discount rate assumed the contributions from employers and from the members would be computed based on contribution requirements as stipulated by State statute. Projected inflows from investment earning were calculated using the long-term assumed investment rate of return (7.75 percent). Based on those assumptions, the plan's fiduciary net position was projected to be available to make all future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all periods of projected benefits to determine the total pension liability.

Sensitivity of the School District's Proportionate Share of the Net Pension Liability to Changes in the Discount Rate Net pension liability is sensitive to changes in the discount rate, and to illustrate the potential impact the following table presents the net pension liability calculated using the discount rate of 7.75 percent, as well as what each plan's net pension liability would be if it were calculated using a discount rate that is one percentage point lower (6.75 percent), or one percentage point higher (8.75 percent) than the current rate.

	Current		
	1% Decrease	Discount Rate	1% Increase
	(6.75%)	(7.75%)	(8.75%)
School District's proportionate share			
of the net pension liability	\$14,692,859	\$10,298,462	\$ 6,602,406

Actuarial Assumptions - STRS

The total pension liability in the June 30, 2014, actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement:

Inflation	2.75 percent
Projected salary increases	2.75 percent at age 70 to 12.25 percent at age 20
Investment Rate of Return	7.75 percent, net of investment expenses
Cost-of-Living Adjustments	2 percent simple applied as follows: for members retiring before
(COLA)	August 1, 2013, 2 percent per year; for members retiring August 1, 2013,
	or later, 2 percent COLA paid on fifth anniversary of retirement date.

Mortality rates were based on the RP-2000 Combined Mortality Table (Projection 2022—Scale AA) for Males and Females. Males' ages are set-back two years through age 89 and no set-back for age 90 and above. Females younger than age 80 are set back four years, one year set back from age 80 through 89 and not set back from age 90 and above.

Actuarial assumptions used in the June 30, 2014, valuation are based on the results of an actuarial experience study, effective July 1, 2012.

The 10 year expected real rate of return on pension plan investments was determined by STRS' investment consultant by developing best estimates of expected future real rates of return for each major asset class. The target allocation and best estimates of geometric real rates of return for each major asset class are summarized as follows:

Asset Class	Target Allocation	Long-Term Expected Real Rate of Return
Domestic Equity	31.00 %	8.00 %
International Equity	26.00	7.85
Alternatives	14.00	8.00
Fixed Income	18.00	3.75
Real Estate	10.00	6.75
Liquidity Reserves	1.00	3.00
Total	100.00 %	

Discount Rate The discount rate used to measure the total pension liability was 7.75 percent as of June 30, 2014. The projection of cash flows used to determine the discount rate assumes member and employer contributions will be made at the statutory contribution rates in accordance with rate increases described above. For this purpose, only employer contributions that are intended to fund benefits of current plan members

and their beneficiaries are included. Projected employer contributions that are intended to fund the service costs of future plan members and their beneficiaries, as well as projected contributions from future plan members, are not included. Based on those assumptions, STRS' fiduciary net position was projected to be available to make all projected future benefit payments to current plan members as of June 30, 2014. Therefore, the long-term expected rate of return on pension plan investments of 7.75 percent was applied to all periods of projected benefit payment to determine the total pension liability as of June 30, 2014.

Sensitivity of the School District's Proportionate Share of the Net Pension Liability to Changes in the Discount Rate The following table presents the School District's proportionate share of the net pension liability calculated using the current period discount rate assumption of 7.75 percent, as well as what the School District's proportionate share of the net pension liability would be if it were calculated using a discount rate that is one-percentage-point lower (6.75 percent) or one-percentage-point higher (8.75 percent) than the current rate:

	Current				
	1% Decrease	Discount Rate	1% Increase		
	(6.75%)	(7.75%)	(8.75%)		
School District's proportionate share					
of the net pension liability	\$48,920,194	\$34,171,300	\$21,698,912		

Note 13 – Other Post-Employment Benefits (OPEB)

A. School Employee Retirement System

Health Care Plan Description – The School district contributes to the SERS Health Care Fund, administered by SERS for non-certificated retirees and their beneficiaries. For GASB 45 purposes, this plan is considered a cost-sharing, multiple-employer, defined benefit and other postemployment benefit (OPEB) plan. The Health Care Plan includes hospitalization, and physicians' fees through several types of plans including HMO's, PPO's, Medicare Advantage, and traditional indemnity plans as well as a prescript drug program. The financial report of the Plan is included in the SERS Comprehensive Annual Financial Report which is available by contacting SERS at 300 East Broad St., Suite 100, Columbus, Ohio 43215-3746 or obtained via SERS' website at www.ohsers.org under Employers/Audit Resources.

Access to health care for retirees and beneficiaries is permitted in accordance with Section 3309 of the Ohio Revised Code. The Health Care Fund was established and is administered in accordance with the Internal Revenue Code Section 105(e). SERS' Retirement Board reserves the right to change or discontinue any health plan or program. Health Care is financed through a combination of employer contributions and retiree premiums, copays and deductibles on covered health care expenses, investment returns, and any funds received as a result of SERS' participation in Medicare programs. Active employee members do not contribute to the Health Care Plan Retirees and their beneficiaries are required to pay a health care premium that varies depending on the plan selected, the number of qualified years of service, Medicare eligibility and retirement

status.

Funding Policy — State statute permits SERS to fund the health care benefits through employer contributions. Each year, after the allocation for statutorily required benefits, the Retirement Board allocates the remainder of the employer contribution of 14 percent of covered payroll to the Health Care Fund. The Health Care Fund was established and is administered in accordance with Internal Revenue Code Section 105(e). For fiscal year 2015, 0.82 percent of covered payroll was allocated to health care. In addition, employers pay a surcharge for employees earning less than an actuarially determined minimum, prorated according to service credit earned. For fiscal year 2015, this amount was \$20,450. State statute provides that no employer shall pay a health care surcharge greater than 2 percent of that employer's SERS-covered payroll; nor may SERS collect in aggregate more than 1.5 percent of total statewide SERS-covered payroll for the health care surcharge. For fiscal year 2015, the School District's surcharge obligation was \$98,531.

The School District's contributions for health care for the fiscal years ended June 30, 2015, 2014, and 2013 were \$45,603, \$8,278, and \$9,347, respectively; 100 percent has been contributed for fiscal years 2015, 2014 and 2013.

The Retirement Board, acting with advice of the actuary, allocates a portion of the employer contribution to the Medicare B Fund. For 2015, this actuarially required allocation was 0.74 percent of covered payroll. The School District's contributions for Medicare Part B for the fiscal years ended June 30, 2015, 2014, and 2013 were \$41,154, \$44,939, and \$43,228, respectively; 100 percent has been contributed for fiscal years 2015, 2014 and 2013.

B. State Teachers Retirement System

Plan Description – The School District contributes to the cost sharing multiple employer defined benefit Health Plan administered by the State Teachers Retirement System of Ohio (STRS Ohio) for eligible retirees who participated in the defined benefit or combined pension plans offered by STRS Ohio. Benefits include hospitalization, physicians' fees, prescription drugs and reimbursement of monthly Medicare Part B premiums. The Plan is included in the report of STRS Ohio which may be obtained by visiting www.strsoh.org or by calling (888) 227-7877.

Funding Policy — Ohio law authorizes STRS Ohio to offer the Plan and gives the Retirement Board authority over how much, if any, of the health care costs will be absorbed by STRS Ohio. Active employee members do not contribute to the Plan. All benefit recipients pay a monthly premium. Under Ohio law, funding for post-employment health care may be deducted from employer contributions. For fiscal year 2015, STRS did not allocate any employer contributions to post-employment benefits. The School District's contributions for health care for the fiscal years ended June 30, 2015, 2014, and 2013 were \$0, \$143,283, and \$138,196, respectively. The full amount has been contributed for fiscal years 2015, 2014 and 2013.

Note 14 - Employee Benefits

A. Compensated Absences

The criteria for determining vacation and sick leave benefits are derived from negotiated agreements and State laws. Classified employees earn up to twenty days of vacation per year, depending upon length of service. Vacation days are credited to classified employees as earned, and must be used within the next 24 months. Accumulated unused vacation time is paid to classified employees upon termination of employment up to a maximum of forty days. Teachers do not earn vacation time.

Teachers, administrators, and classified employees earn sick leave at a rate of one and one-fourth days per month. A percentage of unused sick time is paid at retirement at rates ranging from 30% to 36% depending on an employee's classification. Certain employees with sick time balances exceeding 275 days shall receive 1/12 of the total accumulated days over 275 according to the negotiated agreement. The number of unused sick days which can accumulate is restricted for certain employees.

B. Health Care Benefits

The School District provides employee medical and surgical coverage through Medical Mutual. The School District is self-insured for health, vision, prescription drug and dental claims of the School District employees and their covered dependents. Health care claims paid to Medical Mutual were \$2,121,500. The School District received a 6 % increase in premium due to fees associated with the affordable care act. Individual stop loss coverage is set at \$75,000.

Note 15 - Long-Term Obligations

The changes in the School District's long-term obligations during the year consist of the following:

	Restated Principal Outstanding 6/30/14	Additions	Reduction	Principal Outstanding 6/30/15	Amounts Due in One Year
Governmental Activities					
Long-Term Notes Payable					
2010 QSCB Tax Anticipation Notes 4.75%	\$3,440,000	\$0	\$555,000	\$2,885,000	\$550,000
Total Long-Term Notes Payable	3,440,000	0	555,000	2,885,000	550,000
General Obligation Bonds					
2007 Advanced Refunding 4.0% - 4.25%	204,997	0	75,000	129,997	0
2010 School Improvement 1.25-3.0%	4,525,000	0	1,125,000	3,400,000	1,150,000
2010 School Improvement Premium	182,612	0	45,652	136,960	45,652
2010 QSCB Bonds 5.125%	11,260,000	0	0	11,260,000	0
2012 Refunding 1%-2%	2,460,000	0	810,000	1,650,000	820,000
2013 Refunding .45-3.05%	5,420,000	0	145,000	5,275,000	220,000
2014 Refunding Tax Exempt 3-3.25%	11,149,966	0	0	11,149,966	0
Total General Obligation Bonds	35,202,575	0	2,200,652	33,001,923	2,235,652
Net Pension Liability:					
STRS	40,704,629	0	6,533,329	34,171,300	0
SERS	12,100,838	0	1,802,376	10,298,462	0
Total Net Pension Liability	52,805,467	0	8,335,705	44,469,762	0
Capital Lease	244,826	0	147,629	97,197	97,197
Compensated Absences Payable	2,260,966	52,256	80,754	2,232,468	97,929
Long-Term Liabilities	2,505,792	52,256	228,383	2,329,665	195,126
Total Long-Term Liabilities	\$93,953,834	\$52,256	\$11,319,740	\$82,686,350	\$2,980,778

Qualified School Construction Bonds (QSCB's) On May 13, 2010, the School District issued \$5,650,000 tax anticipation notes in the form of federally taxable direct payment qualified school construction bonds at an interest rate of 4.75%. These tax anticipation notes were issued to fund energy conservation related projects at the School District's High School. The Permanent Improvement Fund property taxes will pay for the bonds. The interest paid on the bonds had been 100% subsidized by the federal government through federal stimulus funds. However, due to sequestration, the remittance to the District decreased 7.2%. The federal government remits the interest paid by the schools through a direct pay reimbursement. The debt rating assigned by Moody's is Aaa.

In May 2010, the community overwhelming passed a \$30 million 2.5 mill bond issue payable over 24 years. One portion of the financing was an issuance of \$11,260,000 in Qualified School Construction Bonds at an interest rate of 5.125%. The bonds were issued to renovate the High School. The interest paid on the bonds had been 100% subsidized by the federal government through federal stimulus funds. Again, due to sequestration, the interest remitted to the District decreased by 7.2%. The federal government remits the interest paid by the schools through a direct pay reimbursement. The debt rating assigned by Moody's is Aaa.

Build America Bonds As part of the bond financing, the District issued \$11,150,000 in Build America Bonds where the federal government remitted 35% of the interest on the bonds to the School District which was part of the federal stimulus funds. The bonds had an extraordinary call provision which the School District exercised due to sequestration. In June 2014 the District refunded this debt with an overall 6.36% net present value savings in the amount of \$709,502. Interest rates range from 2.78% to 3.66%. The debt rating assigned by Moody's is Aaa.

General Obligation Bonds The School District issued \$18,814,982 general obligation bonds with an interest rate of 2.0-5.25%, maturity date December 1, 2022. In July 2007, a portion of the School District's general obligation funds was advanced refunded and reissued at a lower interest rate in the amount of \$6,244,997 with an interest rate of 4.00-4.25%. Present value savings from the advanced refunding is \$247,906. In December 2013, the District refunded a portion of these bonds in the amount of \$5,590,000 and reissued bonds in the amount of \$5,420,000. The District used\$500,000 of its sinking fund to defease a portion of the debt and also shortened the payback period by one year. The debt with mature on December 1, 2021. Net present value savings is \$312,100.

Proceeds from the sale of the Bonds that were used to advance refund the Refunded Bonds were deposited in an Escrow Fund held by The Bank of New York Mellon Trust Company, N.A. (the Escrow Agent), pursuant to an Escrow Agreement between the School District and the Escrow Agent dated December 31, 2013 (the Escrow Agreement). The money deposited in the Escrow Fund will be held in for the (i) payment of interest on the Refunded Bonds when due on June 1, 2014 and December 1, 2014, and (ii) payment of the principal amount of the Refunded Bonds upon their prior optional redemption on December 1, 2014, as provided in the Authorizing Legislation. The Authorizing Legislation provides for an irrevocable call for optional redemption of the Refunded Bonds on December 1, 2014, at a redemption price equal to 100% of the principal amount redeemed, plus interest accrued to the redemption date.

In August 2010, the School District issued \$7,590,000 in tax exempt general obligation bonds with an interest rate of 1.25%-3.0%. The District received a premium of \$319,567 which will be amortized over the life of the issue (7 years for this portion of the debt issued).

In November 2012, the School District refunded \$3,260,000 of its outstanding bonds and reissued \$3,245,000 at a lower interest rate of 1%-2%. Net present value savings was \$225,082.

All bonds outstanding are general obligation of the School District for which the full faith and credit of the School District are pledged for repayment. General obligation bonds are to be repaid from a current 4.4 mill bonded-debt tax levy. Tax monies will be received in and the debt will be repaid from the Bond Retirement Fund.

Compensated absences will be paid from the funds from which the employee's salaries are paid. Compensated absences are generally liquidated by the general fund.

Capital Leases In fiscal year 2014 the School District entered into a capital lease for computers in the amount of \$291,635 at an interest rate of 2.14%. These lease agreements qualify as capital leases for accounting purposes and, therefore, have been recorded at the present value of the future minimum lease payments as of the inception date as capital assets in the governmental activities of the statement of net position. The capital lease will be repaid from the General fund.

The following summarizes the future minimum lease obligations, the net present value of these minimum lease payments, cost and accumulated depreciation of assets acquired through capital leases as of June 30, 2015.

Fiscal Year	
Beginning June 30	General Fund
2016	99,278
Total Minimum Lease Payments	99,278
Less Amount Representing Interest	(2,081)
Present Value of Lease Payments	\$97,197
Capital Assets at Gross Cost:	\$291,635
Less: Accumulated Depreciation	(116,654)
Net Book Value	\$174,981

The School District's overall voted debt margin was \$30,869,361 with an un-voted debt margin of \$709,681 at June 30, 2015.

Principal and interest requirements to retire the long-term obligations outstanding at June 30, 2015, were as follows:

	Long-	Гerm	Gene	ral				
Fiscal Year	Notes P	ayable	Obligation Bonds		Capital Lease		Tot	tal
Ending	Principal	Interest*	Principal	Interest*	Principal	Interest	Principal	Interest
2016	550,000	268,375	2,190,000	1,126,995	97,197	2,081	2,837,197	1,397,451
2017	550,000	268,375	2,220,000	1,078,200	0	0	2,770,000	1,346,575

2019	550,000	268,375	2,390,000	1,015,501	0	0	2,940,000	1,283,876
2020	685,000	134,188	2,405,000	992,818	0	0	3,090,000	1,127,006
2021-2025	0	0	11,669,966	4,905,575	0	0	11,669,966	4,905,575
2026-2030	0	0	9,005,000	1,615,450	0	0	9,005,000	1,615,450
2031-2035	0	0	1,525,000	33,656			1,525,000	33,656
Total	2,885,000	\$1,207,688	\$32,864,963	\$12,666,709	\$97,197	\$2,081	\$35,847,160	\$13,876,478

^{* \$7,844,050} direct payments from federal government, less 7.2% due to sequestration.

Note 16 - Set-Asides

The School District is required by State statute to annually set aside in the general fund an amount based on a statutory formula for the acquisition and construction of capital improvements. Amounts not spent by fiscal year end or offset by similarly restricted resources received during the fiscal year must be held in cash at fiscal year end and carried forward to be used for the same purposes in future fiscal years.

The following cash basis information describes the change in the fiscal year end set-aside amounts for capital acquisitions. Disclosure of this information is required by State statute

	Capital	Budget
	Improvements	Stabilization
Set-aside Reserve Balances as of June 30, 2014	\$0	\$134,873
Set-aside Balance Carried Forward	0	0
Current Year Set-Aside Requirement	248,713	0
Qualifying Disbursements	(1,651,686)	0
Total	(\$1,402,973)	\$134,873
Set-aside Balance Carried Forward to future fiscal years	\$0	\$0
Set-aside Reserve Balance as of June 30, 2015	\$0	\$134,873

Although the School District had qualifying disbursements during the fiscal year that reduced the set-aside amount to below zero for the capital acquisition set-aside, this

amount may not be used to reduce the set-aside requirement for future years. This negative balance is therefore not presented as being carried forward to future years. The total reserve balance for the set-asides at the end of the fiscal year was \$134,873.

Note 17 – Jointly Governed Organizations

Ohio Schools' Council Association - The Ohio Schools' Council Association (Council) is a jointly governed organization among one hundred twenty one school districts. The jointly governed organization was formed to purchase quality products and services at the lowest possible cost to the member districts. Each district supports the Council by paying an annual participation fee. The Council's Board consists of seven superintendents of the participating districts whose term rotates every year. The degree of control exercised by any school district is limited to its representation on the Board. In fiscal year 2015, the School District paid \$136,803 to the Council. Financial information can be obtained by contacting William Zelei, the Executive Director of the Ohio Schools Council at 6393 Oak Tree Boulevard, Suite 377, Independence, Ohio 44131.

The OSC's Natural Gas Program supplies natural gas to member districts in Dominion East Ohio (DEO) and Columbia Gas of Ohio (COH) territories. Our current supplier and manager is Compass Energy Gas Services, LLC. In December 2012, OSC extended the base contract for sale and purchase of Natural Gas with Compass Energy Gas Services, LLC from April 1, 2013 until March 31, 2016. This new contract reduced prices \$0.156 per city gate Dth for DEO accounts and \$0.266 per city gate Dth for COH accounts. DEO accounts are priced at the monthly NYMEX LDS price plus \$.242 per city gate Dth and Columbia Gas of Ohio accounts are priced at monthly NYMEX LDS price plus \$.309 per city gate Dth.

In FY15 (July 2014 to June 2015), 151 members saved a total of \$1,164,097.36 on 3,246,081 Mcf of natural gas. The average price of Natural Gas for fiscal year 2014 was \$5.302 Mcf for Columbia Gas of Ohio and \$5.258 Mcf for Dominion East Ohio Gas.

Members are billed using a monthly level billing. The level billing amounts are adjusted each year based on the prior year's usage and the best estimate of the cost of gas from our gas management company. Due to actual gas prices and usage being higher than estimated for 2013-14, 33% of the members were billed for true-up and 67% of the members were issued credits towards their regular monthly level billing in 2014-15. The members that owe for true-up will be charged on the September invoice. Districts that have credits will be applied to each monthly billing beginning in September until the credits are eliminated. The fee to participate in this program is \$0.07 per dth.

In May 2014, The Ohio Schools Council negotiated and approved a contract for discounted electric generation with First Energy Solutions through Power4Schools(P4S) for schools in the FirstEnergy territory—Ohio Edison, Cleveland Electric Illuminating and Toledo Edison. The price was \$.602 per kWh for all district facilities and was guaranteed through May 31, 2017. There are 110 districts participating in this program including Beachwood School District.

Lake Geauga Computer Association - The Lake Geauga Computer Association ("LGCA") is a jointly governed organization that was formed for the purpose of providing computer services for accounting, grading, scheduling, EMIS and other applications to its 18 member school districts. Each of the districts supports LGCA based upon a per pupil charge. The School District contributed \$61,598 to LGCA during fiscal year 2015.

The executive committee (governing board) consists of the superintendents and treasurers of the member school districts. The degree of control exercised by any participating school district is limited to its representation on the governing board. LGCA's continued existence is not dependent on the School District's continued participation. LGCA is not accumulating significant financial resources or experiencing fiscal stress, which would cause additional financial benefit or burden on the School District. Financial information can be obtained from the Lake Geauga Computer Association, 8140 Auburn Road, Painesville, Ohio 44077.

Note 18 - Contingencies

A. Grants

The School District receives financial assistance from numerous federal, state, and local agencies in the form of grants. The expenditure of funds received under these programs generally requires compliance with terms and conditions specified in the grant agreements and is subject to audit by the grantor agencies. Any disallowed claims resulting from such audits could become a liability of the General Fund or other applicable funds. However, in the opinion of management, any such disallowed claims will not have a material adverse effect on the overall financial position of the School District at June 30, 2015.

B. Litigation

The School District has been named as a defendant in several court cases through the period ended June 30, 2015. Management does not believe that the ultimate resolution of those cases will have a material impact on the financial statements of the School District and further believes that the School District has adequate insurance coverage to protect itself against any material loss.

C. Full Time Equivalent (FTE)

The School District Foundation funding is based on the annualized full-time equivalent (FTE) enrollment of each student. Effective for the 2014-2015 school year, traditional school districts must comply with minimum hours of instruction, instead of a minimum number of school days each year. The funding formula the Ohio Department of Education (ODE) is legislatively required to follow will continue to adjust as enrollment information is updated by the school district, which can extend past the fiscal year end. As of the date of this report, ODE has not finalized the impact of enrollment adjustments to the June 30, 2015 Foundation funding for the school district; therefore, the financial stamen impact is not determinable at this time. ODE and management believe this will result in either a receivable to or liability of the School District.

Note 19 - Contractual Commitments

At June 30, 2015, the School District's significant contractual commitments which were reported as accounts payable consisted of:

<u>Project</u>	Contract	Amounts Paid	Remaining
	<u>Amount</u>	to Date	<u>Contract</u>
HS Auditorium Renovation	\$1,071,903	\$581,783	\$490,121

Note 20 - Subsequent Event

During Fiscal Year 2016, the Beachwood City School District settled contract negotiations with its teachers (BFT). The contract is for a three year period commencing September 1, 2015.

Changes in assumptions: There were no changes in methods and assumptions used in the calculation of actuarial determined contributions for fiscal years 2014 and 2015. See the notes to the basic financial statements for the methods and assumptions in this calculation.

Combining Statements and Individual Fund Schedules

Combining Statements – Nonmajor Governmental Funds

Nonmajor Special Revenue Funds

Special Revenue Funds are established to account for revenues from specified sources which legally, or otherwise, are restricted to expenditures for specific purposes. A description of the School District's Special Revenue Funds follows:

 $\underline{Food\ Service}$ - This fund accounts for the financial transactions to the food service operation of the School District.

<u>Expendable Trust</u> - This fund is used to account for assets held by a governmental unit in a trustee capacity as an agent for individuals, private organizations or other governmental units with specific trust agreements as to how the fund will be disbursed.

<u>Uniform Supplies</u> – This fund accounts for the purchase and sale of school supplies, materials or other school related items above the items provided for general instruction, paid for by students.

<u>Marketing Store</u> – This fund accounts for the sales of school spirit wear in conjunction with the Marketing program.

<u>Recreation</u> - This fund accounts for revenues and expenses in connection with a community recreation program.

<u>Consortium</u> – This fund accounts for services to other Districts for vocation training programs and for educating deaf and hearing-impaired children on a cost-reimbursement basis.

<u>Pupil Support</u> - This fund is used for the general support of the school building, staff, and students.

<u>Miscellaneous Local Grants</u> - These funds are used to develop a Business/Education Partnership program to serve a consortium of eight suburban school districts, and to encourage students to become interested in the teaching profession.

<u>Preschool</u> - This fund accounts for the revenues and expenses of full and half-day services to children ages 2-5.

<u>District Managed Student Activities</u> - This fund accounts for revenues from athletic events and all costs (except supplemental coaching contracts) of the School District's athletic programs.

<u>Auxiliary Services</u> - This fund accounts for State funds for the purchase of science and math materials as well as psychological and other supplemental services at the private schools (Agnon, Fuchs and Yavne) within the School District.

<u>One Net</u> – This fund accounts for money appropriated for Ohio Educational Computer Network Connections.

<u>Race to the Top (RttT) Grant</u> – The purpose of this fund is a state-wide initiative to implement a world class education system which will achieve high graduation rates and increased academic performance.

<u>IDEA B</u> - The purpose of this federal program is to assist schools in the identification of handicapped children, development of procedural safeguards, implementation of least-restrictive, alternative service patterns, and provision of full educational opportunities to handicapped children at the preschool through secondary levels.

(continued)

Nonmajor Special Revenue Funds (continued)

<u>Title III</u> - This fund is to account for money used to educate immigrant children enrolled at Beachwood City School District.

<u>Title I</u> – The purpose of this fund is to provide financial assistance to State and Local educational agencies to meet the special needs of educationally deprived children.

<u>Preschool Handicapped</u> - This fund accounts for the federal revenues which addresses the improvement and expansion of services for handicapped children ages three through five years.

<u>Title II-A</u> - The purpose of this fund is to hire additional classroom teachers in grades 1 through 3.

Nonmajor Proprietary Fund

Proprietary funds focus on the determination of the changes in net position, financial position and cash flows and are classified as internal service funds.

Internal Service Fund

The Internal Service Fund is used to account for the financing of services provided by one department to other departments of the government or to other Districts on a cost reimbursement basis.

<u>Health Care Benefits</u> – This fund is used to account for receipt and expenditure of funds for health, vision, dental and prescription drug claims for employees.

FIDUCIARY FUNDS

Fiduciary Funds are used to account for assets when a governmental unit is functioning either as a trustee or an agent for another party. Because the governmental unit is functioning in a fiduciary capacity, the authority to employ, dispose of, or otherwise use the assets is determined not by a legislative body or oversight board but by the public laws and private agreements that create the agency relationship.

Agency Funds:

<u>Student Activities</u> - This fund accounts for the resources that belong to the student bodies of the various schools, accounting for sales and other revenue generating activities.

<u>Retirement</u> - This fund accounts for the difference between retirement paid to the state retirement systems and the actual amount due to the retirement system. This fund also accounts for any provisions of an early retirement incentive.

STATISTICAL SECTION

Statistical Section

This part of the Beachwood City School District's Comprehensive Annual Financial Report presents detailed information as a context for understanding what the information in the financial statements, note disclosures and required supplementary information says about the School District's overall financial health.

Contents Pages

Financial Trends S3 – S9

These schedules contain trend information to help the reader understand how the School District's financial performance and well-being has changed over time.

Revenue Capacity

S10-S14

These schedules contain information to help the reader assess the School District's most significant local revenue, the property tax.

Debt Capacity S15 – S19

These schedules present information to help the reader assess the affordability of the School District's current levels of outstanding debt and the School District's ability to issue additional debt in the future.

Economic and Demographic Information

S20-S21

This schedule offers economic and demographic indicators to help the reader understand the environment within which the School District's financial activities take place.

Operating Information

S22 - S29

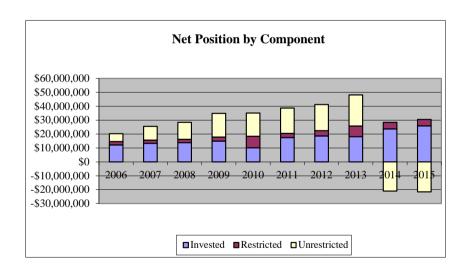

These schedules contain service and infrastructure data to help the reader understand how the information in the School District's financial report relates to the services the School District provides and the activities it performs.

Sources: Unless otherwise noted, the information in these schedules is derived from the Comprehensive Annul Financial Reports for the relevant year. The School District implemented GASB Statement No. 34 in fiscal year 2003 and implemented GASB Statement No. 54 in fiscal year 2011; schedules presenting government-wide information include information beginning in that year. The School District implemented GASB Statement No. 68 in fiscal year 2015.
